DIVIDENDS AND NOTICES

BANK OF MONTREAL

Notice is hereby given that a **Dividend of Two-and-one-Half per Cent.** upon the Paid-up Capital Stock of this Institution has been declared for the current quarter, also a **Bonus of One per Cent.,** both payable on and after Monday, the **Second Day of December** next, to Shareholders of record of 31st October, 1918.

By order of the Board.
FREDERICK WILLIAMS-TAYLOR,
General Manager.

Montreal, 22nd October, 1918.

THE CONSUMERS' GAS COMPANY OF TORONTO

NOTICE OF ANNUAL MEETING

The Annual general meeting of the Shareholders of the Consumers' Gas Company of Toronto, to receive the report of the Directors, and for the election of the Directors for the ensuing year, will be held in the Company's Board Room, 17 Toronto Street, Monday, the 28th day of October, 1918, at 12 o'clock noon.

ARTHUR HEWITT,
General Manager.

CANADA CEMENT COMPANY, LIMITED

PREFERENCE SHAREHOLDERS

DIVIDEND No. 35.

Notice is hereby given that a dividend of 1¾% for the three months ending September 30th, 1918, being at the rate of 7% per annum on the paid-up Preference Stock of this Company has been declared, and that the same will be paid on the 16th day of November next to Preference Shareholders of record at the close of business October 31st, 1918.

H. L. DOBLE,
Secretary.

Montreal, October 16th. 1918.

THE CANADIAN BANK OF COMMERCE

DIVIDEND No. 127.

Notice is hereby given that a quarterly dividend of 2½ per cent. upon the capital stock of this Bank has been declared for the three months ending 30th November, 1918, together with a bonus of 1 per cent., and that the same will be payable at the Bank and its Branches on and after Monday, 2nd December, 1918. The Transfer Books of the Bank will be closed from the 16th to the 30th of November next, both days inclusive.

By order of the Board.
JOHN AIRD,
General Manager.

Toronto, 18th October, 1918.

CONDENSED ADVERTISEMENTS

"Positions Wanted," 2c. per word; all other condensed advertisements, 4 c. per word. Minimum charge for any condensed advertisement, 50c. per insertion. All condensed advertisements must conform to usual style. Condensed advertisements, on account of the very low rates charged for them, are payable in advance; 50 per cent extra if charged.

POSITION WANTED.—Young, married man, discharged from army, fifteen years' experience in insurance business, fire, hail and automobile, eight years in Western Canada, wants position with Company or General Agency, can manage branch office. Reply to Box 205, *The Monetary Times*, Toronto.

DEBENTURES FOR SALE

CITY OF EDMONTON

SERIES "A" & "B" DEBENTURES

Drawings for redemption of the above debentures to the extent of the funds at that date accumulated in the hands of the Sinking Fund Trustees for the purpose will take place at the office of the City Treasurer in the City Hall, Edmonton, on Friday, November 15th, 1918, at 3 p.m., and any debenture holder may attend or appoint a representative to attend on his behalf.

Dated at Edmonton this 17th day of October, 1918.
F. BARNHOUSE,
City Treasurer.

GREAT AMERICAN INSURANCE COMPANY

The Great American Insurance Company, the head office of which is in New York, has increased its capital from $2,000,000 to $5,000,000. The recommendation was announced about two weeks ago, and the shareholders gave their unanimous approval on Thursday, the 24th inst. The increase has been made in order to enable the company to extend its business, and especially to write larger contracts. The regulations limit the amount of any one risk to ten per cent. of the company's paid-up capital.

The stock is being sold at $150 per $100 share. The increase will accordingly yield $4,500,000. Three-quarters of this, namely, $3,375,000, has been invested in bonds of the fourth Liberty Loan.

SEPTEMBER BANK STATEMENT

Savings deposits in Canadian banks have increased by another 22 million dollars. During September they reached a new high level with a total of $1,037,498,920. At the end of August they were $1,014,711,865, a figure which then constituted a record. Curiously, the increase during August was also approximately 22 million dollars.

The September returns also show an increase in bank circulation and an increase in demand deposits. Current loans, both in and outside Canada, are higher as compared with the previous month. The principal figures are as follows.—

	Sept., 1918.		Changes during Sept., 1918.
Reserve fund	$ 114,142,333	+	$ 985
Note circulation	211,623,856	+	10,784,196
Demand deposits	588,940,119	+	34,033.602
Notice deposits	1,037.498,920	+	22,787,055
Total deposits in Canada	1.626,439 039	+	56,820,657
Deposits outside Canada	217,486,568	—	2,637,849
Current coin	74 684,377	—	538,007
Dominion notes	187,080,654	+	824,166
Deposits central gold reserve	100,070,000	+	8,600,000
Call loans in Canada	74,137,860	+	628,289
Call loans outside	159.680,810	—	864,180
Current loans in Canada	942,802,018	+	22,026,749
Current loans outside	109 850,161	+	8,298,615
Total liabilities	2,248.965.343	+	79,481,760
Total assets	2,507,714,981	+	84.248.094

The detailed statement will appear in *The Monetary Times* next week.

The Detroit and Windsor Ferry Company has announced that its rates would be increased pending the decision from the government as to the granting of a new franchise. The mayor of Windsor has forwarded a protest to the Dominion government requesting that the company be ordered to return to its old schedule. The increase announced was about 40 per cent. The company has made no increase in rates for 20 years, although costs have more than doubled.

INVESTMENTS AND THE MARKET

News and Notes of Active Companies—Their Financing, and Future Plans

St. Maurice Paper Company.—Earnings of the company, the chief stockholder in which is the Union Bag and Paper Company, during the current fiscal year are reported as satisfactory, and it is expected that the annual report for 1918, when issued, will show a very handsome return on the common stock. Sales of the stock have been made recently in New York and Philadelphia at $60 per share, which, with the exchange would be equivalent to $62.50 in Montreal. The stock is not listed on the Montreal or Toronto Stock Exchanges, and very little of the stock is held in Montreal, beyond some private distribution.

The plant of the St. Maurice Paper Company, located at Three Rivers, and which has an output of 100 tons of newsprint, 55 tons of sulphite pulp, and 50 tons of kraft paper, has been operating at full capacity during the year. The statement for 1917 showed a net profit after expenses of manufacturing and administration of $1,060,853, which, after deducting $386,955 for exhaustion of timber areas, depreciation of plant and government taxes, left a balance of $673,-900. Bond interest for the period of operation absorbed $78,-750, leaving a net surplus of $595,150.

Coniagas Mines, Limited.—The dividend of 2½ per cent., together with a bonus of 2½ per cent., declared by the company, payable November 1, will amount to $200,000, and bring the total paid this year up to $500,000, equal to 12½ per cent. of the company's $4,000,000 issued capital. The company went on a dividend-paying basis in 1907, since which date a total of $[illegible],240,000 has been returned to shareholders. During 1907 the company paid 9 per cent., equal to $360,000. The highest record was attained when in 1913 the company disbursed 41 per cent., amounting to $1,640,000. The record for 1918 of 12½ per cent. compares with 7½ per cent. during 1917, and is another demonstration of the continued strength of the big mine, and increasing prosperity. The Coniagas is the second largest dividend-paying silver mine in the Dominion. With ore reserves adequate to continue present production for perhaps another four years, and the possibility of extending the limits of ore bodies, and with a surplus of $1,668,360.05 as of the end of the last fiscal year of the company, few mining companies find themselves in such a strong position as does the Coniagas.

The company will end its fiscal year on October 31. During the 12 month period it is expected a production of somewhere in the neighborhood of 100,000 ounces of silver monthly will be shown. On its Ankerite mine in the Porcupine gold area the Coniagas Company is conducting a comprehensive exploration campaign with continued good results, thereby indicating the likelihood of adding another very valuable asset to its holdings.

McIntyre Porcupine Mines, Limited.—The company's profits for the year ended June 30th, 1918, are slightly lower than those of the preceding year. The following is a summarized statement of the profit and loss account:—

	1917.	1918.
Earnings	$1,693,040	$1,714,258
Operating expenses	724,287	776,793
Administration, general and other expenses	131,337	141,476
Non-operating revenue	3,139	15,584
Depreciation on buildings, machinery and equipment	114,763	131,210
Net profit	725,790	680,361

The company's surplus as at June 30th, 1917, was $741,-903. After deducting the business profits war tax to March 31st, 1916, which amounted to $8,548, and adding the profit for the year ended June 30th, 1918, the total available was $1,-413,715. Three dividends at the rate of 5 per cent. were paid on September 29th, January 15th and June 15th, making a total of $541,542. This leaves a balance of $872,172 in the surplus account, which is $130,000 more than last year. During the year the company sold 178,327 tons of ore having a gross value of $1,793,197. Bullion valued at $1,714,258 was recovered. The bullion was sold to the Royal Mint at Ottawa and the United States Mint at Denver, Col. The company's operating costs advanced during the year and offset improvements in operating efficiency which resulted from expenditures on plant and equipment made during the last two years.

THRIFT CAMPAIGN IN CANADA

Sir Herbert B. Ames, who has been placed in charge of the thrift campaign of the Dominion of Canada, has been touring Western Canada preparing his work, which will be actively commenced after the second Victory Loan has been floated. On September 16th, he was in Regina and addressed 40 school inspectors upon the subject. He was also in Winnipeg and points farther west.

War stamps will be sold by the Dominion government somewhat similar to those sold by the governments of the United States and Great Britain. The principal importance of this campaign is not so much that it raises a great deal of money for the national purse, but rather that the funds so raised represent new savings which would otherwise not be made.

INSURANCE INSTITUTE OF TORONTO

The following is the tentative programme prepared for the 20th session of the Insurance Institute of Toronto. It was mentioned in *The Monetary Times* last week that the first meeting due on October 17th had to be cancelled owing to the medical health officer's restriction on public meetings. It is expected, however, that Mr. Finlayson will address the institute at an early date.

October 17th, 1918—Opening Meeting.

President's inaugural address, Mr. H. W. Crossin.

Adrress: "Present-Day Tendencies in Insurance," Mr. G. D. Finlayson.

November 21st, 1918.

"Group Insurance," Mr. Wm. J. Graham, 3rd vice-president, the Equitable Life Assurance Society, New York, N.Y.

January 16th, 1919.

"Poison Gases in Warfare," Col. Geo. G. Nasmith, C.M.G., D.Sc., Ph.D., Deparment of Public Health.

February 20th, 1919.

"Valuation of Insurance Companies' Securities," Mr. D. E. Kilgour, North American Life Assurance Company, Toronto.

March 20th 1919.

"Conservation," Mr. Leighton McCarthy, K.C., of Messrs. McCarthy and McCarthy, solicitors, Toronto.

May, 1919—Annual Meeting.

Results of annual examinations; election of officers.

MOLSONS BANK STATEMENT

During the financial year ended September 20th, 1918, the Molsons Bank surpassed its record of the previous year. The following is a comparative statement of the profits for the two years:—

	1917.	1918.
Balance at credit of profit and loss account from previous year	$127,619	$151,826
Net profits for the year after deducting expenses of management, reservation for interest accrued on deposits, exchange and provision for bad and doubtful debts	615 514	712,485
Dividends at 11 per cent. per annum	440,000	440,000
Contribution to officers' pension fund	21,308	21,282
Patriotic and relief funds	15,000	15,000
War tax on circulation	40,000	40,000
Reserved for depreciation of bonds	75,000	......
Reserved for contingencies	......	100,000
Balance at credit of profit and loss account	$151,826	$248,029

The bank's progress, therefore, as represented by the reservations set aside and the increase in the profit and loss account is this year almost $200,000. Last year it was about $100,000. In addition the bank paid its regular dividend at 11 per cent. per annum.

The capital paid in is $4,000,000 and there is also a reserve fund of $4,800,000. The savings deposits bearing accrued interest now amount to $42,104,559, an increase of $600,000 as compared with last year.

The current deposits have grown to $2,400,000. The circulation is now $7,796,670, as compared with $6,653,453 last year. A new item appears in the statement this year—namely, $7,857,109, balance due to the Dominion government. Balances due to other banks in Canada have decreased by about 40 per cent., but those due to banks and banking correspondents outside of Canada have increased by about 65 per cent. Other liabilities have jumped from $33,271 to $746,209 as a result of the new account with the Dominion government and increases in most of the other items. The total liabilities are now $77,638,029.

Holdings of current coin and Dominion notes are more than last year by $800,000 and the deposit in the central gold reserves has increased from $1,750,000 to $3,000,000. The bank holds over $7,500,000 of Dominion and provincial government securities and over $9,600,000 of other government and municipal securities. This increase, together with the increase in call and current loans and in balances due by foreign banks accounts for the increase in total liabilities.

North American Life Assurance Company
"SOLID AS THE CONTINENT"
HEAD OFFICE - TORONTO

"I Wish I Had Taken Twice As Much!"
Nothing is more often repeated in letters received at our office than the expression "I wish I had taken twice as much insurance while I was about it." When endowments, dividends or cash settlements are paid, the assured very often acknowledges the remittance with that remark The truth is very few men take as much Life Insurance as they can reasonably carry—and repentance often comes when additional Insurance is not procurable. Probably every reader of this paper believes in Life Insurance and carries more or less of it but one should ask himself the question. **Am I Carrying as Much Insurance as I Can Afford?** If the policyholders who are now entering the Company could read the evidence of gratified policyholders and beneficiaries, they would make a great effort to increase the amount applied for—and existing policy holders would double the amount of their protection. "One word more":— What income would your present insurance yield the beneficiary at say 6%?

BRIGHT OUTLOOK IN MOOSE JAW DISTRICT

Threshing Returns a Surprise—Excellent Crops in Moose Jaw District—City Finances in Good Shape—Commercial Trade Good

(Staff Correspondence.)

Moose Jaw, Oct. 18, 1918.

Threshing in the Moose Jaw district is nearing completion, and actual results are in many cases a surprise and a satisfaction to the farmer. Ten weeks ago all kinds of farmers could be found who would have been willing to sell their crops for the cost of the seed, where to-day they are receiving a return of anywhere from 25 to 45 bushels to the acre. One farmer the writer met, who farms several sections of land in the Moose Jaw district, will receive from this year's crop $80,000 in cash, and there are many like him in a greater or less degree. In discussing the local situation, Mr. Harry F. Stirk, one of the financial men of Moose Jaw, said to the "Monetary Times":—

"I have travelled quite extensively through the country during the last two or three months and from Moose Jaw to Outlook on the north line there was never a better crop than we have had this year. The wheat in some places has gone as high as forty bushels to the acre, principally No. 1 hard, and I feel that the average on this line would be about twenty-five bushels to the acre. There were some of the finest fields of oats that ever grew along this line this year, and during the past two or three years the farmers have been handicapped for feed, and were unable to secure sufficient feed to do their summer fallow work. They now have in hand feed to last for at least two years. The oat crop was very heavy, and there were thousands of acres of green oats cut, which will give the farmers plenty of feed for next year, and enable them to save their good oats for the second year. The flax crop was also real good along this line, and should average about ten bushels to the acre. There is considerable summer fallow done in the Moose Jaw district, which is in first-class condition, thus guaranteeing a good crop for 1919.

"Farm land is selling all through the district from $30 to $70 an acre, with large cash payments. Trade in the city is as good as any time since the commencement of the war. The farmers all appear to have plenty of money and are not asking for credit. Collections are good, and on account of only being able to get one price for wheat, the farmers are disposing of their grain and paying up their debts, thus saving the interest. This will result in early settlements of all liabilities.

"A great many farms are changing hands and the loaning field is about as good as any year in the past.

"The district south-east of Moose Jaw, along the Weyburn line, the crops were not quite as heavy as along the north line, but otherwise they are real good, with plenty of feed. South of Moose Jaw on the Assiniboia and Expanse lines, the crops of wheat average about fifteen bushels to the acre." When asked regarding the Victory Loan, Mr. Stirk said: "We are looking forward to receiving at least $4,000,000 out of this district."

Moose Jaw Finances Good.

In discussing city affairs with Mr. G. D. Mackie, City Commissioner, the latter called attention to the comment which was made on the annual report for 1917, in the "Monetary Times" of September 27th.

The finances of the city of Moose Jaw are very satisfactory and a policy of strict economy is being maintained. This fall the city is spending $110,000 on water supply, the money for which is already in hand; also $10,000 for completion of a Children's Home, the debentures for which have been taken over by the sinking fund trustees.

The total loans on current account this year are only $240,000, as compared with $430,000 last year. This noticeable decrease in the city overdraft has been brought about by the plan adopted this year of half yearly payment of taxes, which has proved very satisfactory.

"I read with interest," he said, "your very fair comment on the financial statement of the city of Moose Jaw for the year ended 31st December, 1917, but would point out to you that there was no deficit on the electric light and power department of the city last year as stated by you in the second last paragraph of your review. If you turn to page 41 of the statement, you will find that there was a surplus on the electric light and power department of $7,692.32 and this surplus was after paying operating expenses, and 5 per cent. interest on invested capital and 5 per cent. interest for depreciation. You also state that there was a deficit in respect to the city's hospital. It is only fair to state that this debit balance amounted to only $917.72, and this, after paying all operating expenses and fixed charges on the hospital buildings."

THE FIRE HAZARD

Municipalities Which Choose to be Negligent in Fire Prevention Must do so at Their Own Risk.

By Henry Lye, Adjuster, Vancouver, B.C.

The writer of the criticism on my article on "Fire Hazards," as contained in Saturday Night of 3rd of October, evidently did not stop to think, because I never advocated or even suggested municipal insurance as generally understood. I advocated common honesty in that every city, town, village or locality should bear its own losses and expenses.

It was felt as a general injustice that the rates of premiums for fire insurance were increased throughout the whole continent, after, and because of the San Francisco catastrophe; the risks of San Francisco were, or should have been known, so as to cause the local rates of premiums to have been such as to provide indemnity for San Francisco's fire losses and expenses. The principle of requiring every community to pay its own losses and expenses is fully recognized by the grading of cities, towns, villages and localities in Classes A, B, C, etc.

The same principle is fully established and practised in the system of schedule rating, which goes to the extent of demanding that every risk shall bear its own losses and expenses. The same principle is legalized by the Workmen's Compensation Act. The same principle is practised by the mutual fire insurance companies, who assess each class of risk for its own losses and expenses.

Take any two or more cities or towns, etc.; if one of them presents such conditions and risks as make it apparent that when these result in calamity the others must contribute towards their foreseen losses and expenses, notwithstanding the fact that these contributories have already provided for safety of life and property within their own borders, and paid adequate premiums for what may be termed unavoidable losses and expenses; surely there is an injustice which should at once be prevented by the "cleaning up" of the defaulting locality, so that there may be no defrauding of the innocent communities which have taken due precautions.

It is true that the fire insurance companies are collectors and distributors, but not for sweet charity's sake; they properly endeavor to assess each risk and town and city in proportion to the fire hazards so far as they can ascertain them, so that each one may "bear its own losses and expenses," and, as they have to account to their shareholders, they endeavor to realize a reasonable profit in their business.

There are communities in which there are autocrats who actually refuse to remove buildings or other endangerments to health, or life or property; these persons are the most difficult to satisfy in case of an adjustment, or to persuade in the event of an inspection, but they have the personal, local influence which too often prevails. I know one town and one village in Ontario where, during the past fifty years, the fire losses largely arising from gambling and smoking have been so continuous as to warn any careful insurance company from business within their borders. After a series of adjustments in another town, not in Ontario, I noticed that the merchants threw out of their back doors boxes, crates, straw, paper and other inflammables to such an extent that a stray match would destroy the business portion of the town; across the alleys in the rears of these stores were stables and sheds in such condition as to endanger the whole town, and, in different parts of the town, were old frame buildings no longer in profitable use.

I went to the authorities and told them it was my duty to warn the fire insurance companies as to the real risks of the community; risks not shown on the insurance maps, or heeded, or reported by the local insurance agents, or probably never noticed by them because "it had always been so." The authorities woke up to the facts and cleaned up the alleys at once, beside taking such other precautions as have resulted in freedom from fire losses in that town during the past ten years.

It is probable that the next town has yet maintained similar conditions of danger; surely they should either pay such rates of premiums as will recoup the fire insurance companies when the inevitable "calamity" occurs, or they should be without insurance; in either case "bearing their own losses and expenses."

There are manufacturers and merchants who in response to the requirements of competent inspectors, reply that "If you don't like my risk as it stands, you may leave it, as there are plenty of companies who will be glad to take it." These men are a menace to the community and the insurance company ignoring the risks they represent should be debarred from business.

I repeat, that "every community should bear its own losses and expenses, and so be influenced to purge itself of manifest dangers."

Monetary Times Annual

1919

YEAR after year the MONETARY TIMES ANNUAL finds a most cordial reception at the hands of business and financial interests in Canada. Its intrinsic value as a work of reference is recognized in the offices of financial and commercial houses not only throughout Canada but in all financial centres of the world—in fact, wherever there are those who have investment and commercial interests in Canada.

The 1919 Annual, on which our editorial organization is now at work, will contain statistics covering banking, clearing houses, insurance, bonds, dividend records, fire losses, war finances, loans, exports, imports, etc., which it would be almost impossible for anyone to gather together without an expenditure of much time and effort.

Orders for advertising space are now being received for this issue. The earlier orders are received the better can we serve you in the matter of position.

Read what a few of Canada's leading men of affairs have to say concerning the *Monetary Times Annual*:

"I also wish to congratulate you on the splendid New Year issue of your paper. To my mind there is really more information between the covers of that issue for the benefit of Canada generally than I have ever seen in any magazine published in Canada or elsewhere, and I am sure you really deserve our congratulations in this respect."—E. F. HUTCHINGS, President, Great West Saddlery Company, Winnipeg.

"To my mind your annual publications are head and shoulders over anything of the same nature that I have ever seen in all my wanderings. Your Annual always finds a permanent place on the shelves of my library; and I notice that it also does so in the libraries of most of the thoughtful community throughout the country. It is a great work."—F. MACLURE SCLANDERS, Commissioner, Border Chamber of Commerce, Windsor, Ont.

"I have received a copy of your Annual, and am very much pleased with it. It is very full and covers an immense deal of ground, and gives information to the seeker of knowledge that is valuable."—SIR GEORGE FOSTER.

"You have certainly condensed a wonderful body of information into a form which cannot but prove of enormous educational value."—G. FRANK BEER, Toronto.

"I find the number exceedingly interesting, as there are many articles which have a direct or indirect bearing on the work of this Board."—MAXWELL SMITH, Chairman, Land Settlement Board, Victoria, B.C.

"I have to thank you for the copy of the annual review of *The Monetary Times*. It is indeed a most valuable document both in business and finance."—SIR EDMUND WALKER, President, Canadian Bank of Commerce.

"In acknowledging receipt of the annual number of *The Monetary Times*, I would like to take the opportunity of saying that it is welcomed just as one welcomes an old and tried friend It is never disappointing, but responds to one's inquiries in the most satisfactory manner. It lives because it deserves to live."—S. R. PARSONS, Past President, Canadian Manufacturers Association.

"The general appearance and compilation are excellent and the publication constitutes a valuable record of Canadian financial events during the past year."—SIR FREDERICK WILLIAMS-TAYLOR, General Manager, Bank of Montreal.

"It is a magnificent issue."—MR. T BRADSHAW, City Treasurer and Finance Commissioner, Toronto.

Bank Deposits Make New High Records

Both Savings and Current Deposits Reach New High Levels in the Banks at the End af September—One More Month to Record Before Victory Loan Payments Commence—Currrent Loans Maintain Upward Course—War Loan May Necessitate Further Contraction in Credits

	Sept., 1917.	Aug., 1918.	Sept., 1918.	Year's inc. or dec.	Month's inc. or dec.
Deposits on demand	$451,749,532	$ 554,906,517	$ 588,940,119	+30.37	+ 6.10
Deposits after notice	965,393,541	1,014,711,865	1,037,498,920	+ 7.50	+ 2.30
Current loans in Canada	855,306,953	920,775,269	942,802,018	+10.18	+ 2.40
Current loans elsewhere	87,265,325	101,551,546	109,850,161	+25.28	+ 7.90
Loans to municipalities	42,721,563	56,662,931	47,977,472	+11.90	—16.08
Call loans in Canada	72,421,187	73,509,571	74,137,860	+ 2.77	+ 1.37
Call loans elsewhere	166,480,004	160,544,990	159,680,810	— 4.22	— .63
Circulation	178,139,958	202,489,039	213,066,909	+19.66	+ 5.45

In discussing the bank statement for August, we were able to announce a new high record for Canadian savings bank deposits. At the end of September, however, both current and savings deposits reach new high levels, as indicated below. Other important features of the bank record for the month, as noticed in the above figures, are the continued increases in current loans, and in circulation. Loans to municipalities have, however, fallen off by over 16 per cent., as the result of tax collections, and the realization of funds for loans floated this summer. The statement, as a whole, reflects somewhat more than usual activity, the commencement of the crop movement period, and expectation of the coming Victory Loan.

The following table gives record of deposits for the past thirteen months:—

	Deposits payable on demand.	Deposits payable after notice.
1917—September	$451,749.532	$965,393,541
October	495,058,449	985,790,850
November	538,869,362	1,008,657,874
December	569,441,871	995,978,013
1918—January	559,777,237	900,314,256
February	565,266,642	908,822,988
March	561,042,236	921,080,803
April	558,509,221	933,644,668
May	535,655,731	947,757,337
June	549,327,078	965,934,556
July	549,068.651	992.015,137
August	554,906,517	1,014,711,865
September	588,940,119	1,037,498,920

This substantial growth of bank deposits reflects the high wages, steady employment, and tendency towards savings throughout the country. It is, however, to a certain extent due to the government's restriction upon the issue of other securities, which has consequently forced money into the banks to await the flotation of the war loan. Also in view of the declining value of money, savings should increase in order to keep pace with the new conditions.

The course of the deposits account during the past six years is shown in the following table:—

Sept.	On demand.	After notice.	Total.
1913	$381,737,513	$ 621,249,585	$1,002,987,098
1914	348,284,206	658,401,501	1,006,685,707
1915	359,315,280	693,339,851	1,052,655,131
1916	454,148,049	816,374,171	1,270,522,220
1917	451,749,532	966,393,541	1,417.143,073
1918	588,940,119	1,037,498,920	1,626,439.039

The total, it is seen, is now 60 per cent. greater than before the war, which is a very creditable showing in view of the large sums we have raised at home for war financing.

The trend of the Canadian loans account for the past thirteen months is shown in the following table:—

Loans.	Current in Canada.	Call in Canada
1917—September	$855,306,953	$72,421,187
October	883,986,860	71,653,719
November	868,973,714	72,178,345
December	858,533,298	71,779,020
1918—January	855,506,506	76,239,201
February	859,363.147	76,722,163
March	886,995,222	74.257,877
April	884,089,402	77,497,360
May	894,817,113	78,466,582
June	897,226,012	76,970,920
July	905,677.233	74,382,762
August	920,775,269	73,509,571
September	942,802,018	74,137,860

That bank credits to assist business have grown, in spite of the request of the president of the Canadian Bankers' Association that credits be restricted to essential industries, is indicated by the above table. Call loans have, however, varied within the small range of $8,000,000 during the past year, as a result of inactivity in speculation and in dealing in securities.

December.	137,157,869	173,878,134	134,483,482	....

Canadian money at call in New York has evidently been withdrawn to some extent during the past few months. This movement can only be very limited, however, as it is an essential part of Canadian banking policy that considerable funds should be kept there, as this amounts practically to a cash reserve.

Dominion Government---September, 1918

LIVERPOOL AND LONDON AND GLOBE

Announcement is made that Mr. James Carruthers has been appointed a Canadian director of the Liverpool and London and Globe Insurance Company, Limited, the other members of the board being Mr. M. Chevalier Sir Alexandre Lacoste, Mr. Wm. Molson Macpherson and Sir Frederick Williams-Taylor, with Mr. J. Gardner Thompson, manager; Mr. Lewis Laing, assistant manager, and Mr. J. D. Simpson, deputy assistant manager.

Milk in Regina will in the future cost another ten cents per ten quarts, the price of $1.50 having been made for the twenty pint tickets, which recently sold for $1.40.

AGENCY OFFICERS' CONVENTION

Prominent Life Men, Including Canadians, Will Address Meetings in Chicago

The annual convention of the Life Agency Officers' Association will be held in Chicago on Friday and Saturday, November 8th and 9th. Headquarters will be the La Salle Hotel.

The programme for the meeting includes: (1) “Rebuilding of Agency Organizations Following the War,” and (2) “Agency Selection and Turnover.” A full report on the questionnaires, from which records of about five thousand successful agents have been analyzed and useful deductions made, will be presented and discussed.

The meeting will open at ten o'clock on November 9th, with reports from the executive committee and from the secretary-treasurer, R. J. Mebane, third vice-president of the Southern Life and Trust Company, who will speak on “The Value of Touching Elbows,” and Vice-President M. A. Linton, of the Provident Life and Trust, on “Life Insurance After the War.” Mr. Glover S. Hastings, superintendent of agences, New England Mutual Life, will speak on “Successful Methods of Meeting the Draft.” A discussion of “Our Method of Handling Applications of Agents Who Desire to Change Companies” will be opened by Vice-President Allan Waters, of the Union Central Life, followed by Julian Price, agency manager of the Jefferson Standard Life. “How Far Should We Go in Seeking Men from Other Companies?” will be discussed by H. E. Aldrich, Equitable Life, of Iowa; E. G. Simmons, vice-president of the Pan-American Life and president of the American Life convention, and H. M. Woollen, president of the American Central Life.

Mr. Isaac Miller Hamilton, president of the Federal Life, will speak on “Disability and Accident Insurance as an Asset to the Life Agent,” and J. F. Weston, managing director, Imperial Life of Canada, on “Over the Top Together.” General discussion of “What Method of Advertising Gives Best Service to the Agent” will be opened by T Louis Hansen, vice-president, Guardian Life of America; G. A. Deitch, vice-president, Reserve Loan Life, and Mr. E. E. Reid, of the London Life. The subject, “Diminishing Agency Turnover,” will be discussed by W. E. Taylor, Equitable Life of New York; G. K. Sargent, Mutual Life, and W. E. Webb, National Life of United States.

The Saturday meeting will be addressed by Lincoln K Passmore, vice-president, Penn Mutual Life, on “Building Team Work Among Agents;” “The Value of Agents' Conventions” will be discussed by J. C. Behan, superintendent of agents, Massachusetts Mutual Life, and G. M. Lovelace, Connecticut Mutual Life. H. C. Everett, Central Life, and Fred Halstead, Dominion Life, will lead discussion of “Successful Methods of Rendering Service to General Agents in Building Local Agencies.”

A feature of the afternoon session will be an address by Hon. Thomas B. Love on “How We Have Built the Biggest Company in the Quickest Time.” Mr. Love is assistant secretary of the treasury, and will discuss the War Risk Bureau of the government. Philip Burnet, president, Continental Life, of Wilmington, and Sidney A Foster, secretary of the Royal Union Mutual Life, will lead discussion of “Values Secured and to be Secured by Our Association,” after which the meeting will come to an end.

We are not asked to give.
We are asked only to LEND.

CONSUMERS' GAS COMPANY REPORT

The annual report of the Consumers' Gas Company, of Toronto, submitted at the annual meeting, held on Monday, October 28th, was not surprising in view of the difficulties under which public utility companies have been operating during the past year. The report is for the year ended September 30th, 1918, and appears in full, together with the addresses of the president and of the general manager, elsewhere in this issue. The usual dividend was paid during the year, but whereas in ordinary years the company had a balance left after paying this dividend, this year it had to draw upon the surplus account in order to do so.

The gross revenue for the year was $5,095,006, and the net revenue (balance carried down) $776,665. The sum of $1,055,765 was distributed in interest, dividends and appropriation for the plant and buildings renewal fund, the difference of $279,100 being made up from the reserve fund. This reserve fund has accordingly been reduced from $684,956 to $405,856, while the plant and building renewal fund has been increased by the sum of $158,674, leaving the net deficit for the year at $120,426. The paid-up capital of the Consumers' Gas Company is $5,360,700, and the total assets as at September 30th, 1918, were $11,744,397.

During the year the price of gas was increased from eighty to ninety cents per thousand feet. This increase was, however, operative only during one half of the financial year.

Needless to say, expenses of operation increased greatly during the year, which accounts for the smallness of the net income. As pointed out by the president in his speech, the cost of labor and materials, especially coal, has increased greatly. At the same time the demand for gas and other products of the industry has continually increased. The position of the company is similar to that of many other public utility enterprises throughout the country, which find themselves with plenty of business on hand, but with such increases in operating costs, while rates are comparatively fixed, that it is impossible to maintain net earnings. The merits of the company's claim for higher rates was fully recognized by a committee appointed by the city to report upon their application last spring. It was found that conditions fully justified the increase.

The efforts of the company to keep down the price of gas are to be commended. The price in Toronto compares very favorably with the prices in other cities of Canada, and even with those in the United States, where the companies generally pay less in freight charges and are not subject to the customs duties which must be paid on materials imported into Canada. In the great majority of Canadian cities the price, for lighting purposes, ranges from one to two dollars per thousand feet.

HAIL INSURANCE ASSOCIATION MEETS IN REGINA

Three important meetings of interest to the great farming community of Saskatchewan were held in Regina recently. The first was the meeting of the board of directors of the Saskatchewan Hail Insurance Association on October 22nd. On the day following the executive of the Rural Municipalities' Association of Saskatchewan held an important meeting in the city. On the 24th the board of directors of the Saskatchewan Grain Growers convened.

The principal business before the board of directors of Saskatchewan Hail Insurance Association was the striking of the percentage which the association will be able to pay on claims for 1918 hail losses. In a statement made public by the manager, E. G. Hingley recently, it was stated that the percentage of losses the association would be able to pay would be between 70 and 80 per cent.

The executive of the Rural Municipalities' Association had under consideration such questions as the seed grain situation and other matters pertaining to the operation of the municipal machinery throughout the province.

The Dunlop Tire and Rubber Goods Company, Limited, have subscribed for one million dollars of the 1918 Victory Loan. This amount does not include individaul subscriptions, made either by the directors of the company or the employees. In making this announcement on October 24th, Mr. Warren Y Soper, the president, said: “I think I can safely add that no action in the Dunlop company's twenty-five years of existence has given the directors a keener sense of satisfaction.”

ACCOUNTANCY AS A PROFESSION

In order that the certificate of a recognized chartered accountant may be accepted as an authoritative statement, it is necessary that a standard be maintained by the profession such as is maintained by the legal or medical professions. Business may temporarily be lost by too great strictness on the part of practising accountants, but this cannot fail to react to their final advantage. Once an auditor's statement becomes recognized as a correct and independent description of a company's financial condition, the value of these statements and the possibilities for increased business on the part of accountants becomes apparent.

An unusual action was recently brought in a United States court, whereby two members of the American Institute of Chartered Accountants took action against four other members who constituted a firm, for certifying to a balance sheet which was not correct. The complaint alleged that items of approximately $230,000 due from associated companies and $150,000 due for officers and employees had not been separately shown, but had been included under a general heading "Accounts and Notes Receivable." The total including the above items was slightly in excess of $1,000,000. The firm had prepared a more or less detailed audit report, and a condensed balance sheet, both of which were signed and delivered to the client. It was alleged that even the detailed report failed in several instances to state accurately the transactions with the associated companies as separate and distinct from regular debtors and creditors. It was the condensed balance sheet, however, which contained the most serious errors, and this was the statement which was shown to the banks with which the company had business, and the banks accepted it as being correct without securing any explanation of the items. Complaint was also entered that the inventories were shown at market instead of at cost price; on the liability side a reserve was included to reduce the inventory from market to cost, but it was placed along with other general reserves in such a way that the bankers considered it as a general reserve out of surplus. Raw materials under process and finished stock were also shown in one total as merchandise. An item also appeared on the balance sheet as investments, which consisted chiefly of stocks representing ownership of subsidiary companies, except about 20 per cent. of the total which consisted of treasury stock.

The defendants acknowledged the balance sheet produced and argued that there had been no misrepresentation or intent to deceive, the question of arranging the balance sheet being a matter of technique rather than of principle. The member who had actually signed the balance sheet was, however, suspended for six months, and the other three members of the firm against whom complaint had been made were suspended for three months.

The importance of this case consists not in the technical charges upon which the members were convicted, but rather in the principle of mutual responsibility among members of the profession. It is, of course, not an easy matter to construct a condensed statement which will accurately describe a company's condition. The intent to deceive, however, or the failure to display reasonable skill in the preparation of these statements should be punishable by law, and it is to the mutual interest of the profession to see that a proper standard is preserved. Moreover, where a condensed statement conceals an unusual condition of business, it should not be certified to without the necessary explanation.

MIGHT AND THE PEACE OF NATIONS

The present war has demonstrated the futility of international agreements which are not supported by force. We have had enough of international rules which exist only to be obeyed or violated at will, and which have exercised the acumen of many legal minds to decide whether they are law at all. If their acceptance as rules of conduct, is the required criterion, then they are such, but in any case this is only a matter of definition, and the practical imperfection which results from the absence of the sanction of force is equally apparent.

The doctrine of might has, then, triumphed from the present catastrophe. Right has had to establish its position by an appeal to the very force against which it was previously arrayed. But even in the past, right has always been more demonstrative and more exacting in demanding the execution of the letter of the law, when backed by superiority of political power, than when relying upon its own moral force. Small nations which are out of the reach of Germany's arm have joyously arrayed themselves with the entente allies, and have seized German property and shipping with alacrity, while those within her reach humbly submit to international indignities of a graver kind. We speculate as to what might have resulted had Germany's submarine campaign been more successful and her wartime superiority, or equality, upon the seas been established. And now Bulgaria, which eagerly embarked upon a career of conquest, deserts its leader in the hour of trial, while Denmark complains because nothing was said in Wilson's peace note, about the restoration of its lost province.

Never again will we put our trust in the word of princes, nor even of democratic nations. A surer basis of international peace is required. International amity is not a permanent condition; international "rapprochements" and controversies turn up in the shuffle with equal readiness. France and England, which for centuries were ready to fly at one another's throats, now join hand in hand,—for a common purpose; and the most friendly relations have been for a half-century maintained between the United States and Great Britain, because of their intimate social and commercial relations, the recognition of the disastrous results of a clash, and the pursuit of common aims.

Right, then, will be established and maintained by might. But it will be none the less right, not because it is the will of the allied nations, but because it is the expression of the opinion of justice on the part of intelligent men. We do not settle our domestic law cases nor our international disputes by barter backed with the strength of the opponents but by referring specific causes to the decision of individuals; and we are finding this method of setting labor disputes more satisfactory and effective than the old system of tests of strength between industrial corporations and labor unions. Force remains in the background, to act as a police power in ensuring that the decision is carried out. That is how justice among Canadian provinces, or British colonies, is secured. When the American colonies in 1787 joined to form a new political power, they limited their freedom of individual action, but at the some time they created a vast field of new legal rights. Similarly it is possible to establish an international body clothed with judicial powers and armed with a force superior to that of any member nation. Judicial decisions may occasionally miscarry, but the gain is a hundred-fold as compared with the loss otherwise. In this way is right to be established, and nations have little to lose and much to gain by the process.

WINNIPEG ELECTRIC RAILWAY SITUATION

It has practically been decided that the citizens of Winnipeg must pay higher street car fares, and the attitude of Mr. H. G. Veitch, president of the Winnipeg Trades and Labor Council, and other labor leaders, in admitting the justice of the company's claim to increased revenue, reflects the enlightened policy which the best labor organizations now adopt.

The situation in Winnipeg may be briefly reviewed, for it is typical of recent developments in public utility enterprise throughout Canada and the United States. During the early months of the present year the demands of the employees of the Winnipeg Electric Railway for increased wages became more and more emphatic. The company refused to grant their requests, on the grounds that it was not in a position to bear any additional financial burden. By way of explanation, it may be said that the company paid good dividends up to and including the year 1915, but nothing has been paid since the end of that year. For the year 1917 the net income after deducting depreciation but not provision for sinking fund, was only $152,579, or about one and two-thirds per cent. on the common stock. A board of conciliation was, however, formed, which granted substantial increases to the employees, and at the same time recommended that the company should have increased revenue.

Recognizing the fact that the interests of the employees were in the final analysis linked up with those of the employer, the labor leaders of Winnipeg have decided to support the company's contention. "If it is shown," says Mr. Veitch, "that in order to enable its employees to live in the same state of decency as men in similar walks of life in Winnipeg, the Winnipeg Electric Railway Company must charge higher fares, then I say the company is justified in asking the citizens to supply the necessary additional revenue." The president of the Amalgamated Association of Street and Electric Railway Employees of America is also quoted as of similar opinion. "The service of these companies," he says, "is a matter of public necessity, of war necessity, if you please, and as a matter of public necessity, of public policy, higher rates will have to be allowed sooner or later. The sooner they are allowed the better it will be for everybody."

But this is not all. If the revenue is to be just sufficient to pay adequate wages and other operating expenses, and fixed charges, including provision for the replacement of existing property, how is the stockholder to receive any return on his legitimate investment? Where corporations engage in the production of commodities which are sold in the open market at competitive prices, profits are the stockholders own lookout, and if new conditions arise which prevent the realization of the anticipated profit, all that can be said is that a bad speculation was made. But in the case of a public utility enterprise such as this, where rates are fixed by a public body, the investor, even the holder of bonds, is at the mercy of the regulating body, which must recognize the claim of capital for an adequate return.

1918—VICTORY LOAN BULLETIN—1918

CAMPAIGN NOTES COMMITTEE REPORTS PERSONAL MENTION

The Editorial Department will be pleased to receive and publish each week items of news for this page.

CANADA GOES OVER THE TOP

Our 1918 Victory Loan campaign opened on Monday with every indication of a successful conclusion. The crest of the influenza epidemic is said to be passed in Ontario and Quebec, but the disease is now at its height in the west. This affects the campaign both directly and indirectly but not seriously.

Some of the municipalities of Ontario have already obtained their quotas, and are proceeding to double them. It has become apparent to the canvassers that a great deal of money has been stored up in preparation for this loan, and that our national thrift campaign has had some real effect.

Large subscriptions promise to greatly exceed those of last year. The life companies have once again demonstrated what a powerful factor they are in Canada's financial life. The accompanying list gives the subscriptions of those who have thus far sent in their applications. Industrial corporations are also supporting the loan for financial and patriotic reasons, and are encouraging their employees to buy bonds. Municipalities are also purchasing heavily for sinking fund purposes.

The campaign was ushered in on Monday by demonstrations and parades in cities and towns throughout Canada. On Sunday afternoon mass meetings were held in Queen's Park, Toronto, where a crowd, estimated at 30,000 people, was addressed by Sir Robert Borden, Sir Thomas White, Hon. W. H. Hearst and Hon. T. W. McGarry.

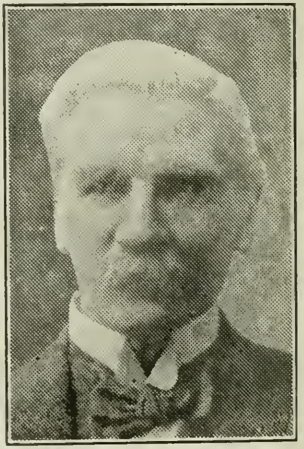
T. H. ESTABROOKS,

Chairman, New Brunswick Victory Loan Committee.

The following are the members of the Victoria, B.C., sales committee, with Chairman Kenneth Ferguson commanding: Messrs. J. Hudson, J. B. Warnicker, J. Dencker, J. E. Wilson, John Mowatt, W. Murphy, J. Moss, F. Lewin, F. Kilner, Alex Peden, R. A. Power, T. E. Marriner, David Leeming, F. L. McGregor.

ALBERTA HAS HIGH RECORD TO REACH

Mr. C. R. Mitchell, Provincial Victory Loan chairman in Alberta, thinks, that in view of the excellent record made last year by the province, and the fact that some parts have had a bad crop this year, it may be difficult to equal the former total. In a statement to *The Monetary Times* he says: "I have a pretty fair idea from the reports that have come in as to the amount that each district of the province will be able to subscribe. It would appear that we will be unable to raise anywhere near the amount of money we did in the campaign of 1917 of over $17,000,000, as we then greatly exceeded the objective set of $12,000,000, but we do hope to this year raise the amount asked of us in 1917.



G. S. CAMPBELL,

Chairman, Nova Scotia Victory Loan Committee.

"The organization is a very complete one and will undoubtedly get the very best results obtainable, but there are large localities in the province which suffered very severely from drought and frost, and provision will even have to be made for supplying a large number of the people in these localities with their seed grain. These were districts that subscribed a very large proportion of the amount raised in 1917. Another difficulty which is general throughout the Dominion is the influenza epidemic. A number of our important workers are temporarily indisposed and it is very materially affecting the organization, nevertheless, the other workers are doing their best and are making great sacrifices to equalize this difficulty. Our inability to hold public meetings as a result of this epidemic will affect us quite seriously. They are the easiest means to fully inform the people regarding the loan and the personal appeal always arouses greater enthusiasm and gets the best results.

"It would appear as if the people are willing to do their very best and support the loan to its utmost, and we are not having to contend with difficulties as we did with the previous loan, as there is a much better spirit of co-operation and the people are much better informed regarding the government's requirements."

C. H. B. LONGWORTH,

Chairman, Prince Edward Island Victory Loan Committee.

TORONTO'S TASK DISCUSSED

Bank managers and other men prominent in financial circles met the Toronto executive of the Victory Loan campaign at the King Edward Hotel on October 24th, and came to an understanding concerning some important details of the drive.

J. W. Mitchell presided, and with him at the head table were Denison Miller, governor of the Commonwealth Bank of Australia, Sir Edmund Walker, E. R. Wood, G. S. Forbes, C. R. Bogert, H. R. Tudhope, C. A. Ross, D. M. Neeve, D. A. Cameron, G. F. Laing, G. G. Adam, A. E. Ames, W. K. Pearce, E. P. Gower, J. H. Gundy, T. Bradshaw, J. S. Skeaff, H. V. F. Jones, A. E. Calvert, W. Mason, G. D. Boulton, R. H. Harvey, W. S. Hodgins, F. G. Osler, F. J. Coombs, G. G. LeMesurier.

Mr. Mitchell explained that Toronto was asked for a minimum of $80,000,000, and if that amount is not subscribed the city will have failed in its duty. For the last loan $78,000,000 was subscribed here.

An undoubtedly hard task lay before the teams under the five district chairmen who had been weighted with the heavy responsibility of gathering $41,000,000, the remaining $30,000,000 having been delegated to the Special Subscription Committee to find. Mr. Mitchell pointed out that it was not within the province of the bank managers to trespass on the province of the canvassers and canvass subscriptions because it was essential that the skilled canvasser should be brought into contact with possible subscribers and get the most out of each. "Lend to the limit" was the slogan of this year's campaign, the chairman pointed out, and the team workers were going to drive it home to the hilt.

H. V. F. Jones, chairman of the Campaign Advisory Committee, remarked that it was rather a negation of the banking principle to encourage depositors to withdraw their money, but a greater duty, he said, had been placed upon bankers than that of encouraging the accumulation of funds. The war was still on, and this moment, when the enemy was wavering, was the time to make the greatest push of all, and that push could not be made without money. Every bank lost deposits as a result of last year's loan, Mr. Jones admitted, but to-day the deposits, he said, were larger than ever, and when the forthcoming banking return was issued, it would show that the deposits in the banks were larger than ever before in their history.

Denison Miller told of Australia's seven war loans, all of which had been greatly over-subscribed.

Sir Edmund Walker sounded a warning against any relaxation of war efforts now that victory was in sight. There must be no slackening of effort.

VANCOUVER.

The Special Subscriptions Committee in British Columbia is headed by George H. Kidd, general manager of the British Columbia Electric Railway. He has associated with him Messrs. Fred. Buscombe, E. C. Knight and William Godfrey, and in view of the special circumstances in Vancouver it is thought that this committee is a specially strong one.

The chairman of the Business Committee is Mr. H. H. Watson, who was Mr. Farrell's chief lieutenant last year. Associated with him on this committee are Mr. F. W. Rounsefell, of Ceperley, Rounsefell and Company, Mr. S. Burke, of Pemberton and Sons, and Mr. J. P. Nicolls, of MacCaulay and Nicolls, all of whom were on the executive last year under Mr. William Farrell. Each member of this business committee is chairman of another special committee. Mr. S. Burke is in charge of the Setting-up Committee, which looks after the actual co-ordination of the various committees. Mr. F. W. Rounsefell is chairman of the Finance Committee. Mr. J. P. Nicolls is also on the Finance Committee. The Publicity Committee is in charge of Mr. F. W. Marsh, manager of the Canada Life Assurance Company, who held a similar position last year. Mr. P. G. Shallcross, who was chairman of the Vancouver City Committee last year, this year is chairman of the Provincial district. He is president of the board of trade in this city. All of the aforementioned are business men in Vancouver, who are giving their time and their services to the campaign without any question of remuneration.

The campaign this year has been carefully organized, and has taken up a great amount of time of all the men concerned, who are usually under any circumstances busy men. Mr. W. H. Malkin, who heads the whole organization, is a well-known business man in Vancouver, heading the large wholesale grocery organization known as W. H. Malkin and Company, and is a director of the Union Bank. In Victoria, Mr. R. F. Taylor, last year's chairman, heads the organization; and Mr. G. H. Dawson has taken into his charge the whole of the island campaign. At New Westminster Mayor Gray heads the whole organization of New Westminster and district. The preliminary arrangements have been very carefully made, and if hard work by all the organization and committees throughout British Columbia can give the result, a record subscription may be rolled up for the Victory Loan.

Sir Thomas White visited the coast on October 14, 15 and 16, and met all the organizers that could be brought down to the city of Vancouver. Unfortunately, owing to the Spanish influenza, the public meetings had to be limited, but despite conditions, the committees under the chairmanship of Mr. W. H. Malkin, are right on their toes for the coming campaign.

Victoria has accepted the challenge of Vancouver to take part in a per capita subscription contest. The loser is to present a big Union Jack to the winner. The Victoria committee is not going to bother pricing flags, but steps will be taken shortly to find a suitable pole and to place it in some conspicuous place, so that when the pennant is brought by the Mainland bond hustlers no delay need be caused.

VICTORY LOAN IN NOVA SCOTIA

Lined Up For Big Drive—Committees Appointed For the Province

The Victory Loan office in the Province Building, Halifax, is a busy place, and the hurry and bustle will continually increase, not culminating until the very last day of the campaign. Every one of the workers, from G. S. Campbell, chairman of the executive, down to the tiniest Boy Scout who licks postage stamps, are toiling as if inspired.

Its members, with the exception of Mr. Campbell, who has successfully guided many other patriotic movements, are almost exclusively men who represent the brokerage houses of Nova Scotia. There are also several sub-committees for publicity, finance, special names, etc., which will co-operate with the central executive in the supervision of the provincial drive.

Each county has a distinct organization of its own, consisting of a chairman, a county executive and various sub-committees, which the county executive itself appoints, in addition to providing for a systematic and thorough canvass of the respective fields. This county organization has been created by an organizer chosen by the central executive, some experienced broker, who, in conjunction with the county committee, supervises the preliminary work.

The aggregate amount of subscriptions expected from the entire province is $25,000,000. This sum has been decided upon because of the urgency of the situation, and it is hoped that very county will exceed the prescribed objective. Each county is subdivided into a certain number of canvassing districts, and thus each one of these districts becomes responsible for a specified portion of the county allottment.

County Officers.

A list of the officials in the various counties follow:—

Annapolis—Hon. S. W. W. Pickup, chairman; F. C. Whitman, secretary; C. Blackie, organizer.

Antigonish—Rev. J. J. Tompkins, chairman; A. O. Phillip, secretary; P. R. Jack, organizer.

Cape Breton—Walter Crowe, K.C., chairman; S. P. Challoner, secretary; R. W. Elliot, organizer.

Colchester—A. J. Campbell, K.C., chairman; H. F. Bethel, secretary; H. F. Bethel, organizer.

Cumberland—George T. Douglas, chairman; H. R. Thomson, secretary; W. I. Macdougall, organizer.

Clare—E. L. Comeau, chairman; U. J. Belliveau, secretary; C. Blackie, organizer.

Digby—H. B. Short, chairman; W. E. VanBlarcom, secretary; C. Blackie, organizer.

Guysboro—E. C. Whitman, chairman; W. P. Chittick, secretary; P. R. Jack, organizer.

Hants—Rev. Dr. T. S. Boyle, chairman; Rev. H. A. Harley, secretary; S. F. Thompson, organizer.

The following are the objectives of some of the townships in Carleton County: Osgoode, $140,000; Marlboro, $35,000; North Gower, $77,500; Nepean, $200,000; March, $12,000; Huntley, $87,400; Fitzroy, $112,000; Gloucester, $200,000; Goulbourne, $80,000; Torbolton, $25,000.

NEW BRUNSWICK COMMITTEES

The following are the members of the Executive Committee for New Brunswick: T. H. Estabrooks, St. John, N.B., chairman; C. H. Peters, St. John, N.B., vice-chairman; S. A. Thomas, St. John, N.B., secretary; Hon. Senator W. H. Thorne, Messrs. J. M. Robinson, James MacMurray, F. M. Keator, F. C. McNeill, St. John, N.B.

Finance Committee.—C. H. Peters, St. John, N.B., chairman; Messrs. T. H. Estabrooks, S. A. Thomas, St. John, N.B.

Publicity Committee.—E. H. Turnbull, St. John, N.B., chairman.

Special Names Committee.—J. M. Robinson, St. John, N.B., chairman.

VICTORY LOAN CHART

On pages 28 and 29 of this issue will be found a chart illustrating the 1918 Victory Loan organization in Canada. The body which is first of all responsible is the Dominion Executive. This, however, merely assumes the general direction, separate executives being formed for each of the provinces. At the head of each provincial executive is a chairman, as indicated in the drawing. The general lines of provincial organization are the same in each province, that of Ontario being shown in detail for purposes of illustration, because the Ontario organization is probably the most comprehensive.

SOUTHERN ALBERTA PERSONNEL

The following is the official organization for the Victory Loan campaign in Southern Alberta. The chairman for the province as a whole is Mr. C. R. Mitchell, provincial treasurer:—

Southern Alberta Executive.—Wm. Toole, chairman; G. R. Marnoch, vice-chairman; J. B. Sutherland, C.A., treasurer; C. W. Hague, secretary; Robert J. C. Stead, chairman, Publicity Committee.

Divisional Chairman.

H. F. Kenny, G. A. Robinson, Wm. Ardern, W. D. Mackay, C. P. McQueen, Edmund Taylor, E. D. Adams, A. McTeer, T. A. Hornibrook, Hugh Melvin, C. D. Taprell, S. J. Shepherd, Wm. Cousins, Thoburn Allan, H. E. Middleton, H. W. Wood, Eugene Coste, P. L. Nasmith, J. H. Woods, P. A. Wintemute, H. A. Howard, C. W. Smith, A. Haselden.

Southern Alberta General Committee.

All of the above-named and the following: W. H. Berkinshaw, P. Burns, A. E. Cross, Alex. Hannah, T. Longworth, A. M. Peters, Bruce Robinson, G. F. Bletcher, L. A. Cavanaugh, R. A. Darker, F. W. Hess, J. I. McFarland, I. C. Rand, W. H. Redcliffe, J. Bruce, W. M. Connacher, Dr. Wm. Egbert, R. A. Jackson, Geo. L. Peet, C. Rice-Jones, R. Andrew Smith.

Honorary Chairmen of Districts.

The names of the honorary chairmen are as follows: Red Deer, W. E. Payne; Olds, L. H. Smith; Innisfail, G. A. Bryan; Stettler, W. Dunlap; Castor, E. H. Matthias; Coronation, A. J. Stewart; Monitor, W. S. McCulloch; Drumheller, Jesse Gouge; Hanna, W. C. Stirling; Youngstown, J. Woodman; Oyen, N. V. Miller; Cochrane, Hon. C. W. Fisher, M.L.A.; Rocky Mt. Park, B. W. Collison, Banff P.O.; Airdrie, Dr. W. F. Edwards; Crossfield, Thomas Amery; Carstairs, Dr. R. J. Chrystal; Didsbury, P. R. Reed; Calgary, A. E. Cross; Strathmore, W. E. Brown; Gleichen, Harry Scott; Langdon, Roy Cowen; Acme, F. W. Grainger, Grainger P.O.; Shepard, James Smith; Standard, Chris Dam; High River, J. S. Hunt; Nanton, G. S. Ferris; Vulcan, Fred. Elves; Okotoks, Wm. Fisher; Bassano, H. O. Bredin; Brooks, E. F. Purcell; Empress, R. M. Henderson; Jenner, Mr. MacCrimmin; Crows Nest, O. E. S. Whiteside, Coleman P.O.; Macleod, D. J. Grier; Pincher Creek, H. E. Hyde; Claresholm, R. S. Law; Lethbridge, A. G. Baalim; Carmangay, A. E. Quayle; Barons, J. Donovan; Warner, F. Leffingwell, M.L.A.; New Dayton, G. C. McDonald; Milk River, W. J. Quinn; Taber, Dr. A. Hamman; Foremost, P. E. Baker; Cardston, Ed. J. Wood; Magrath, E. E. Benyon; Raymond, Louis D. King; Medicine Hat, A. F. Andrews; Bow Island, S. G. Jamieson; Redcliff, G. Lydiatt; Irvine, Carl Beny.

FUEL PROBLEM GROWS MORE ACUTE

Permanent As Well As Temporary Solution of Canada's Fuel Problem Must Be Found—Possibilities of Wood Discussed at Galt Conference—Heating Appliances Are Frequently Wasteful—Owing to Canada's Position, International Relations Are Affected

(Continued from last week)

ATTENTION has frequently and specifically been drawn in *The Monetary Times* to the great seriousness of the fuel question in Canada. Last week's issue again took up the subject, with special reference to the conference held by representatives of Western Ontario municipalities in Galt on Fuelless Monday, February 11th last.

Mr. Arthur V. White—who for many years has been directing attention to the coal problem of Canada, chiefly in its broad, national issues, and who has been appealing for statesmanlike action with respect to the problem—contributed special articles to the issues of *The Monetary Times* of 5th January, 1917, and 4th January, 1918, in which he again emphasized certain relationships existing between our resources of electrical energy and our need for obtaining coal, as heretofore, from the United States.[*] The issue of last week also contained addresses by Mr. Arthur V. White and Mr. Clyde Leavitt before the Galt Conference above referred to.

An important resolution, moved by D. B. Detweiler, Kitchener, and seconded by C. Cook, of Brantford was placed before the conference and unanimously passed. This resolution is as follows:—

"That whereas a crisis has arisen in the fuel situation, affecting nearly all parts of the provinces of Ontario and Quebec—the most populous parts of Canada—which menaces our very existence, and which question, apart from the issues of the war, constitutes our gravest national problem;

"And whereas it is imperative that immediate organized effort be arranged to enlist the active support of the Dominion and provincial governments, the Dominion fuel controller, the Canadian Commission of Conservation, all municipalities, urban and rural, labor organizations, manufacturers' associations and boards of trade covering:—

"(a) All possible joint effort to facilitate the handling, storage and conservation of all coal supplies obtainable during the coming spring and summer months.

(b) To secure united action in all parts of the country towards providing substitutes for United States coal by the utilization of wood, peat, lignites and Canadian coal.

(c) To study and provide a solution of the fuel question as a national problem in its widest aspects in order to secure an ample and independent supply of Canadian fuels, should occasion require it.

"Therefore be it resolved, that a committee of seven be appointed to call or arrange to have a general conference of representatives from all parts of the province of Ontario to be held at the earliest possible date with a view to securing prompt, definite and concerted action in this most important matter."

The following seven representatives from various municipalities were then appointed: Mayor Dakin, J. H. Hancock, president board of trade, Galt; W. G. Wiechel, Waterloo; Mr. Cook, Brantford; Mr. Hall, Hespeler; Mr. Kelly, Hamilton, and Mr. Detweiler, of Kitchener, the latter to act as convener.

Mr. Detweiler, referring to the resolution, stated the idea was to take steps similar to those adopted in New York State, where there was an active organization, to increase the production of wood to tide them over the crisis. The committee should also urge the government to have a larger production of coal in Canada, and provision should be made to store coal in the summer when it was possible to get it.

Mr. C. Cook, seconder of the resolution, said that he supported it because he realized the necessity of some action, and he felt the government should take the lead. A general conference was required to arouse the people to the seriousness of the situation.

Present Heating Systems Wasteful.

Mr. Z. A. Hall, M.P.P., of Hespeler, spoke with special reference to the great lack of efficiency obtained from the burning of coal in the average house furnace. This is a subject to which more attention is being directed at the present time in the United States. It is to be expected as the fuel situation becomes more and more strenuous year by year that those using heating apparatus will have to demand from the manufacturer higher grade and more efficient apparatus. It is unfortunate that the public have not already realized that it is to the interest of keeping down their own expenditures to insist upon better and more efficient heating equipment. The manufacturer is usually ready to give the public what they demand. Mr. Hall said:—

"The question has been considered along my own line as a manufacturer, and I think the resolution is quite in order. Mr. Hanna tells us how to conserve food. He educated us, and told us to do these things. Referring to women as real food controllers, I believe women are, to a large extent, the real fuel controllers and conservators of the country. The fuel controller should get around him some of the best mechanical engineers, who understand fuel combustion thoroughly, and get a lot of real, good information as soon as possible along the line of direction for women to teach them how to burn fuel in the stoves and furnaces which we have at the present time.

"I think, too, that municipalities and speculators, especially in the larger cities, should act to prevent the installation of inefficient heating systems. For instance, in the city of Toronto, great lines of houses have been built—probably 100 houses. Next, the owner goes to someone in the heating business and wants a furnace for each of the 100 houses, with the result that during the last eight or ten years furnaces put into the houses have been the very cheapest sort that could possibly be put in, resulting in more fuel being burned in the least economical way, and getting least service and comfort out of what is burned. It is up to the municipalities to see that when houses are built a proper system of heating is installed. Besides, go into factories. A great many factories heat in a most extravagant manner. As a manufacturer, I would be pleased to have some man come around and tell how to heat the plants more economically, because at the present time there is a very great deal of waste. We would only be too anxious for them to come into our factories and tell us how to lessen the amount of fuel consumed. If we, individually, could save only 100 or 200 pounds a day. I know that some factory, burning a carload a day, would be anxious to welcome such people, and I believe the government should appoint a commission of expert technical men to assist our fuel controller and to give directions to assist in burning fuel at the present time.

"We know that up to the present time the railroads of our country have done as much as they can for purposes of conserving fuel by cutting off passenger trains. About 16,000,000 tons of coal are consumed per annum in the province of Ontario. There are, say, 600,000 homes, of which, say, 300,000 are burning coal in the kitchen, and if they were given instructions how to burn coal, no doubt they would be able to save at least one ton of coal in each home, thus making a total saving of 300,000 tons of coal per annum. Heating of houses is a matter for future consideration in the province of Ontario, and there could easily be a saving of twice that amount, or 600,000 tons, if you knew how to run the furnaces and how, properly, to burn what you do get. This means that practical engineers in different municipalities would be of great assistance in order best to tell

A Newspaper Devoted to Municipal Bonds

THERE is published in New York City a daily and weekly newspaper which has for over twenty-five years been devoted to municipal bonds. Bankers, bond dealers, investors and public officials consider it an authority in its field. Municipalities consider it the logical medium in which to announce bond offerings.

THE BOND BUYER
67 Pearl Street New York, N.Y.

what kind of heating apparatus should be installed in their houses."

Proposed Co-operative Purchasing.

Alderman Hurley, of Brantford, said:—

"I am here to represent the fuel committee to-day. I have come to the conclusion that if there is to be any help during the coming winter we must help ourselves, and I am heartily in accord with the resolution. Governments move very slowly. I do not believe that the government can do anything that will help us in the crisis that will be upon us next winter. Last spring and summer a great quantity of coal came into Canada. The amount next year will be far less and the crisis will really be upon us next winter. I do not believe that we can meet this crisis with coal as it will not be possible. In Brantford we have outlined a plan providing 45,000 cords of wood next winter. It was wise, gentlemen, to call a meeting of this kind. You have the best and liveliest bunch of men in this district of anywhere in Ontario. The situation is one that we have got to meet somehow and I expected to hear some concrete suggestions as to how to meet it. Also I expected some proposition to be made whereby we could co-operatively undertake the purchase of standing timber and cut it, thus providing Galt, Brantford, Paris and neighboring towns with wood. Perhaps it is impracticable, freight conditions preventing us from going a long way from home to obtain wood, so we must endeavor to find wood within a few miles radius of our cities; consequently, in Brantford we have endeavored to meet the situation by advertising for wood in several small papers within a radius of 20 miles around the city to find out who had wood for sale.

"If we can supply the people of this province with white coal why not black coal. Organize a commission to take hold of the coal question of this province and buy coal for the entire province and handle as a huge co-operative society. Go into the coal business and furnish the people with coal at cost. Each municipality purchase coal from the commission, the commission to do all ordering, and purchase the entire coal supply for the province of Ontario and despatch supplies to the various towns. If we can do it with hydro, we can do it with coal. There is no use of municipalities going into the coal business as long as dealers are in it. If we organize a commission to purchase all the coal for the province of Ontario and allow the municipalities, as they see fit, to go into the coal business, then the coal miners would not be dealing with jobbers and coal dealers but with one man, one commission, which would simplify the state of affairs from miners' standpoint, inasmuch as when the coal is shipped, the miner makes out his invoice and issues same to the commission."

Further Discussion.

Mayor Dakin, of Galt, spoke as follows.—

"I had expected to hear something definite as to how the situation is to be met. I believe Ontario will still get a certain amount of coal, but the situation might be helped some by restricting the time when coal can be used. The wood question is a local one, because of the heavy freight rates, but the waterways could be used to bring in stocks and the street railways would be used to bring in fuel at night. The wood question is a proposition for every municipality to settle itself. The government should educate the people in the use of coal and the fuel controller should do everything possible to secure an adequate supply for Canada. I am sorry to hear the question of the use of peat dismissed without much discussion. I believe that in Russia, Italy and the European countries peat is used extensively and the matter should be gone into thoroughly."

Mr. Leavitt referring to what Mayor Dakin had said, stated that Fuel Controller Magrath was making every effort to secure coal for Canada with the result that Canada is allotted so much coal per month.

R. T. Kelly, president Hamilton Board of Trade, said:—

"In order to have action taken, it will be necessary to have a lot of public sentiment aroused to the seriousness of the situation. Meetings of this kind will do that more than anything else, and if we are able to impress upon the councils and boards of trade the need for taking drastic measures at once, and supply information so that men may be brought together from all portions of the province, our object may be reached. I believe that we have been getting a real good share of coal as far as Canada is concerned. Speaking to a man from Cleveland a few days ago, I was informed that we were better off in Hamilton than conditions were in Cleveland, right beside the mines, and I would suggest getting after wood now for next year."

Wood Only an Alleviating Agency.

The temporary coal shortage at present existing, as has frequently been pointed out by many persons, may be substantially alleviated, in many districts, at least, by the use of wood fuel. Its use is made more practicable by the present enhanced price of coal. Wood, however, as a wholesale solution of the coal problem of Canada is out of the question, and it has never been the purpose of this journal to other than emphasize the desirability of its increased production and use for the purpose of aiding in such shortages as at present exist. The winter of 1918-19 will probably not be the last of the present coal shortage. We believe that full advantage has not been taken of the information and counsel given in connection with the providing of wood for the present winter. The instruction, however, also holds with regard to getting ready this coming winter for the winter following. Those who have assumed the responsibilities for the present winter's fuel supply will doubtless see that the needs are somehow supplied, but could not more have been done, and be done, in connection with the wood supply?

All domestic sources for the supply of either fuel or power must be thoroughly appreciated and applied so as to render most efficient service. Fortunately, for Canada, she early perceived the advantages of retaining government regulation or control of water-powers not already alienated. Actual development of the powers may be by the government or by other parties under government control. The interest of the public is the essential element to be safeguarded.

The following statement* well indicates the general character of such activity as has been recommended by state fuel controllers:—

"With respect to making effort at the present time to cut hard wood to supplement the fuel requirements for next winter, it is interesting to note a recent statement relating to recommendations made by Commissioner George D. Pratt, member of the committee for the State of New York, co-operating with the United States Fuel Administration. The statement referred to and which in part is quoted below, recommends the immediate establishment of wood yards in all parts of New York State, in order to stimulate the increased accumulation of wood for next winter's use.

" 'With less than a month before the rush of spring work on the farms,' says Commissioner Pratt, 'rural communities are warned to make all possible use of this time in cutting and preparing wood fuel.' He urges the formation of municipal wood yards to keep the matter strongly before the public and to see that every possible cord of wood is cut and distributed.

"Commissioner Pratt in his outline for a municipal wood yard as given to the board of trade, suggests they get a good, vigorous business man to take charge of all operations from the woods to the consumers, and rent or purchase a suitable site and equipment. The yard is then ready for business, wood may be secured from mills waste, from cord wood supplied by farmers, or from stumpage purchased. City laborers can be used to work up the wood and delivery may be made by city teams or trucks. The capital required, according to Commissioner Pratt, is not great, but the advantages to be gained are far-reaching. He urges them to figure on running for the duration of the war and for a year or two longer.

" 'Municipal wood yards are already in successful operation in a number of the towns of the state,' said William G. Howard, assistant superintendent of state forests, who has charge of the Wood Fuel Bureau of the Conservation Commission. 'At Oxford, a town in Chenego County, which has a population of only three thousand, the business men undertook the proposition, and rented a vacant lot. Up to date they have cut and marketed about two hundred cords of wood at a cost to the consumer of approximately $3 per cord.

" 'The availability of fire wood supplies is being taken into account by the fuel administration in apportioning the limited quantity of coal,' continues Commissioner Pratt's letter to the boards of trade. 'Wood should be seasoned for six months or more to make good fuel; therefore now is the time to prepare for next winter in order that the citizens of

Special Reasons Why Certain Estates Should Have Administration Services of this Corporation

Estates composed of various interests should have as Executors a Corporation which has experts in every line of business on its staff or on its Board of Directors. Where an Estate consists partly or largely of real property or investments in the West, the advantages we offer as Executors through our branch offices at Winnipeg, Saskatoon and Vancouver, are quite obvious. We invite correspondence on this subject and mail special literature on request.

your town may provide against another fuel shortage and the suffering that accompanied it.'

"While urging the utilization of all available sources of wood fuel, Commissioner Pratt does not include the sacrifice of shade trees. 'We have never at any time authorized or encouraged this practice,' he writes, 'for we do not believe the amount of fuel to be obtained in such a manner warrants the continuance of such a practice. These trees require a long time to grow and their value is usually far greater for shade purposes than for fuel.'

"Within the last fortnight the United States Fuel Administration has issued a bulletin entitled 'Burn Wood and Save Coal—An Appeal to the Patriotism and Thrift of Farmers and Villagers.' This bulletin states:—

"'Look the situation squarely in the face; these are war time and our country is short of coal—50,000,000 tons short.' It ends with this appeal:—

"'This isn't a time to think of profits, yet wood can be handled at a very attractive margin. You know your own local conditions better than anyone else. But whether you make a wood-cutting bee—or go at it as a business enterprise. Cut Wood!'"

The Commission of Conservation, Ottawa, under the authorship of Mr. Clyde Leavitt—whose address at Galt was quoted in *The Monetary Times* of last week—has issued an important bulletin entitled, "Wood Fuel to Relieve the Coal Shortage in Eastern Canada," which may be had by application to the commission. Mr. Leavitt summarizes how wood fuel may help as follows:—

"Experience has shown that it is altogether feasible to materially relieve the coal shortage by a more extensive use of wood fuel in at least the following directions:—

"1. Farmers and rural communities generally, within easy reach of wood supplies, should make as general use of this fuel as possible, to relieve the demands for coal and freight cars alike. To a certain extent this would involve reversion to the old-fashioned wood-stove which has become more or less obsolete, even in such communities. This, will, of course, be feasible to a lesser extent in the larger towns and cities.

"2. The general substitution of wood for coal in furnaces and stoves during early autumn and late spring, as well as during mild weather in the winter, when only a moderate fire may be required. The United States Forest Service advises that, where wood is to be burned in a stove or furnace intended for coal, it will be found desirable to cover the grate partly with sheet iron or fire brick, to reduce the draught. If this is not done, the wood is wasted, by being consumed too fast, and while it makes a very hot fire in a furnace, it may damage the fire box.

"3. The heating by wood, of churches, lodge-rooms, halls, etc., where warmth for only a limited period of time may be necessary.

"4. In many cases it will be quite feasible to eke out limited stores of coal by burning wood in the day-time, reserving coal for holding the fire over night.

"5. Furnaces may be run low, keeping the house in general only warm enough to prevent water pipes from freezing, supplementing this by the use of wood fuel in stoves or grates to keep the living and dining rooms comfortable.

"6. Wood can be used much more generally than at present as a substitute for coal in cooking.

"7. As Senator Edwards has pointed out, a great saving of fuel can be accomplished by making windows and doors tight against the entrance of cold air from the outside, through the use of weather stripping, etc.; also, by the insulation of furnaces and pipes with coverings of asbestos and other suitable material. Further, wherever possible, the burning of mill waste in incinerators should be avoided by saw-mill owners, and this material reserved for heating during the ensuing winter."

INCREASE IN EDMONTON COAL OUTPUT

An increase of more than 80,000 tons in the output of coal by the mines of the Edmonton district is reported by the provincial mines branch for the eight months ending August 30th. The figures are 497,315 tons as compared with 414,881 tons for the corresponding period last year, and represent a considerable expansion in mining activity by the local operators. For the entire province the production for the eight months, according to the figures reported to the government, was 4,009,500 tons.

LOCAL PRICE INVESTIGATION COMMITTEES

A Chance for Consumers to Satisfy Themselves as to Whether They Are Being Overcharged

The Canada Food Board says:—

"Consumers of Canada have now an opportunity of ascertaining whether the prices they pay for foodstuffs are reasonable and fair or possible extortions by alleged profiteers. All they have to do in each municipality in Canada is to ask their municipal council to appoint a Fair Price Committee to investigate the prices asked by retailers and to draw conclusions as to whether these prices are fair and reasonable. These fair price committees will then publish their findings in the form of lists.

"In this way the consumers will make sure whether they are paying prices which are unreasonable and unfair or not. It may be that the prices which the committee considers to be fair and reasonable will not be any lower than the present prices charged by retailers. In some cases they may be higher. But that need not bother the consumer so long as he is satisfied through the investigation of the impartial fair price committee within his own municipality that the prices published indicate a fair and reasonable standard to guide both consumer and retailer, having in mind war conditions and the unsettling of pre-war prices.

"If there is a desire on the part of the consumers to find out just where they stand in regard to prices which they have to pay for foodstuffs, they now have a golden opportunity to have the matter dealt with once and for all under the provisions of the recent Order-in-Council, fathered by the Department of Labor, relative to the appointment of municipal fair price committees.

"In some quarters it is said that fair price committees will not solve the food problem present in most households. It may be pertinent to suggest that municipal fair price committees first should be given a chance to show that they can find a solution before the principle of municipal fair price committees is condemned out of hand. It is a good rule to support measures that seem to tend in the right direction. A similar programme has been effected in the United States.

"The virtue of this Order-in-Council, giving authority to municipalities to appoint fair price committees to investigate the prices consumers have to pay, lies in the publicity that will be given to the findings. In this way public opinion will be informed, and enlightened public opinion may be trusted to co-operate in all national food efforts if it knows the facts. You can always give anything a thorough trial once."

CANADIAN COMMISSION IN RUSSIA

The personnel of the Canadian commission which will have charge of Canada's commercial interests in Russia was announced by the government on October 22nd. It consists of the following persons:—Mr. C. F. Just, chief Canadian trade commissioner in Russia; W. D. Wilgress, Canadian trade commissioner at Vladivostok; Col. J. S. Dennis, Liaison officer of the Canadian Siberian Expedition; Mr. Ross Owen, transportation officer in Russia of the Canadian Pacific Railway Company.

S Stafford, Limited, $50,000; W. S. Stafford, W Bachia, L. S. Stafford. Commercial Agencies, Limited, $40,000; W Douglas, J Callahan, D. Douglas. Mabee Condensed Milk Company, $1,500,000; A W. Hunter, J C Thompson, C H. Kemp.

PUBLICATIONS RECEIVED

Report of the Secretary and Registrar of Ontario for 1917.—Contains an alphabetical list of companies incorporated in the province during the year and other changes affecting the standing of companies here.

Canadian Quarterly Review for August, 1918.—Published in French by the Alumnae Association of the Montreal Polytechnique School. The August issue contains some excellent articles upon points of current interest in Canada, and a review of books recently issued here.

Ontario Railway and Municipal Board.—12th Annual Report for the year ended 31st December, 1917. During the year there were 492 formal applications to the board. All of those in which the parties were ready to go to trial have been disposed of. There were 74 applications involving the validation of municipal debentures, 25 assessment appeals, and much other business connected with the operation of public utilities, etc.

Imperial Institute Bulletin.—January-March, 1918. This quarterly journal, which has been issued for the past 16 years, is a record of progress in agriculture and industry throughout the British Empire, but is devoted more especially to the tropical countries. This issue describes especially the resources of Burma, the work of the institute in connection with British cotton cultivation, the manufacture of natural dye stuffs, coffee and tea from Uganda, and the utilization of rice and its by-products.

Alexander Hamilton Institute.—Four booklets have recently been issued by this institute entitled respectively: "From the Banks' View Point," "Cashing in Foreign Trade," "Investing in Bank Shares," and "The Foreign Exchange Field." They deal with questions affecting our banking and foreign exchange. The last-mentioned is by Mr. L. M. Jacobs, who has made a special study of international monetary and exchange questions. Mr. Jacobs is familiar with these topics not only as a student but from first-hand knowledge, having travelled extensively while engaged with the National City Bank. He is now a vice-president of the International Banking Corporation and President of the International Bank.

Army Anthropometry.—The Prudential Insurance Company of America, in behalf of the Committee on Anthropology of the National Research Council, has recently published an extended discussion of the scientific and practical aspects of army anthropometry and medical rejection statistics, of special interest and value to those particularly concerned with questions involved in the carrying out of the medical provisions and physical requirements under the selective draft. The publication includes a review of the recruiting statistics of all the principal foreign countries, and the medical causes of rejection in the different armies, with some brief observations on the corresponding rejection statistics of The Prudential. The investigation brings out the wide variation in the physical proportions of recruits and the urgency of more strictly scientific physical standards. The publication is the result of investigations made in behalf of the Committee on Anthropology of the National Research Council, by Doctor Frederick L. Hoffman, third vice-president and statistician of The Prudential. The publication is for gratuitous distribution to those who have a scientific and practical interest in the subject-matter of the discussion.

The A. B. C. of the Federal Reserve System.—By Edwin Walter Kemmerer, Ph.D., Professor of Economics and Finance in Princeton University. This is a book which is instructive to the experienced banker, as well as clear to the layman. The Federal Reserve System has now been in operation in the United States for four years. As the author points out, it was established to remedy certain recognized weaknesses in the United States banking system. From 1914 to 1917, however, the banks were in a very strong condition, as a result of the general prosperity, increasing wealth and inflow of gold. The credit system was expanding, but the base—viz., gold, was also growing in proportion. The Federal Reserve banks were accordingly, he says, regarded as expensive luxuries. This period sufficed, however, to place them in good working order, so that they were well prepared for the strain during the past year. As a result of the experience of the period 1917-18, Mr Kemmerer states: "The reserve system has become established upon a basis of confidence and respect, even in fact of admiration, among both bankers and business men; and its future therefore seems assured, so long as good management deserves the support now enjoyed." There were four serious defects of the old system of local banks. These were decentralization, inelasticity of credit, cumbersome exchange and transfer system, and defective organization as regards relationship with the federal treasury. The author fully describes these defects, and then illustrates how the new machinery remedies them. The old banking machinery is retained in full, but is supplemented by 12 federal reserve banks in 12 federal reserve districts, whose chief function is to do business with the local banks in their respective districts, rather than with the public. These act as rediscount institutions, and exercise great control over the credit system. Appendices give the federal reserve law with amendments, and combined balance sheet of the 12 banks. Both the book itself and the act are fully indexed. Published September 30th, 1918, by the Princeton University Press, Princeton, N J. Price, $1.25 net.

OFFICIAL PROSPECTUS

The proceeds of this Loan will be used for War purposes only and will be spent wholly in Canada

THE MINISTER OF FINANCE OF THE DOMINION OF CANADA offers for Public Subscription the

VICTORY LOAN 1918

$300,000,000 5½% Gold Bonds

Bearing interest from November 1st, 1918, and offered in two maturities, the choice of which is optional with the subscriber as follows.

5 year Bonds due November 1st, 1923
15 year Bonds due November 1st, 1933

Principal payable without charge at the Office of the Minister of Finance and Receiver General at Ottawa, or at the Office of the Assistant Receiver General at Halifax, St. John, Charlottetown, Montreal, Toronto, Winnipeg, Regina, Calgary and Victoria.

Bonds may be registered as to principal or as to principal and interest, at any of the above-mentioned offices.

Interest payable, without charge, half-yearly, May 1st and November 1st at any branch in Canada of any Chartered Bank.

Principal and Interest payable in Gold
Denominations: $50, $100, $500 and $1,000

Issue Price: 100 and Accrued Interest

Income Return 5½% per Annum

Free from taxes—including any income tax—imposed in pursuance of legislation enacted by the Parliament of Canada.

The proceeds of the Loan will be used for war purposes only, including the purchase of grain, foodstuffs, munitions and other supplies, and will be spent wholly in Canada.

Payment to be made as follows:
10 per cent. on application; 20 per cent. January 6th, 1919;
20 per cent. December 6th, 1918; 20 per cent. February 6th, 1919;
31.16 per cent. March 6th, 1919.

The last payment of 31.16 per cent. covers 30 per cent. balance of principal and 1.16 per cent. representing accrued interest at 5½ per cent. from November 1st to due dates of the respective instalments.

A full half year's interest will be paid on May 1st, 1919, making the cost of the bonds 100 and interest.

Subscriptions may be paid in full at the time of application at 100 without interest; or on any instalment due date thereafter together with accrued interest at the rate of 5½ per cent. per annum.

This Loan is authorized under Act of the Parliament of Canada, and both principal and interest are a charge upon the Consolidated Revenue Fund.

The Amount of this issue is $300,000,000, exclusive of the amount (if any) paid for by the surrender of bonds of previous issues. The Minister of Finance, however, reserves the right to allot the whole or any part of the amount subscribed in excess of $300,000,000.

Conversion Privileges

Bonds of this issue will, in the event of future issues of like maturity, or longer, made by the Government, during the remaining period of the War, other than issues made abroad, be accepted at 100 and accrued interest, as the equivalent of cash for the purpose of subscription to such issues.

Payments

All cheques, drafts, etc., covering instalments, are to be made payable to the Credit of the Minister of Finance. Failure to pay any instalment when due will render previous payments liable to forfeiture, and the allotment to cancellation. Subscriptions must be accompanied by a deposit of 10 per cent. of the amount subscribed. Official Canvassers will forward subscriptions or any branch in Canada of any Chartered Bank will accept subscription and issue receipts.

Subscriptions may be paid in full at time of application at 100 without interest; or on any instalment due date thereafter together with accrued interest to time of making payment in full. Under this provision, payment of subscriptions may be made as follows:—

If paid in full on or before Nov. 16th, 1918, par without interest, or 100 per cent.
If remaining instalments paid on Dec. 6th, 1918, balance of 90 per cent. and interest, ($90.48 per $100.)
If remaining instalments paid on Jan. 6th, 1919, balance of 70 per cent. and interest, ($70.80 per $100.)
If remaining instalments paid on Feb. 6th, 1919, balance of 50 per cent. and interest, ($51.04 per $100.)
If remaining instalment paid on Mar. 6th, 1919, balance of 30 per cent. and interest, ($31.16 per $100.)

Denomination and Registration

Bearer bonds, with coupons, will be issued in denominations of $50, $100, $500, and $1,000, and may be registered as to principal. The first coupon attached to these bonds will be due on May 1st, 1919.

Fully registered bonds, the interest on which is paid direct to the owner by Government cheque, will be issued in denominations of $50, $100, $500, $1,000, $5,000, $10,000, $25,000, $50,000, $100,000, or any multiple of $100,000.

Payment of Interest

A full half year's interest at the rate of 5½ per cent. per annum will be paid May 1st, 1919.

Form of Bond and Delivery

Subscribers must indicate on their application the form of bond and the denominations required, and the securities so indicated will be delivered by the bank upon payment of the subscription in full.

Bearer bonds of this issue will be available for delivery at the time of application to subscribers desirous of making payment in full. Bonds registered as to principal only, or fully registered as to principal and interest, will be delivered to subscribers making payment in full, as soon as the required registration can be made.

Payment of all instalments must be made at the bank originally named by the subscriber.

Non-negotiable receipts will be furnished to all subscribers who desire to pay by instalments. These receipts will be exchangeable at subscriber's bank for bonds on any instalment date when subscription is paid in full.

Form of Bonds Interchangeable

Subject to the payment of 25 cents for each new bond issued, holders of fully registered bonds without coupons, will have the right to convert into bonds with coupons and holders of bonds with coupons will have the right to convert into fully registered bonds without coupons, at any time, on application to the Minister of Finance or any Assistant Receiver General.

Forms of application may be obtained from any Official Canvasser, from any Victory Loan Committee, or member thereof, or from any branch in Canada of any Chartered Bank.

Subscription Lists will close on or before November 16th, 1918

DEPARTMENT OF FINANCE, OTTAWA, October 28th, 1918 141

Behind the Gun the Man — Behind the Man the Dollar
Make Your Dollars Fight the Hun

PERSONAL NOTES

Mr. Zepherin Hebert, who has been elected director of the Montreal City and District Savings Bank, succeeding the late Sir Evariste Leblanc, is a well-known business man of Montreal and the first French-Canadian to fill the office of president of the Montreal Board of Trade. He is a native of Montreal, 52 years of age, and is president of the old-established house of Hudon, Hebert and Company, Limited, wholesale grocers and exporters.

Baron Beaverbrook, head of the propaganda department of the British government, has resigned. His resignation was due to ill-health and the necessity of undergoing an operation. Baron Beaverbrook is a Canadian, and as Sir Max Aitken was official eye witness with the Canadian troops on the front in France throughout 1915. In December, 1916, King George conferred a peerage on him and he assumed the title of Baron Beaverbrook. In February last he was appointed Chancellor of the Duchy of Lancaster and head of the propaganda department.

OBITUARY

Mr. Portch, actuary of the Franklin Life Insurance Company, died recently in Montreal, where he had been attending the convention of the Actuarial Society. He was well known in Canada, having at one time been employed by the Canada Life.

Mr. Alvin Roy Burkholder, one of Ottawa's prominent business men, died on October 23rd, in a local hospital. He was secretary-treasurer of the firm of F. D. Burkholder, Limited, Bank Street, for the last few years, previous to which he acted as bookkeeper for the same firm.

Mr. John MacEwen died on October 26th, at the Private Pavilion, Toronto General Hospital, in his 56th year. Mr. MacEwen was born in Kingston, Ont., the son of the late Ewen MacEwen, barrister of that place, but came to Toronto at an early age. For the past 23 years he was connected with the Norwich Union Fire Insurance Society, 14 of which were spent in Montreal as superintendent.

Mr. W. F. Cowan, president of the Standard Bank of Canada, who died of heart failure at his home in Oshawa on October 27th, was one of the most prominent bankers and business men in Canada. Born in Trillick, County Tyrone, Ireland, 88 years ago, he came to Canada at an early age, and in the sixties opened a drygoods business in Toronto on Yonge St. The business was later transferred to Brooklin, Ont., and afterward to Oshawa, where Mr. Cowan branched out into other industries. He was president of the Standard Bank since 1876, and at the time of his death was president of the Oshawa Malleable Iron Works, and was connected with other important enterprises.

COBALT ORE SHIPMENTS

The following is a statement of the shipments of ore, in pounds, from Cobalt Station for the week ended October 25th, 1918 —

Dominion Reduction, 88,000; Buffalo, 308,055; Nipissing, 371,360; McKinley Darragh, 146,042; Mining Corporation, 152,819. Total, 1,066,276.

The total shipments since January 1st now amount to 25,771,13[illegible] pounds, or 12,885.6 tons.

MONEY MARKETS

Messrs. Glazebrook and Cronyn, exchange and bond brokers, Toronto, report the following exchange rates to *The Monetary Times*:—

Sterling demand in New York, 4.75 7-16.

Bank of England rate, 5 per cent.

LATEST VICTORY LOAN FIGURES

Up to 6 p.m., October 31st, the following figures of loan subscriptions had been received at headquarters in Toronto:—

British Columbia	$ 4,369,050
Alberta	1,929,150
Saskatchewan	1,250,000
Manitoba	2,506,800
Ontario (including Toronto)	45,614,800
Quebec (including Montreal)	13,553,050
New Brunswick	1,000,000
Nova Scotia	2,136,400
Prince Edward Island	103,800
Grand total for the Dominion	$72,463,050

Subscriptions in Toronto are reported at $18,054,050, and in Montreal at $6,581,150. A list of large subscriptions appears elsewhere in this issue.

A later report, made public Thursday morning, gives the Ontario figures at $55,212,000, and a total for Canada of $82,060,250. This includes business to the end of October 31st in Ontario, but not in the other provinces.

AUSTRALIAN LOAN A SUCCESS

Acting Premier Watt of Australia stated on the 30th of October that, in view of the highly satisfactory response to the war loan, it will not be necessary to introduce compulsory subscription. The amount actually raised so far is $206,252,000. The bill legalizing compulsory subcriptions to State loans, however, Mr. Watt said, would be passed, and will be made applicable to future loans. The total number of subscribers was 212,000.

WEEKLY BANK CLEARINGS

The following are the bank clearings for the weeks ended October 27th, 1917, and October 24th, 1918, respectively, with changes:—

	Week ended Oct. 24, '18.	Week ended Oct. 27, '17.		Changes.
Montreal	$ 89,936,470	$ 90,978,377	—	$ 1,041,907
Toronto	73,835,857	60,833,030	+	13,002,827
Winnipeg	68,967,577	85,263,235	—	16,295,658
Vancouver	11,424,630	10,202,502	+	1,222,128
Ottawa	7,128,306	5,414,650	+	1,713,656
Calgary	8,308,094	10,802,826	—	2,494,732
Hamilton	5,726,215	5,529,191	+	197,024
Quebec	4,380,913	3,686,788	+	694,125
Edmonton	3,704,174	3,362,430	+	341,744

Sherbrooke	963,182	719,996	+	243,186
Kitchener	588,046	640,459	—	52,413
Prince Albert	347,249	....		....
Totals	$305,388,665	$301,320,061	+	$ 2,554,045

The Toronto bank clearings for the current week are $60,699,080, compared with $64,025,091 for the same week in 1917, and $61,433,599 in 1916.

The operation of the Cobalt Mines of the Mining Corporation of Canada, formerly managed by the late Charles Watson, who met his death in the recent marine disaster near Skagway, will be conducted by the present staff under the direction of M. F. Fairlie. Mr. Fairlie has heretofore been manager of the Cobalt Reduction Company of the Mining Corporation.

ticle "Victory Loan Chart" on page 16 of this issue)

When you have bought to the limit

Will you make it a point to impress on all those who look to you for information and financial guidance how important it is that this loan be a success, a great success?

The Financial and Commercial men of Canada should be fully posted regarding all details of the Victory Loan 1918—prepared to answer fully and correctly all questions regarding it—to spread information and enthusiasm.

Explain the security of Victory Bonds—the good rate of interest they pay, the advantage of saving and thrift to buy Bonds, and last but not least, the direct connection between this loan and our military efforts.

Don't consider that your help is of little importance.

It is desired that everyone shall do his share.

It is an "action" along the entire Canadian front.

From the standpoint of our national honor, our military success and our commercial and industrial future, nothing approaches in importance the success of the Victory Loan 1918.

Buy Victory Bonds to the limit of your ability—induce others to buy to the limit of their resources

Issued by Canada's Victory Loan Committee,
in co-operation with the Minister of Finance
of the Dominion of Canada

101

The Reasons Why—

THIS is what war-time conditions have done in the case of the telephone business:

Increased the cost of new telephone construction from 50 to 100 per cent or more—

Doubled the price of steel, copper wire, platinum and lead—

Increased the cost of all labor that goes into telephone plant and equipment—

Made higher wages necessary for telephone employees—

Increased the traffic so that a larger number of employees is necessary.

Drawn to the colors a large proportion of skilled male employees, making ordinary upkeep both difficult and expensive—

Made it necessary to give the subscriber more service to take care of his thriving business—

And made it necessary also for us to get some increase in rates to cope with mounting costs.

We are therefore asking for what is necessary. We can see no other solution.

The Bell Telephone Company
of Canada

REPORT ON HYDRO-ELECTRIC COMMISSION

Mr. E. R. C. Clarkson, auditor, of Toronto, has completed an investigation into the accounts of the Ontario Hydro-Electric Commission for the year ended October 31st, 1917. This report will shortly be followed by a further one for the succeeding year. Mr. Clarkson criticizes one or two points in the Hydro's administration but, generally speaking, the report is distinctly favorable to it.

He says: "I report that the accounts of the commission are, and have been, well and sufficiently kept, so as to distinguish between expenditures of a capital nature, chargeable to construction, and expenditures which are chargeable to the cost of operations, and that the vouchers supporting all expenditures made in the period under review have, with few exceptions, been adequately and properly certified to by the chief engineer of the commission or other responsible officers. My examination of the accounts indicates that certain alterations in their form can be made with benefit. Some improvements which I recommended having already been effected. All information required by me for the purposes of the audit have been furnished."

WINNIPEG STREET RAILWAY FARES UP

The Winnipeg Electric Railway Company will be permitted by the city temporarily to charge a flat five-cent fare, except for children's and workmen's tickets, which will be sold at the rate of eight for 25 cents and six for 25 cents respectively.

An exhaustive investigation of the company's business is to be made by the Public Utilities Commissioner to establish whether the increased rates are to be permanent. The city's action will avert the threatened strike of motormen and conductors, set for November 1st.

VICTORY LOAN SUBSCRIPTIONS

List of Subscribers Whose Names Have Been Announced During the Past Week

The following is a list of large subscribers to the Second Victory Loan.—

LIFE INSURANCE COMPANIES.

Sun Life Assurance Company, Montreal	$10,000,000

Under a ruling of the War Trade Board, applications for import licenses covering gold-plated, silver-plated or gilt jewellery, will be approved, providing applications are otherwise in order. This ruling of the War Board is made in connection with the restriction on jewellery imports which went into effect on September 14th. The ruling extends also to gold and silver plated pens, pencils, cigarette cases, vanity boxes, thimbles and silver thimbles.

VICTORY LOAN 1918

Dunlop Rubber Company

Subscribes $1,000,000

WE doubt if the Directors of this Company ever made a quicker decision than when they resolved, on behalf of the Company, to subscribe for **One Million Dollars'** worth of the forthcoming Victory Loan.

¶ This decision, to us, seems to justify the conclusion that the security back of Canada's Victory Bonds is so good that it requires no discussion, and that the appeal to Canadians to buy Victory Bonds is so justifiable that it permits of no alternative.

REPORT ON SASKATCHEWAN MUNICIPALITIES

Past Year Has Been Prosperous, Especially in Rural Sections of the Province

According to the annual report of the Saskatchewan Department of Municipal Affairs for the year ended April 30th, 1918, the municipalities of the province have, with a few exceptions, survived a difficult period. The report says:—

"Wealthier by experience gained through the passing of years, Saskatchewan's municipal institutions have progressed through the 12 months just passed. They have seen sunshine and shadow—prosperous times whose bright outlook proved in some instances too rosy, and the reaction which gave each municipality a more sober and steady attitude towards the cause and purpose of its existence. That municipality is stronger and more self-reliant whose fate it was to struggle for a time.

"At the time of writing, Saskatchewan has 300 rural municipalities and in each of these prosperity has abounded a condition to be expected in any agricultural community when a world-war is sending skyward the prices of natural products. As at the end of 1916, many rural municipalities closed their books last December showing cash surpluses of over ten thousand dollars each.

"Our seven cities, 75 towns and 313 villages have nearly all advanced in a substantial and satisfactory manner. The unusual prosperity existing six or seven years ago, however, caused some of them to install waterworks systems which should have been done without, and which proved to be far in advance of the ability of the municipality to pay. Somewhat similar undertakings caused one other urban municipality to encounter trouble in meeting its debenture coupons during the past year. Notwithstanding the era of prosperity through which Saskatchewan has passed, and which is often harder to stand than adversity, there are very few municipal institutions in actual difficulty. The percentage is less than three-quarters of one per cent. Statements on this condition issued from points beyond the limits of the province would indicate a different condition, but they are based on innocence of facts.

Report on Incidence of Taxation.

"In the last annual report of this department it was forecast that, at the request of several citizens of the province, an expert on taxation matters who lived beyond Saskatchewan's limits, would be asked to make a survey of the incidence of taxation in our urban municipalities. Doctor Robert Murray Haig, assistant professor of economics, Columbia University, New York, consented to undertake the work, and after investigating the many-sided question and visiting all our cities and several towns and villages, issued a statement which has since been printed and distributed widely. The report, which speaks for itself, is in demand not only in our nine provinces, but in the United States. Any reiteration herein of its contents would be redundant. It is mailed free upon request to those who are interested in its contents.

Assessment Valuations.

"As intimated in our last report, the question of making a proper valuation of land for assessment purposes proves to be a difficult task. During the last year, however, assessors generally have brought about changes which are more in harmony with actual values. The obsolete catalogue prices of the far flung subdivision of an urban centre are no longer a guide. The public is commencing to see values as they are There has been a tendency, however, in the past to take as an assessment valuation either the maximum selling price under good times, or a sacrifice selling price when there is little demand for real estate Value, present, potential, or otherwise, can hardly be expected to follow the fluctuations of a real estate market especially when a world-war holds the attention of a score of nations and diverts funds in large quantities from the usual pursuits of peace. Generally, however, the municipal assessors of Saskatchewan have met the situation in a practical and reasonable manner In some urban centres valuations for assessment purposes might yet be reduced without causing injustice, while at the same time, in a large number of our rural municipalities, the average valuation per quarter-section might be reasonably raised.

"At the last session of the legislature a new statute, 'An Act with respect to Town Planning and Rural Development,' was passed This bill had been in preparation for some time and it was not until after it had been submitted to municipalities within the province and carefully scanned by Mr. Thomas Adams, town planning expert, Commission of Conservation, Ottawa, that it was presented to and passed by the legislature.

"In the minds of too many, town planning generally is not regarded as important. The impression that the principles of sane arrangement of the layout of townsites in villages, towns and cities, and even of farms and farm land in the rural areas, are not vital is erroneous. The subject is wide and in some centres throughout Canada and the United States includes in a most practical way the housing of thousands of workers at munition plants and other industrial pursuits. In the Old Country, it is stated, the government has found it profitable to establish neat and commodious residences near munition plants in order to insure a good and permanent class of workers. It is also stated that recreation is provided for the workers in order to make them healthier and more contented. A municipal moving picture theatre has even been produced, but a step of this kind we scarcely expect to see in our province for some decades at least.

"A director of town planning will be associated with the department of municipal affairs By-laws and regulations for municipal institutions will be suggested for the purpose of enabling these self-governing bodies to insure that townsites will be laid out on modern healthful lines rather than for the purpose of speedy sale and high profits for the vendors.

"This new portion of the statutes, which comes into effect on the first day of July next, should engage the attention of all who are interested in proper municipal development.

Union Hospitals.

"At the first session of the legislature in the year 1917, the Union Hospital Act was revised and consolidated. Experience had shown some respects in which this portion of the law could be bettered. It is now possible for two or more rural municipalities and an unlimited number of urban municipalitites to unite for the purpose of establishng a union hospital for the benefit of all their respective ratepayers. An easy method is outlined whereby a hospital committee is formed to promote the proposal. In due course a regular hospital board takes office whereat each rural municipality is entitled to two members, each village to one, each town to two, and each city to three members. These municipal representatives are not paid a salary but are given expenses and mileage for not more than 15 meetings during each year. At the time the act was passed it was expected, from sentiments often expressed, that many municipalities would take advantage of thus securing by a comparatively easy method a hospital convenient to each community. The results, however, were somewhat disappointing. One cause which retarded progress was the difficulty which the delegates experienced in deciding upon a point at which the hospital should be built. Sometimes jealousies between two towns thwarted the erection of the hospital. Again, it was noticed in more than one instance that rural municipalities did not relish the idea of contributing their funds to the erection of a large building in some town which did not form a part of the rural municipalities concerned. It is readily seen that a policy of the kind is shortsighted, but its existence was noticed nevertheless.

"The high cost of labor and building material is another deterring factor. The prices of medical and surgical supplies have also risen at an abnormal rate since the outbreak of the war, thus discouraging many communities from undertaking a union municipal hospital.

"The desirability of having a hospital at a junction point, or at some centre whch is most easily reached by rail, is evident During the past year, however, two union hospitals were erected and two others are under way. Success achieved by those already in operation, the quick relief for the sick and suffering, and the mental comfort to the ratepayers who know that in case of emergency a hospital with a competent staff is near at hand, are greater than anyone is prepared to estimate.

The Municipalities Seed Grain Act.

"A new Seed Grain Act was passed at the session of the legislature which came to a close on December 15th last. One of the new features therein is the provision whereby the council may raise without by-law, but under the authority of a resolution of the council, an amount for the purpose of purchasing seed grain for distribution to unfortunate settlers not exceeding $2,000. In all other cases the permission of the majority of the ratepayers is required. During the past

winter much seed grain was purchased and distributed by municipal councils in their public-spirited efforts to see that every possible acre was seeded, and to make sure that no areas would go unproductive through lack of municipal effort. Many municipalities undertook this work because it was war time, and the allies needed the product of our prairies. Under normal conditions municipal councils are wary of indulging in seed grain distribution owing to difficulties so often experienced in securing repayment of assistance thus advanced.

The Hotel Act.

"It may seem more than passing strange that the Hotel Act should now be mentioned in a report on municipalities for any particular year. It indeed indicates a change in the control of places of public accommodation. One reason for this rests in the fact that at the end of 1917 the office of the director of public accommodation, as well as the Hotel Act itself, ceased to exist and the main provisions of the said act were incorporated in municipal legislation.

"It is in the interests of every municipality, whether urban or rural, to see that restful and comfortable accommodation is ensured in each community for the travelling public. The farmer driving to his market place, possibly 12 or 20 miles away, has a right to expect at that point some well-appointed place where he, his family and his horses, may receive warmth and nourishment. It should be noted that the hotel in the average town or city is not used so much by the residents as by travellers and others whose only home while in the town or city is the hotel. The impression of a community which a person often carries away is based on the comfort and accommodation as well as the welcome which he received at the local hostelry. Municipalities may assist in establishing rest and reading rooms and in encouraging proper places of accommodation. A rural municipality may also contribute to this worthy end. While in some outlying spots the traveller is sometimes disappointed in his desire to secure a good meal or a comfortable resting place, it may be said that our municipalities generally are so alive to their responsibilities in this connection that the travelling public secures, as a rule reasonable accommodation in the province.

Municipal Borrowings.

"A continuation of last year's attitude towards borrowing is plainly in evidence. At a period when rates of interest are high and labor is scarce, councils have wisely curtailed expenditures and have kept down to a minimum any necessary loans. In a few cases where a reasonable supply of water and fire fighting apparatus was a necessity, permanent loans were undertaken, but in no large number. Even temporary borrowings were largely avoided and it was not uncommon during the year to learn from some municipalities that they had carried on their work during the year, had supplied with funds school districts dependent on them, and performed a moderate amount of public works, without borrowing from a bank or other money-lending institution. This independent condition is indeed to be envied, and more and more are our municipalities reaching it.

"It is noted with gratification that local issues of debentures are being purchased more than ever by residents of the community.

Greater Production.

"Saskatchewan's municipal councils were not slow in sounding the slogan for greater production. They helped it in a very practical way and many of the more public spirited officials did much in disseminating information on the needs of the allies at this critical time, and of the desirability of making two blades of wheat grow where only one had grown before. It was recognized that the municipal council is close to the average ratepayer and from various sources came demands upon the time and energies of our municipal officials, which in practically every case met with a hearty and loyal response."

Queen's University, Kingston, Ont., has decided to begin a campaign to raise $375,000 for an endowment. The late Chancellor of the University, Mr. James Douglas, of New York, agreed to give dollar for dollar, an amount up to $500,000, providing a corresponding amount was raised by the university. Part of the funds will be used to establish research work in economic and other subjects.

FOOD COMMODITIES IN CANADA

Reports Received by Labor Department Indicate Ample Supplies of Food—Distribution of Stocks Among Provinces of Canada

The Cost of Living Branch of the Department of Labor, makes the following report to the Honorable T. W. Crothers, minister of labor, concerning goods in cold storage throughout the Dominion. Totals for all the goods reported on September 1st, 1918, are shown for the Dominion and each of the largest cities. Comparisons are made with a year ago and a month ago, in each case employing the reports of firms for which we possess records for dates involved. The reports are now being forwarded to us more promptly and satisfactorily by the cold storage concerns than formerly, but there is still great room for improvement.

Reports not Complete.

The reports of the following firms are not included in the totals for September 1st, 1918:—New Brunswick Cold Storage Company, St. John, N.B.; Gunns Limited, Montreal, Que.; P. Poulin & Company, Montreal, Que.; E. Morgan, Delhi, Ont.; F. W. Fearman, Hamilton, Ont.; Michipicotin Fish Company, Sault Ste. Marie, Ont.; Swift-Canadian Company, Fort William, Ont.; Manitoba Abattoir & Packers, Winnipeg, Man.; Armstrong Trading Company, The Pas, Man.; Armstrong Trading Company, Winnipeg, Man.; Sigurdson Fisheries, Hnausa, Man.; Armstrong Trading Company, Winnipegosis, Man.; Winnipeg Fish Company, Selkirk, Man.; Gordon, Ironsides & Fares, Saskatoon, Sask.; Gordon, Ironsides & Fares, Regina, Sask.; Swift-Canadian Company, Saskatoon, Sask.; Swift-Canadian Company, Regina, Sask.; Swift-Canadian Company, Moose Jaw, Sask.; Canadian Fish and Cold Storage Company, Prince Rupert, B.C.; Canadian Fishing Company, Vancouver, B.C.

The quantity of butter in storage is excessive. It is not true that the whole trade is involved in this hoarding, but certain members of the trade are holding larger amounts than is right and the law allows. It is gratifying to note that the food board has already taken steps to force this butter into channels where it will be used.

Cheese, Eggs and Meat.

The amount of cheese in storage at the first of the month is less than a month ago and very much less than a year ago. There is very little change in the amount of eggs in storage. It is not yet the time of year to move eggs from storage and apparently very few were put in during August. The stocks of oleomargarine have declined. This will be a source of gratification to all concerned. The total stocks of pork are about the same as last month, but a larger proportion of it is completely cured and available for immediate shipment. The stocks of beef have increased. This fact agrees with other evidence that no new high records of prices should occur in the near future. Evidently the stocks of mutton and lamb on hand a month ago have been sold for consumption as we suggested. The stocks have declined very decidedly. The stocks of fowl, while increased above last month, are still insignificant.

Fish Stocks Greatly Increased.

The stocks of fish are greater than a month ago and much greater than a year ago. The only gratifying thing in this is that the submarines operating off the Atlantic coast apparently have not stopped the catching of fish. We would suggest to the fish dealers that they give greater encouragement to the consumption of this fish by selling at more alluring prices than those ruling to-day in the fish markets.

With reference to report published last month of goods on hand August 1st, the following points should be noted: The quantity of eggs on hand in the city of Edmonton should have read 2,001 dozen in 1917 and 15,863 dozen in 1918. A certain cold storage company in the maritime provinces failed to report that they had 163,080 dozen eggs stored for others in July, 1917. This would have made the maritime provinces comparative statement read 357,883 dozen in 1917 instead of 104,803 dozen.

The amount of food commodities in storage September 1st, 1918, as indicated by all reports at hand, were:—

The services of some of the leading film actors and actresses have been obtained to assist in advertising Canada's second Victory Loan. Films have been prepared which are run off in about five minutes.

It is officially announced that up to September 30 manufacturers in Canada had produced 68,000,000 shells and 75,650,000 forgings. The war authorities are making preparations as if there was no peace in sight, and orders on a larger scale than ever are being let by the Imperial Munitions Board The orders for the coming year will run nearly half a billion dollars.

PROMOTERS LIABLE FOR GUARANTEE

The failure of a hundred per cent. proposition conceived by a local syndicate at a time it had in view the purchase of some twelve hundred square miles of timber lands in Labrador is told in a judgment handed down in the Superior Court on Saturday, October 5th, by Mr. Justice Weir. In this judgment, Frederic Lapointe, Joseph Landry and Raoul Vachon are condemned, jointly and severally, to pay to Michel Metivier a sum of $1,000 subscribed by him to the defendants on May 15, 1914, on their guarantee to return the money to him in default of paying a dividend of a hundred per cent. on his investment within a year, as from May 15, 1914. The action, as directed against some sixteen others was dismissed, plaintiff, the judge said, having failed to prove that they were liable in the matter.

Justice Weir said the evidence established that Frederic Lapointe issued and Joseph Landry used the circular and receipt, which guaranteed the return of the money advanced, with six per cent. interest, if a hundred per cent. dividend had not been paid on the investment at the end of one year. The dividend was not paid and the two defendants just named, the judge added, acted irregularly and without authority from their partners. Thereby they obtained from plaintiff the sum of $1,000 as a subscription to the projected enterprise. The defendant Raoul Vachon, examined as a partner, Justice Weir said, acknowledged having used the receipt to obtain subscriptions. This occurred prior to plaintiff's subscription and thereby recognized the validity of the receipt so far as Vachon was concerned as one of the promoters of the organization. Thereafter he did nothing to warn the public or plaintiff that he withdrew his recognition of the receipt.

Accordingly, the court condemned Frederic Lapointe, Joseph Landry and Raoul Vachon jointly and severally to refund $1,000 to plaintiff, with interest from the date of demand, and costs of the action.

The Fidelity Agency Corporation, Limited, has been appointed general agent for Toronto for the Globe Indemnity Company.

VICTORY LOAN IN BRITISH COLUMBIA

Labor Organizations Ready to Co-operate—Will Accept Victory Bonds in Payment of Taxes

"The people of British Columbia are united in their determination to make the coming Victory Loan a complete success, as far as that province, at least, is concerned," said Mr. J. D. Kearns, provincial organizer for the Victory Loan committee, after a tour of the province. "From east to west, and from north to south, British Columbia is now organized for the coming campaign," he said, "and in every section, complete and enthusiastic co-operation is being shown toward the work. That the campaign will be very intensive, more so even than the one of last year, is evidenced by the manner in which every worker is taking hold of the task ahead.

"One of the most encouraging phases of his trip, was the whole-hearted co-operation given him from the labor organizations up country," he said, "this being particularly evident in the Crow's Nest Pass districts. At Golden, B.C., the last place in which organization was completed, plans have already been adopted which ensure the greatest amount of success for the loan."

Mr. Kearns has visited practically every section of the province now, and when the campaign opens, the work will go with a swing everywhere.

Labor Unions Line Up.

Three more branches of organized labor have notified Mayor Gale, of Vancouver, of their intention to actively participate in the coming Victory Loan campaign. The mayor received communications from G. P. Boston, of the International Brotherhood of Locomotive Engineers; from J. Shields, secretary of the Policemen's Union, and from Mr. Brooks, of the International Association of Machinists, stating that the members of these bodies had passed resolutions to that effect. The names of Messrs. Boston, Shields and Brooks have been added to the names composing the Victory Loan committee in accordance with the wishes expressed by the unions.

Mr. Frank Parsons, vice-president of the Vancouver committee, which has set itself the task of raising the sum of $15,000,000 in the city, addressed the faculty of the University of British Columbia, and outlined the campaign planned by the local committee. The meeting was an enthusiastic one and arrangements were made for attending to the part the university will take in the effort to raise the amount needed.

Quota Committee Meets.

With a good supply of cards already on hand the quota committee, composed of some 20 prominent business men, met on October 14th, and made considerable headway in the preliminary work This committee will be in session every day during the campaign and will make its head-quarters in offices in the Standard Bank building, Vancouver, where a large force of stenographers and volunteer male help will be kept busy every day.

Arrangements are in hand for holding a big parade on November 8 of all school children in Vancouver. As there are well over 16,000 children the parade will be one of the biggest affairs of its kind ever witnessed in the city. The schools have undertaken to raise the sum of a quarter of a million dollars.

Victory Bonds for Taxes.

Alderman Kirk of Vancouver, said that the city would accept Victory Bonds in payment of taxes, in reply to the criticism that a tax sale at this time would militate against the success of the Victory Loan drive.

"The Victory Loan," he said, "must be carried through to a successful conclusion in order that the government may have the money to finance the war. Likewise the city must carry on while the war is being won, and since nearly all the city's revenue is derived from taxation, taxes must be paid. Buy Victory Bonds and pay taxes. There is the chance to make dollars do double duty."

"Buy Victory bonds and turn them in as payments on taxes," in effect, said the chairman of the civic finance committee, pointing out that it would knock out the argument that people would rush to the city hall to save their property and pay in money that would otherwise be invested in the loan

THE INFLUENCE OF EDUCATION

Where the Universities Can Influence Social Conditions—Struggle Between "Culture" and "Applied Education"

BY A. T. DRUMMOND, LL.D.

Canada, which has, hitherto, been in the slowly formative stage, is now on the threshold of great changes in its relations to the empire, in its foreign trade, in the development of its natural resources, in its social conditions, and, we venture to hope, in its standards of morality in politics, business and domestic life. In taking their part in guiding these changes into right channels, a great responsibility rests on the different governments of the Dominion. As presently constituted, these governments, too often, cannot be counted on to take the initiative in inaugurating important internal changes, and even the suggestions or new ideas, which eventually result in such changes, too seldom emanate from ministers of the Crown themselves. Behind these ministers will be found leading influences throughout the country carrying weight with the people, and representing well thought-out judgment which the government ultimately decides to follow. Among these influences should be the press, but the daily newspapers in Canada have been hitherto, chiefly party organs, which, too often, through party prejudice, could not be relied on for carefully considered, unbiased opinion on the country's affairs, whilst such initiative as they might display, was apt to be influenced by local, provincial, racial or political considerations.

Important sources of influence, to which we should be able to turn, are the universities, but have they, as yet, realized their opportunities and power? If higher education counts for anything, the men who think for themselves, who can initiate new ideas, who have breadth of view, and who are aloof from biasing strife, are to be found there. Our larger Canadian institutions have now passed the stage when they were merely teaching bodies. With the many distinguished men on their staffs, and with the numerous problems before them, affecting the social, industrial and other life of the country, these universities should, hereafter, also become centres of thought. There is hardly a sphere of active work which they do not directly or indirectly touch, and which in a greater or less degree, they cannot influence. Social conditions should especially appeal to them, and should open up to them splendid opportunities for wise ideas and for leadership at the present time, when men in every walk of life feel that the country is on the eve of great social changes which need to be dealt with courageously and from the standpoints of liberty, brotherhood and fair dealing. Ideas emanating from the universities, given in the spirit of helpfulness to the masses, and fairness to all others, are what we want. Education is only one of the problems, but even it has loomed into view as a wide problem involving both readjustment and some reform in hitherto accepted principles, not only in meeting the newer needs of the masses, but in, what is termed, higher education itself. What is the education which the son of every self-respecting worker should have, to fit him well for life's battle? On the other hand, there is now a serious conflict between culture so called, and, what might be termed, applied education. Are the staffs of the universities appreciative of the opportunities which lie before them, and of the responsibilities in this connection which their high position has cast upon them?

PAPER MAKERS MUST OBEY ORDER

Action has been taken by the government to require newsprint manufacturers to comply with the order of Commissioner Pringle, dated August 6, 1918. Instructions issued under an order-in council provide that in the event of any companies named in Mr. Pringle's order refusing or neglecting to comply with any of its requirements, "notice for export of paper shall, so long as such refusal or neglect shall continue, issue to such company refusing or neglecting to comply."

Although no specific mention is made of the fact, the order-in-council is understood to refer more particularly to the payment of differentials. It would also cover the case of a company refusing to supply paper to a newspaper as ordered by the newsprint controller.

SEVENTIETH ANNUAL REPORT OF THE

CONSUMERS' GAS COMPANY OF TORONTO

YEAR ENDING 30th SEPTEMBER, 1918

The Directors have satisfaction in presenting to the Stockholders the Seventieth Annual Statement of the Company and to report a large increase in the number of customers and in the output of gas.

During the year, 1,535 new service connections have been made, and as there have been practically no additions to the street mains system, these services represent new business on existing main pipe lines.

The general shortage of coal and the difficulties experienced by citizens in obtaining sufficient coal for the heating of their houses, has resulted in large quantities of gas being used for this purpose.

The consumption of gas in munition plants, military establishments and for general industrial purposes has continued to increase.

The Company's manufacturing plant has, therefore, been taxed to nearly the limit of its capacity; but it is gratifying to your Directors that there has been no failure on the part of the Company in meeting these extraordinary demands.

Economic conditions have, of course, practically prohibited the installation of new manufacturing plant.

It will not be a matter of surprise to the Shareholders that there have been increases in the cost of raw materials used in the manufacture of gas, but the Directors have thought it well to show the actual increases to the Company in certain items of operating costs for the past year as compared with the cost of the same items in 1915:—

	Total Increase.
Gas Coal (Increase per ton $2.25)	$ 499,214.70
Gas Oil (Increase per gallon 4.1c.)	265,376.20
Labor (Average Increase per hour 13c.)	201,914.10
Taxes (Increase)	69,504.27
Total Increase	$1,036,009.27

Having these figures in mind it is not surprising that the financial statement shows an adverse balance, after payment of interest charges and dividend. Your Directors, however, are of the opinion that they are justified in allowing the Company to carry a fair share of the burden of the war, and they have, therefore, refrained from increasing the price of gas to a point which would yield sufficient revenue to cover all of the increase in the cost of gas. It is, of course, recognized that this policy cannot be continued indefinitely, and unless there be early prospect of reductions in the cost of raw material, it will be necessary to further increase the selling price of gas. Your Directors have been anxious, however, to demonstrate that they were earnest in their efforts to maintain the price of gas at the lowest possible figure.

There are four hundred and fourteen names on the Honor Roll of the Company employees who have enlisted for active military service overseas. Forty-eight of these have given their lives. The Directors desire to express their deep respect for the men who have so patriotically responded to their country's call, and would extend sincere sympathy to the families who have been bereaved.

The Shareholders are asked to confirm the following subscriptions and special allowance made during the past year:—

February, 1918..Toronto and York County Patriotic Fund	$ 5,000.00
October, 1918..Navy League of Canada	1,000.00
Payments to wives and families of men enlisted for active military service overseas	21.137.00

The following statement for the past, as compared with the preceding year, shows:—

	Meters.	Gas Sales.
Year ending 30th September, 1918 ..	113.022	$3.811,386.89
" " " " 1917 ..	108,719	3.007,423.89
Increase	4,303	$ 803.963.00

All of which is respectfully submitted,

A. W. AUSTIN,
President.

(Signed) W. E. SAMPSON,
EDMOND GUNN, F.C.A., } Auditors.

Toronto, 23rd October, 1918.

SEVENTIETH ANNUAL MEETING

The Seventieth Annual General Meeting of the Stockholders of the Consumers' Gas Company of Toronto was held at the Company's Board Room, 17 Toronto Street, on Monday, the 28th of October, 1918, at noon.

Present: Thos. Long, Alexander Smith, A. J. Helliwell, J. J. Fairty, Wellington Francis, Wm. Leak, Herbert Langlois, A. W. Austin, J. K Niven, J. F Michie, W. Gillespie, T H Wood, C S. Gzowski, W. G Brown, A. H. Campbell, Sir E B. Osler, Jos Wright, J A Parker, Hugh Neilson, John Laxton, Jas. Brown, Geo. N. Reynolds, Dr F. LeM Grasett, Major Robt. Wood, C. A. Jefferis, Arthur Hewitt, Wm. Mulock, Jr., John J Armstrong, and others.

The President was called to the chair, and presented the Annual Report and Financial Statements. In moving the adoption of the Annual Report, the President said:—

In moving that the report be adopted, I would like to say that the year just closed has been characterized by great expansion in general business. It has been one of memorable achievements, of difficulties encountered and vanquished. Notwithstanding the serious interference with normal conditions, we have, as shown in the statement submitted, done a larger business without any increase of capital. In these days when many utility companies are passing, or reducing, their dividends I am sure that you will agree with me that our report is a very excellent one.

It has taken herculean effort to secure the necessary supplies of oil, coal and repair parts. The extra demand made upon us for gas for the manufacture of war munitions, has forced us to call upon the Fuel Controller for a permit for more coal. We are grateful not only to him for his kind and prompt consideration of our requests, but also to the mine owners, for their assistance in the time of war need.

The scarcity of labor has made it very difficult for us to produce enough gas to meet the increased demand, it being necessary now to work our plant to full capacity. The temporary and extraordinary wages offered for labor by munition manufacturers has depleted our ranks very materially. Time and again we have been compelled to raise the wages of our employees.

During the year, we found it necessary to raise the price of gas, and on April 5th the net price was increased from eighty cents to ninety cents per one thousand cubic feet. The City, as a shareholder, asked for an investigation relative to this increase. Mr. Thomas Bradshaw, the Commissioner of Finance for the City, and Mr. Walter Sterling, City Auditor, were appointed to make the investigation, and brought in a report fully justifying the increase.

We have had a great many applications for gas in newly settled districts where we have no mains. We are sorry not to have been able to take up this new business, so far, but it has been impossible to obtain the necessary pipe, or the labor to lay it. Pig iron has, of course, been urgently needed for war purposes.

Many of our customers who are using gas in the manufacture of war munitions, are so satisfied with it, that it is their intention to continue to use it in their regular business after the war.

The spirit of co-operation and loyalty throughout our organization continues as in the past. The General Manager, Secretary, Superintendent and the whole staff are always ready to contribute to the Company's reputation and success. We appreciate the effort, labor and zeal with which they have struggled to advance the Company's interests, especially when their numbers are considerably reduced.

Again I would like to urge upon our Government the importance of setting apart funds for the search for, and the development of fuel in Canada, thus making us more independent of other countries for our supplies, and keeping large sums of money in the country. Surely this fuel question is a most important one.

I will now formally move that the Balance Sheet and the Revenue Account for the year ending 30th September, 1918, together with the report of the Directors, be and are hereby received and adopted.

In seconding the adoption of the report, the Vice-President stated that as the General Manager had prepared a report covering the conditions during the year, he would not occupy the time in going into matters which could be much better dealt with by the Manager.

The General Manager addressed the Shareholders as follows:—

OUTPUT OF GAS.

The increase in the output of gas for the past year has amounted to 517,986,000 cubic feet, or 12.33%, notwithstanding the daylight saving regulations which came into force during the year, and the restrictions placed by the Fuel Controller on outdoor lighting.

Prior to this year the maximum gas output for one day had amounted to 13,755,000 cubic feet. That was on September 10th, 1917. That figure has been exceeded on several occasions during 1918, the maximum being reached on February 4th, 1918, when the output for the day amounted to 16,815,000 cubic feet, an increase of 22.25% over the previous year's maximum.

(Continued on page 43.)

Annual Report of the Consumers' Gas Company of Toronto (*Continued*)

FINANCIAL.

The accounts for the past year show that after providing for all operating expenses, taxes, etc., the net income falls short of the amount required to meet actual repairs and renewals, interest and dividends by $120,426.08. This deficiency is the inevitable result of the abnormal prices of Coal, Oil, other materials and Labor used in the manufacture and distribution of gas and the high prices of all materials necessary for the maintenance of the plant.

As compared with the prices paid in 1915, this year's prices have advanced for Coal 68.2%, for Gas Oil 84.5%, for Labor 46.65%. The additional cost to the Company represented by the increase of these three items alone has amounted to $966,505.00 during the last fiscal year.

Taxes, including Workmen's Compensation and the Dominion Income War Tax, amount to $204 972.26, an increase of $51,792.36 over the preceding year, and $69,504.27 over 1915.

The average rate being paid at the present time for Labor at the Manufacturing Plants is 72.36% greater than the rate paid in 1915.

It must be borne in mind that the increase in the price of gas from 80 cents net to 90 cents net was effective only after April 5th, 1918, so that for one half of the year, and that the period of the largest consumption of gas, the net price was 80 cents.

It is worthy of note, as demonstrating the efficiency and economy with which gas is manufactured and distributed in Toronto at the present time, that when, in a former period, the cost of coal was as high as it is to-day, gas was sold for $2.50 net per 1,000 cubic feet.

SEVENTIETH ANNIVERSARY.

This being the seventieth year of this Company's existence, it will be a matter of interest to review some of the records of the Company during the past fifty years. The following statement shows the output of gas, number of meters in use, population of the city, consumption of gas per capita, population per meter, miles of mains and the price of gas for the years 1868, 1878, 1888, 1898, 1908 and 1918:—

Year.	Co'y Years.	Gas Output M. cu. feet.	Increase per cent.	No. of Meters in use.	Population.	Increase per cent.	Cons. per Capita. cu. ft.	Pop. per Meter.	Miles of Main	Price of Gas.
1868	... 20	38,596	......	1,254	50,000	.....	478	40	42	$3.00
1878	... 30	124,118	221.58	3,285	70,867	41.73	1,227	22	85	2.00
1888	... 40	414,672	234.10	10,020	126,169	78.04	2,368	13	163	1.10
1898	... 50	707,211	70.55	24,257	190,000	50.59	3,303	8	242	.90
1908	... 60	2,006,804	183.76	53,368	320,000	68.42	5,900	6	361	.75
1918	... 70	4,720,502	135.22	113,022	520,000	62.5	8,624	4.6	586	.85

The total output of gas during three average days in 1918 equals the entire output of gas for the year 1868.

The total of meters in use in 1868 was 1,254 as compared with 113,022 in 1918.

In 1868 there was one gas meter for every 40 inhabitants, whereas now there is one meter for every 4.6 inhabitants.

The amount invested in plant per 1,000 cubic feet of output in 1868 was $12.46, as compared with $2.18 in 1918, the capital expenditure per unit now being one-sixth of what it was in 1868. This fact, coupled with the limited dividend rate, makes the capital burden (dividends and interest) 12.73 cents per 1,000 cubic feet of gas sold, which is a remarkably low figure for this continent.

The Seventieth Anniversary of the Company comes at a time when local interests are completely overshadowed by the great events connected with the war. However, there are still the common duties to be performed, and the ordinary affairs of business must be carried on with even added zeal, and with such measure of efficiency as circumstances make possible.

Gas was first supplied in Toronto on 28th December, 1841, and from careful investigation it would appear that, while there have been local stoppages due to frost, broken mains, etc., there has not been even a momentary interruption to the general gas supply to the City since that date, a period of nearly seventy-seven years.

Originally used only as an illuminant, gas has become one of the vital necessities of the domestic and industrial life of the community. The tremendous development and growth of the Gas Industry, particularly during the past ten years, furnishes abundant evidence of appreciation by the public of the merits of the commodity supplied and of the economy in the use of gas for the thousand and one purposes for which it is now so well adapted.

Its success in holding the market against all rivals of the same order of utility is due, largely, to its possession of certain valuable and unique physical properties, viz.:—

(1) It is a permanent gas, suitable for consumption in or out of doors, either as an illuminant or as a smokeless fuel of high or low intensity, or as a source of motive power; all from the same supply system.

(2) It is susceptible of perfect sub-division without loss of efficiency for use in either required application for lighting or the production of heat or power. The cost to the consumer is always in direct proportion to the quantity consumed.

(3) It is a readily available fuel, cleanly and inoffensive, to be obtained by the turning of a tap, which will grill a chop, boil a kettle, or heat a flat iron, and there is no metallurgical or smith's work for which its heat is not adequate, no household warming for which it is not suitable.

In considering the use of gas from the important standpoint of the conservation of coal, it is interesting to see what a Gas Company can secure from a ton of bituminous coal.

In the first place, a ton of gas coal in an efficient carbonizing plant will yield ten thousand cubic feet of gas, from which may be extracted a certain percentage of benzene and toluol. It will produce approximately 1,350 lbs. of coke, from which, after providing the necessary fuel for the producers, there will be left a residue of from 800 to 850 lbs. of coke to be marketed as fuel for steam raising, industrial purposes and for domestic use. It will yield ten Imperial gallons of tar, from which may be recovered toluol, benzene, fuel oil, acids, dyes, etc. Another important by-product is ammonia, useful in the manufacture of fertilizer, and for refrigeration and other purposes. There is also, as a minor by-product, retort carbon, which is used in the manufacture of carbon electrodes for searchlights, electrical steel furnaces, etc.

It is estimated that the percentage of efficiency obtained from coal in a gas works will run from 60 to 70 per cent. Compare this with the efficiency obtained in general practice from a ton of the same kind of coal used in an open fire which has just been fed with coal. Would the efficiency be 20 per cent., or less?

The available supply of anthracite coal is admittedly limited, and the need for conservation is probably greater with regard to it, than is the case with any other kind of fuel. From every thousand tons of bituminous coal which a gas company carbonizes, it produces and makes available for general consumption, as a substitute for anthracite coal, four hundred tons of gas house coke. The value of coke, as compared with anthracite coal, may be observed from the following analyses:—

	Anthracite Coal. (Per cent.)	Coke. (Per cent.)
Moisture (after air drying)	3.20	1.60
Volatile combustible	6.86	8.27
Fixed carbon	76.61	76.23
Ash	13.33	13.90
Sulphur	.92	.94
Gross B.T.U. per lb.	12,800	12,200

GAS FOR LIGHTING.

Under the conditions formerly prevailing when gas was sold exclusively for lighting by its luminous flame, the criterion of its value to the consumer was its illuminating power, but since the introduction of the Welsbach system of gas lighting by the heating to incandescence of a foreign substance in the bunsen or non-luminous flame of gas mixed with air, gas is merely burned as a fuel just as for the purpose of cooking, heating and generation of motive power.

GAS FOR COOKING PURPOSES.

Aside altogether from the cleanliness, ease of control, reliability of quantity and quality of supply, in which respects it stands pre-eminent, in point of economy there is

(*Continued on page 44.*)

Annual Report of the Consumers' Gas Company of Toronto (*Continued*)

no fuel which at prevailing prices can begin to compare with the cost of gas for certain kinds of service. If gas exclusively were used for cooking in the city of Toronto, there would be a large money saving to the consumers, but more important than this saving would be the economic advantage gained by having to import so many tons less of anthracite coal.

GAS AS FUEL FOR INDUSTRIAL PURPOSES.

The following list contains but a few of the hundreds of successful industrial gas appliances available and in use in Toronto:—Baking Ovens, Japanning Ovens, Glue Heaters, Cauldron Furnaces, Bakers' Fryers, Confectioners' Furnaces, Oil Tempering Furnaces, Metal Melting Furnaces, Crucible Furnaces, Gas Fired Steam Boilers up to twelve horse-power, Gas Fired Forges, Muffle Furnaces, Annealing Furnaces, etc.

THE USE OF GAS IN THE MANUFACTURE OF MUNITIONS.

The same causes which make gas valuable for ordinary industrial purposes apply with increased force to the manufacture of munitions. In England it is publicly admitted that the tremendous leap forward in munition manufacturing could not have been made without the use of gas. On this side of the water, while the need for gas was not vital, nevertheless gas has played an increasingly important part in munition making. At times it has been adopted solely because of the speed with which an installation could be made, but once in, it stays in, when the instrinsic merits of the fuel become known.

When munitions are mentioned, we naturally think of shells, and it is in the manufacture of shells that much of the gas used in munition works has been consumed.

In the manufacture of shrapnel, every shell has to be hardened and tempered in a manner similar to the treatment of tool steel. The end of the shell must also be heated in order to forge in the end, or "nose" it. Much gas has been used for this purpose, and also for heating water used for washing grease off the finished shell, and for melting resin which is poured into the shell after it has been charged with bullets. Even the high explosive shells have required gas. It has been used in ovens for baking varnish on the inside of the shell, and in some sizes, notably the six inch, large quantities have been used in forges for "nosing in."

Comparatively large gas-fired annealing furnaces have been employed for the treatment of various parts of shells, rifles, etc. Many parts are heated in forges for various operations, some of these forges being even 25 or 30 ft. high, which shows that gas is being worked into the heavier operations.

Although large quantities of gas have been used for the purposes to which I have referred, it is not contended that other fuels could not be used, but nevertheless, for various reasons, gas has been preferred. In the manufacture of small cartridge cases, however, gas is almost a necessity, and to the best of my knowledge is the only fuel used in the intricate machines which turn out millions of small cases, every one of which must be treated with absolute uniformity.

While it is true that large quantities of gas are now being used in munition plants, the proportion of gas used for this purpose, compared with the total output, is small, and it is important to remember the reference in the President's remarks to the fact that those manufacturers who are presently engaged in the manufacture of munitions, are planning to use gas as fuel in connection with peace-time industries.

The problem for the Company is not likely to be how to get sufficient business, but rather how to meet the demand for its product.

The resolution for the adoption of the Annual Report was carried unanimously.

Messrs. W. E. Sampson and Edmond Gunn, F.C.A., were re-appointed Auditors for the ensuing year.

Messrs. W. Gillespie and J. K. Niven, being appointed Scrutineers, reported the unanimous re-election of the following gentlemen as Directors for the ensuing year:—A. W. Austin, A. H. Campbell, Wellington Francis, K.C., F. LeM. Grasett, M.D., John Hoskin, K.C., LL.D., D.C.L, Herbert Langlois, Thomas Long, Lt.-Col. J. F. Michie, Sir Edmund Osler.

At a meeting of the Board held subsequently, A. W. Austin and Wellington Francis, K.C., were unanimously re-elected President and Vice-President, respectively, for the ensuing year.

NEW CAPITAL IN WESTERN GROCERS

Western Grocers, Limited, formerly the A. Macdonald Company, Limited, have announced a plan for the issue of stock in lieu of the five years' accumulated dividends on the preference stock. The last preferred dividend, at the rate of 7 per cent. per annum, was paid on the 31st December, 1913, and the last common dividend, at 5 per cent. per annum, was paid on June 30th, 1913. The circular says:—

"Your Directors, after careful deliberations, submit the following plan for the consideration of holders of preference shares:—

"(1) The plan outlined herein, is based on the fact that the capital represented in the deferred dividends will be necessary to the successful operations of the Company for some time to come.

"(2) We, therefore, recommend that the present issue of preferred stock be increased by an amount equal to the accumulated and unpaid dividends as at December 31st, 1918.

"(3) That the shareholders accept preferred stock at par in full settlement of unpaid dividends as at December 31st, 1918.

"(4) Providing that the holders of preferred stock now issued, accept this plan as a settlement of the preferred and unpaid dividends on their shares up to the 31st of December, 1918, and subscribe at par for an amount of further preference stock approximately equal to the cumulative and unpaid dividends up to the 31st day of December, 1918, a dividend of 35 per cent. will be declared early in the year 1919 to carry out this arrangement (35 per cent. being cumulative dividend of 7 per cent. for five years). For this purpose it will be necessary for any holder of preferred shares whose dividends will not amount to an even sum of $100.00, or even multiples thereof, to pay such additional amount as will, with the dividend, bring the amount up to an even sum of $100.00, or even multiples thereof.

"(5) Only shares of the par value of $100.00 each will be issued.

"Your Directors anticipate that if this plan is accepted and your Company's earnings continue as satisfactory as they are at present, the future earnings will be sufficient to warrant the payment of regular quarterly dividends at the rate of 7 per cent. per annum, on the total issue of preference stock, beginning with the quarter ending March 31st, 1919.

"On December 31st, 1918, the amount of accumulated and unpaid dividends on the present issue of preference shares will amount to $618,380.00. It is anticipated that by the end of this year your Company will have sufficient in Reserve and Profit and Loss Accounts to retire these accumulated dividends in full. You will understand, however, that these accumulated profits are invested in merchandise, book accounts, and other assets necessary to carrying on the business. The high prices now prevailing for all lines of grocery merchandise, the larger amounts consequently required for investment in merchandise stocks and credits, and the fact that your Company is enjoying a steadily increasing trade have made necessary the employment of more capital in the conduct of the business. Bank borrowings as a result have increased. In view of this it is clear that it is impossible to withdraw from the business the large amount of cash represented in these deferred dividends. You will, therefore, see that the plan here suggested is about the only way the accumulated dividends can be retired and the interests of your Company at the same time be properly guarded. In fact this plan and its prompt acceptance by preference shareholders is the only safe way your directors see for the retirement of these dividends in whole.

"It is desired that we have your acceptance of above plan at an early date, as the number of preference shareholders is large and the prompt acceptance of each will facilitate matters."

The Canadian Northern Railway has completed its new line, from Ottawa to Montreal through the tunnel under Mount Royal. The first train left Ottawa at 11 o'clock on the 21st inst. Among the passengers on board were Mr. R. L. Fairbairn, general passenger agent of the line, and several other officials.

Assessment Commissioner Huehnergard, in a statement presented to council on October 21st, showed the population of Kitchener, Ont., to be 19,767, an increase of 72 over the year 1917. The total value of assessable property in the city, including incomes, is $14,097,553. The increase over the income assessment of 1917 is $64 612.

By order of the Board.
C. E. NEILL,
General Manager.

Montreal, Que., October 15, 1918.

EDMONTON TELEPHONE SYSTEM

The city of Edmonton, Alta., telephone department shows a betterment of $12,000 for September over the same period in 1917, according to the monthly report which has been submitted to the commissioner by Superintendent Lowry.

In September, 1917, the department had a net surplus to date of $12,375. At the end of the past month, these figures for the year had rolled up to $24,597.

The department has succeeded in reducing the operation and maintenance costs, as is shown by a comparison with the same months in previous years. In September, 1914, the cost per phone was $2.94; 1915, $3.52; 1916, $2.77; 1917, $2.87; 1918, $2.57. During the past month the rent per line was $2.94, leaving a surplus of 37 cents. There has been a net gain of 97 phones and 95 lines. The total number of phones, now 9,968, is 85 in excess of July, 1914, the previous highest period.

The three branch offices are running at full capacity, but the department is not considering any temporary services in the north. There are no available numbers for this purpose. There was a surplus in September of $2,038, while in the same month last year there was a deficit of $74. The revenue for the month was $23,690. Maintenance and operation charges were $6,900 and capital charges, $13,821.

CONDENSED ADVERTISEMENTS

"Positions Wanted," 2c. per word; all other condensed advertisements, 4 c. per word. Minimum charge for any condensed advertisement, 50c. per insertion. All condensed advertisements must conform to usual style. Condensed advertisements, on account of the very low rates charged for them, are payable in advance; 50 per cent. extra if charged.

POSITION WANTED.—Young, married man, discharged from army, fifteen years' experience in insurance business, fire, hail and automobile, eight years in Western Canada, wants position with Company or General Agency, can manage branch office. Reply to Box 205, *The Monetary Times*, Toronto.

The Mutual Life and Citizens' Assurance Company, Limited, of Australia, have subscribed £1,500,000 to the seventh Australian war loan. As already pointed out in *The Monetary Times*, just one-half of the assets of this company consist of government bonds. This is an unusually large proportion. The whole of its accumulations since August, 1915, have been invested in war loans. The company does a large business in Canada, a branch office being maintained at 286 St. James Street, Montreal.

DOMINION LOAN ORGANIZATION

Personnel of Committee Which Directs 1918 Victory Loan Campaign Throughout Canada

The opening days of the Victory Loan campaign reveal the fact that a Dominion-wide organization of exceptional foresight and efficiency has been at work. At the head of the organization is the Dominion Executive, of which Mr. E. R. Wood is chairman.

Under this Dominion executive, provincial organizations have been set up throughout the whole country, the chairman of each provincial organization being a member of the Dominion Executive.

The type of provincial organization varies somewhat with the different provinces. In Ontario the province is divided into eight divisions, each of which has a divisional organizer. The divisional organizer has supervision over the cities and counties in his division, and for each city and county there is also a local organization These are again divided into canvassing districts, which usually correspond to the townships or municipalities, and it is this organization and these canvassing units that actually go out and sell the bonds.

Dominion Executive Committee.

The following are the members of the Dominion Executive Committee:—

E. R. Wood, chairman, Toronto; Sir Augustus Nanton, vice-chairman and chairman province Manitoba, Winnipeg: J. M. Mackie, vice-chairman, Montreal; J. H. Gundy, vice-chairman and chairman Special Subscriptions Committee, Toronto; W. R. Fleming, secretary, Toronto; A. E. Ames, chairman, Administration and Finance Committee, Toronto; W. C. Brent, Toronto; C. H. Burgess, Toronto; P. P. Cowans, vice-chairman, Dominion Special Subscriptions Committee, Montreal; Sir Henry Egan, Ottawa; G. Tower Fergusson, Toronto; Sir George Garneau, Quebec; Robert Hobson, president, Steel Company of Canada, Hamilton; Edwin Hanson, vice-chairman, Dominion Administration and Finance Committee, Montreal; Æmilius Jarvis, Toronto; Rene T. Leclerc, Montreal; J. W. Mitchell, Toronto; A. H. B. Mackenzie, Montreal; W. A. Mackenzie, Toronto; W. L. McKinnon, Toronto; R. C. Matthews, Toronto; A. J. Nesbitt, Montreal; R. A. Stephenson, chairman, Dominion Publicity Committee, Montreal; Edgar M. Smith, president, Montreal Stock Exchange, Montreal; H. R. Tudhope, president, Toronto Stock Exchange, Toronto.

C. H. B. Longworth, chairman, province Prince Edward Island, Charlottetown; G. S. Campbell, chairman, province Nova Scotia, Halifax, N.S.; D. H. McDougall, president, Nova Scotia Steel and Coal Company, New Glasgow, N.S.; T. H. Estabrooks, chairman, province New Brunswick, St. John, N.B.; Hon. F. J. Venoit, Fredericton, N.B.; E. A. Macnutt and A. P. Frigon, joint chairmen, province Quebec, exclusive Island Montreal, Montreal; J. W. McConnell, chairman, Island of Montreal, Montreal; G. H. Wood, chairman, province Ontario, Toronto; A. L. Crossin, vice-chairman, province Manitoba, Winnipeg; J. A. Anderson, secretary, province Manitoba, Winnipeg; Hon. C. A. Dunning, chairman, province Saskatchewan, Regina; D. M. Balfour, vice-chairman, province Saskatchewan, Regina; J. O. Hettle, Saskatoon, Sask.; Hon. C. R. Mitchell, chairman, province Alberta, Edmonton; James Ramsey, chairman, Northern Alberta District, Edmonton; Wm. Toole, chairman, Southern Alberta District, Calgary; W. H. Malkin, chairman, province British Columbia, Vancouver, B.C.; W. T. Shattford, Penticton, B.C.; R. F. Taylor, Victoria, B.C.

Thomas Moore, president, Dominion Trades and Labor Congress, Ottawa; P. M. Draper, secretary, Dominion Trades and Labor Congress, Ottawa (representing Dominion Trades and Labor Congress); H. C. Cox, president, Life Officers' Association, Toronto; D. E. Kilgour, secretary, Life Officers' Association, Toronto (representing Life Officers' Association); P. A. Wintemute, president, Life Underwriters' Association, Calgary; J. H. C. Graham, secretary Life Underwriters' Association, Toronto (representing Life Underwriters' Association); W. J. Taylor, president Canadian Press Association, Woodstock; John R. Bone, Toronto (representing Canadian Press Association); P. M. Wickan, president, Fire Underwriters' Association, Montreal (representing Fire Underwriters' Association); Hume Cronyn, president, Dominion Mortgage and Investments' Association, London (representing Dominion Mortgage and Investments' Association)

LOAN CORPORATIONS IN ONTARIO

The statement of receipts and expenditures of loan corporations in Ontario, which appears in this issue, reflects the quiet condition of this class of business during the year 1917. The total receipts were $325,143,826, as compared with $314,134,283 during the year 1916. The receipts of corporations for their own use, however, were only $140,252,810, while last year they were $150,103,506. The business of loan companies in the province is undoubtedly falling off, due to the unusually prosperous conditions in farming communities, resulting in the paying off of existing obligations, and the fact that new building and improvements enterprises are not being taken up through shortage of capital, labor and material. On the other hand, trust companies seem to have established more and more their value as purely trust institutions, acting as trustees and executors.

The statement of assets and liabilities will be given next week.

RAILROAD EARNINGS

The following are the earnings of Canada's transcontinental railways for the first three weeks in October:—

Canadian Pacific Railway.

	1917.	1918.	Inc. or dec.
Oct. 7	$2,842,000	$3,458,000	+ $616,000
Oct. 14	3,333,000	3,524,000	+ 191,000
Oct. 21	3,429,000	3,509,000	+ 80,000

Grand Trunk Railway.

Oct. 7	$1,014,812	$1,460,738	+ $445,926
Oct. 14	989,067	1,433,788	+ 444,721
Oct. 21	916,866	1,296,165	+ 379,299

Canadian Northern Railway.

Oct. 7	$ 758,500	$1,072,900	+ $314,400
Oct. 14	960,600	1,040,300	+ 79,700
Oct. 21	872,300	1,189,000	+ 316,700

YIELDS ON INVESTMENTS IN STOCKS AND BONDS

The following table of investment yields of stocks and bonds has been compiled for *The Monetary Times* by Messrs. Morrow & Jellett, Members Toronto Stock Exchange, 103 Bay Street Toronto:—

October 30th, 1918.

"SOLID AS THE CONTINENT"

Throughout its entire history the North American Life has lived up to its motto, "Solid as the Continent." Insurance in Force, Assets and Net Surplus all show a steady and permanent increase each year. To-day the financial position of the Company is unexcelled.

1918 promises to be bigger and better than any year heretofore. If you are looking for a new connection, write us. We take our agents into our confidence and offer you service—real service.

Correspond with
E. J. HARVEY, Supervisor of Agencies.

North American Life Assurance Company

"SOLID AS THE CONTINENT"

HEAD OFFICE - TORONTO

"I Wish I Had Taken Twice As Much!"

Nothing is more often repeated in letters received at our office than the expression "I wish I had taken twice as much insurance while I was about it." When endowments, dividends or cash settlements are paid, the assured very often acknowledges the remittance with that remark The truth is very few men take as much Life Insurance as they can reasonably carry—and repentance often comes when additional Insurance is not procurable. Probably every reader of this paper believes in Life Insurance and carries more or less of it but one should ask himself the question, **Am I Carrying as Much Insurance as I Can Afford?** If the policyholders who are now entering the Company could read the evidence of gratified policyholders and beneficiaries, they would make a great effort to increase the amount applied for—and existing policy holders would double the amount of their protection. "One word more":— What income would your present insurance yield the beneficiary at say 6%?

The Mutual Life Assurance Co. of Canada

Waterloo Ontario

A WORD TO THE YOUNGER MEN

In one of his famous Essays John Stuart Mill, the great Economist, made the following terse statement:

> "We all desire to be well off, but few possess the effective desire of accumulation."

That is the point—to have both the wish and the WILL, to save money.

A Life Insurance Policy is the surest stimulus to save, and The Great-West Life Policies provide all the advantages of profitable investment, and safe protection on most favorable terms.

Full rates and information on request.

Industry and the Anglo-Saxon

Economic Traits of the Race—Individualism Is One of the Strongest Characteristics—Relation to Political Organization—Skill in Commercial Development—Recent Modifications in Character—Why the Race Has Out-Distanced Others in Economic Life

FOR over a century past the world has watched with amazement the political and economic expansion of the Anglo-Saxon race. Great Britain has filled to the utmost the role of a nation of shop-keepers, a term which Napoleon contemptuously applied to it. But not only has a great market place been set up in the home country, but the race has carried its wares throughout six continents, and has opened shop in the remotest parts of the earth.

But while all the world wondered at this great economic expansion, it now gasps with amazement at the military achievements of nations so long regarded as skilful only in the arts of peace. Within the space of four years Great Britain, the colonies, and the United States have been transformed into armed camps, where commercial life has been entirely subordinated to political organization, with an eye single to conducting an aggressive war. While the element of immediate defence has no doubt figured to some extent in the United Kingdom, the military efforts of the colonies and of the United States have been entirely along offensive lines, no danger of invasion being apparent for the present at least. One of the wonderful aspects of this military development has been the facility with which Great Britain manages a score of campaigns scattered over three continents. The ubiquity of the race has been established in the political field as well as in the economic; for, though English political forms have been established and copied throughout the globe, at no time have her forces been engaged in military operations in so many quarters.

In this vast field Britain takes the lead first of all as an organizer. There is no egotism in saying that British brains have been, throughout the four years of war, the central force in allied operations. The campaign on the western front has been the joint concern of all the chief belligerents; but Britain has certainly been the chief contributor to the war efforts in East and West Africa, in Egypt, in Mesopotamia, in the Balkans, and in Siberia: she has organized and equipped the Belgians in Flanders, the Serbs and Greeks in the East, and now she unifies the actions of the Czecho-Slovaks in Siberia and of the allied forces on the Murman coast. Great Britain and the United States are the financiers of the inter-allied operations, and the financial support of the weaker nations which range themselves with the allied cause.

Is this phenomenon merely the result of the size and strength of the British Empire and the United States, or is it the result of some deeper cause, some fundamental characteristic of the Anglo-Saxon?

A few years ago a book was written under the title "Anglo-Saxon Superiority; to What is it due?" What is more remarkable than the title or the subject matter of this work, is the fact that it was written by a Frenchman, Mr. Edmond Demolins. The author deplored the decadence of France, her political methods, and the decline in her population. In comparison, he points to the expansion of the British race, and the secret he finds in its fundamental characteristic of individualism. French organization on the other hand, is communistic, which term also characterizes in greater or less degree the other nations of Europe and Asia. The effect reveals itself in differences in education, in politics, in the attitude of the citizen towards agriculture, industry and commerce; but in examining these distinctions he traces the cause to the one fundamental quality mentioned above. The book was of course written with a practical purpose; but judging from the standing of the author, who was intimately connected with a leading French journal, "La Science Sociale," and from its success in France, it represents a thoughtful and enlightened estimate on the part of an independent investigator, of the fundamental virtue of the race.

How can we connect this quality with the economic work of the Anglo-Saxon race, and will the theory account for the unceasing activity and success of British commercial effort? It is not difficult to trace the quality in economic methods in the British Empire and the United States. Here the trader departing for the foreign field goes on his own initiative, actuated by motives of economic gain; he is not the accredited agent of a national trust, commissioned to unload the wares of a subsidized industry upon the hands of the foreigner. The British immigrant has freely emigrated to better his economic conditions, and, transplanting himself with little or no capital or training, has taken root and grown through the force of independence and ambition. He does not look forward to an

State Control

The first quarter in which to seek for evidences of the quality would seem to be in the relations of the citizen to the state. A marked contrast is at once apparent between Anglo-Saxon and European countries. The pinnacle of fame in France, in Germany, in Russia and in the other nations of Eurasia, lies not in the industrial achievements, nor even in science or art, but in the sphere of politics. The German scientist or captain of industry who displays any considerable talent, is promptly enrolled in the service of the fatherland. In Russia the meanest official position has, at least in the past, been considered superior to scientific or commercial success regardless of the wealth which may accrue to the latter. And even in France the competition for the multitude of official positions is of the keenest, regardless of the fact that industry has offered more liberal and certain pecuniary reward. It is not so in Great Britain, in the United States, nor in the British colonies, where the great difficulty has always been to tempt competent men into the ranks of the government service; for evidence of which witness the wholesale transfer of leading men of these nations, temporarily, and from patriotic motives, into the service of the state during war time. This has not taken place in the countries of Europe, where the additional assistance has been recruited into the lower ranks rather than the upper. The British or American citizen in fact prefers to regard the state as his servant rather than his master, as an instrument of his individual development rather than the final goal of his career. That is why the British flag has always lagged behind the commercial expansion of the nations; for the British merchant has not advertised his citizenship, though he has been careful to retain it for assistance in case of need. The economic life of one half the world has been organized by this race, but just about one-third declares allegiance to the British crown, or to the United States of America.

In the organization of industry itself, nations where the English race prevails have, generally speaking, avoided state control. The great corporations of the United States have developed spontaneously, though the protective tariff may account to some extent for their growth in domestic industry. It is only after every other solution has failed that government regulation is resorted to, and government control or ownership is still regarded with intense disfavor. The nations most developed in self government, therefore, seem to be the ones most averse to extending the functions of the state. Municipal institutions are jealously guarded, as being more easily controlled by those concerned. We are individualistic in our attitude towards capital and labor, and their relations, disputes being settled on grounds of specific interest.

It is not necessary to illustrate the point further. But we may ask if this theory is the key to the solution, or if other and more complex factors must be considered. It would be a very remarkable thing indeed if one quality alone were found to be responsible for the economic success of the race. We are inclined to think that a number of causes are responsible; and it must be also remembered that there is really no such thing as unqualified superiority, at least not in comparing one race or nation with another. Even in the economic sphere alone, nations differ in the quality of their achievements. The United States, which has undoubtedly outstripped all others in the rapid production of wealth, has certainly not solved the problem of distribution, for the city of New York houses alike some of the greatest fortunes in the world, and some of the most wretched cases of poverty. During a period of industrial development the world over, the Anglo-Saxon race has found itself peculiarly well fitted to take the lead, and the rapid changes in industrial methods have brought the individual organizer and the private corporation to the fore.

New Conditions Now Exist

This era of development may now be ended, and further progress may have to be along lines which require qualities of a different type, and in which we may be surpassed by others. Through forces of individual competition many industries have become organized upon a national basis; trusts and monoplies, national and international, have been formed. In almost every case of this kind we have come to realize that at some point the interest of private production clashes with that of the public, and relations between the state and industry must be established. Thus far our efforts to harmonize such conflicting interests have been conspicuously unsuccessful, and changes of a fundamental character may be necessary to bring this about. We may be required to surrender a part of our thorough going individualism, and the experience of Germany, France and Japan in other methods of furthering production may place us at a disadvantage. During the four years that the allied countries have been at war with Germany, they have copied German methods more than was ever done in a similar period before. Japan's foreign trade expansion has certainly not been along lines such as were pursued by Great Britain and the United States and these nations themselves have conceived of the idea of promoting trade by the formation of industrial syndicates, and of enlisting the service of the government in constructive work.

Recent developments along these lines may mean a temporary encroachment upon the policy of individualism, or its permanent surrender. We may be departing from the policy which has accounted for our industrial growth, or paving the way to further progress under new conditions. The conservative view would seem to be that experience of the past should not be neglected, nor racial qualities which have borne the brunt of economic competition thoughtlessly suppressed.

METHODS IN FIRE PREVENTION

Mr. Henry Lye, who is an insurance adjuster of long experience in Vancouver, has written *The Monetary Times* commenting upon Mr. George F. Lewis' address on "Ways and Means of Fire Prevention," which was published in *The Monetary Times* of September 27th.

Mr. Lewis in the course of his address, referred to two articles of the Code Napoleon as having been ignored. "In this he is mistaken," says Mr. Lye, "as I have successfully applied this principle on several occasions where I have taken subrogation and have recovered many thousands of dollars for the insurance companies thereunder. The Railway Act contains the only limitation of liability now in force on this subject. The knowledge gained by experienced adjusters should have been utilized in the selection of officers of conservation."

The system of the Niagara District Independent Telephone Company's Clinton and South Townships has been taken over by the Bell Telephone Company. The price paid was $25,000.

DOMINION PLACES SHIPBUILDING CONTRACTS

Government Will Establish Ocean Service, Working in Conjunction with National Railway System, Similar to C.P.R. Service

Supplementary to previous announcements in connection with the government shipbuilding programme, Hon. C. C. Ballantyne, Minister of Marine and Fisheries, announced on November 1st that contracts have been placed with the several shipbuilding yards in Canada for the construction of 31 steel steamers, ranging in tonnage from 3,400 tons dead-weight capacity to 8,100 tons. In addition to the types of vessels for which contracts have been placed, plans and specifications for a larger type, of 10,500 tons, are in course of preparation, and it is expected that contracts for the construction of several vessels of this type will be placed in the near future at Halifax and possibly at Vancouver.

All the vessels to be constructed under the government shipbuilding programme will be built of steel. Some of them will be of the one-deck type and some of two-decks, suitable for bulk and general cargo. The sea speed of the ships will, vary from 9 to 12 knots. All the vessels will be built to Lloyds or British Corporation highest class, under the requirements of the British Board of Trade and the Canadian Steamship Inspection Board.

First Two in Mid-November.

The first launching under the programme will take place from the yard of the Canadian Vickers, Limited, Montreal, towards the middle of November, when two vessels—one of 4,300 tons and another of 8,100 tons—will take the water. The launching ceremony will be performed by Sir Robert and Lady Borden, and it is expected that the vessels will be ready to proceed on their first voyage before navigation closes on the St. Lawrence. The keel of the first vessel, of 4,300 tons, was laid on March 12 last, while that of the 8,100 tons size was laid on July 13 last. They will be named respectively "Canadian Voyageur" and "Canadian Pioneer." The minister states that unless delays in the delivery of steel occur, seven or eight additional vessels will be ready for commission on the opening of navigation next spring, and that he fully expects to have the whole 31 ships, aggregating 175,000 tons, in commission before the end of next year.

The delay in laying keels and completing ships is due to the fact that all the ways were occupied with the construction of ships for the Imperial Munitions Board. As rapidly as the ships being constructed for the board are completed, the berths are immediately occupied with the construction of ships under the government programme.

Prices Compare Favorably.

While the price being paid for these vessels is substantially higher than the price paid in Great Britain, the minister pointed out that the vessels were being constructed at prices that compare favorably with those being paid for similar types in United States yards.

He states that plates and shapes, which are at present obtainable only in the United States, are being purchased for the same price as is being paid by the United States government, and although substantially lower than prices obtaining in the open market, they are materially higher than prices heretofore ruling in Great Britain. As the result of the difficulties experienced in securing supplies of plates, the minister stated that he had become more convinced of the soundness of the policy adopted by the government of providing for the manufacture of ship plates in Canada.

Supply of Plates.

"In January last and for some months previous to the government's decision to engage in shipbuilding," said Mr. Ballantyne, "private firms for whom ships were being built in Canadian yards were paying prices for plates ranging from $100 to $180 per ton, and several small lots had to be purchased for upwards of $200 per ton. Through the courtesy of the United States government, the department was enabled to obtain an assurance that sufficient plates to meet the requirements up to July or August next would be available from United States sources, at the rate fixed by the United States government—namely, $65 per ton. It was in these circumstances and in pursuance of a policy to make Canada self-contained in the matter of shipbuilding, that the arrangement was concluded with the Dominion Steel Corporation for the erection in Sydney of a plate mill and the purchase therefrom of 250,000 tons of ship material at a basic price of $83 per ton.

"The contract with the steel company provides that the price of plates will be reduced proportionate with any reduction that may hereafter occur in the cost of producing steel ingot. This cost will be determined at the end of every six months period by auditors selected by the government for that purpose. While the fixed price seems high, it is from 50 to 100 per cent.—and more in many cases—lower than the prices then obtaining in the open market. It was necessary to provide assured supplies of plates for Canadian shipyards and other Canadian industries."

Retain Vessles for Canada.

The minister observed that the world-wide demand for tonnage continued, and is likely to continue for a number of years. So much is this the case that if the government at the present time decided to dispose by sale of the contracts already concluded, very substantial profits would accrue. The policy of the government, however, remains what it was at the outset—to retain for the use and advantage of the people of Canada all vessels now under contract or to be hereafter contracted for.

Part of National Railway System.

Mr. Ballantyne, after expressing the view that the rates of freight prevailing would continue for some time after the war, said it was the intention of the government to operate its vessels in connection with the Canadian National Railway system from the Atlantic to the Pacific and the Great Lakes.

"There will," he said, "unquestionably be a very great demand for tonnage to carry the products of the field, the mine, the forest and the factory, as well as to bring back the Canadian soldiers who have so splendidly participated in bringing about the victory that now seems so near."

The minister further authorized the statement that on his recommendation the government had decided that the government vessels to be constructed under the government programme will be operated by a steamship company organized to work in co-operation with the Canadian National Railway system free in all respects from interference of any kind, and under the management of D. B. Hanna and his officials. In the adoption of this policy Mr. Ballantyne said: "The government is following the system adopted and now in operation by the Canadian Pacific Railway."

RAILROAD EARNINGS

The following are the earnings of Canada's transcontinental railways for the month of October:—

Canadian Pacific Railway.

	1917.	1918.	Inc. or dec.
Oct. 7	$2,842,000	$3,458,000	+ $616,000
Oct. 14	3,333,000	3,524,000	+ 191,000
Oct. 21	3,429,000	3,509,000	+ 80,000
Oct. 31	4,988,000	5,022,000	+ 34,000

Grand Trunk Railway.

Oct. 7	$1,014,812	$1,460,738	+ $445,926
Oct. 14	989,067	1,433,788	+ 444,721
Oct. 21	916,866	1,296,165	+ 379,299
Oct. 31	1,463,482	2,157,396	+ 693,914

Canadian Northern Railway.

Oct. 7	$ 758,500	$1,072,900	+ $314,400
Oct. 14 . .	960,600	1,040,300	+ 79,700
Oct. 21 .	872,300	1,189,000	+ 316,700
Oct. 31	1,350,200	1,872,800	+ 522,600

The following is a statement of the earnings and expenses of the Canadian Northern Railway for the month of September, 1918:—

	1918.	1917.	Inc. or dec.
Total gross earnings ..	$ 4,050,900	$ 3,341,700	+ $ 709,200
Operating expenses ..	4,109,000	2,915,800	+ 1,193,200
Net earnings	(Loss) 58,100	425,900	— 484,000
Aggregate gross earnings from July 1st	11,723,600	10,591,800	+ 1,131,800
Aggregate net earnings from July 1st	718,200	1,924,000	— 1,205,800

VICTORY LOAN SUBSCRIPTIONS

List of Subscribers whose Names Have Been Announced During the Past Week.

The following is the second list of large subscribers to the Second Victory Loan. The first list appeared in *The Monetary Times* last week:—

LIFE INSURANCE COMPANIES.

Metropolitan Life Insurance Company, New York, N.Y.	$5,500,000
Dominion Life Insurance Company, Toronto, Ont.	500,000
Excelsior Life Insurance Company, Toronto, Ont.	300,000
National Life Insurance Company, Toronto, Ont.	250,000
Continental Life Insurance Company, Toronto, Ont.	200,000

FIRE AND GENERAL INSURANCE COMPANIES.

Prudential Insurance Company of America, U.S.A.	3,500,000
Law, Union & Rock Insurance Company, Montreal, Que.	500,000
London and Lancashire and General Assurance Company, Montreal, Que.	300,000
British-America Assurance Company, Toronto, Ont.	250,000
Western Assurance Company, Toronto, Ont.	250,000
North British and Mercantile Insurance Company, Montreal, Que.	250,000
Commercial Union Assurance Company, Montreal, Que.	250,000
Royal Exchange Assurance Company, Montreal, Que.	150,000
Insurance Company of North America, Montreal, Que.	100,000
Royal Guardians, Montreal, Que.	100,000
Globe Indemnity Company of Canada, Montreal, Que.	50,000
Guarantee Insurance Company, of Canada, Montreal, Que.	50,000
Dominion Fire Insurance Company, Toronto, Ont.	41,000
American Central Insurance Company, Winnipeg, Man.	25,000
Portage la Prairie Farmers' Mutual Fire Insurance Company, Winnipeg, Man.	20,000

MORTGAGE AND TRUST COMPANIES.

Toronto General Trusts Corporation, Toronto, Ont.	3,000,000
Crown Trust Company, Montreal, Que.	60,000
Dominion Loan and Securities Company, Winnipeg, Man.	50,000
Continental Guarantee Corporation, Montreal, Que.	10,000

INDUSTRIAL AND OTHER COMPANIES.

Canadian Pacific Railway Company, Montreal, Que.	17,000,000
McLaughlin Motor Company, Chevrolet Motors, and General Motors, Limited, Toronto, Ont.	2,225,000
Massey-Harris Company, Limited	1,250,000
Beardmore and Company	1,000,000
Dominion Textile Company, Montreal, Que.	1,000,000
Imperial Tobacco Company, Montreal, Que.	1,000,000
Canadian Westinghouse, Toronto, Ont.	750,000
Canadian Vickers, Limited, Montreal, Que.	500,000
Canadian Locomotive Company, Limited, Toronto, Ont	[illegible]
M. L. Samuel, Benjamin and Company, Toronto, Ont	[illegible]
Burlington Steel Company, Hamilton, Ont.	[illegible]
Asbestos Corporation, Montreal, Que	300,000
Maritime Nail Works, St. John, N.B.	300,000
James Pender Company, St. John, N.B.	300,000
Salada Tea Company, Montreal, Que.	250,000
Montreal Transportation Company, Montreal, Que	250,000
Wm. Davies Company, Toronto, Ont.	250,000
Mackay Companies, Toronto, Ont.	250,000
Canadian Kodak Company, Toronto, Ont.	250,000
[illegible] Chemical Company, Limited, Montreal, Que.	[illegible]
Belgo-Canadian Pulp and Paper Company, Shawinigan Falls, Que	[illegible]
[illegible] Company, Limited, Toronto, Ont.	[illegible]
Laidlaw and Company, Montreal, Que	200,000
Canadian Cartridge Company, Hamilton, Ont	200,000
Hamilton Bridge Works Company, Hamilton, Ont	[illegible]
Le Seminaire de St. Sulpice, Montreal, Que.	150,000
Firstbrook Brothers, Toronto, Ont.	[illegible]
International Harvester Company, Hamilton, Ont.	140,000
Robert Reford Company, Limited, Montreal, Que.	[illegible]
New Jersey Zinc Company, Montreal, Que	100,000
Locomotive Super Heater Company, Montreal, Que.	[illegible]
A. R. Williams Machinery Company, Toronto, Ont	[illegible]
Canada Cement Company, Toronto, Ont	[illegible]
McLennan, McFeely and Company, Vancouver, B.C	[illegible]
[illegible] and Company, Montreal, Que	[illegible]
Ahearn and Soper, Ottawa, Ont	[illegible]
Canada Linseed Oil Mills Company, Montreal, Que	[illegible]
[illegible] Company, Limited, Montreal, Que	[illegible]
[illegible] Company, Montreal, Que	[illegible]
Wabasso Cotton Company, Limited, Three Rivers, Que	[illegible]
Atlantic Sugar Refinery, St. John, N.B.	[illegible]
[illegible] and Company, Hamilton, Ont	[illegible]
Woolworth Company, Toronto, Ont	[illegible]
Dominion Brake Shoe Company, Limited, Montreal, Que	[illegible]
Hamilton Cotton Company, Hamilton, Ont	[illegible]

THE COAL SITUATION

Just as European nations have found themselves in a critical situation as a result of difficulty in securing food and other necessary materials, so the provinces of Manitoba, Ontario and Quebec have been faced with a shortage in fuel supply which is almost as essential to them. The general causes of shortage are in both cases similar,—a new situation has arisen in political relations involving labor shortage and transportation difficulties. The food crisis has been met by stimulating production, by an alleviation of the causes which were restricting the supply, and by reducing, also, as far as possible, the consumption. Similar methods must be more fully applied to the present coal problem. We trust, of course, to continue to obtain from the United States the maximum coal supply that Washington will allot us. But incidentally it is worth remembering that the more we secure from the United States, the greater becomes that unfavorable balance of trade against Canada, which we are continually trying to reduce. It is futile, at present, to think of meeting the needs of these provinces by the importation of Alberta or Nova Scotia coal because the transportation factor presents an insurmountable difficulty; excepting, of course, in the case of portions of Manitoba and Quebec.

As regards the utilization of wood, this source is of real assistance in rural communities. We believe,—with the exception of certain striking instances where municipalities have acted,—that the possibilities of local relief from wood have not been adequately taken advantage of. In the United States, we understand, the Fuel Administration takes cognizance of the efforts made regarding wood when making allotments of coal. Wood, however, is an inadequate means of meeting either the present temporary exigency or the permanent fuel problem with which these provinces are faced.

With regard to stimulation of local coal production we, especially in Ontario and Quebec, can do nothing directly along these lines. We may, however, increase the development of hydro-electric power, making this available for purposes of industry and thereby release large quantities of coal for heating, for which purpose, as has been pointed out in previous articles, electricity is not economically suitable.

For the present at least, it almost appears that the combined effect of the various sources of relief just referred to cannot make up for the twenty per cent. reduction that has been made in Canada's coal allotment from the United States. It is necessary, therefore, that the fullest possible efficiency must be obtained through such regulation in the actual consumption of our coal supply as can be exercised by those in charge of the Fuel Administration, whether federal, provincial or local.

There are large numbers of people in the provinces of Manitoba, Ontario and Quebec, who have their usual supply of coal and who are using it in the usual way; there are many also who, through lack of foresight or through unexpected circumstances find themselves unable to obtain any at the eleventh hour. These latter at least are greatly interested in any measures which would secure them a supply. Shall we have to rely, as in the case of the food scarcity, upon a patriotic appeal, which does not at all reach considerable portions of the community?

If the fuel situation is as being represented in the public press, and we believe it is, then is not some form of drastic regulation a necessity? If so, how long will it be before adequate regulation is made effective? Our Public Health authorities found that provision and action with regard to the "Influenza" were rewarded by greatly relieving the distress arising from this epidemic.

AMERICANS AND THE VICTORY LOAN

The subscriptions sent over from the United States to Canada's domestic war loans, issued before our great neighbor entered the war, were quite important; and furthermore in the case of those loans our bonds were actively sold in the United States subsequent to the closing of the respective subscription periods. It was currently estimated that investors on the other side of the boundary line had taken as much as $70,000,000 or $80,000,000 of our first three issues. It will be remembered that Canada's third loan was floated just before the Washington Government declared war; and it therefore received a goodly measure of outside support. When our fourth domestic issue (the first Victory Loan) was brought off, American investors were more or less under compulsion to reserve their available funds for the war issues of their own Government and only comparatively small amounts came over to contribute towards our great total of $400,000,000 in subscriptions. In other words Canada carried that big transaction through practically without outside assistance. That is what she expects to do again on the present occasion. As a result of the successful placing of $750,000,000 of domestic issues, our self-reliance is increased and we approach the second Victory Loan (which constitutes the fifth domestic issue) with all confidence that it will be brought to a successful conclusion by our own unaided efforts.

At the same time, notwithstanding the circumstances above referred to, there will be a certain amount of money remitted from the United States for the purchase of the new Victory bonds. There are many Canadians resident there who have sent subscriptions to all or most of the four preceding loans, and who will do the same in case of this one. Many of these expatriated Canadians are wealthy, and the amounts they send are of considerable assistance. Then, of course, there will be some substantial remittances from American industrial, mercantile and other concerns having branch establishments or extensive business connections in Canada. Notwithstanding that they are hard hit by the increased taxation provided for in the new war revenue bill at Washington, most of the American concerns closely connected with Canada's business life will feel that they should subscribe something to the Dominion's war loan. The canvassers and organizers here will no doubt enlist the co-operation of the Canadian managers or representatives of the American companies in procuring subscriptions from their head offices. Also we can always count on a few subscriptions from American capitalists or investors desirous of showing their appreciation of the part played by Canada on the battlefields of France and Flanders; and a certain number will be attracted by the soundness of the investment in Dominion bonds and the comparatively high return obtainable on them.

When the Liberty Loan opened at the end of September the premium quoted here on New York funds tended upwards. One explanation of this movement was that it reflected the action of American banks and other corporations in recalling their Canadian balances for purposes of Liberty Loan payments; also Americans resident here were understood to be remitting funds home for subscription purposes. The movement of funds in connection with our new Victory Loan flotation will be in the opposite direction and should supplement the effects of the long delayed grain export movement in improving our exchange position.

A CANADIAN NATIONAL OCEAN SERVICE

It is evidently the policy of the Dominion government to embark upon an extensive programme of ocean shipping. The government has placed contracts with Canadian shipping yards for the construction of 31 steel steamers. These contracts, it is claimed, have been placed on advantageous terms. "So much is this the case," said Hon. C. C. Ballantyne, Minister of Marine and Fisheries, recently, "that if the government at the present time decided to dispose of some of the contracts already concluded, very substantial profits would accrue. The policy of the government, however, remains what it was at the outset—to retain for the use and advantage of the people of Canada all vessels in the contract or to be hereafter contracted for." These arguments sound familiar; they recall those advanced within the past two years in support of the aquisition of the Canadian Northern, and many years ago in favor of the construction of the National Transcontinental. Our old national road the Intercolonial, has continually been operated "for the use and advantage of the people of Canada," in return for which privilege they have had to meet from the public purse a chronic deficit. Are the prospects any better in the case of the ocean services now planned?

Even supposing that the Dominion Government has secured ships at attractive prices in view of present conditions, it is obvious that a worse time could not very well have been selected at which to invest the capital for such an enterprise. The prices of materials, of labor and of the completed ships are enormously higher than they were a few years ago, and it is a pretty safe assumption that they will be lower within the next few years. The capital invested, therefore, will represent a minimum of producing assets. If present programmes are successfully completed the number of merchant vessels in the world at the close of the war will greatly exceed the number in 1914, and when the short period of readjustment, during which transportation in abnormal quantities is required, comes to an end, it may reasonably be expected that passenger and freight rates will drop considerably. Quite apart from these factors is the more general view, which has been established time and again in actual practice, that the state cannot operate such an industry as satisfactorily as can a private concern. It must be admitted, however, that there is this difference between a government steamship and a government railroad program, namely, that in the former case the capital is invested in assets which are readily saleable provided the ships measure up to reasonably good standards, while in the latter case a road unwisely constructed may be worth very little more than the material of which it is composed..

This ocean service is, it is stated, to be operated in conjunction with the national railway system, the whole forming a scheme similar to that operated by the Canadian Pacific Railway Company. Presumably, therefore, it will compete with the Canadian Pacific system, If in future years the government system does not operate upon a paying basis, will the same measures be adopted as have been used to make the earnings of the weak Canadian roads measure up towards those of the Canadian Pacific,—will deficits be met out of the national purse, or will the ships and other property be disposed of at a loss?

In the editorial last week entitled "Accountancy as a Profession," reference was made to the American Institute of Chartered Accountants. The correct name of this society is the American Institute of Accountants.

Cable transfers	4.86.30	4.86.45	4.88½

Sterling demand in New York, 4.75¾.

Bank of England rate, 5 per cent.

WAR TAXES SHOW LARGE INCREASE

War taxes collected by the Department of Inland Revenue during October show an advance over the war revenue of October, 1917, of almost one and a quarter million dollars. The amount taken in was $1,331,302, as compared with $108,371 in the previous October. The large increase was due to the new taxes imposed by Parliament last session. Excise taxes fell slightly below the three million mark, an increase of $400,000 over October, 1917. The total increase in collections over October, 1917, was $1,647,000.

Goldman (Central Division Organizer).

GREETINGS FROM UNITED STATES TREASURY

On November 5th Sir Thomas White received the following message from Hon W. G. McAdoo, secretary of the United States treasury:—

"May I not send you my best wishes for a most successful outcome for your fifth Victory Loan campaign? The men from the States and the men from your great Dominion are fighting shoulder to shoulder against a common enemy, and winning glorious victories for liberty and democracy, which mean the early return of the only kind of peace worth having, the kind of peace for which we fight. It is a genuine privilege for those who stay at home to serve our heroes at the front. America joins hands with her gallant neighbor, Canada, in service to humanity and civilization. We must always put the necessary financial resources in the scale to make that service effective."

The minister of finance sent the following reply:—

"Many thanks for your splendid message, which will be greatly appreciated throughout the Dominion, and will inspire all to greater effort. We are proud to be fighting shoulder to shoulder with our gallant comrades of the great Republic in this terrible war, waged for freedom and civilization, and now nearing victorious conclusion. Canada, which has made so many sacrifices for the cause in the field, will not fail to do her full duty at home. The Victory Loan campaign goes exceedingly well. Best regards."

THE LOAN OUTLOOK

With considerable reason for expecting an early peace, an entirely new factor enters into our economic as well as our political life Whatever happens during the next few weeks, however, it is absolutely essential that we maintain that industrial production which has proved such a source of economic and military strength during the past four years. As was said in the early days of the war by a leading English statesman, it may be the last dollar which wins the struggle, and it behoves us to see that Canada is not lax in concluding her part in the war as brilliantly as she has begun it. Indeed, the most trying economic problems will come at the close of the war, not during it, because that patriotic spirit, which has worked for effort and harmony in industrial relations, will then be lacking in whole or in part.

The conduct of the war on the part of Great Britain, the colonies and the United States, has been characterized by a kind of blatant optimism as to the future, coupled with a magnificent industrial effort. Let us drop the former, but continue the latter indefinitely in the rebuilding of new peace structures.

As regards the Victory Loan campaign, it is still essential that an unqualified success should be recorded. Mr. G. H. Wood, chairman for Ontario, expresses a view which should be shared by all Canadians. "To-day's peace celebrations," he says, "although premature, make us pause to consider what the effects of actual peace will be on the campaign. I am afraid that there may be a grave danger of many, because the end of the fighting appears to be in sight, feeling that such an amount as $500,000,000 would not now be required. This is, of course, a totally wrong conclusion, and the public must be warned not to harbor any such illusion for the following reasons:—

"(1) An armistice merely leads to a declaration of peace and may involve months of negotiation before peace treaties are actually signed.

"(2) It will then take from one to two years to demobilize and bring our soldiers home.

"(3) The Mother Country will require our foodstuffs for probably years to come, and Canada must furnish the funds if our products are to find that market.

"(4) War expenditures will continue long after an armistice has been signed and banks' advances must be repaid.

"There is just as much need, therefore, to raise not less than the $500,000,000 with peace as without it."

PRESS SUPPORT OF LOAN

At a special dinner of the Toronto Victory Loan committee and canvassers, held at the King Edward Hotel on Tuesday, the 5th inst., local representatives of the press of Canada were present Among the speakers were Mr. W. J. Hanna, of the Imperial Oil Company; Mr. W. J. Taylor, president of the Canadian Press Association, and Mr. J. E. Ganong, chairman of the local publicity committee. Mr. Hanna, formerly food controller of Canada, referred to the importance of the Victory Loans of 1917 and 1918 in stimulating the production in Canada of the food which is so essential to the Allies. Mr. Ganong outlined the work which the local publicity committee was doing, and Mr Taylor, on behalf of the press representatives, assured the workers of the continued assistance of the newspapers and journals

LATEST VICTORY LOAN FIGURES

Up to midnight, November 7th, the following figures of loan subscriptions had been received at headquarters in Toronto:—

British Columbia	$ 12,175,950
Alberta	7,544,850
Saskatchewan	6,034,950
Manitoba	16,405,300
Ontario (including Toronto)	128,917,650
Quebec (including Montreal)	49,769,000
New Brunswick	5,537,100
Nova Scotia	12,752,850
Prince Edward Island	644,650
Grand total for the Dominion	$239,782,300

Subscriptions in Toronto are reported at $45,249,000, and in Montreal at $38,507,950. A list of large subscriptions appear elsewhere in this issue.

VICTORY LOAN COMMITTEE AT NORTH VANCOUVER

The city of North Vancouver and adjoining district municipalities of North Vancouver and West Vancouver have, following the precedent of last year, been formed into a Victory Loan district, with Lieut.-Col. G. H. Dorfell as chairman. The committee consists of Mayor G. W. Vance, Reeve Bridgman, Reeve Vinson, Alderman G. H. Morden and Messrs. R. F. Archibald, C. H. Lamberton, Watts Doney, Perry, D. Toddum and W. B. Goldie, with Mr. James Chapman as secretary. A high objective has been set, but the district looks to surpass it. Valuable help in the campaign is being lent by the civic and military authorities and by the Victory girls and Boy Scouts. Unfortunately, the prevailing epidemic has interfered with public meetings, but it is hoped that they are only postponed.

TORONTO'S OBJECTIVE RAISED

At a dinner at the King Edward Hotel, Toronto, given, on November 7th, to the honorary members of the Toronto Victory Loan Committee by Sir Edmund Osler, chairman, it was decided to raise Toronto's objective from $80.000,000 to $100.000,000. Sir Edmund explained that the former figure was approximately the amount secured in Toronto in the first Victory Loan campaign, while the latter was the total which ought to be raised in the city if it were to do its part in securing a Dominion total of $500.000,000. Among the speakers were Mr. Lloyd Harris, until recently chairman of the Canadian War Mission in Washington, and who will leave shortly for similar duties in London, Eng., Rev. Capt. W. A. Cameron, Mr. A. E. Ames, Mr. J. W. Mitchell, Mr. J. H. Gundy, Mr. E. R. Wood. It was also decided, on the motion of Mr. P. C. Larkin, that a $10,000 club be formed.

The large plant of the Noxon Company in Ingersoll, Ont., has been purchased by the John Morrow Screw and Nut Company, Limited. The firm has set apart $10,000 for repairs, and it intends to offer the plant to the town with the hope that some large industry will be induced to locate here.

SOUTHERN ALBERTA ORGANIZATION

The above chart, prepared by the Southern Alberta Executive of the Victory Loan, shows the organization for that part of the province, and its relation to the Dominion organization. As previously mentioned in *The Monetary Times*, Mr. C. R. Mitchell, provincial treasurer, is chairman for the province of Alberta as a whole, but the work is carried out in the northern and southern parts of the province by separate committees. Working in co-operation with the Southern Alberta Executive are sub-committees on Finance, Publicity, Special Subscriptions, etc., as in the other provinces. The territory is divided into sections, presided over by divisional chairmen, and under these again are teams for the various towns, villages and rural communities. Calgary, the principal city, constitutes a separate division. This chart may be compared with that prepared by the Ontario organization, and published last week in *The Monetary Times*.

MORTGAGE COMPANIES FACE ISSUE

Representatives of mortgage companies met the Saskatchewan government on October 18th in regard to the seed grain situation, and it is now up to the head offices of the companies to make the next move The situation is that rural municipalities in most cases will purchase the seed wheat required for their ratepayers on patented lands. They have power to borrow for this purpose and take as security a mortgage on the land of those who receive advances of seed grain which take priority over all other encumbrances on the land with the exception of first mortgages. In addition the municipalities have a seed grain lien on the crop of the land seeded with the seed advanced for two years. This experience has proved that it gives ample security and in practically all cases the municipalities have been able to borrow all they required. In a few cases the provincial government has to guarantee the advances. It is not proposed to change the system, but in a few municipalities in the province the amount required to be borrowed runs into a very large sum. One municipality estimates $70.000 will be required for the purchase of seed wheat. It is felt that this is too large an amount for the municipality to finance, and the mortgage companies were called into conference with the government to determine whether they would extend aid to their debtors to secure seed grain, or whether the provincial government would take action. If the latter course is followed, the government would want to take lien security which would take precedence over all encumbrances including first mortgages, and this the mortgage companies are opposed to, as it would weaken their security in some cases.

The mortgage companies are consequently faced with the alternative of either helping to finance their own debtors and retaining their security unimpaired or letting the government step in and losing priority in security.

OPTIMISTIC FEELING IN CALGARY

Crops Averaging Better than Expected—Collections Satisfactory—Strong Victory Loan Organization—Alberta Flour Mills, Limited

(Staff Correspondence.)

Calgary, October 25, 1918.

Thrashing is now practically completed in the West and, on the whole, is averaging much better than was generally expected. The district around Calgary and especially in Southern Alberta, is no exception. Some farmers have very little indeed for their summer's work, while others have received a good average crop, more particularly on land that was well farmed. In an interview with James W. Davidson, of the firm of Beisecker and Davidson, Calgary, large dealers in Alberta farm lands, when asked as to how collections and general conditions would be this fall, he said:—

"Collections on land contracts in that portion of Alberta, which is generally operated from Calgary are proving much better than indications warranted some three or four months ago. While the crop was generally light, perhaps not averaging over one-third of last year's yield, still there are a considerable number of farmers who have obtained sufficient to give them, at present prices, gross returns quite equalling, if not exceeding, the income from crops previous to the war.

"Where a farmer is blessed with grown-up sons to care for the labor, and obtained even a small crop, such parties have a good net return, and this is evident in the number of our contracts upon which we have received payment during the past few weeks, made in advance of due date. Furthermore, even in the case of farmers with practically no crop, we find, in many instances, that they have other resources and quite a number of substantial payments have been received from such parties during the past month.

"The partial failure of crops seems not to have created a pessimistic feeling. From all reports the farmers who have the land and the labor to work it are preparing for a larger acreage than ever during the coming season.

Large Scale Farming not Good.

"The individual that is suffering is the farmer or land owner who is operating on a large scale and is dependent upon hired labor. In fact, it would appear that the days of the big farm are drawing to a close in Alberta. Labor has not only demanded an unreasonable wage, but, generally speaking, has been decidedly inefficient and anarchistic. As one of the largest operators informed me at an auction sale, a few days ago, at which the last of his outfit was being disposed of: 'Formerly I told my men what to do; this year they told me what to do.' Stock ranching, which can be cared for with a minimum of outside labor, is appealing to many of these people, and I believe we will see in the coming year many of the large grain farms for sale. Either that, or they will be split up into units and rented to or worked on shares by men who have in their own family the bulk of the labor required. The man with a big family of husky sons has the greatest opportunity for profitable farming that has, I believe, ever been known.

"There is still considerable activity in sales, though the demand this autumn has been more largely for our mixed farming lands in the Airdrie and Crossfield districts, than for the exclusively grain lands further east."

Southern Alberta Victory Loan.

Mr. Wm. Toole, of the firm of Toole, Peet and Company, Calgary, chairman of the Southern Alberta Victory Loan organization, and Mr. G. R. Marnoch, president of the Lethbridge Board of Trade, vice-chairman, along with the rest of the executive committee, have put some unique effort into the present campaign. They issued a most convincing story of the present loan which will, undoubtedly, "go well over the top' in these districts, in six different languages—Russian, Ruthenian, Polish, Italian, French and German. In discussing the ultimate success of the loan with Mr. Marnoch, vice-chairman, he spoke of these people as 'the people who come from somewhere,'' stating in a circular to the organizations in the various districts that: "We are all foreigners in Canada, bar the Red Indians, and we do well to remind ourselves occasionally that we invited these people to come here to hew our wood, to draw our water, and to mine our coal, and to remember that we altogether neglected our duty to help them to become responsible citizens of our country.

"They made big purchases of Victory Bonds last year, and helped Southern Alberta to make the wonderful showing that we did. Those of them who have Victory Bonds have discovered the benefit of the investment, and they have been telling their neighbors that they have got their first payment of interest.

"We know that they possess large amounts of currency, which they hide or carry about with them. They used to send their money to the countries of their origin, but they know now that that is very unsafe and that taxation will be very heavy in all those countries. You should see to it they get to understand that Victory Bonds are free from taxation by the Dominion Government."

In another circular issued by Mr. Toole and Mr. Marnoch they state: "Although Germany is beaten, there may be quite a little way to travel yet before the poor deluded common people of Germany fully discover that they mistook a man-made machine for their own human soul.

"If the answer to their request for an armistice be 'See Foch,' let your answer to your country's request now be: 'If you want money—See me.' "

In regard to the Mennonites, about whom there has been considerable controversy recently, Mr. Marnoch mentioned that they expected to get good subscriptions from some of these people, pointing out that away back 44 years ago, the Dominion government lent this sect in Alberta $80,000, and that, as one of them remarked, they were not going to forget this when the government needed money, Sir Thomas White giving them the assurance that the government would see that their subscription would be used for relief purposes—such as hospitals, etc.

Alberta Flour Mills, Limited.

There is at the present time in Calgary, in the course of construction, a new flour mill, which, when completed, will be one of the largest and most up-to-date in Western Canada. The mill will be of a 6,000-barrel per day capacity, with terminal elevator to store 1,000,000 bushels of wheat. All to be constructed of reinforced concrete.

Alberta Flour Mills, Limited, is incorporated under the "Companies Act, Part 1," of the Dominion of Canada, with an authorized capital of $5,000,000, divided into 50,000 shares of the par value of $100 each. Official permission for the issue of these securities (or shares) as required by order-in-council (3439, of December 22, 1917), has been duly obtained. The directors of the company are: Mr. Geo. Lane, president, president of Geo. Lane, Limited, ranchmen, farmers and livestock dealers; Mr. A. E. Cross, vice-president, president of the Calgary Brewing and Malting Company, Limited, ranchman and farmer; Mr. Edward E. Stevens, general manager, is from Minneapolis, where he has had a life-long experience in the domestic sale and export of flour; Mr. Wm. Pearce, late statistician Dominion Economic and Development Commission and Fellow Royal Geographical Society; Colonel J. S. Dennis, ex-president Engineering Institute of Canada; Dan E. Riley, one of the leading ranchmen and farmers of Southern Alberta.

The directors have brought to Calgary the latest equipment to build the plant with the greatest labor saving devices and least expense. Mr. Alex Ingraham, president the Willford Manufacturing Company, of Minneapolis, a milling engineer of over 30 years' successful experience, is overseeing the construction work and is the designer of both mill and elevator. The head office of the company is in Calgary, where the securities of the company are being handled direct. No bonus stock or promotion stock is to go to any person; directors and investors alike are paying par for their stock.

Alberta now raises quantities of as high grade wheat as is raised anywhere in the world, and the building of a 6,000 barrel per day flour mill at Calgary brings to attention the new routings westward and the almost unlimited opportunities extended to the mills of the West by the Panama Canal and the Asiastic markets.

The Loaning Situation.

Mr. William Toole, manager of the Canada Life Assurance Company, Investment Department, for Southern Alberta, when interviewed by *The Monetary Times*, said:—

"General loaning conditions might be much worse. After all, Alberta is a most fortunate province endowed with extraordinary recuperative capabilities. Conditions in Alberta are

NATIONAL TRUST COMPANY
Limited

not as rosy or prosperous, nor the people spending money in the same free and easy way they were this time last year. Our cereal yields on the whole are not up to our average, and in some localities partial and whole failures are reported. It has been an exceptionally dry year, but the greatest damage was done by the warm winds which swept over the country when the grain and fodder crops were suffering from want of moisture. Much anxiety was apparent during the summer for fear the hay and fodder crops would not be sufficient to take care of the stock during the winter, but, fortunately, we received rains in many districts with favorable growing conditions which relieved the general situation. On account of the dry season there has not been as much new breaking done as last year, but a very large area has been prepared this fall for early seeding.

"Many new settlers have come to Alberta during the year, and large sums have been expended on the the farms and ranches in permanent improvements.

"In regard to mortgage loans there has been a very noticeable increased demand for money, and large sums are being invested by the various mortgage companies in farm land securities. The prevailing rate is 8 per cent.

"Has the legislation of recent years made any difference in the attitude of the companies? It certainly has. The lending companies are not going so far from railway and market facilities as they did some years ago, and neither are they lending as large amounts in comparison with appraiser's valuations as they did a few years ago. Those precautions are only reasonable and good business, when it is considered the effect recent legislation has had on mortgage investments, not only in Alberta, but throughout the three western provinces. Newer districts are certainly at a disadvantage as compared with a few years ago, when it was generally recognized that a first mortgage under our Torrens Title system was absolutely gilt-edged security, providing the proper precautions had been taken in securing the security, but recent events have forced agents and managers for mortgagees, whether they be companies or individuals, to exercise the greatest precaution.

"How is the Victory Loan going this year, and have you anything to say about it? Our organization is stronger and better equipped than last year. We have been very much handicapped by reason of the influenza epidemic which has prevented the holding of meetings, and consequently a more determined personal canvass has to be arranged for. The papers are all giving us splendid support, without which, of course, we could not reach the people. Sir Thomas White was here recently, and addressed a meeting of our district chairmen and editors, and his remarks were splendid and did much to inspire everyone present, so that our country representatives went away filled with enthusiasm. It was unfortunate that we were unable to have a public meeting. Albertans responded to the call to arms in a magnificent manner, they have subscribed liberally to previous loans and I firmly believe, despite the adverse conditions with which we have to contend this year, that we will exceed our objective in every district."

SASKATCHEWAN REFUNDING LOAN

Subscriptions were received up to October 10th, at the office of the Union Bank, in London, England, for a province of Saskatchewan loan. The amount is £650,000 in 5¾ per cent. debentures, and the price of issue 99 per cent. As the object of the issue is to replace the £619,800 of 4½ per cent. debentures maturing on January 1st next, holders of these debentures were given the opportunity of converting the whole or any part of their holdings into an equal amount of the debentures offered. Holders exercising the option to convert receive a cash payment of £1 per cent.—the difference between the issue price of the new loan and the value of the old loan on maturity—and also retained the coupon due next January on the existing loan. This is the first time for a long period that a Canadian borrower has appeared in the London market. Since the war made it necessary to restrict the raising of capital in Great Britain to war purposes, Canadian borrowers have satisfied their requirements in the United States and, to an increasing extent, in Canada itself. There would probably have been no break in Canada's abstention from the London market now had the purpose of the issue not been to replace a security floated and held there.

LIFE PRESIDENTS TO MEET IN DECEMBER

Broad Questions of Life Insurance and Thrift to be Discussed at Annual Convention in New York

Invitations to attend the twelfth annual convention of the Association of Life Insurance Presidents at the Hotel Astor, New York, on December fifth and sixth, have been mailed to the principal executive officers of all the life insurance companies of the United States and Canada. The Insurance Commissioners are also being asked to attend. Their convention will be held earlier the same week at the Hotel Astor and it is expected that many of them will remain over for the executives' meeting.

A preliminary announcement accompanying the invitations indicates that this year's convention of the Life Presidents will take the form largely of a Thrift Conference involving war and reconstruction problems on the financial, economic and human side. Representatives of other business interests and Government officials have been invited to contribute to this part of the programme.

The announcement which was made by Manager George T. Wight of the Association follows:

"Our twelfth annual convention will have as its theme 'Freedom and Thrift in Nation and World.'

"The programme will provide a discussion of future national development accentuated by thrift intelligently and voluntarily practiced. The constructive influence of American life insurance as a component part of civic life and as a teacher of thrift, and other aids from various thrift agencies, will be presented. The convention in fact and form will be a thrift conference.

"Millions of Americans now devote themselves to saving money, where formerly their chief thought was to spend it. Other millions, already practiced in thrift, are doubling their savings. The life insurance policy and the savings bank book have fostered the War Savings Stamp and the Liberty Bond. Thus the principles of life insurance, invoked in times of peace, become a part of the nation's reserves in time of war.

"The days of reconstruction, too, will demand continuing thrift and economy. This demand may even increase in scope. Life insurance can consistently claim as much as any single agency to have laid the foundation for national thrift. The permanency of the structure to be erected above that foundation will require the continuing creative genius which conceived the idea of thrift as an essential to social stability with its consequent contribution to Governmental strength. It seems fitting that a convention of life insurance executives at this time should give prime consideration to the further development of the principles of thrift so thoroughly interwoven in their business. Representatives of banking and other business interests are expected as guests. They will contribute to the theme of the convention from their experience and viewpoint.

"The conference will be confined to the financial side of the thrift theme. It will embrace the human question of conserving and adapting man power to social economic needs. A Government official has promised to present plans determined upon for the vocational retraining of disabled soldiers and sailors, bringing a special message to life insurance companies.

"Topics and speakers will be announced later."

EDMONTON'S TAX ARREAR DEBENTURES

The Edmonton commissioner's report providing for the redemption of 1914-1915 tax arrear debentures in order to effect a considerable saving for the city, was adopted by the council on October 15th.

While no authoritative figures are given, it is estimated that the amount of debentures to be redeemed will range about $100,000. These funds are in the hands of the sinking fund trustees and are drawing but 3 per cent., while the city has been obliged to pay 6 per cent. The redemption of these debentures, authority for which was obtained by charter amendment at the last session of the legislature, will wipe away this heavy interest payment.

How Many

Bonds

TO-DAY?

That's the pertinent question being asked.

And it's Canada that's doing the asking.

Canada's jaws are set, and looking squarely into your eyes she asks :

"How many Bonds To-day?"

Space Donated to the Winning of the War
By the Toronto Members of the
Bond Dealers' Association.

What is YOUR Answer?

Canada wants plain talk, no quibbling.

Canada is through with "conversational" help—words are fine but they won't buy food or guns.

Advice—Canada has more than plenty, little of which can be traded for ammunition.

She wants a direct answer to this question:—***How many bonds to-day?***

An answer that will spell action.

Such action as will fulfill your duty as a citizen.

Yes, and help pay the obligation you owe to your country. And when you have answered—

Stand erect in all your manhood—

Proud of the flag under which you live—loyal to the country you call your own—ready to help and protect to the last dollar.

To buy your quota—your equal share—is a simple duty—patriotism suggests that you do more.

If you fail Canada now—you are shifting your just burden on to another man's shoulders.

Endangering the Patriotic Spirit of Canada.

Put every dollar you have saved, and can save, and every dollar you can borrow, at work—at work saving lives and bringing our fighting men, sons, husbands, brothers, friends, home alive and victorious.

If you cannot fight it's your bounden duty—your very self-preservation—demands that you lend your money to your country—

If your income is $2,500 and upwards—do not buy a couple of bonds and sit back with a look of self-satisfaction. DOUBLE your first figure. You are not giving, you are lending—at good interest—on the best security in all Canada,

BUY VICTORY BONDS---MORE VICTORY BONDS---STILL MORE VICTORY BONDS

Bond Dealers' Association.

OCTOBER MUNICIPAL BOND SALES

Victory Loan Activities Account for the Low Volume of Sales Last Month—Sale of $170,000 in United States Market

The municipal bond sales in Canada during October, 1918, totalled $103,000, compared with $761,600 in September, and $398,771 in October a year ago. The October records of municipal bond sales at home for the past eight years are as follows:—

October.	Municipal bond sales in Canada.
1911	$1,730,075
1912	1,060,597
1913	3,452,282
1914	737,420
1915	1,245,874
1916	1,361,665
1917	398,771
1918	103,000

The large increase of October, 1917, total over October, 1918, total, is accounted for by the fact that the Victory Loan campaign in 1917 started a month later.

In addition to the $103,000 municipals sold in Canada, $170,000 were sold in the United States, making the grand total for October $273,000, the smallest October total in recent years.

Last Month's Sales Small.

The following are the details of October sales:—

Quebec.

Municipality.	Rate %.	Term (Years).	Amount.
Sorel	6	5	$75,000

Manitoba.

Municipality.	Rate %.	Term (Years).	Amount.
Brandon			28,000

The following table summarizes the above details:—

Province.	Municipal bond sales, October, 1918.
Manitoba	$ 28,000
Quebec	75,000
Total	$103,000

The following table shows the sales of municipal bonds in Canada only, during the past three years, and this year to date:—

	1915.	1916.	1917.	1918.
January	$ 1,784,047	$ 1,909,441	$ 1,969,256	$ 461,000
February	3,047,011	1,419,909	458,874	5,243,279
March	2,572,357	2,027,741	229,013	9,191,643
April	8,603,004	1,979,852	1,182,974	3,968,995
May	3,464,281	2,649,000	1,375,939	4,751,142
June	2,395,744	3,043,283	1,642,003	10,108,606
July	1,618,422	1,521,525	3,814,489	1,415,946
August	6,087,415	852,447	4,637,826	3,158,307
September	2,768,184	960,435	440,268	761,600
October	1,245,874	1,361,665	398,771	103,000
November	1,645,892	1,246,480	917,191	....
December	1,676,693	669,000	890,000	....
Total	$31,910,214	$19,640,778	$17,955,714	$39,163,608

Sold in United States.

The following is a record of Canadian municipal bond sales in the United States during October:—

Municipality	Rate %	Term (Years).	Amount.
New Westminster, B.C.			$170,000

The offer of the Lumbermen's Trust Association, of Portland, Ore., was accepted for the purchase of $100,000 worth of the city's bonds, and a sixty-day option on another $70,000 worth. The company exercised its option and took the bonds towards the end of last month. The offer calls for the disposing of the bonds at 91 with accrued interest and the exchange on foreign money, which makes the bonds worth a small fraction over 93. The sale was authorized by the United States government and by the local manager of the Bank of Montreal, and by the bank's head manager at Montreal.

The sale recorded above was the only sale of Canadian municipals in the United States during October. The sales of our municipals in that market during the past three years, and this year to date, are as follows:—

	1915.	1916.	1917.	1918.
January	$ 340,000	$ 3,183,215	$ 2,454,000	$ 10,000
February	6,471,000	809,500	485,725	300,000
March	6,543,947	595,000	120,440	Nil
April	7,100,825	2,158,306	1,563,200	Nil
May	600,000	7,219,000	Nil	Nil
June	Nil	3,393,243	80,000	Nil
July	890,000	3,631,200	1,530,000	Nil
August	750,000	97,300	Nil	Nil
September	6,748,342	200,000	Nil	Nil
October	1,580,000	Nil	Nil	170,000
November	4,000,000	7,894,000	Nil	....
December	450,000	3,065,000	Nil	....
Totals	$35,483,114	$32,335,764	$ 6,233,365	$ 480,000

Bank Loans to Municipalities.

The following table, compiled by *The Monetary Times*, shows the volume of bank loans to municipalities since January, 1915:—

	1915.	1916.	1917.	1918.
January	$35,952,802	$32,015,371	$24,487,272	$40,015,466
February	38,437,903	35,149,915	26,121,324	43,535,628
March	41,227,449	38,649,462	29,877,911	50,652,061
April	43,031,360	44,371,050	35,931,996	55,685,350

June	46,889,816	46,773,032	42,757,673	58,000,424
July	44,029,446	42,385,096	43,989,207	56,589,173
August	46,020,730	30,882,811	43,940,176	56,662,931
September	43,028,331	38,708,745	42,721,563	47,977,472
October	45,682,230	37,613,530	41,204,781	....
November	41,064,550	32,045,963	36,459,598	....
December	30,878,028	24,056,797	36,353,039	....

School District Sales.

Between August 15th, 1918, and September 27th, 1918, many blocks of Saskatchewan School District bonds were disposed of, totalling $67,500. Record of these sales was not made in our August or September monthly sales, because announcement was not made until the beginning of last month.

SOUTH VANCOUVER'S CONDITION IMPROVED

Mr. F. J. Gillespie, commissioner for South Vancouver, B.C., announced on October 23rd, that Spitzer, Rorick and Company had agreed to take $200,000 for two hundred of the $1,000 treasury certificates with full and accrued interest for September and October, making approximately $202,000. These certificates were issued by the municipality in March, 1917, and were for a three-year term, maturing in March, 1920, at 6 per cent. The entire issue was for $450,000 and the municipality will, therefore, still owe $250,000. As the municipality was only getting 3 per cent. from the bank for the $200,000 or so, Commissioner Gillespie pointed out that it was good business to pay out this money and redeem the certificates, thereby saving the six per cent. interest between now and the date of their maturity.

Speaking with reference to the tax sale which will be held in the municipality next year, Commissioner Gillespie said that if this sale is a success, and with the promised changes in the Municipal Act, he believed it would be that South Vancouver would see daylight financially. The tax sale, according to the present act, must be held between July 15th and October 15th, but the proposal is to make all tax sales take place during September. This municipal tax sale will be for 1914 tax arrears. Mr. Gillespie said that it was a well-known fact that when South Vancouver held a tax sale in 1915 there was too much property put on the market with the result that the public was not able to purchase it. Lands offered at that time included property on which taxes from 1911 to 1913 inclusive were in arrears.

OCTOBER FIRE LOSSES

Largest Total on Record Since Halifax Disaster—Due to Imperial Munitions Explosion

The Monetary Times' estimate of Canada's fire loss during October, 1918, is $5,119,145, compared with the September loss of $917,286 and $704,605 for October, 1917. The following is the estimate of the October losses:—

Fires exceeding $10,000	$4,877,000
Small fires reported	45,300
Estimate of unreported fires	196,845
Total	$5,119,145

The Monetary Times' record of the past three years and this year to date, shows the following monthly losses.

	1915.	1916.	1917.	1918.
January	$ 1,249,886	$ 1,649,217	$ 1,918,660	$ 2,688,556
February ..	1,019,556	3,275,600	2,009,953	2,243,762
March	1,632,696	1,406,501	2,050,650	1,682,286
April	1,463,747	1,460,437	1,317,714	3,240,187
May	881,855	1,850,205	1,163,110	3,570,014
June ..	1,157,156	494,557	1,184,627	3,080,982
July	773,269	3,039,634	1,101,734	3,369,684
August	403,693	1,057,109	1,230,183	3,110,445
September ..	1,116,109	981,703	1,301,700	917,286
October	1,290,325	1,077,815	704,605	5,119,145
November ..	1,087,980	923,235	959,049	....
December ...	1,595,255	3,271,496	5,144,100	....
Totals ...	$13,671,527	$20,487,509	$20,086,085	$29,022,347

The fires reported in October at which the losses amounted to $10,000 and over were:—

Brantford, Ont., October 4, barns of J. Nightingale, $10,000.

St. Catharines, Ont., October 8, Wipper's confectionery establishment, $20,000.

Fort Rouge, Man., October 17, building and stock of Gray Campbell Carriage Company, $400,000.

Montreal, Que., October 19, plant of Traversy, Limited, $100,000.

Trenton, Ont., October 14, plant of the Imperial Munitions Board, $3,500,000.

Brockville, Ont., October 28, plant of the Canadian Carriage Company, $500,000.

Dunvegan, Alta., October 22, offices of the Edmonton Dunvegan and British Columbia Railway, $10,000.

Quebec, Que., October 24, establishment of J. M. Stobo, boot and shoe manufacturer, $100,000.

Vancouver, B.C., October 22, Ladyware store, $15,000.

Quebec, Que., October 29, Ancient Quebec Skating Rink, $60,000.

Winnipeg, Man., October 28, Curry Building, and stock of A. J. Brenton Fur Company, $150,000.

Newcastle, N.B., October 29, "Advocate" building, $12,000.

Destroyed or Damaged.

Among the structures damaged or destroyed last month were:—Business buildings, 6; garages, 2; barns, 12; stable, 1; plant, 5; residences, 7; granary, 1; college, 1; warehouse, 1; theatre, 1; freight shed, 1; drying kiln, 1; store, 1; flax mill, 1; blacksmith shop, 1; office, 1; hotel, 1; hospital, 1.

Among the causes reported last month were:—Playing with matches, 1; explosion of gasoline tank, 1; explosion of natural gas, 1; defective wiring, 1; heating of acid in process of manufacturing T.N.T., 1.

The following is a list of fires at which fatalities occurred last month:—

Brant, Ont., October 11...	Trapped in burning barn	1
Florence, Ont., October 3..	Trapped in burning house..	1
Quebec, Que., October 8...	Clothing caught fire from stove	1

LIABILITY OF LESSEE FOR FIRE

Case Comes into Quebec Court for Decision—Lessee Claims Owner is Responsible Because of Defects

An interesting case was argued in the Quebec Court of Appeal recently in which their Lordships Justices Carroll, Cross, Pelletier, Martin and Tellier—the last-named sitting as judge ad hoc—will have to decide, among other things, whether the following article (1629) of the Civil Code may be applied in the present instance:—

"When loss by fire occurs in the premises leased, there is a legal presumption in favor of the lessor that it was caused by the fault of the lessee or of the persons for whom he is responsible; and unless he proves the contrary he is answerable to the lessor for such loss."

Knox Henry was tenant of a house at Chambly. On February 4th, 1911, the water pipes were frozen and the tenant called in Samuel Dumaine, plumber, to thaw out the pipes. The latter used a gasoline lamp, and while he was at work the house caught fire which destroyed the building. Joseph Ward, the proprietor, took action against his tenant and the plumber, claiming $4,000 damages, alleging that the fire resulted from the imprudence of the plumber, and holding that Henry and Dumaine were jointly and severally liable for the $4,000 loss by fire.

In the Superior Court plaintiff's action was dismissed by Mr. Justice Demers. The case was inscribed in review, and by a majority decision (Justice Greenshields dissenting) the defendants were held liable and condemned in damages.

In the present appeal from the judgment of the Court of Review, the question is whether the article quoted above is applicable, thereby establishing presumption of fault against the tenant and putting upon him the burden of proof that the fire was not due to fault on his part or on the part of the plumber whom he engaged.

Henry submitted that the specific imprudence of the plumber destroyed all the benefit that plaintiff might otherwise claim from the presumption established by Article (1629) of the Code referred to. Then it was submitted that plaintiff had failed to establish any fault on the part of either the tenant or the plumber. It was argued that the fire resulted from defects for which the proprietor was responsible, and for the reasons submitted, the plaintiff-respondent's action should fail.

Judgment was reserved.

Perron and Taschereau appeared for Ward; Bissonnet and Cordeau for Dumaine, and St. Germain and Company for Ward, the respondent.

CANADIAN NORTHERN ANNUAL MEETING

Following a meeting of the board of directors of the Canadian Northern Railway on October 25th, the annual meeting of the shareholders was held, at which the previous directors were re-elected. The report submitted was adopted.

R. C. Vaughan has been appointed assistant to the president of the company, D. B. Hanna.

M. H. Macleod is to be vice-president of operation, maintenance and construction, with jurisdiction over all lines. R. P. Ormsby is to be secretary of the company. A. E. Warren is to be general manager at Winnipeg of western lines.

ILLNESS AND QUEBEC COMPENSATION LAW

Superior Court of Province Decides That Illness Contracted While at Work Does Not Come Under Act

Is a workman's illness, if contracted in the course of his work, an accident within the meaning of the Workmen's Compensation Act? The question was submitted in the Superior Court in Quebec Province in four cases before Mr. Justice Tellier for adjudication. His Lordship's conclusion was in the negative, and the actions as entered were dismissed.

Early in 1917 Joseph Brabant, Arthur Charron, Ernest Charron and Edmond Charron were engaged to work for the Canadian Pacific Railway Company in the sorting yard, near Lachine. They contracted typhoid fever, and Arthur Charron died. His widow, Dame B. Paquette, authorized by judgment of the court to enter in justice, took an action against the railway company under the Workmen's Compensation Act, claiming $2,025 damages in her own behalf and that of her minor children. It was alleged that deceased's illness was contracted while he was at work through drinking impure water supplied to him.

Ernest and Edmond Charron and Joseph Brabant recovered from their illness, and likewise took action against the company for damages under the Workmen's Compensation Act, alleging liability on the ground mentioned in the widow's plea.

Justice Tellier ruled that the actions would not legally lie under the statute in question. Employers, his Lordship pointed out, were liable under this measure for injuries resulting from accidents sustained by workmen in the course of their labor. Even if the men in question had contracted their illness through drinking water supplied for drinking purposes by the employer—and the Court said this had not been proved in any instance before him—but even if the proof were there, he said action in damages under the Workmen's Compensation Act could not succeed. The men's illness would then have resulted from something apart from their labor. It had not been shown that one of the conditions of their work was that the company should supply them with meat and drink. That was a matter entirely their own. The germ of the disease might have come elsewhere than from the source of the water supply in the railway yard.

On the merits of a claim under the Workmen's Compensation Act, the judge added that it must be proved that the injury sued upon resulted from an accident related to the injured party's work. What was an accident? In law it was a fortuitous event suddenly produced from the man's work. In none of the four cases under consideration had the men suffered from an accident within the meaning of the act. Their actions, therefore, were dismissed with costs.

HELP POST-WAR WORK

An important conference between representatives of the Canadian Manufacturers' Association and the labor committee of the Dominion reconstruction committee was held in Ottawa on October 23rd, when Senator Robertson presided. The Canadian Manufacturers' Association was represented by T. P. Howard, Montreal, first vice-president; C. Howard Smith, chairman, Montreal branch; R. E. Jamieson, E. Matheson, Major Anthes, chairman Toronto branch; W. H. Miller, H. Banfield, T. H. Murray, general secretary; H. Macdonald, assistant secretary, Montreal branch. Hon. T. W. Crothers, minister of labor; Tom Moore, president of the Labor Congress of Canada, and Dr. McFall, commissioner on the cost of living, were present.

A discussion took place on the way in which the manufacturers could co-operate with the government in the solving of reconstruction problem. The most pressing problem at the close of the war will be to find employment for all available labor. The manufacturing industry will be more seriously affected than any other, and the desire was expressed that the government take immediate steps towards increased production, without which Canada cannot hope to cope with the situation. It was agreed that a further conference be held between manufacturers and labor leaders.

Senator Robertson thanked the deputation for the valuable contribution they had made to the catalogue of ideas, some of which were already receiving the careful consideration of his department. Major Anthes replied on behalf of the delegates.

TRADE OF CANADA AND NEWFOUNDLAND

A report on trade in Canada and Newfoundland for 1917 has been prepared by the British trade commissioners in Canada, and published by the Department of Overseas Trade of the United Kingdom. Reviewing conditions during 1917, it says:—

"The most important fact bearing upon the economic situation of Canada during the year 1917 was the entry of the United States into the war. Before that event, it seemed as though the United Kingdom, engrossed in manufacturing supplies of war for her own needs and for her Allies, would be compelled gradually to withdraw from the export trade to Canada. Naturally, in such case, Canada, both on account of proximity to the United States and of the ever-increasing means of communication between the two countries, would seek to obtain from the neighboring republic that part of her requirements previously obtained from the United Kingdom, which the latter was not in a position to supply her.

"The entry of the United States into the war in April, 1917, changed the situation, but, while the pressure has thus been relieved to some extent, the United Kingdom manufacturers have not been in a position to resume their former activities and to supply the demands from overseas.

"On the other hand, the United States authorities have found it imperative to curtail the export of much raw material which came freely into Canada before the entry of the United States into the war.

"Meanwhile, Canada is receiving immense orders, both from the United Kingdom and from the United States, for munitions and equipment needed for war purposes, and will have to rely mainly upon the United States to supply her with the raw material necessary for their manufacture. There still remain many industries concerned with the manufacture of articles of personal or household necessity, and for these Canada will be dependent more and more on her own resources while the war continues.

"Statesmen and business leaders are now urging upon the manufacturers of Canada to look ahead and consider ways and means to organize for an intense production to meet requirements, when the war ceases, of the home and export markets.

"It is impossible to say exactly what effect there will be on Canadian prosperity upon the cessation of the war, but Canadian manufacturers may be expected to bring all possible influence to bear for the increase of tariffs on goods which it is anticipated that Canada can produce.

"United Kingdom manufacturers, when the war ceases and labor is once more available for peaceful purposes, should have no fear that they will not be able to regain the businesses they have been compelled to relinquish during the war, provided they maintain their system of supplying goods above reproach at reasonable prices.

"So far as the Canadian market is concerned, there will probably be large purchasing power available to absorb United Kingdom productions of a kind suitable for this country. The prosperity of Canada will depend:—

(a) On the happy development of its agricultural and natural resources;

(b) The extension of its home manufactures; and

(c) The development of an export trade in goods, which the Dominion may be able to produce more cheaply and economically than its competitors.

"The agricultural development must be settled by the attraction to the country of the right kind of immigrants (this phase is already in course of adjustment by the arrival of numbers of experienced United States farmers with capital), but as to the number of returned soldiers or of the farming class who may emigrate from the United Kingdom or the continent of Europe after the war, opinions are too widely divided to arrive at any reasonable conclusion. The extension of Canadian manufactures will depend very largely upon the introduction of foreign capital, and the amount available for this purpose will depend upon the situation which will prevail in the money markets of the world when the general settling day arrives. The export trade which Canada has now secured, after the most laudable and energetic efforts, will depend for its continuance upon the competition met with from other countries."

The main part of the report consists of statistics of Canadian industry, and of trade with the United Kingdom.

OFFICIAL PROSPECTUS

The proceeds of this Loan will be used for War purposes only and will be spent wholly in Canada

THE MINISTER OF FINANCE OF THE DOMINION OF CANADA offers for Public Subscription the

VICTORY LOAN 1918

$300,000,000 5½% Gold Bonds

Bearing interest from November 1st, 1918, and offered in two maturities, the choice of which is optional with the subscriber as follows.

5 year Bonds due November 1st, 1923
15 year Bonds due November 1st, 1933

Principal payable without charge at the Office of the Minister of Finance and Receiver General at Ottawa, or at the Office of the Assistant Receiver General at Halifax, St. John, Charlottetown, Montreal, Toronto, Winnipeg, Regina, Calgary and Victoria.

Bonds may be registered as to principal or as to principal and interest, at any of the above-mentioned offices.

Interest payable, without charge, half-yearly, May 1st and November 1st at any branch in Canada of any Chartered Bank.

Principal and Interest payable in Gold

Denominations: $50, $100, $500 and $1,000

Issue Price: 100 and Accrued Interest

Income Return 5½% per Annum

Free from taxes—including any income tax—imposed in pursuance of legislation enacted by the Parliament of Canada.

The proceeds of the Loan will be used for war purposes only, including the purchase of grain, foodstuffs, munitions and other supplies, and will be spent wholly in Canada.

Payment to be made as follows.

10 per cent. on application;
20 per cent. December 6th, 1918;
20 per cent. January 6th, 1919;
20 per cent. February 6th, 1919;
31.16 per cent. March 6th, 1919.

The last payment of 31.16 per cent. covers 30 per cent. balance of principal and 1.16 per cent. representing accrued interest at 5½ per cent. from November 1st to due dates of the respective instalments.

A full half year's interest will be paid on May 1st, 1919, making the cost of the bonds 100 and interest.

Subscriptions may be paid in full at the time of application at 100 without interest; or on any instalment due date thereafter together with accrued interest at the rate of 5½ per cent. per annum.

This Loan is authorized under Act of the Parliament of Canada, and both principal and interest are a charge upon the Consolidated Revenue Fund.

The Amount of this issue is $300,000,000, exclusive of the amount (if any) paid for by the surrender of bonds of previous issues. The Minister of Finance, however, reserves the right to allot the whole or any part of the amount subscribed in excess of $300,000,000.

Conversion Privileges

Bonds of this issue will, in the event of future issues of like maturity, or longer, made by the Government, during the remaining period of the War, other than issues made abroad, be accepted at 100 and accrued interest, as the equivalent of cash for the purpose of subscription to such issues.

Payments

All cheques, drafts, etc., covering instalments, are to be made payable to the Credit of the Minister of Finance. Failure to pay any instalment when due will render previous payments liable to forfeiture, and the allotment to cancellation. Subscriptions must be accompanied by a deposit of 10 per cent. of the amount subscribed. Official Canvassers will forward subscriptions or any branch in Canada of any Chartered Bank will accept subscription and issue receipts.

Subscriptions may be paid in full at time of application at 100 without interest; or on any instalment due date thereafter together with accrued interest to time of making payment in full. Under this provision, payment of subscriptions may be made as follows:—

If paid in full on or before Nov. 16th, 1918, par without interest, or 100 per cent.
If remaining instalments paid on Dec. 6th, 1918, balance of 90 per cent. and interest, ($90.48 per $100.)
If remaining instalments paid on Jan. 6th, 1919, balance of 70 per cent. and interest, ($70.80 per $100.)
If remaining instalments paid on Feb. 6th, 1919, balance of 50 per cent. and interest, ($51.04 per $100.)
If remaining instalment paid on Mar. 6th, 1919, balance of 30 per cent and interest, ($31.16 per $100.)

Denomination and Registration

Bearer bonds, with coupons, will be issued in denominations of $50, $100, $500, and $1,000, and may be registered as to principal. The first coupon attached to these bonds will be due on May 1st, 1919.

Fully registered bonds, the interest on which is paid direct to the owner by Government cheque, will be issued in denominations of $50, $100, $500, $1,000, $5,000, $10,000, $25,000, $50,000, $100,000, or any multiple of $100,000

Payment of Interest

A full half year's interest at the rate of 5½ per cent. per annum will be paid May 1st, 1919.

Form of Bond and Delivery

Subscribers must indicate on their application the form of bond and the denominations required, and the securities so indicated will be delivered by the bank upon payment of the subscription in full.

Bearer bonds of this issue will be available for delivery at the time of application to subscribers desirous of making payment in full. Bonds registered as to principal only, or fully registered as to principal and interest, will be delivered to subscribers making payment in full, as soon as the required registration can be made.

Payment of all instalments must be made at the bank originally named by the subscriber.

Non-negotiable receipts will be furnished to all subscribers who desire to pay by instalments. These receipts will be exchangeable at subscriber's bank for bonds on any instalment date when subscription is paid in full.

Form of Bonds Interchangeable

Subject to the payment of 25 cents for each new bond issued, holders of fully registered bonds without coupons, will have the right to convert into bonds with coupons and holders of bonds with coupons will have the right to convert into fully registered bonds without coupons, at any time, on application to the Minister of Finance or any Assistant Receiver General.

Forms of application may be obtained from any Official Canvasser, from any Victory Loan Committee, or member thereof, or from any branch in Canada of any Chartered Bank.

Subscription Lists will close on or before November 16th, 1918

DEPARTMENT OF FINANCE, OTTAWA, October 28th, 1918 141

Behind the Gun the Man — Behind the Man the Dollar
Make Your Dollars Fight the Hun

BUSINESS TAX IN QUEBEC PROVINCE

Difficulties Arise in Case of Extra-Provincial Companies —Tax is on Total Capitalization

A deputation representing the Canadian Manufacturers' Association and the Montreal Board of Trade waited upon Hon. Walter Mitchell, provincial treasurer, on Monday, October 28th, with regard to the new regulations as to the imposition of taxation on companies in doing business outside the province, extra-provincial companies doing business in it, and other complications arising out of the involved procedure of taxing large corporations doing business both in the province and elsewhere. A considerable round-table discussion followed the representations made, with the result that the whole matter was left in abeyance, with the assurance from the provincial treasurer that while the province needed the taxation as a means of meeting its obligations during this time of heavy expenditure, the tax would be so arranged that there should be no doubling up of taxes on companies doing business outside the province, and that efforts would be made to see that the tax would be arranged that it would not drive companies having headquarters in Quebec province to seek other locations for their business.

The tax in question amounted to 1-10 of 1 per cent. on each $100 of capitalization, and a case was instanced of an American corporation doing business in this province where, if the strict terms of the law were enforced, the total taxation would amount to no less than $100,000 on its capitalization of $100,000,000, although most of its business was done outside this province, which would be an impossible state of affairs.

The whole question raised at the discussion with the minister was as to the change in the administration of the act regarding the taxation of incorporated companies, with especial reference to companies employing only a part of their capital in this province.

Caused Complication.

Previous to this summer, it was stated, through an oversight, one of the provincial officials had been permitting, without recognized authority, a reduction of these taxes on provincial companies doing business outside the province, or on extra-provincial companies doing business there, fixing the amount of taxation according to the amount of business done and capital employed in Quebec province.

It was stated that the act provided that in such cases the amount of taxation might be reduced by order-in-council of the provincial government, but this course had not actually been taken, so that such reductions as had been made were illegal. Following this the provincial treasurer had issued an order stopping his officers from making further reductions. A questionnaire had then been sent to all interested companies calling for information upon which the provincial treasurer could make a basis for the allowance of reductions considered fair, which must be put through by order-in-council, so as to place the whole matter on a uniform basis.

It was in order to discuss what was to be done in the matter that the delegation went to see the provincial treasurer. Addresses were made to the treasurer by Messrs. G. F. Benson, Thos. Williamson, A. H. Britton, James W. Pyke and other members of the deputation, after which discussion followed.

Must Have the Money.

At the conclusion of the discussion, Hon. Mr. Mitchell said that the situation was that the government had so much work to do that it needed the money with which to do it, and that this taxation seemed the most equitable method of securing the necessary funds so as to spread the burden properly amongst those who should bear it. As a result of the conference, he remarked, the government would now have much more information on which to proceed with their work of arriving at a just basis of allowing reductions for companies operating outside the province.

Hon. Mr. Mitchell disagreed with the idea that the tax might be imposed in such a manner as to drive incorporated companies doing a big business out of the province. His idea in sending out the questionnaire was to get information which would lead to a fair application of the tax.

With regard to companies doing business outside the province, but capitalized here, the provincial treasurer intimated that steps would be taken to see that there should be no double taxation, by way of taxation on capital here, and on investments elsewhere. He insisted, however, on the principle that increased revenue must be secured by the provincial government to meet the losses caused by the abolition of liquor licenses.

As a result of the conference the deputation left the provincial treasurer with the conviction that while the tax on incorporated companies must be enforced, it would be so distributed as not to cause unfair treatment of companies doing business both in this province and in other provinces and countries, so as to avoid the difficulty of multiple taxation wherever they might be doing business.

At the interview the board of trade was represented by Messrs. John Baillie, 1st vice-president; Thos. Williamson, chairman of the provincial legislation committee; Albert Hudon, James W. Pyke, William Rutherford, Lorne C. Webster, and the secretary, Mr. George Hadrill. The representatives of the Canadian Manufacturers' Association were Messrs. G. F. Benson, chairman of the branch legislation committee; H. M. Jacques; F. B. Whittet, T. P. Howard, William Rutherford and W. P. Hughes, secretary.

DOMINION PERMANENT LIQUIDATION

Majority of Shareholders are Taking Action in Opposition to Claims of Creditors

Seeking $1,300,000 from 1,200 stockholders of the defunct Dominion Permanent Loan Company, the legal representatives of Mr. G. T. Clarkson, liquidator of the well-known Toronto institution which closed its doors in the spring, appeared before the Master-in-Chambers, Mr. J. A. C. Cameron, in Toronto last week.

Attorneys of about 700 of the 1,200 unhappy shareholders were on hand to contest the liquidator's claim and to show cause why they should not be settled upon the list of contributories. About 500 shareholders thus ran the risk of having their names placed in the list by default.

Unpaid stock and also dividends said to have been paid out of capital are being charged for by Mr. Clarkson. Messrs. James W. Bain and M. L. Gordon, of the firm of Bain, Bicknell, Macdonell and Gordon, are acting in his behalf.

Many of the alleged contributories are Toronto people. Some weeks ago a copy of the list, with amounts calculated, was mailed to each, the result being that a number of them have acted together in securing counsel to prepare a defence.

Shareholders Not all in Same Position.

The 1,200 are of four classes. A number are alleged to have purchased ordinary stock in the Dominion Permanent Loan and then to have neglected to pay in full for their stock. Claim is against the total amount of these unpaid balances.

A second class were originally shareholders in the Provincial Loan Company, which was taken over by the Dominion Permanent on an agreement by which they might have taken fully-paid shares in the latter, but who are said to have accepted a larger number of shares of stock which was only 75 per cent. paid up. Claim against these is for the 25 per cent.

A scheme by which some holders of prepaid shares in the Dominion Permanent Loan paid $50 for each share and agreed to have the remaining $50 paid up by allocation of profits to their credit, with the understanding that they might withdraw the $100 when fully paid up, created the third class. On the ground that no profits were earned, counsel for the liquidator contended that the amounts credited to this class of shareholder over and above the first $50 per share should be listed and paid to him to satisfy the creditors.

The fourth class includes all who received moneys as dividends from the defunct company, the argument of Messrs. Clarkson and Bain being that no profits were earned and that the dividends were paid out of capital.

In each class the number of persons and the amounts of money are considerable, 700 persons having filed with Mr. Clarkson their notices of defence, attacking the "no dividends" basis of the liquidator's case.

About 4,500 horse power of Trent Falls electrical energy is released for the use of eastern Ontario municipalities through the destruction of the munitions plant at Trenton. This big plant used that quantity of power, and Kingston has lately been feeling a shortage of supply from the Hydro-Electric Commission.

DEFICIT ON REGINA UTILITIES

The three public utilities operated by the city of Regina show a total deficit of $61,331.89 for the nine months ended September 30th, according to a statement prepared by Gladwell and Wilson, the city's auditors. Of this amount property sales contributes $15,431.06, leaving a balance of $45,900.83 to be provided from general revenue.

The street railway deficit now amounts to $42,405.18 as compared with an estimated deficit for the entire year of $46,824.82. In other words, if the deficit of the railway continues to pile up at its present rate the estimated deficit for the year will be reached at the end of October.

The electric light department shows a deficit of $16,490.71 at the end of the nine months as opposed to an estimated surplus of $3,191.06 for the year, while a deficit of $2,436 is charged up against the waterworks department as compared with an estimated surplus of $13,037.30 for the twelve months.

CANADA MAY HAVE NEW COIN

The Minister of Finance is considering the design of a new one-cent copper coin. The present one-cent piece, while of excellent design, is of so large a size as to make it inconvenient to carry more than two or three in the pocket. The new coin will be slightly larger and slightly thicker than a ten-cent piece, so as to be readily distinguishable to the touch. It will take some time to have the die made and the coins issued for circulation.

British Columbia shipments of lumber to Eastern Canada in 1918 will probably reach a total of 150,000,000 feet, according to the estimate of Provincial Lumber Commissioner I. B. Beale, in a report to the chief forester for British Columbia. The amount estimated for 1918 is six times the quantity shipped to Eastern Canada in 1914.

The Molsons Bank

Proceedings at the Sixty-Third Annual General Meeting of the Molsons Bank, Held at Their Banking House in Montreal, Monday, November 4th, 1918.

The Sixty-third Annual General Meeting of the Shareholders of The Molsons Bank was held in the Board Room of their Banking House, 200 St. James Street, Montreal Monday, November 4th, 1918, at 3 o'clock.

The President, Mr. William Molson Macpherson, took the chair, and there were also present the Vice-President, Mr S. H. Ewing, and Messrs. George E. Drummond, F. W. Molson, Wm. M. Birks, W. A. Black, E. J. Chamberlin, Arthur Browning, Alfred Piddington, W. R. Miller, A. D. Thornton, C. E. Spragge, W. B. Blackader, S. M. Baylis, R. S. White, and others.

The President, having called the meeting to order, requested Mr. E. W. Waud to act as Secretary, and after that gentleman had read the advertisement calling the meeting, and stated that notice of the meeting had been mailed to each shareholder, in accordance with the requirements of the Bank Act, the President named Messrs. C. E. Spragge and Alfred Piddington to act as Scrutineers.

The Minutes of the last Annual Meeting were taken as read, and adopted.

The President then called upon the General Manager, Mr. Edward C. Pratt, to read the Annual Report, as follows:—

THE ANNUAL REPORT.

Gentlemen,—

Your Directors beg to submit to the Shareholders this the Sixty-third Annual Report of The Molsons Bank and Statement of its position on 30th September, 1918.

The net profits for the year, after making ample provision for Bad and Doubtful Debts, amounted to $712,485.01, from which has been deducted $440,000 in Quarterly Dividends at the usual rate of 11 per cent. per annum; $21,282 to Officers' Pension Fund; $15,000 to Patriotic and Relief Funds; $40,000 War Tax on Circulation, and a further sum of $100,000 has been reserved for contingencies, the balance being added to the balance carried forward in Profit and Loss Account, which now amounts to $248,029.41.

There has been an increase of over $1,000,000 in Circulation and over $3,000,000 in deposits since last year.

On the other side of the Balance Sheet Current Loans show an increase of $2,700,000. The Dominion and British Government Securities show an increase of $6,000,000.

During the year we closed the Tetreaultville (Montreal) Branch.

The Auditors, Messrs. George Creak, Lemuel Cushing and Charles A. Hodgson, whose report is appended to our Balance Sheet, offer themselves for re-election.

As usual, all the branches of the Bank have been carefully inspected during the year, and we have pleasure in testifying to the zeal and efficiency of our staff.

EDWARD C. PRATT, General Manager
WM. MOLSON MACPHERSON, President.

	$616,282.00
Leaving at credit of Profit and Loss Account, 30th September, 1918	248,029.41
	$864,311.41

WM. MOLSON MACPHERSON, President.
EDWARD C. PRATT, General Manager.

AUDITORS' REPORT TO THE SHAREHOLDERS.

We have checked and verified the Cash, Investments and Securities of The Molsons Bank at the Chief Office in Montreal on 30th September last, and also at another time as required by the Bank Act, and we have at different times during the year checked and verified the Cash and Securities held at other important Branches of the Bank.

We have compared the Certified Returns from all the Branches with the entries in the Books at the Chief Office of the Bank as at 30th September, 1918, and find that they agree therewith; and all the transactions which have come under our notice have been, in our opinion, within the powers of the Bank.

We have obtained all the information and explanations we have required, and we certify that, in our opinion, the above Statement is so drawn up as to exhibit a true and correct view of the Bank's affairs at the close of business on 30th September, 1918, according to the best of our information and the explanations given to us, and as shown by the books of the Bank.

GEORGE CREAK,
LEMUEL CUSHING, } Auditors.
CHAS. A. HODGSON,

Chartered Accountants.

Montreal, 19th October, 1918.

THE PRESIDENT'S ADDRESS

The President, Mr. William Molson Macpherson, then delivered his Annual Address, as follows:—

I am sure that the Sixty-third Annual Statement of The Molsons Bank now submitted to you will be considered most satisfactory. The profits are practically the same as for the year 1911, which was the best year in the Bank's history, but on account of the extra cost of conducting the business, this result is only attained by the handling of assets of thirty million dollars in excess of those of 1911.

It looks as though before our next Annual Meeting the war will be over and the country be able to settle down to peaceful industries. So much of the business of Canada in the past four years has originated in war work and so many of our factories are equipped for dealing with munitions that we cannot but look forward with some anxiety to the period of readjustment after the war. We have, however, every confidence that the exploitation of the natural resources of the country will enable us to quickly return to a normal condition.

In the emergency of war the government exercised its power by regulating prices and in other ways, to which action the people willingly submitted in these times of stress. As the end of the war approaches we trust the government will be as ready to remove all restrictions as the public will be to be free from them, and that our statesmen in the reconstruction period will show sound judgment, tolerance and breadth of view.

The past year has undoubtedly been most favorable to the farmers in Eastern Canada. They are getting higher prices than ever for their produce and, owing to the shortage of food in Europe, there is no doubt they will continue to benefit for some years to come. While the Western harvest has not been nearly so good as was expected in the early part of the summer, the high prices will bring a very satisfactory amount of money into the country.

Deposits in the chartered banks in Canada have increased during the year $305,000,000, and at the end of September, 1918, were $1,744,000,000. The circulation has also increased by $34,000,000, and now stands at $211,623,856. The total loans, including call loans in Canada, show an increase of $89,000,000.

During the year an additional number of our officers have joined the army; their places to some extent have been taken by young women. Unfortunately many have fallen in battle since last we met, amongst whom is counted a manager. We have reason to be proud of the share our men are taking in the conflict; let us hope that the time is not far distant when we shall give them a hearty welcome home.

The President then invited discussion, but, there being none, he moved the adoption of the Annual Report, which was seconded by the Vice-President, Mr. S. H. Ewing, and unanimously adopted.

It was then moved by Mr. W. R. Miller, seconded by Mr. Alfred Piddington, and resolved, that Messrs. George Creak, Lemuel Cushing and Charles A. Hodgson, be continued in their office as Auditors of the Bank for another year. This was unanimously adopted.

It was moved by Mr. A. Browning, seconded by Mr. W. B. Blackader, and resolved, that the Secretary be instructed to cast one ballot for the re-election of the Directors, which was unanimously carried.

Messrs. C. E. Spragge and Alfred Piddington then presented the report of the Scrutineers, as follows:—

Montreal, November 4th, 1918.

To the General Manager, The Molsons Bank:

Sir,—We have the honour to report that at the Annual Meeting of the Shareholders of The Molsons Bank, held this day, the following gentlemen were re-elected to the Board of Directors:—

Wm. M. Birks,
W. A. Black,
E. J. Chamberlin,
F. W. Molson,
George E. Drummond,
S. H. Ewing,
Wm. Molson Macpherson,

A vote of thanks of the Shareholders to the President, Vice-President, Directors, Officers and Staff of the Bank for their efficient services during the year, was then moved by Mr. W. B. Blackader, seconded by Mr. A. Browning.

In presenting this vote of thanks and appreciation, Mr. Blackader said: "Very often these votes of thanks are a mere matter of form. But during the past few years of stress the carrying on of this Bank in war time has become something more than a matter of form, and we feel that the work of those of our officers and staff who have carried on the work here is equally a part of the national endeavor with that of those brave officers of the Bank who have gone overseas and taken their part, many of them to make the supreme sacrifice. The report we have received to-day shows that those officers of the Bank here have carried out their duties as capably as have those who have been able to go overseas. The small attendance of shareholders to-day shows the entire confidence all have in the management of the Bank, and in their Directors."

The President briefly thanked the Shareholders for this renewed mark of confidence in himself, the Officers and Staff of the Bank. The services of all, he declared, had been given consistently and loyally, and he felt confident that the work of The Molsons Bank had been carried out in such a manner as to not only conserve the interests of the Shareholders, but to aid the country's business in this period of war, which he trusted will have concluded before the next annual meeting.

The meeting then terminated.

At a subsequent meeting of the Directors, Mr William Molson Macpherson was re-elected President, and Mr. S. H. Ewing Vice-President for the ensuing year.

MUNICIPAL BOND MARKET

The Monetary Times Weekly Register of Municipal Activities and Financing

Calgary, Alta.—The city council has entered into negotiations with the Molsons Bank for a special loan of $500,000, with which to meet the city's obligation to Spitzer, Rorick and Company, of New York. The bank is to take tax arrears as security, and will charge 6 per cent. interest.

St. Hyacinthe, Que.—The ratepayers of the city will consider a bonus of $20,000 to the Canadian Pipe Organ Company, which has been located in that city since 1906. If it is approved, $20,000 of 5 per cent. bonds will be issued with interest and principal payable at the Bank Nationale, St. Hyacinthe, dated 1st December, 1918.

Toronto, Ont.—According to a report submitted to the city council by the finance commissioner covering the period from January 1st, to September 30th, 1918, the uncontrollable expenditure has been $4,479,653, and the controllable, $6,632,884, making a total of $11,112,537. The amounts, it was estimated would be expended up to the date named were $5,392,589 and $7,868,472 respectively, or a total of $13,261,061. There is a balance of $6,568,877 with which to finish the year.

New Westminster, B.C.—The Lumberman's Trust Company, of Portland, Ore., without waiting for the time of their option to expire, has exercised its option to purchase $70,000 of the city's recent issue of five-year bond certificates, in addition to the $100,000 it has already purchased. This leaves bonds to the amount of $230,000 still in the city's hands. Originally the city issued $500,000 of these bonds to retire treasury certificates. Wood, Gundy and Company, Toronto, bought $100,000, and for some weeks held an option on the remaining $400,000, but failed to exercise. Then the Lumberman's Trust Company, which has its headquarters at Portland, Ore., bought $100,000 and took an option on $70,000, which has now been closed.

Montreal, Que.—With the close of the month of October, the collection of property assessments at the City Hall reached a high figure. While the corporation of Montreal does not allow any discount on property taxes, the fact that interest at the rate of 6 per cent. will be charged, explains why the heavy amounts are now being received.

That the returns this year are ahead of those received a year ago is evident from a comparison of figures. The total amount collected in property assessments from about September 15th to and including October 31st is $2,758,031 as compared with $2,295,702 for the same period a year ago. This increase of nearly half a million dollars is due, of course, to the increased rate of taxation, which is this year, for the first time, $1.25 a $100 valuation, as compared with $1 a $100 last year.

That the receipts from the property tax have been averaging well may be judged by the following figures: October 31st the amount taken in was $1,271,705; October 30th, $413,296; October 29th, $316,751; October 28th, $184,850; October 27th being Sunday the city hall was closed, but for the Saturday half holiday the collection amounted to $86,609; and on October 25th it was $107,584.

St. John, N.B.—The expenditure of the Board of Trustees on buildings and furniture for repairs during the year was $20,762. The liability of the board to the Bank of Nova Scotia on the 30th June last was $88,302.

Debentures to the amount of $20,000 matured during the year and there being no sinking fund to protect them, they were paid by refunding.

Debentures amounting to $20,000 were issued for the purpose of paying the above maturity, at 25 years expiry, bearing 5 per cent. interest. These were sold at 94½ per cent.

The bonded indebtedness on the 30th day of June, 1918, was $694,500. Of this amount $283,000 is carrying a sinking fund for its redemption at maturity.

The amount required to pay interest on the bonded debt as it stands above is $28,417.50.

On 30th June, 1918, "Sinking Funds" had at its credit $51,506, namely:—

Bonds in safety deposit box (face value $43,000)	$41,752
Special deposit with Bank of Nova Scotia	9,754
	$51,506

LIBERTY LOAN TOTALS

The fourth Liberty Loan was over-subscribed by more than $866,000,000. Final reports announced on the 1st inst. by the treasury shows subscriptions of $6,866,416,300. It is estimated that 21,000,000 persons bought bonds.

All Federal Reserve districts over-subscribed, the Boston district reaching 126 per cent. of its quota, and standing first in the percentage column. Richmond made 123 per cent. and Philadelphia 119. Other district percentages were: Cleveland, 116; Minneapolis, 114; St. Louis, 113; Atlanta, 112; Dallas, 111.69; New York, 111.11; Chicago, 110; Kansas City, 109; San Francisco, 105.

COBALT ORE SHIPMENTS

The following is a statement of the shipments of ore, in pounds, from Cobalt Station, for the week ended November 1, 1918:—

National, 59,967; La Rose, 65,846; Buffalo, 351,570; Nipissing, 356,855; Mining Corporation, 154,920; McKinley-Darragh, 148,072; total, 1,137,230.

The total shipments since January 1st now amount to 26,908,363 pounds, or 13,454.2 tons.

WEEKLY BANK CLEARINGS

The following are the bank clearings for the weeks ended November 3rd, 1917, and October 31st, 1918, respectively, with changes:—

	Week ended Oct. 31, '18.	Week ended Nov. 3, '17.		Changes.
Montreal	$101,269,365	$ 90,300,887	+	$10,968,478
Toronto	60,699,089	64,025,091	—	3,326,002

MOLSONS BANK STATEMENT

The complete annual report of the Molsons Bank, together with the president's address, appears elsewhere in this issue of *The Monetary Times*. The report was reviewed in our issue of the 25th inst., the substantial increase in net profits for the year ended September 30th, as compared with the previous year being noticed. The balance at the credit of profit and loss account is now $248,029, as compared with $151,826 at the end of the financial year 1917. The bank provided for its usual contribution to officers' pension fund, patriotic and relief funds, war tax on circulation, and reserved $100,000 for contingencies in place of the $75,000 reserved for depreciation of bonds last year. Dividends at the rate of 11 per cent. per annum were paid as usual.

The Molsons Bank is one of the oldest of Canadian financial institutions, having been incorporated by act of parliament in the year 1855. Its management has been characterized throughout by conservatism, and while some of the other banks rank higher in point of size, the reputation of the Molsons Bank for financial soundness is equal to that of any other bank in Canada. The reserve fund is 4,800,000, or 20 per cent. greater than the capital stock paid in, in addition to which there is the profit and loss balance mentioned above. The bank owns Dominion and Provincial government securities totalling $5,208,896, and other municipal and public securities amounting to almost $6,000,000. The bank's reserve in Dominion coin and notes at the end of the fiscal year amounted to $6,334,957 and the deposit in the central gold reserve was $1,750,000.

NEW STANDARD BANK PRESIDENT

Mr. Wellington Francis, K.C., has been elected president of the Standard Bank of Canada in place of the late W. F. Cowan. Mr. Francis is a member of the firm of Francis and Wardrop, barristers and solicitors, of Toronto. He was formerly vice-president of the bank, and is also vice-president of the Consumers' Gas Company, vice-president of the Toronto Mortgage Company, and a director of the Toronto General Trusts Corporation.

(British and Colonial Press Photo.)

WELLINGTON FRANCIS, K.C.,
President, Standard Bank of Canada.

Mr. Francis was born in Toronto in 1848 and was called to the Ontario Bar in [illegible]. The present legal partnership has existed since [illegible], Mr. Francis being created King's Counsellor in [illegible]. Owing to Mr. Francis having been vice-president of the Standard Bank since 1912, the continuity of direction is therefore maintained.

The statement of assets and liabilities of Ontario loan companies will appear in *The Monetary Times* next week.

SERVICE IN AGENCY BUILDING

An Address Before the Life Agency Officers' Convention in Chicago, on November 9th and 10th

BY FRED. HALSTEAD,

General Superintendent, Dominion Life Assurance Company, Waterloo, Ontario.

[Note.—Mr. Halstead spoke extemporaneously, but the following is the substance of his remarks.—Editor.]

Methods are constantly changing. The system of yesterday is obsolete to-day, and the practice of to-day will be thrown into the discard to-morrow. Your way of doing things differ from mine even though our purposes and the goal we are aiming at may be identical, because your physical and mental make-up were not cast in exactly the same mould as mine, and our environment, education, training and experience have not been along precisely similar lines.

Your company has not the same geographical location as mine, their past history and traditions do not coincide, different personalities have been among the active forces causing their development, they have operated in different and perhaps widely separated fields, and the state, provincial or federal laws governing their workings have not been uniform.

The policy contracts, premium rates, surrender values, mortality, interest, dividends, etc., vary as between your company and mine. Our literature, advertising, correspondence and other means of publicity have, perhaps, not been in strict accord each with the other in the appeal they have made to our respective representatives and to the insuring public.

Bill Jones, general agent, and John Smith, local agent, of your company are not the same men as Bill Jones and John Smith of my company, even though they bear like names, and most certainly they will not respond to just the same treatment in every particular. You cannot manage men by a card system alone. How, then, shall I dare to define "Successful methods of rendering service to General Agents in building Local Agencies" for your company?

Foundation of an Agency System.

Practices change, systems decay, methods become worn out, and better practices, newer systems and more effective methods take their place, but principles founded on fundamental truth are everlasting and immutable. If this be true, may we not say that "Successful methods of rendering service to General Agents in building Local Agencies" are those methods only which are based on elemental truth and the application of sound principles to the almost kaleidoscopic variation of circumstances? And may I pause here for a moment without detailed comment, while we reflect on the sad havoc which has been wrought in the world during these past four years as a result of very efficient methods, coupled with the teaching of very false principles by the philosophers and leaders of what we once regarded as a great and wise nation?

And so if an agency superstructure is to stand four-square to the buffetings of time and circumstance and be an enduring monument to its builders, it must first of all have a sure foundation. It must rest on the bed-rock of unselfish devotion to the welfare of humanity.

A life insurance company is either good or bad, selfish or serviceable as the prime motive underlying its inception and subsequent development has been right or wrong. The man we are working with is either noble or ignoble, ambitious or lackadaisical, lazy or industrious, moral or immoral, as at the bottom of his heart his main purpose and object in life is wright or wrong.

If the aims and designs of the companies you and I as life insurance men represent in this, the greatest and most beneficent system of mutual helpfulness ever evolved by the mind of man, have not an altruistic, as well as a business objective, we must with all the forces at our commend, within and without, endeavor to alter their course or leave them and begin to serve with more idealistic though not necessarily visionary, institutions, or devote ourselves to other useful vocations, otherwise we cannot achieve true success for ourselves or be of the highest value to others.

Likewise, if our fellow worker appears base, we must exert our utmost powers to arouse the spark of nobility within him. If he is careless and indifferent, the small flame of his ambition must be fanned until it becomes a consuming fire.

HEAD OFFICE - TORONTO

"I Wish I Had Taken Twice As Much!"

Nothing is more often repeated in letters received at our office than the expression "I wish I had taken twice as much insurance while I was about it." When endowments, dividends or cash settlements are paid, the assured very often acknowledges the remittance with that remark. The truth is very few men take as much Life Insurance as they can reasonably carry—and repentance often comes when additional insurance is not procurable. Probably every reader of this paper believes in Life Insurance and carries more or less of it but one should ask himself the question, **Am I Carrying as Much Insurance as I Can Afford?** If the policyholders who are now entering the Company could read the evidence of gratified policyholders and beneficiaries, they would make a great effort to increase the amount applied for—and existing policy holders would double the amount of their protection. "One word more":— What income would your present insurance yield the beneficiary at say 6%?

For Agencies in Western Ontario, apply to E. J ATKINSON, Manager, 107 Manning Chambers, 72 Queen St. West, Toronto

Should he be indolent, ours the task to stir him from his lethargy and convince him of the grandeur and meaning of labor. With Browning, we must say to him: "Get work, get work; be sure 'tis better than what you work to get."

Man and Machinery.

It is the old yet ever new truth that the human factor always was, is now, and ever will be, the greatest finite factor in business, because business in its widest sense occupies all of our waking hours, embracing not only our commercial and industrial, but also our physical, mental, social, moral and even our spiritual life, for man was made in the image of God.

But the human element has been almost eliminated in some organizations, and if that should unfortunately be true of any of us, our duty to-day is to try to restore that element. It is probably true that more than 50 per cent. of all labor troubles have arisen out of purely human issues, and many a grievance in our own business is but the economic expression of a lack of mutual understanding.

Many mathematically accurate systems for running an organization have been worked out and set in motion by experts, but when the expert goes the system runs down. He left everything there but his personality. That he could not leave, and without a personality behind them methods and systems revert to rule of thumb and finally to chaos. Benjamin Disraeli once said: "We put too much faith in systems and look too little to men."

I am a profound believer in scientific methods, and do not close my eyes to the amazing possibilities of business development which they open to our view, but I am convinced that if we would measure up to our great opportunities we must apply science, and especially the science of personality, in more intensive degree than heretofore, to the living, breathing, thinking human problem in business, even as we apply thought, system and plan to cold inanimate facts and figures or blocks of wood or stone.

Motive Must be Right.

Of paramount importance, therefore, is the conclusion that there must be an ideal at the root of our efforts to assist general agents in building local agencies and training the men who shall have charge thereof, and from this basic motive must arise all of our plans and purposes in dealing with these men from day to day.

With these thoughts in our minds, then, let us say that in rendering service to a general agent in building local agencies, it is assumed as an essential that he has been thoroughly instructed in the duties of life insurance field work in general, and is especially well informed as to the merits of his own company in particular, having a comprehensive knowledge of its foundation and subsequent history up to the time of his entering its service. He must also be familiar with its plans of insurance, premium rates, income, expenditure, assets, mortality and many other facts and figures, while an intimate acquaintance with the personnel of its official staff will be of great value to him.

A knowledge of the fundamental doctrines, both ethical and mathematical, on which the edifice of life insurance stands, along with an appreciation of the great benefits it has already conferred, and the vastly greater service it will give to mankind as time goes on, is, in my opinion, indispensable. (And what a marvellous and continually widening opportunity for doing good does our vocation present.) To know, but not necessarily for competitive purposes, the general and special features, figures, etc., relating to other companies operating in the same field, should form a part of his training. And this process of education must be a continuous one. It should not cease on the day the agent receives his rate book.

General Agent Must Keep Standard High.

Having taken for granted such a grasp of his work as we have herein outlined, what is our next step in rendering service to the general agent?

1. If our agency organization is to be erected on enduring principles the general agent must be admonished and encouraged to obtain as local agents only men of high reputation for truth, honesty, good habits and unquestioned integrity.

2. They must be men of initiative who have been successful in life insurance work or some other useful occupation, for our business has no place for the individual on whom the brand of failure has been stamped.

3. Firmly believing that the man who can best be helped is he who can best help himself, and having observed that principle in choosing the general agent who shall represent my company, I would strongly urge on him the selection of that type only to assume the duties and responsibilities of a local agency.

4. Like the general agent, the local agent must be a man of good dress as well as of good address. I know that exceptions to this rule might be cited, but they are sufficient only to prove the rule. "Suggestion" is a potential force in salesmanship, and lasting impressions are often made by the clothes a man wears and by the manner of his speech.

5. The general agent, having by his own efforts found sufficient human material of the kind above described to work on, I would from time to time have either some competent officer of the company or myself go through his territory with him, making comment on and suggestions concerning the various candidates, who were proposed as local agents, leaving, however (on the principle of self-help), the selection of each assistant to be made by the general agent, the company, of course, having the right to promote a worthy local or dismiss an unsatisfactory one at any time.

6. I would frequently remind the general agent to see to it that his local shall constantly help himself to all the life insurance knowledge within his reach, and that, in addition, he be afforded all necessary instruction which he cannot acquire of his own initiative.

7. I would emphasize the importance of the local agent taking a prominent part in the life of his own community, especially by helping in every good work for its welfare or that of the state or nation, besides particularly impressing on him the great value of a close study of his fellow-citizens of all classes with a view to anticipating and supplying their need for life insurance.

8. I would keep up a steady intercourse by personal contact and by letters calculated to be instructive and stimulating with both the general agent and his locals, and would maintain a sincere and active interest in all of their undertakings, cultivating an intelligent sympathy with them in their cares and worries, their ambitions and aspirations.

9. I would encourage the reading of good literature, especially that relating to our particular calling, as well as to finance and salesmanship generally, and in order to be of maximum usefulness in this direction I would strive to keep myself thoroughly abreast of the times.

10. In the education of the local agent, too much stress cannot be laid on the importance of intensive cultivation and the large yield which it brings for the energy expended. One of the besetting sins in our field work to-day is the constant dissipation of our energies in trying to cover too wide an expanse of territory. Much evidence of the truth of this can be furnished by every thoughtful and observant agency manager.

11. I would unceasingly direct the attention of all agents to the need for concentration on steady, persistent, intelligent, well-directed work and the abundant reward it bestows on those who are willing to labor. There have been more failures in the insurance field for want of good, old-fashioned, honest toil than from all other causes combined. Work, then, is the word, fearless, unremitting, courageous work.

> "Pluck wins, it always wins,
> Though days be slow and nights be dark
> 'Twixt days that come and go,
> Yet pluck will win its average is sure.
> He wins the most who can the most endure,
> Who faces issues, he who never shirks,
> Who waits and watches and who always works."

12. While imparting instruction to general and local agents when traversing their territory, I would try to create and foster in each separate community and throughout the whole district an atmosphere favorable to the institution of life insurance and to all companies engaged in that great work, attracting special attention to, let us call it, the Humanity First Life Insurance Company, as a worthy exponent of its inestimable benefits and immeasurable power for good to the individual, the family, the community, the nation and mankind at large, and I would urge that this be an ever present purpose and a continuous effort on the part of every agent in the field.

Despite labor troubles and strikes British Columbia's coal production for the eight months ended August is estimated at 1,821,681 tons. In September the output of the province is placed at 167,301 tons, bringing the total for the year up to September 30th, or nine months' output, up to nearly two million tons.

Canada Must Still Have More Funds

Official Objective Passed at Week-End—Much Must Be Done to Reach Total of Half-Billion, all of which Sum Will Undoubtedly Be Required—Relation of Government to Development of Peace Industries.

ALTHOUGH hostilities have ceased, the necessity of the government for large sums of money still remains. It will unquestionably be some time before final peace terms are concluded, because it has been announced that the self-governing Dominions of the British Empire will have a voice in this conference, and all the nations which have been engaged in the war will also be represented. A large armed force must be maintained in the field until that time and as continued disturbances are very likely to take place in Europe, a force must undoubtedly be maintained there for some time after that. There is also the work of reconstructing the devastated sections of Belgium and France which it is evidently the policy of the allied nations to undertake. The full total of this Victory Loan will, therefore, be required, as the government's account with the Canadian banks has already been overdrawn to the extent of about $250,000,000.

Upon receipt of the news regarding the signing of the armistice, Sir Thomas White, minister of finance, made the following statement:—

"The acceptance by Germany of the armistice terms virtually ends the war. Right has decisively conquered and wrong has been overthrown. In this supreme moment of allied triumph and exultation, the predominant feeling in the hearts of the Canadian people will, I believe, be one of thankfulness to God, who has given the victory. The long night of horror and of travail, of blood and tears and human agony and anguish, has passed away, and the morning of peace has dawned. It brings to the nations heavy tasks and stern duties. The map of Europe has to be recast. Great historic wrongs have called to account. If those who have conspired against the peace of the world, who have brought those unspeakable woes and calamities upon mankind, and under whose direction brutalities of inconceivable barbarity have been perpetrated in subversion to the laws of nations and of humanity, are not brought to punishment for their monstrous crimes, it will be the greatest failure of retributive justice in the annals of history. No sanctuary should shield them from the consequences of their crimes.

"As for Canada, we may, without fear of reproach, reflect with just pride upon the part played by the Dominion in this great and terrible world drama. We have fulfilled all the obligations of international duty and of national honor. We have been true to the Empire and to our allies.

"We have kept the faith with our own gallant forces overseas. Their achievements have shed imperishable glory upon the name of Canada, and will for all time be the greatest tradition and inspiration of the Canadian people. We can never repay the debt of gratitude which we owe to those who have borne the battle in our defense overseas. To those whose loved ones nobly went forward, but will return no more, the hearts of their fellow-citizens will go out in deepest sympathy, and from all the sacrifice, suffering and bereavement of this awful war let us hope that there will dawn a better and a brighter day for the world and for civilization.

Sir Thomas White again emphasized that notwithstanding the conclusion of peace the full amount of money asked for would be required. "The nations will be on a war basis for a long time to come," he said, "and it will take Canada the greater part of next year to demobilize. In addition, we must be prepared to continue to furnish credits for the purchase of our agricultural and other products required to meet the food demands of Great Britain and her allies, and for reconstruction work in France and in Belgium."

Large purchases will still be made through the government agencies created for war purposes, and Canada as a nation has a splendid opportunity to share in this business. This was emphasized by the Hon. N. W. Rowell, speaking on November 12th.

"If we were faced with difficulties in mobilizing the resources of the country and putting them on a war footing, we should be faced with greater difficulty in some respects in putting the country back on a peace basis," Mr. Rowell said. "We have had engaged in the production of munitions in this country something over 300,000 men. In addition to the manufacture of munitions, thousands of men and women have been employed in auxiliary industries. These industries will soon cease their operations on war work. This means that thousands of people will have to find employment of some other kind, and that presents to us the gravest problem that immediately confronts us. Let me suggest some methods by which we hope that the problem will be met.

"Many industries which turned to the manufacture of munitions at the outbreak of the war will be able to resume operations along the lines of industry they originally carried on, and we may look forward with confidence to a large amount of labor being employed in this way. Many industries have been short of labor for the past few years, and they will absorb many workers. At the present time the problem of the reconstruction of France, Belgium, Roumania and Serbia is engaging the attention of the allied Governments, and it will require enormous quantities of material to re-establish these countries.

Canadian Trade Commission

"Undoubtedly the purchase of the necessary supplies, materials and implements will be made through some form of Governmental Commission in London, Paris, Brussels or Rome, purchasing from the allied or neutral countries which are able to supply the necessary materials. In order that Canada may secure her fair share of that trade, the Government has recently established a Canadian Trade Commission in London. Mr. Lloyd Harris, formerly with the Canadian Trade Commission at Washington, is going overseas as Chairman of that Commission. Canada will be represented in London, and later in Paris and Brussels if necessary, by Canadians who know the things we can produce with advantage, and the prices at which we can produce them, and they will be in direct touch with the Government Commission in order to see that a just and fair share of the trade comes to Canada to keep our industries going in full swing, to give employment to our workmen, and to insure the financial and industrial stability of Canada."

Mr. Rowell pointed out that Belgium, Serbia, Roumania, and probably France, would not have the money to pay for the supplies they would need. They would be able to secure the rehabilitation of their territory only by purchasing on credit, and it would undoubtedly be necessary for the Canadian Government to arrange for credits in order that the allied Governments might pay the Canadian manufacturers and workingmen. For this reason it was essential that Canadians should support the Victory Loan.

Food Production More Urgent

Probably the most urgent problem for the next year, proceeded Mr. Rowell, will be the feeding of the people of Europe, owing to the depletion of agriculture. The need for increased food production will be more urgent than ever between now and the next harvest. The allies have promised to assist to the best of their ability the starving people of those countries. He thought the farmers could look forward to another year of high prices. He believed there would be no shortage of farm labor this year, owing to the stoppage of munitions manufacturing. Productive public works, which will add to the stability and productive power of the nation, must be carried on to provide employment for many, he said, while the transportation interests, which had been starved for the lack of new rolling stock, will probably make large purchases of locomotives, cars and rails, now that the war is over. The Government intends doing that with its own railway, said Mr. Rowell.

He hoped the day would not be far off when the Government would acquire the Grand Trunk Railway, and added that Canada must complete her transportation system by establishing fleets of steamships on the lakes and seas. The Government had embarked on a large shipbuilding programme, and Canada will possess in the not far distant future one of the greatest fleets of steamers in the world.

He foreshadowed the construction under Government auspices of a system of inland waterways that will permit standard ocean-going ships to get to the head of the lakes and load up with Canadian grain for Europe. The work of deepening and widening the Welland Canal would have to be completed, and the St. Lawrence canal system would have to be improved.

The hundreds of thousands of undeveloped horsepower on the St. Lawrence presented a greater opportunity for industrial development, and the Government stood for the utilization of this water power in the public interest by the Government for the benefit of the whole people.

"To provide employment for the workers of Canada when the soldiers come back the Provinces and municipalities throughout the Dominion should undertake necessary public works," said Mr. Rowell, "because we can face and solve our reconstruction problems only by the co-operation of the whole people, by the co-operation of the Dominion, the Provinces, the municipalities, the employers of labor and the workers."

BRITISH-CANADIAN TRUST, LIMITED

For the fiscal year ended August 31st, 1918, the British-Canadian Trust, Limited, made a profit of £14,295. This is after paying interest and expenses on borrowed money, expenses of investment and management, and income tax, and includes £3,157 brought forward from the previous year. Dividends at the rate of 4½ per cent. on the preference shares and at the rate of 5½ per cent. on the ordinary shares were paid, leaving a surplus revenue of £5,187; £2,000 of this was transferred to a contingent fund leaving a balance to be carried forward of £3,187.

This is a Scottish corporation the head office being in Dundee. The business consists of loaning money on mortgage in Canada and the United States, the agents in Canada being the Royal Trust Company, of Montreal, Quebec and Vancouver. Reviewing the conditions for the year the management remarks that interest on mortgages in the United States has been very well met but that the partial crop failures in Canada in 1917 and the absence of many borrowers on war service have prevented full interest payments, and this has reduced the income for the time being. On the other hand, expenses increased, so that the net income is smaller than last year by £2,700.

The British-Canadian Trust is experiencing the same tendency which is being felt by other mortgage companies—namely, the gradual reduction in outstanding mortgages which results from prosperous agricultural conditions and a restricted demand for new agricultural capital. Their Canadian and American mortgages have been reduced during the year by £23,000, the proceeds being invested in home securities including war loans.

EUROPEAN EXCHANGES ADVANCE

Between the fall of Damascus on September 30, and the collapse of Turkey on October 20, with intermediate Austrian and German defeats there was a further marked appreciation of the pound sterling in neutral markets. The advances ranged from nearly 8 per cent. in Denmark up to more than 13½ per cent. in Sweden, and the movement was intelligible. There was also an appreciation in the German mark, the value of which rose on a range of from fully 7½ per cent. in Holland up to nearly 13½ per cent. in Sweden. A somewhat analogous movement took place in the case of Austrian currency.

* * *

The Excelsior Life Insurance Company, of Toronto, has subscribed $300,000 of the Victory Loan, being an increase of 50 per cent. over their subscription to the previous loan and represents an amount greater than the total of the new premiums which will be received in 1918. The head office staff at Toronto has obtained an honor flag 70 per cent. of the staff subscribing for Victory Bonds amounting to 12½ per cent. of the annual payroll

THE PEACE OUTLOOK

Definite news of a cessation of hostilities, which was received in Canada on Monday, the 11th instant, fundamentally altered the industrial outlook here. During the preceding few months the prospect of peace had become an appreciable factor and problems of reconstruction were also being discussed in some detail. The difficulty at that time was that a period of uncertain length intervened before the commencement of the period of reconstruction. As the intensity of the problems which would then arise would depend to a considerable extent upon the duration of the war, it was evidently difficult to prepare any except the most indefinite plans. Now, however, we appear to be already started upon the road towards normal industry. The war period merged into the period of peace preparation, as both governments and private companies had carefully considered what they should do upon the arrival of peace, and were, therefore, prepared to take action immediately.

The transition from war to normal conditions is one of very great magnitude; it should be accomplished, and, we trust, will be accomplished, more quickly than was the transition from our organization in 1914 into that of 1918. Canada must, like the other belligerent nations, pass from a condition in which economic organization has been taxed to the limit as a result of pressure of war orders and shortage of labor and supplies, to the reverse condition, when the labor supply will be adequate, stocks of materials will be rapidly replaced, and the difficulty will be to secure a market for produce. It is obviously necessary, therefore, that this development should be commenced as early as possible, and should be pushed with the greatest possible vigor both through government and private companies. Labor shortage in Canada has been most keenly felt during the present year owing to the application of the Military Service Act here. It is extremely desirable, therefore, that all those who can possibly be released for re-entry into civil life should be released in order that our peace industries may begin to be rebuilt. As might be expected, the British Government ceased recruiting immediately upon receipt of the news and the United States government cancelled calls which had been issued. The Dominion Government has also intimated that many of the troops in Canada will be released shortly.

It is apparent that to throw a large labor supply upon the market at one time would be disastrous. The present condition, therefore, should be taken advantage of and no time should be lost in keeping the labor market well supplied. Later on will be adequate time to discharge from the army those who are to be re-educated into new occupations. Reconstruction is a work that can only be accomplished gradually, and each accession to the ranks of workers helps to lay a new foundation and furnish a demand for still more assistance.

PROFIT AND PUBLIC SERVICE

That the earning capacity is not a correct measure of human service is a theory that has developed rapidly in recent years. The usefulness of industrial corporations is also not of necessity measured by their profits. According to the report of the Methodist conference recently held at Hamilton, Ont., there must be a "transference of the whole economic life from a basis of competition and profits to one of co-operation and service."

There is no doubt that economic success is not a true measure of usefulness. Valuable services are daily performed without financial compensation, and doubtless always have been. The thief does not serve society in proportion to his gains, nor do industrial corporations advance the interests of the public by managing monopolies to the limit of extortion. The whole struggle between capital and labor, moreover, does not directly affect the general consumer; the fact that labor has wrested concessions from employers, or vice versa, does not necessarily mean that their joint productive power is increased thereby.

None the less this measure has been commonly accepted, because it is the most satisfactory that society has so far evolved. If one of two competitive concerns makes a higher profit than the other, we must assume that it performs a greater service; for they both satisfy the demands of the public in proportion to the volume of business done, while the one produces greater results for its promoters, and the profits must ultimately find their way back into the channels of business. The vague standard of "national service" has thus far not been defined with sufficient accuracy to render it practicable. It has always been a difficulty, in judging the value of some activities such as government regulation and educational work to determine whether a reward is reaped in proportion to the work and expense involved. When this fact is borne in mind, it is obvious that in each case the onus of proof lies with the movers of the enterprise, and the results achieved can not at the most be more than estimated.

It is essential, therefore, to stick to our old methods until some more satisfactory substitute is found, and proved by reasonable experiment. Economic laurels must continue to accompany economic success, and fatal measures must not be directed against our profitable corporations merely because they are such. By means of income taxes and profit taxes we make the successful contribute to the national expenses, and in so doing we acknowledge the fact that it is on them that our national existence relies for its economic support.

ACKNOWLEDGMENT

To that great-hearted, patriotic Toronto firm, the T. Eaton Co., Ltd., we acknowledge our indebtedness for the permission to photograph the "Victory" statue which they designed and constructed. The statue stands in front of the City Hall at Toronto, having been presented to the Victory Loan Committee by Sir John Eaton. The illustration on page 5 of this issue is an exact reproduction of the photograph of the statue excepting as regards the base, which has been slightly altered. The employees of the T. Eaton Co., who are responsible for this inspiring statue, are to be congratulated upon their artistic and skilled work. It is the opinion of a number of experts that this is the best "Victory" figure yet produced.

ASSIMILATING THE FOREIGNER

Canada's political development, like that of the United States, has been along the lines of toleration of social and economic customs. As a result we have attracted the best class of emigrants from European and other countries, that is, those who have desired political freedom and industrial opportunity. Our political systems and educational methods have been framed with a view to admitting of wide variations in language, religion and customs.

The war has, however, had a tendency to solidify these varied elements. The United States has declared against the hyphenated citizen, and in Canada the same mental attitude has been adopted. We are inclined, therefore, to look askance at such settlements as those of the Doukhobors in Manitoba and the Mennonites in Saskatchewan, which retain their customs by community living. We have sometimes endeavored by changes in our educational legislation to force such peoples into a use of the English language and a study of English customs. In the early days there was no typical American or Canadian citizen, the different sections being merely offshoots of the nations from which they had emigrated. In the course of time, however, with the development of a more aggressive political life, a type of citizen has been developed who is primarily Anglo-Saxon in his character, but modified by the more cosmopolitan conditions under which he has become accustomed to live.

This freedom of the individual has been one of our characteristic and desirable features and has enabled our nation and its industries to develop along broader lines than is the case with states made up of a uniform race. Against it we are comparing the advantages of attaining the uniformity in language and industrial methods, and so far as possible developing a thorough spirit of Canadian citizenship. Efforts of this kind in other lands have, however, not generally been successful and have usually succeeded in bringing about a result directly the opposite of that desired. Communities which endeavor to retain their characteristic mode of life may, none the less, play an important part in promoting industrial development. Those referred to above are industrious and economical in their habits and usually succeed in reaping profits where the Englishman would fail. The best development is not necessarily uniform. A broader aim is to constitute a political and industrial system which is capable of assimilating the best emigration which is available. We are even now discussing possible means of escaping from the evils of our old individualism. It would not be seemly, therefore, to try to suppress organizations which have attained success in community life.

ADVERTISING SERVICE AND THE AGENT

At the convention of Life Agency Officers held in Chicago on December 8th and 9th, considerable time was given to a discussion as to what method of advertising gives the best service to the agent. This discussion was led by Mr. T. L. [illegible], vice-president of the Guardian Life of America, by Mr. G. H. [illegible], vice-president of the Reserve Loan Life and by Mr. E. E. Reid, assistant manager of the London Life of Canada.

Mr. Reid, dealing more especially with the Canadian companies, expressed his opinion that there was no one mode of advertising that could be relied upon exclusively. He quoted a statement of Mr. Elvins, advertising manager of the Imperial Life of Canada, that: "No one form of advertising gives the best service for the agent; any good form of advertising may give the best service for the agent."

Mr. Reid questioned the general view that the preparation of life insurance advertising copy did not require skill, but submitted the opinion that competent assistance should be utilized for work of this kind. Each individual company, he said, has its own peculiar problems and must therefore prepare its advertising to suit its own business. Mr. Reid also believed that there is a great need for an educational campaign which will remove misconceptions on the part of the public. Advertising, he pointed out, must be truthful.

VANCOUVER IS PROSPERING

Conditions Much Improved on Coast—Value of Fishing and Shipbuilding Industries—British Columbia Electric Affairs

(Staff Correspondence.)

Vancouver, November 9th.

Conditions in Vancouver at present are exceptionally good. Practically every house in reasonable repair in the city and in the suburbs is occupied, and, as there was a considerable number of homes put up here, even during the quiet years of 1913, 1914 and 1915, the population now is in excess of what it was in the height of the boom in 1912. As a result, retailers and merchants of practically every class are doing well, and, even at the much increased prices, the amount of goods sold is greater than in any former year. The situation regarding homes is now developing so rapidly that within a few months, at the present rate, it will be imperative that some action be taken to house the people. Rents have, naturally, gone up. Property owners are in most cases receiving a good interest return on a fair valuation of their property. A number of second-class hotel buildings which the advent of prohibition made unprofitable are being remodeled into light housekeeping suites, and are finding no difficulty in securing tenants at good rates. This condition is having a good effect on the city treasury, and the city is getting in better condition every month. The receipts from water rates show continual increases, the receipts for ten months being over $12,000 ahead of last year, and this is a profitable branch of the civic administration.

In an interview with *The Monetary Times*, Mr. J. R. Davison, industrial commissioner of Vancouver, said:

"In spite of the high cost of labor and of some building supplies, new houses are going up, particularly in the higher class residential sections of the city, the majority being buildings which cost from $4,000 to $12,000. The building permits to October 31st totalled $1,287,843 as against $676,[illegible]5 in 1917.

"The factors that contribute to this condition are many, the chief probably being the payrolls from the shipbuilding industry. This has gone steadily on here, and up to the end of September there had been a total of fifty-two vessels of from 1,500 tons up launched in lower British Columbia. In addition to the payrolls of these yards, this industry has stimulated other industries which supply them with machinery, materials, etc., and for both wooden and steel vessels very large amounts of lumber have been required. The production of aeroplane spruce has kept many logging camps humming, and dealers in supplies have found very profitable business as a result. At the moment there is a slackening of the production in lumber and shingles. The curtailed demand from parts of the Canadian prairies, where crops are not so good, has been responsible, together with several minor factors, for the decrease in demand for the former. The embargo on the export of shingles into the States is the chief cause of the closing of a number of shingle mills.

Farming in British Columbia.

Agriculture for the province has had, I think, a reasonably good season. Dry weather during the early part of the summer interfered with the production of hay and grain in the Fraser valley, but rains later in the season have very much improved conditions in respect to feed there. The fruit crops have, on the whole, been good, and as each year more orchards are coming into bearing, this shows almost each year larger returns.

In spite of very high ocean freight rates, the last steamer to Australia took out a large shipment of apples. With the exception of good [illegible], this industry has had a busy season. The pulp and paper companies cannot turn out their products fast enough to meet the orders that come to them.

"In spite of the many restrictions that are put on travel, the hotels here have had a busy season, and from the States and from the prairies there has been a goodly number of visitors. Just at the moment we are thinking and talking Victory Loans, and are determined to exceed our quota and show that we will back our boys to the limit."

Mr. Justice Macdonald, at Vancouver, on October [illegible], handed down his decision in favor of the British Columbia Electric in the case brought against it by the city of Vancouver for an injunction to prevent it charging a six-cent fare. On July 8th last the city council passed a by-law permitting the six-cent fare to be charged, and entered into an agreement whereby the company agreed to put its cars back following the strike, paying the men their increased wages. Mayor Gale refused to sign the by-law later. The court has now decided that the agreement is binding and the by-law valid, and that the company can compel the mayor to sign it.

Unless the decision is appealed against, the six-cent fare will remain in force for nine months, until April 8th, 1919, by which time it is expected a public service commission will be appointed for the province. The commission will then decide upon the fares.

Several jitneys are still operating in Vancouver, but they are being prosecuted by the city. Appeals brought by jitneys to prevent the city prosecuting have been carried to the higher courts of British Columbia and the city's right maintained.

NATIONAL BRICK COMPANY REORGANIZATION

Representatives of the bondholders of the National Brick Company, of La Prairie, Quebec, have issued a circular to the bondholders proposing a plan of reorganization. It will be remembered that the interest on the $2,319,100 of six per cent. first mortgage bonds of this company has not been paid since April 1, 1915. The bondholders agreed to accept scrip certificates for interest due from that date until April 1, 1918. These certificates, which are outstanding to the amount of $450,936, are secured by $500,000 of bonds and bear interest at 6 per cent. per annum payable semi-annually. The first payment was due on October 1st of this year.

The bondholders' proposal is that these scrip certificates should be funded in preferred stock, the old bonds should be exchanged for a new issue and present holders of the common stock should receive one share of new common stock for every four shares of old.

The new plan is not approved of by many of the common stock shareholders and on the 5th inst., Mr. J. N. Greenshields, K.C., formerly president and still a director of the company, announced that he had taken legal steps to bring about a liquidation of the company, which, in his opinion, appeared to be the only way to protect his interest as a shareholder.

HEAD OF GUARANTY TRUST'S FOREIGN SERVICE

Allen Walker, who has been the New York manager for the United States Chamber of Commerce since the organization of that body in 1913, has joined the Guaranty Trust Company, of New York, and will have charge of its foreign trade service.

Prior to joining the United States Chamber of Commerce, Mr. Walker studied commercial organization in Europe, and extensive travels and studies have familiarized him with market conditions in other parts of the world. Since the United States entered the war, he has been responsible for the organization of many commercial and industrial groups which have been brought into contact with various governmental departments through war service committees. He has had charge of the administration of the agreement between the United States and Argentine which the International High Commission established for the settlement of commercial disputes by arbitration and has acted as arbiter in many cases of disagreement, due to transportation and embargo difficulties arising out of the war, between domestic and foreign business houses.

The foreign trade service of the Guaranty Trust Company of New York is the agency through which a variety of services are performed for the American exporter and importer. It supplies information regarding business opportunities in foreign countries and the commercial conditions peculiar to each. Classified indexes of foreign and domestic manufacturers and dealers are maintained for the purpose of bringing buyers and sellers together. By reason of his wide experience and his knowledge of what American and Canadian industries want in the way of foreign service, Mr. Walker is regarded as especially fitted to assist manufacturers and exporters in that development of international trade which is now recognized as one of the most important features of the reconstruction programme.

PERSONAL NOTES

MR. W. F. KERR has been elected a member of the Toronto Stock Exchange.

DR. MAGILL, chairman of the government Board of Grain Supervisors, has tendered his resignation to the Minister of Trade and Commerce.

MR. W. T. PERRY, manager for Canada of the Ocean Accident and Guarantee Corporation, Limited, left Toronto this week on a trip to the coast.

SIR PERCY SHERWOOD, Commissioner of Dominion Police, after 30 years of efficient service, has asked to be relieved of his duties. He is in poor health.

MR. W. G. WATSON, assistant general manager of the Toronto General Trusts Company, has completed his biennial trip of inspection in Western Canada.

MR. HERBERT LANGLOIS, of Toronto, has been appointed vice-president of the Standard Bank of Canada, in succession to Mr. Wellington Francis, K.C., who becomes president.

MR. C. F. SISE, general manager of the Bell Telephone Company of Canada, was elected vice-president of that company on November 13th, in succession to the late Charles Cassills.

MR. W. A. COPELAND, former manager of the local branch of the Bank of Toronto, at Collingwood, Ont., has retired. He will be succeeded by Mr. C. W. Pangman, manager of the Parliament and Queen Streets branch, Toronto.

MR. W. B. MOORE, of the American City Bureau, Portland, Maine, has accepted the appointment to the position of managing secretary of the Greater Winnipeg Board of Trade. Mr. Moore took up his new duties on October 28th.

MR. E. G. MCKENZIE, until recently district manager of the North American Life at Windsor, Ont., has been appointed general agent of the London Life Assurance Company, with headquarters in Victoria, B.C.

LIEUT. J. E. HODGSON, of Toronto, died in England recently of pneumonia. He was a son of the late John E. Hodgson, M.A., a graduate of the University of Toronto, and before enlisting was connected with the bond house of Murray, Mather and Company.

MR. J. S. MITCHELL, of J. S. Mitchell and Company, Limited, Sherbrooke, has been elected a director of the Canadian Bank of Commerce and chairman of the local committee of the bank at Sherbrooke, to take the place of the late Mr. William Farwell, of Sherbrooke, former president of the Eastern Townships Bank.

MR. T. A. STEVENSON, president of the Toronto Typographical Union and secretary of the Toronto District Labor Council, has been appointed as the representative of labor upon the Department of Civil Re-establishment. Mr. Stevenson, since the outbreak of the war, has been the representative of labor upon many patriotic organizations.

MR. E. P. WITHROW, of Calgary, who has accepted the position of British Columbia manager of the Dominion of Canada Guarantee and Accident Insurance Company, succeeding Mr. Harry W. Falconer, has arrived in Vancouver and is taking up his work released by Mr. Falconer, who becomes general superintendent of the company with headquarters at Toronto.

OBITUARIES

MR. JOHN MCALLISTER, ex M.P. for Restigouche, died suddenly at Campbellton, N.B., on November 4th. He represented Restigouche for at least two terms, 1892 and 1896.

MR. GEORGE O'KEEFE, police magistrate of Ottawa, from [illegible] to 1917, died on November 3rd, after a lengthy illness. He once represented Ottawa in the Provincial Legislature in the Liberal interest.

MR. JAMES LUTHER CARLTON died suddenly on November [illegible], in Regina, where he was for the past five years the local secretary of the Confederation Life Association. The late Mr. Carlton was previously with the head office of the company at Toronto.

MR. G. S. A. OLIVER, manager of the Windsor Street branch of the Bank of Montreal, died on October [illegible], at the [illegible] General Hospital, after a short illness. Born in [illegible] of Scotch descent, he entered the service of the bank in [illegible]. For many years he was attached to the staff of the [illegible] office. He was manager of the Windsor Street office when [illegible].

TO SECURE MORE ORDERS FOR CANADA

Government Announces Formation of a Canadian Mission in London

The Dominion government has decided to establish a Canadian Trade Mission in London, and Mr. Lloyd Harris, chairman of the Canadian War Mission, Washington, has been appointed chairman. It is probable that for a considerable period after the war, the purchase and distribution of a large portion of our exportable agricultural products, and many manufactured articles, will be made through governmental agencies established by Great Britain and other allied nations. Many inter-allied boards and commissions have been set up during the last four years for such purposes, and through these boards control and supervision are being exercised by agreement over important financial affairs, the distribution of shipping, freight rates and prices of many important commodities, and generally the distribution of the industrial, agricultural and mineral production of the world. It is expected that many of these commissions will be continued for like purposes in the years immediately following the conclusion of peace. If therefore, Canada is to have a direct voice in these important financial, shipping, and industrial questions, in which she is so vitally interested, and particularly if she is to find a satisfactory market for her exportable agricultural and manufactured products, it is desirable that she be directly represented in London by men in touch with the business and agricultural interests of Canada.

For this purpose the Canadian Trade Mission, which will be known as "The Canadian Mission," has been established. The Mission is to consist of the chairman and such other members as may be appointed by the governor-in-council on the recommendation of the chairman.

Powers of the Chairman.

The powers and authority of the chairman as defined in the order-in-Council are as follows:—

The chairman shall be empowered to represent the government and its various departments and other administrative branches in negotiations and affairs of the special economic character hereinbefore indicated which it may be necessary to conduct: (a) With the government of the United Kingdom or its departments or other administrative branches; or (b) with the allied missions operating in London or elsewhere in Europe; or (c) with the various inter-allied boards, commissions or committees now or hereafter set up to deal with economic questions; (d) with any other government, commission or board as the chairman may deem desirable or expedient.

The chairman or other members of the Canadian Mission shall be empowered to act at the proceedings in such inter-allied boards, commissions or committees, in such capacity as may from time to time be arranged after consultation between his Majesty's government and the government of Canada.

Dr. Harris has rendered a great service to Canada as chairman of the Canadian War Mission in Washington, and it is confidently anticipated that he will render still greater service in the new post which he has accepted.

Mr. Frank A. Rolph, of Toronto, who has been associated with Mr. Harris in the Canadian War Mission at Washington and has rendered such valuable service there, succeeds Mr. Harris as chairman of the mission.

CHANGES IN DOMINION CABINET

It was announced on November 7th, that Hon. T. W. Crothers, Minister of Labor, who is now en route for California, had handed his resignation to Sir Robert Borden, and that it had been accepted. Hon. Gideon Robertson, who has represented labor in the cabinet for some time past, in addition to acting as chairman of the Canada Registration Board, has been appointed minister in succession to Mr. Crothers. Mr. Crothers resigned on the ground of ill-health.

Two other appointments have also been made: Col. Hugh Clark, M.P., Parliamentary Under-Secretary for External Affairs, becomes Parliamentary Under-Secretary for the Department of Militia and Defence. F. H. Keefer, M.P. (Port Arthur and Kenora), has been appointed Parliamentary Under-Secretary for External Affairs.

INVESTMENTS AND THE MARKET

News and Notes of Active Companies—Their Financing, Operations, Developments, Extensions, Dividends and Future Plans

Dominion Park Company.—The annual report of the company shows that $2[illegible]0,709 was earned for the year 1918, an increase of $61,737 over the preceding year. Net profits amounted to $[illegible]4, as against $35,857. The increased expenses and the taking over of concessions formally leased absorbed a large part of the increase in the earnings of the company. After paying $24,[illegible]0 on account of the 6 per cent. dividend, and setting aside $1,242 for taxes, the amount at the credit of surplus account was $180,304, against $175,142 a year ago.

Hudson's Bay Company.—For the quarter ended September 30th, 1918, sales of farm lands by the company amounted to 45,090 acres, realizing £155,770, contrasting with 52,400 acres for £190,000 for the corresponding period of last year, while the town lots sold yielded £350, as against £105.

For the six months to September 30th the farm lands sold amounted to 165,270 acres for £601,1[illegible]0, comparing with 164,935 acres for £609,800 for the same half of last year, and, as the sales of town lots rose from £220 to £630, the total receipts were £229,030, as against £227,300.

Western Power Company of Canada, Limited.—The company reports for the month of August, 1918, operating revenues of $[illegible]9,149, an increase of 5 per cent., compared with August, 1917, and net earnings of $24,576, a decrease of 4.8 per cent., compared with August, 1917. There was included in August, 1918, operating expenses for depreciation reserve the sum of $2,702.

For the twelve months ended August 31st, 1918, the company shows operating revenues of $453,128, an increase of 2.9 per cent. over the same period in 1917, and net earnings of $312,[illegible]10, an increase of 5 per cent. over the same period in 1917.

Canadian Copper Corporation.—During extensive development and construction work for mining operations next year, Canada Copper Corporation continued production at its Greenwood properties. These operations have been conducted at high cost, but with some profit. Production has not equalled [illegible] capacity, and has shown a gradual decline to 152,4[illegible] pounds in September.

Montreal Light, Heat and Power Company.—The company's earnings for September, both gross and net, were the largest so far reported for the current fiscal year, beginning May 1st, as well as the largest reported for any September. As compared with September a year ago, gross earnings at $915,527 registered an increase of $81,324, or 9.7 per cent., and surplus earnings, after expenses and fixed charges, at $400,12[illegible] show an increase of $26,143, or 7 per cent.

For the five months of the fiscal year, gross earnings at $4,327,024 show an increase of $409,530, or 10.5 per cent. Net earnings, after deducting expenses, amounted to $2,230,284, an increase of $113,38[illegible] or 5.3 per cent., and the surplus, after charges, at $1,814,046, show an increase of $113,320, or 6.7 per cent.

September's surplus represented earnings at the rate of 7.5 per cent. on the stock.

Dominion Bridge Company.—The company, whose fiscal year was brought to a close with the end of October, is believed to have had a fairly satisfactory twelve months. The span of the Quebec bridge had been put in place, but the structure was still at the risk of the Dominion Bridge Company, or its subsidiary, when the financial year closed on October 31st, 1917. At the annual meeting President Johnson stated that the company had not yet distributed the profits on the Quebec bridge. The company's share for the seven years' work will be in the vicinity of $1,500,000. A good many questions have since been asked concerning this $1,500,000. The first question alluded to date of payment, and the second to its destination or distribution. Many shareholders seem to be of the opinion that a bonus to shareholders will be declared. It has since been reported that the company received Victory bonds instead of cash. No doubt this will appear at the annual meeting in December.

International Nickel Company.—The company reports a surplus of $3,415,905 for the six months ending September 30th, after the deduction of charges, war taxes and preferred dividends. This is equivalent to $2.04 a share on the common stock (par value $25) ,as compared with $2.68 for the corresponding months of 1917, when there was a surplus of $4,484,306. The total income for the first half of this year was $7,809,342, an increase over the preceding year of $102,279. Administration and general expenses, however, increased by just about this amount.

The decrease in surplus is accounted for by the heavier appropriation made to cover United States and foreign taxes, $2,740,126 being set aside for this purpose, an increase of practically $1,000,000 above the reservation of $1,741,140 during the corresponding period of 1917. After the deduction of $995,090 for depreciation, practically the same amount as that set aside a year ago, there are profits of $3,683,283. The preferred dividends amounted to $267,378, leaving a balance for the common of $3,415,905.

Lake Shore Gold Mines, Limited.—The company has broken all former records, this time with a production of $44,500 for the month of September. The tonnage treated during the thirty-day period also constitutes a new high record, amounting to 1,860 tons, and thus exceeding the 1,800 ton mark for the first time in the company's history. The amount recovered per ton treated approximated $23.92.

During the month the mill ran 96.21 per cent. of the possible running time, treating 1,860 tons of ore, which yielded approximately $44,500.

Ore reserves may also be counted upon to be large, due to the fact of the long drifts at the 200-foot and 400-foot levels being in ore over their greater length, and with very little stoping having been done.

Late next month, or early in December, it is expected dividend No. 2 will be paid, and will probably amount to $50,000, and be equal to 2½ per cent. on the company's $2,000,000 capital, thus making a total disbursement of 5 per cent., or $100,000, during the last half of 1918.

Schumacher Gold Mines, Limited.—A deficit of $7,695 for the fiscal year ended March 31st last is shown in the annual report of the company. Bullion production amounted to $202,387, and other small credits raised the total income to $202,783, while costs total $210,479. The surplus carried forward was $65,530, as against $73,013 the year before.

During the period of operation development work was aggressively carried on as is shown by the following figures: Drifting, 1,442.2 feet; crosscutting, 1,127.9 feet; raising, 178.7 feet; diamond drilling, 705 feet; stoping, 15,753 cubic yards.

The mill treated 45,373 tons of ore, valued at $259,365.30, and recovered bullion worth $242,060.84. Income from other sources amounted to $635.59. Operating cost amounted to $234,021.33, being $1.22 02 per ton of ore milled for milling, and $3.93.75 per ton of ore milled for mining, and all other charges except depreciation. The foregoing figures are from the period between March 31st, 1917, and July 15th, 1918.

Nova Scotia Steel and Coal Company, Limited.—Nine months' results hold out the promise that the company will earn a surplus for the common stock of about $2,500,000 for the year ending December 31st, or more than double last year's showing, when the balance available for the common stock was $1,260,477. That is, earnings should equal about 17 per cent., against 8.4 per cent. in 1917.

Net profits of the company, after allowing for fixed charges, but before appropriations for taxes and depreciation, amounted to $2,743,125 for the nine months ended September 30th last. That compares with $2,315,501 for the full year 1917, when interest charges are allowed out, but no depreciation and taxes. That is, the company's net was some $400,000 larger in the nine months than in the twelve months of 1917, and would seem to indicate a full year's profit of $3,600,000.

The company's cash position continues satisfactory. Net working capital at the end of the September quarter amounted to $11,[illegible]00,000, including over $4,000,000 in cash, and since the close of the quarter the company has received an additional $1,000,000 on account of car orders.

Western Canada Flour Mills Company.—The report of the company for the year ended August 31st, 1918, shows

milling profits of $289,929 and profits from other sources and investment income of $253,915, making a total of $543,844, as compared with $418,023 a year ago. This is equal to 23 per cent. on the common stock as against 19.8 per cent. a year ago. The company had carried forward from the previous year a balance of $844,651, from which a stock dividend issued later of $212,470 must be subtracted, leaving $632,181, which, added to the profits of the year under review, makes a surplus for distribution of $1,176,026. From this amount bond interest took $87,889, dividends of 8 per cent. and a bonus of 2 per cent. took $299,702, and a balance was carried forward into the current year of $853,434.

The company's net working capital was reduced nearly $100,000, due partly to the enforced curtailment of inventories, which were reduced from $1,067,000 to $509,084. The company, however, strengthened its financial position, as the balance sheet will show. Accounts and bills receivable were increased $147,000. Holdings of Victory Loans were $250,000 against nothing before, cash account amounted to $208,000 more than in 1917, the total being $235,699 On the other hand, accounts payable were reduced by $346,000.

Temiskaming Mining Company.—The financial statement just issued by the management of the company shows the company to be in a strong financial position. Active assets on September 30th, 1918, amounted to $717,427, as compared with current liabilities of $14,620, leaving working assets of $902,807. This compares with $723,686 on December 31st, 1917, an increase of $193,741. The statement adds that the mill has not been in operation for the past six months and that development work has been solely of an exploratory nature. The company's assets have not been dissipated. Moreover, they are equal to 36 cents on each outstanding share as against a present market price of 30

Underground developments at the Timiskaming mine are taking a favorable turn. The new vein reported as having been encountered on the Gans lot is showing improvement as work proceeds. It is understood drifting is proceeding both north and south, and the vein has a width of about one foot. The wall rock is said to carry silver values over the full width of the drift.

The Guaranty Trust Company, of New York, announces that it has completed arrangements to act as the correspondent of the Tata Industrial Bank, Limited, of India, in the United States. The Asia Banking Corporation, which was recently formed by the Guaranty Trust Company, and a group of associated banks will act in the same capacity in the far east.

The Sherbrooke Street Railway Company has presented an ultimatum to the city council stating that it wants tariff of fares increased and in the event of the council failing to agree to these demands that the street car service will be discontinued after November 30. As an alternative the company is willing to sell to the city at a price to be fixed by arbitration. Several of the aldermen characterized the ultimatum as a bluff.

THE PORT OF VICTORIA

Natural Advantages of Western Port Are Recognized, But War Conditions Have Diverted Traffic.

Victoria, situated on the Strait of San Juan de Fuca, being on the direct route of all vessels destined to or from southern British Columbia and Puget Sound ports, it is natural that the entries and clearances at this first and last port of call should compare favorably with any other port in Canada. This is shown in the following latest published returns of the Department of Trade and Commerce for the year ending 31st March, 1917:

Number and tonnage of sea-going vessels entered at and cleared from:—

	Vessels.	Tonnage.
1. Halifax ..	2,641	4,740,289
2. Victoria ..	3,208	4,208,177
3. Montreal ...	1,134	3,858,823
4. Vancouver ..	3,156	3,812,865

Ogden Point Breakwater

The Government of Canada, in 1912, recognized the natural advantages and splendid geographical situation of Victoria and appointed Mr. Louis Coste, C.E., to investigate and report upon the situation. Mr. Coste's recommendations were approved by the Dominion Government, and a contract for constructing a breakwater, 2,530 feet in length, at Ogden Point, was awarded to Sir John Jackson (Canada), Limited, in May, 1913. This work was completed on 22nd of January, 1917, at a cost of $2,200,000.

New Ocean Docks.

Another contract was awarded to Messrs. Grant, Smith & Co. & McDonnell, Ltd., for the construction of the initial two piers, part of those included in Mr. Coste's recommendations, and this work was completed in March, 1918, at a cost of $2,440,000.

One side of the pier nearest the breakwater is 1,000 feet in length. The other side, and the sides of the adjoining piers are 800 feet each. The width of the piers is 250 feet in each case, separated by 300 feet of water, with a minimum depth of 35 feet at low tide. These piers are of solid construction, concrete cribbing filled in with rubble.

On the pier nearest the breakwater a freight shed has been constructed, 700 feet by 200 feet, said to be the largest on the Pacific Coast, costing $218,000. This shed is complete in every respect for handling freight (railway trackage, electric cranes, etc.) and is connected by rail with a car barge ferry slip, which has cost an additional $65,000.

It is intended to provide similar freight shed accommodation on the other pier on a progressive plan, to meet requirements, a further 200 feet by 200 feet to be immediately constructed and connected by rail with the car barge ferry slip.

Victoria is indebted to private enterprise and railway corporations for wharf accommodation, and it redounds to the credit of her citizens and those corporations that the shipping of the port, both coastwise and overseas, has grown to such large proportions.

Panama Canal.

The new works were planned to take care of increased shipping which would have followed the opening of the Panama Canal. The war, however, has upset these calculations and much shipping has been entirely withdrawn from Pacific Ocean trade in order to be placed in war service upon the Atlantic and elsewhere. The volume of overseas shipping using the port of Victoria has, however, been maintained, with the certainty of an enormous increase upon conclusion of the war and return to peace conditions.

Railway Terminal Facilities.

It will now be possible to load these transhipment freights direct into rail cars, as is done with the most modern facilities anywhere existing, and the cars can be safely and expeditiously moved by car ferry to any mainland railhead desired. There is practically no limit to the possible expansion of this business, if energetically developed.

Port Charges.

An important factor to this end will be found in the port charges, and while these collectively are already lower than elsewhere on this coast, according to a circular issued by the Victoria Board of Trade, endeavors are being continued to obtain further reductions. The pilotage situation has recently been investigated by a Royal Commission, and it is expected that the report will provide for still lower pilotage rates.

Sick mariners' dues should be either abolished or a more modern system of collection adopted, commensurate with the service required, says the Board of Trade. It must be mentioned that the Government of Canada for years has been, and is at present, collecting at British Columbia ports one dollar for about every fifty cents expended upon sick mariners.

These two items are practically the only charges paid by vessels calling at Victoria.

Bonding Facilities.

The Canadian Government regulations already provide for holding goods in bond in private warehouses, but it is desirable that such facilities should be extended by the construction of suitable premises entirely under Government control, where it would be possible not only to store goods on a rental basis, but to draw samples, exhibit them, repack goods—in brief, establish an entreport with practically all the facilities of a free port.

Continuing, the circular issued by the board says:—

Coal Bunkers.

"The coaling of ships is generally associated with bunkers, but the use of hulks is now common. They are equipped for coaling ships either overhead through the hatches, or through the sides, as construction of the ship may require. This Board of Trade has long desired coaling facilities at Victoria, feeling confident that advantage would be taken of the superior steam qualities of our island coal if vessels could be saved the time occupied in proceeding to the mine bunkers, as is now necessary.

"With large oil tanks already established at the entrance of Victoria Harbor, it should not be difficult to extend the oil supply service to ships requiring that fuel.

"Pure, fresh water is available at the wharves and is supplied in any quantity at a low rate.

Grain Elevator.

"Mr. Coste's plans provide for the establishment of a grain elevator at the shore end of the piers at Ogden Point. It is believed that this could be used with advantage, especially in the case of ships proceeding to sea after failing to secure full capacity of cargo at a mainland port. Such vessels could complete their loading with grain at Victoria, and would perhaps accept a lower freight rate rather than proceed on a long voyage with empty cargo space. Enlargement of the grain elevator would naturally keep pace with the demands upon it.

Ocean Docks and Island Railways.

"The Canadian Pacific Railway Company's position to do island business with the Ogden Point ocean docks is already practical, for cars can be transferred to their line by using their Esquimalt car ferry slip. Similar facilities will be available for other lines of railway.

"The Provincial Government, in developing the former Indian reserve, is placing common user rail trackage along the waterfront, which will be available to both the Canadian Pacific Railway Company and the Canadian Northern Pacific Railway Company. A car barge ferry slip is also contemplated at the southwestern end of the reserve, and its construction and the rail connections will be provided for by the Provincial Government at the earliest possible date.

"The Canadian Northern Pacific Railway Company's steam car ferry in its operations will enable that company to advantageously cater to the Oriental trade, which the Canadian Pacific Railway Company has shown to be possible of development, for that business now done through this port is almost entirely due to the enterprise of the company's agents in the Orient in arranging for routing at this end before the goods are shipped at point of origin.

Natural Advantages of the Port of Victoria.

"In estimating possible port development at Victoria attention must be given to recent changes in Pacific Coast shipping movements. It is not many years since San Francisco was the principal port on this coast, but that is changed and now by far the greater movement of shipping is via the Strait of San Juan de Fuca, en route to Puget Sound and British Columbia ports. With few exceptions all these vessels call at Victoria, and in many cases they do not call elsewhere in this province. From a glance at the accompanying sketch map it will be seen that Victoria is on the direct line to all inland ports.

"The entrance to the harbor has ample depth of water and it is quite free of any obstacle to navigation. Fog is practically negligible, records extending over twenty years proving the average number of days upon which fog has occurred to have been twenty-four per annum, and many of these fogs were of short duration.

"The payment of pilotage at Victoria is compulsory for vessels engaged in foreign trade, but the captains of one regular line dock their vessels without assistance. Victoria inner harbor is used almost exclusively by vessels engaged in coast trade, and these vessels do not employ pilots.

FARM MORTGAGES IN CANADA

An Address Before the Farm Mortgage Bankers' Association, at Kansas City, Reprinted Herewith from the United States Investor.

BY WILLIAM E. STILES,
Of the National Trust Company of Canada.

A few years ago the farmers were clamoring for this and clamoring for that and the feeling was that those men did not quite realize the necessity of stabilizing the value of the land or the security. But there has been a wonderful change in the feelings of those farmers' organizations. They are in business to-day, those men. It originated with the Grain Growers' Association and out of that sprang the Grain Growers' Grain Company. The Grain Growers' Association was formed of all the grain growers through the different provinces. The Grain Growers' Association then started to handle grain in carload lots and send it to the Winnipeg grain trade. Then out of the comes the Saskatchewan Cooperative Elevator Company. I haven't got the figures with me but, believe me, gentlemen, they have an enormous organization. They have elevators in nearly every town in Saskatchewan. They have just finished building one of the largest terminal elevators at Ft. William. They have put up a building in Regina 50 feet wide by 125 feet long. They put that up two years ago and they found it wasn't long enough and this year they have added another 25 feet to it. When I came through Winnipeg recently I was with the president of our Manitoba Association and we went to the solicitor's office. I went to the eleventh story of the Bank of Hamilton Building, an eleven story building about 125 feet deep with a frontage I should say of fifty or sixty feet. The bank, gentlemen, is holding the ground floor and that of their business solicitors are on the top floor. The other nine floors are completely occupied with the business organizations of these farmers. They are selling their grain, they are buying coal, implements, groceries; they are carrying on a cooperative business there. They market their wool cooperatively and they have got a wonderful organization. I just mention that in passing to show the difference since those men have got into business, of their idea of business methods. I don't want to say just the idea of business methods, but they run business in a different light from what they did before when they hadn't had their own experience.

The representatives from the commercial interests, the Canadian Bankers' Association, the Credit Men's Association, the Manufacturers' Association, the Farm Implement Association, the Manitoba Retailers, the Saskatchewan Cooperative Elevator, Retail Land Association, Retail Lumber Association, the Regina Board of Trade, Saskatchewan Board of Trade—and these people, as I say, 25 from each Association, must meet together and they discuss things very freely.

This matter of discussing legislation has brought forth splendid results. We used to go down to the Provincial Government with anything special and they felt a little diffident about acting before they had the feeling of their constituents. Now if anything is brought up, and notice is given, and it is brought up at this Joint Committee of Commerce and Agriculture and the resolution goes out from that association—and, by the way, it must be unanimous—to the different governments, they feel that they have got something to act on.

Soldier Settlements.

I might mention here also—I don't know whether it would be out of place or not—it is not mortgage business, but I would like to tell you what we do for the returned soldiers. The Dominion Government appointed a Soldier Settlement Board. They have arranged to loan as high as $2,500.00 to returned soldiers on their farm at 5 per cent. 30 year amortization notes. They have appointed advisory boards to consider these applications in the three provinces. I happen to be on the Saskatchewan Advisory Board. Up to the present time we have loaned about $250,000.00 to returned soldiers. We have taken a first mortgage on the real estate and where the title is not as good it is still in the name of the government. We take a first lien. We take a lien, not a mortgage. We cannot mortgage. We take a lien on that land and in addition to that we lend money to buy live stock. And the way we lend this money to buy live stock. We take a lien on the live stock: We do not take a chattel mortgage on it. We take a lien note and register it. The lien note defines the animal. I don't know whether the mortgage company or trust company have power to lend on a note. The trust hasn't power to lend on a note, that is a banker's business. The trust company is not a bank as we know it here.

Going back to the soldiers' settlement, we have loaned about $350,000.000. The only way we would accept office is that these loans would be considered on a business basis; that we didn't want to go on with anything that might be considered a hand-out. There had to be security put up for those and where the land is still in the name of the government, the way we are making these loans, we are making sort of progressive loans. A man comes for a quarter of a section and they all ask for $2,500.00, everyone of them. We make him a loan of $600.00 this year, and next year we lend him a little money to buy a horse, or lend him money to buy seed or perhaps to buy a team of horses. We go on and lend him the money and the government goes on and pays the expenses and the only cost to him is the 5 per cent. which he pays, and they have made arrangement whereby the first payment of interest is deferred for a year.

Well, gentlemen, I think I have covered all I have to say at the present time. There is one thing I might mention, that all these loans are made under the Torrans System; that is, in Saskatchewan where the title is guaranteed by the government. It is an easy system and all liens show on a certificate of title. It is easy to find out what is against the piece of land after the solicitor gets his abstract and the certificate as to sections; generally he gets a certified copy of the duplicate of title and on that he can see all recitations. I have copies of the titles with me and if anybody is interested, I can show you copies of titles with the certificates of charges on the note whereby the government says that the title is in the name of so and so, that it is subject only to first mortgage and so on. That is accepted by our agents and attached to the mortgage showing the mortgage we have is the first charge. I believe it is in vogue in some of your states here and we find it is all right. It saves time and it is absolutely secure. The government has an insurance fund for which we pay a fee in proportion to the value of the land each time it is transferred. That goes into an insurance fund which is held by the government to protect them or to pay out in case there should be any application where it is shown that somebody has suffered an injury. I think in Saskatchewan there have been very few payments and it makes a very nice revenue for the province. When they get about $200,000.00 in there they transfer $100,000.00 to the revenue of the province and go on accumulating.

COBALT CAMP MAKES RECORD

During the first ten months of 1918 the value of silver shipped from the mines of Cobalt approximates $7,624,761.55. This compares with about $6,070,748.04 during the corresponding period of 1917, and represents an increase of approximately $1,554,013.51, or an average increase of upwards of $150,000 every 30 days. At this rate the total shipments for the whole of 1918 will exceed the 1917 record by not far under $1,900,000. Such an increase cannot but help to swell profits, even after deducting increased costs of operation.

That 1918 is establishing the highest record in Cobalt's history in point of value of silver shipped in a refined state, may be attributed to the fact that the price of commercial bar silver is maintaining the highest average in the past quarter of a century. It is also due in no small measure to the fact that the great silver deposits from month to month are being found to continue farther and farther beyond their previously known limits.

Apart from the continued probability of the large producers maintaining a large aggregate output for many years there is always present the great possibility of encountering new large deposits in the smaller operations. The history of Cobalt has been such that at any property where the geology is favorable and where work is being intelligently and aggressively carried on, there is always present the very great possibility of developing a mine. Also it is by no means certain that the silver deposition is confined to the present known productive area It seems quite probable that the North Cobalt area may come in for a good deal of attention. Such a possibility is indicated in the fact that the Mining Corporation is installing an electrically driven mining plant within sight of North Cobalt, and have outlined a somewhat extensive plan of operation.

The fortunes of the mines of the camp may continue to fluctuate. This has been so from the beginning, and will probably continue. It is not improbable that the working out or partial working out of one mine may be followed by greater production from others, such to continue for a great many years.

PREPARATIONS FOR PEACE PROBLEMS

What Canada is Doing to Meet New Conditions Which Are Now At Hand.

MUNITIONS WORK TO BE GRADUALLY REDUCED

Policy of British Government, as Regards War Orders in Canada, Will be to Bring About Gradual Cessation

The Imperial Munitions Board desires it to be known that it is in communication with the British Ministry of Munitions with regard to the method to be adopted in ceasing munition production in Canada. The orders now running in Canada, which have been placed by the Imperial Munitions Board on behalf of the Ministry of Munitions and other British government departments, may be divided into three classes:—

(a) Articles which are no longer required at all, as a result of the cessation of hostilities, and of which no use can be made, e.g., shells and explosives. The further production of these would be economically wasteful, and it is therefore expected that the British government will give instructions for their production to be discontinued as soon as possible.

(b) Articles which may no longer be actually required by the government, but of which use can be made, e.g., metals and raw materials of various descriptions. In this class it may be found possible to allow existing contracts to run out or to bring them to an end gradually, the British government taking any loss on the materials as they are delivered.

(c) Articles which are still likely to be required, e.g., commercial lumber and ships. In this class it is not likely that any change will be made in existing contracts. It should be stated that the Imperial Munitions Board has still a number of steel and wooden ships under construction for the British government, in addition to the programme of merchant ship construction which is being carried out by the Canadian government. This latter programme will take up the berths in steel shipbuilding yards now occupied by the board's vessels as these are completed. As regards wooden ships, important contracts have been placed in Canada for this class of vessel by the French government, and also on private account, which will ensure continued operation of the yards.

Discontinue Initial Operations.

With regard to class "A," i.e., the class of contracts which are likely to be discontinued as soon as possible, it is estimated that not more than fifty thousand work people are at present employed in Canada on British government contracts of this description. It is proposed by the board, as the method of dealing with these, that manufacturers should be asked at once to discontinue the initial operations on material. This would involve the immediate reduction of their staff to the extent of perhaps ten to fifteen per cent. of the number employed. This must be taken as a rough general average, as the numbers would, of course, vary in individual plants. The balance of the employees will be occupied in completing the manufacture of articles already in process, and as these are completed, will be gradually reduced. This will go on till a fixed date, probably about the middle of December, after which time further manufacturing operations in this class would cease.

Give Time for Absorption.

It is hoped that by this method sufficient time will be given for a considerable portion, at any rate, of the work people who will no longer be required for the manufacture of munitions to be absorbed in other employment. Many of the factories now making munitions have other lines of manufacture, the output of which has been restricted by shortage of material and labor, and which they may now be able to extend as these restrictions will disappear through the cessation of hostilities. It is understood also that the Canadian government, as announced by the acting prime minister, is taking up with the railways, and in other directions, the question of placing increased orders for manufactured goods, and putting in new hand work of various kinds in order to provide occupation for munitions workers as they are released from the munitions factories.

TRANSPORTATION OF RETURNED MEN

On November 12th Hon. J. D. Reid, Minister of Railways and Canals, and Hon. S. C. Mewburn, Minister of Militia, held a conference with the presidents of the three great Canadian railways, E. W. Beatty of the Canadian Pacific Railway, Howard G. Kelly of the Grand Trunk, and D. B. Hanna of the Canadian Northern, to discuss the necessary arrangements for the transportation of Canadian troops from England to Canada and distribution to their homes at the conclusion of the war. It was decided that a committee composed of a representative of each of the three railways would be located permanently in Ottawa. Associated with them will be Col. E. Clarke, representing the Militia Department. The names of the three railway officials will be made known as soon as they are selected by the railway companies, and they will take up their duties in Ottawa at once.

This committee will have full authority to deal with the transportation question as affecting demobilization, and it will be its duty to look after the return of the troops in comfort after they have been landed in Canada. It will endeavor so to co-ordinate and direct the work of transportation as to eliminate the difficulties sometimes caused by the movement of large bodies of men.

NEW RAILWAY WORKS TO BE COMMENCED

With a view to arriving at an understanding of what motive power, rolling stock and other essentials for railway operation will be required during the coming year, a conference was held to-day between Hon. J. D. Reid, Minister of Railways and Canals; Hon. S. C. Mewburn, Minister of Militia; Sir Thomas White, Minister of Finance; President E. W. Beatty, of the Canadian Pacific Railway; President Howard G. Kelly, of the Grand Trunk, and President D. B. Hanna, of the Canadian Northern Railway. It is recognized that with the closing down of munition plants and other war industries many men will be thrown out of employment in the near future, and it is the intention of the government, working in conjunction with the railways, to utilize this labor as much as possible in anticipating equipment requirements of the roads.

At the conference to-day it was decided that the railways should go fully into the details, and gather more complete information with regard to their future requirements. A further conference will be held in a few days, at which the situation will be again discussed, and possibly a policy looking to the employment of munitions workers in railway work will be adopted.

RAILWAY EXTENSION IN NORTHERN ONTARIO

The Cochrane board of trade has passed a resolution urging that the Ontario government proceed with the extension of the Temiskaming and Northern Ontario Railway to James Bay. The resolution points out numerous advantages to be derived from such a development, and a copy of the resolution is being sent to the Premier of Ontario, Sir William H. Hearst, and his colleagues of the Cabinet, as well as to the individual members of the Ontario legislature and to Mr. J. L. Englehart, chairman of the Temiskaming and Northern Ontario Railway Commission; also to the Associated Boards of Trade of Ontario.

CANADA'S EXPORT TRADE

Reconstruction problems were under consideration at conferences on November 12th between leading manufacturing interests and the Reconstruction and Development Committee of the Cabinet. A large delegation recently urged on the government the necessity for steps to develop export trade in view of the probable early cessation of munition orders. It was then decided that a committee should be appointed to work in conjunction with and to advise the government.

The conferences, it is understood, are in furtherance of the decision then reached.

Your Help May Turn the Scale

There is little need to more than remind you business men of Canada how vitally necessary it is that the Victory Loan 1918 should be an overwhelming success.

Your responsibility does not end with your subscription —large as it may be.

You business men of Canada occupy a peculiar and responsible position in respect to the Victory Loan because many people, with whom you come in contact, will act according to your advice and example.

So, for the period of the Loan do not overlook an opportunity to throw the full weight of your influence and enthusiasm behind the Victory Loan 1918.

Yes, do more than that. Go out of your way to increase the prestige of this Loan, remembering that you are accomplishing war work of a most important nature.

Don't underestimate your part in this campaign.

The assistance and support of you business men may be just the weight necessary to turn the scale. It may be that your influence and the influence of every business man from coast to coast, is all that is needed to make the Victory Loan 1918 a new world's record per capita in subscriptions.

Issued by Canada's Victory Loan Committee,
in co-operation with the Minister of Finance
of the Dominion of Canada.

THRASHING AND PLOUGHING IN THE WEST

Thrashing Almost Completed—Manitoba has had Best Year, and Must Supply Seed Oats—Live Stock Good

The Manitoba "Free Press" has completed its annual report on thrashing and fall cultivating. The reports received from correspondents throughout the west show that thrashing is practically complete, that large areas of country are in need of moisture, and that these areas are mainly those that have been dry all summer.

Quite a number of correspondents state that there is serious shortage of water for stock during the winter. In all, 58 points report country very dry, and a number of these state too dry to plow. Fall cultivation, however, on the whole, is well forward. A number state in addition that areas summer fallowed are large.

Considered by provinces, conditions are very satisfactory in Manitoba, but vary very widely in Saskatchewan and Alberta. In Saskatchewan, yields from thrashing machines do not measure up as well as the fields indicated at harvest time in a number of the northern districts; while great wheat producing areas like Swift Current, Maple Creek, Leader give such returns as two to five bushels to the acre, or state that so much of the seeded area was not thrashed at all that an estimate of average cannot be made.

The "Free Press" still feels, however, that its estimate of 92,000,000 bushels of wheat for Saskatchewan was not unduly optimistic. The indications are strong that Manitoba will have pretty close to 50,000,000 bushels. With regard to Alberta fewer reports have been received. The average of yield at Raymond in the irrigation belt is only 15 bushels, which is certainly disappointing, as is the average of 10 at Carmangay, one of the big wheat areas of the middle south; on the other hand, 20 bushels per acre at Erskine is a surprise; while 4 at Empress is neither better nor worse than pre-thrashing expectations.

The oat situation is certainly serious, and indicates that the damage to late oats by the frosts of September 4 and 5 was very heavy, and that oats suitable for seed will be scarce. Manitoba will undoubtedly have to supply the main bulk of seed oats and farmers who have good oats should be careful about using them for feed until seed requirements have been met.

The barley crop in Manitoba is quite wonderful, and is very fair in Saskatchewan and some parts of Alberta.

Prices and yields considered, the indications are that, in spite of drought, drifting and untimely frost, the Canadian west will realize about $500,000,000 from her five cereal crops—wheat, oats, barley, flax and rye.

The reports indicate that food for stock is, on the whole, fairly satisfactory. A few districts report it "very short," but many state that there is sufficient roughage, but that some grain will have to be shipped in. In Manitoba, out of 36 points heard from, 19 report feed "abundant," "ample," "plenty," and the like, while only three points report feed scarce.

BRITISH COLUMBIA'S FOREST RESOURCES

The Commission of Conservation has just completed an exhaustive investigation, covering a period of three years, into the forest resources of British Columbia. It shows that the total stand of saw lumber and pulpwood material in British Columbia is 366,000,000,000 board feet.

The report discloses the fact that of the total land area of the province, 355,855 square miles, approximately 200 square miles is incapable of producing forests of commercial value. About 145,000 square miles lie above the merchantable timber line, and on 55,000 square miles the soil is either too rocky or wet, or the forests have been so completely destroyed by fire that there is no hope for the natural re-establishment of forest conditions for centuries to come.

Of the remaining 165,855 square miles which is capable of producing forests, only about 28,000 square miles carries sufficient timber to be classed as statutory timber land. The timber on about 110,000 square miles, or two-thirds of the area once forested, has been totally destroyed by fire, and in more than half of the remaining 55,855 square miles has been seriously damaged. Using the timber still standing as a basis, it is estimated that the province has lost, through forest fires, at least 665,000,000,000 feet board measure.

MUNICIPAL BOND MARKET

The Monetary Times Weekly Register of Municipal Activities and Financing

Bowmanville, Ont.—The by-law on November 11th to loan $50,000 to the Canadian Can Company, was carried by 395 for and only 39 against. Operations are to begin at once. The new company will absorb the J. F. Ross Can Company, and the Hygienic Containers Company, Toronto.

Kisbey, Sask.—The local government board has authorized the council of the village of Kisbey to borrow the sum of one thousand dollars for the purpose of paying the cost of certain road improvements within the village and to issue debentures for that amount, repayable in ten equal consecutive annual instalments, with interest at a rate not exceeding 8 per cent. per annum.

Browning, Sask.—The local government board has authorized the rural municipality of Browning No. 34 to borrow the sum of eight thousand one hundred dollars for the purpose of paying its share of the cost of erecting and equipping the Lampman Union Hospital. Debentures for that amount are to be issued repayable in fifteen equal consecutive annual instalments with interest at a rate not to exceed 8 per cent. per annum.

Lampman, Sask.—The local government board has authorized the village of Lampman to borrow the sum of eighteen hundred dollars for the purpose of paying its share of the cost of erecting and equipping the Lampman Union Hospital. Debentures for the said amount are to be issued, repayable in fifteen equal consecutive annual instalments with interest at a rate not to exceed 8 per cent. per annum.

COBALT ORE SHIPMENTS

The following is a statement of shipments of ore, in pounds, from Cobalt Station for the week ended November 8th, 1918:—

McKinley Darragh, 83,506; Foster Lease, 87,928; Dominion Reduction, 81,400; Kerr Lake, 61,230; Penn-Canadian, 65,063; Nipissing, 300,445; Buffalo, 329,710; Mining Corporation, 151,640; total, 1,160,022.

The total shipments since January 1st, now amount to 28,069,285 pounds, or 14,034.6 tons.

RAILROAD EARNINGS

The following are the earnings of Canada's transcontinental railways for the first week in November:—

	1917.	1918.	Inc. or dec.
Canadian Pacific Railway.			
Nov. 7	$3,204,000	$3,437,000	+ $233,000
Grand Trunk Railway.			
Nov. 7	$ 944,110	$1,342,941	+ $398,831
Canadian Northern Railway.			
Nov. 7	$ 895,400	$1,049,300	+ $153,900

NEW LOAN IN UNITED KINGDOM

A new loan of £700,000,000 was called for in the British House of Commons on November 12th, by Andrew Bonar Law, Chancellor of the Exchequer.

Mr. Bonar Law, in moving the new vote of credit, said he believed there would be a reduction in expenditure owing to the change in the military situation, but that the treasury officials had advised him against reducing the amount of money desired. It might be necessary for the allies to make efforts to bring food supplies to Europe, in which case a greater expenditure would be incurred, the chancellor said. He added that the general financial situation at the end of the fiscal year would be appreciably less than his budget figures. The future prosperity and well-being of the country, he continued, depended on the extent to which capital and labor could harmoniously work together. It was vital that the close international unity which the war had produced should prevail while the ravages of war were being repaired.

CANADIAN ROADS ARE PREPARED

Railway War Board Says New Conditions Following Arrival of Peace will be Adequately Met

"Whether peace comes to-morrow or next week, Canada's trade arteries are in a healthy condition and will meet even the most complete changes in the current of traffic without confusion or congestion." This statement was issued by the Executive Committee of the Canadian Railway War Board at the end of a long session on Wednesday, November 6th. Lord Shaughnessy will continue as chairman, presiding over Canada's entire railway system. The executive committee was attended by Lord Shaughnessy; Mr. H. G. Kelly, vice-chairman and president of the Grand Trunk Railway; Mr. D. B. Hanna, president of the Canadian Northern Railway; Mr. E. W. Beatty, K.C., president of the Canadian Pacific Railway, and Mr. A. H. Smith, formerly president of the New York Central, now Regional Director of the United States Railway Administration. Mr. Smith represents the American lines in Canada.

Engine and Car Shortage Lessened.

"Thanks to the foresight of the Canadian government in ordering engines built at a time when some of the roads in Canada were unable to finance and purchase, the power situation on the Canadian roads is now fairly satisfactory. Two hundred new engines are now in service on the Canadian Northern Railway, Grand Trunk Railway, and Canadian Government Lines. The scarcity of locomotives, which was on the verge of becoming acute last winter, is now greatly modified.

"The supply of freight cars has been increased by 14,000 new cars bought by the government for the government roads. These new cars, added to the better loading, quicker handling and more rapid unloading methods obtained through the Canadian Railway War Board's efforts, mitigates the danger of car shortage. That, however, does not mean that economical methods may be relaxed.

"Last winter over 20,000 of our cars were lost in the American traffic tie-up. It is hoped that this winter the lines will be able to return our cars almost as fast as they get them.

"The condition of rails and roadbed is not as satisfactory as might be desired. New rails have been denied the roads owing to the heavy demand for steel for munitions. Out of the 100,000 tons finally allotted us only 80,000 have been received. These have been used to good advantage on the main lines.

Labor Situation.

"The labor situation is satisfactory except in so far as the roads are still understaffed. A special Labor Board formed at the request of the Canadian Railway War Board with the co-operation of the Brotherhoods is administering the McAdoo award very satisfactorily. Over 14,000 railway employees have been laid off by the 'flu,' but are now returning to work. Forty-five thousand doses of anti-'flu' serum have been sent west by the Canadian Railway War Board to forestall any further spread of the disease.

"Old trouble spots have been carefully guarded. The temporary isolation of the Drumheller coal fields by railway breakdown last winter, and the consequent fuel shortage in certain prairie districts, will almost certainly not happen this winter, as the vital section of the line has been double tracked. The board has made working plans for the Canadian Northern, Canadian Pacific and Grand Trunk Pacific to co-operate in carrying traffic in the West should any one road find itself over-burdened.

Direct Haul to Toronto.

"The Canadian Railway War Board has arranged also that the Michigan Central, Toronto, Hamilton and Buffalo, Canadian Pacific Railway, and Grand Trunk shall all haul traffic direct into Toronto. Formerly the Grand Trunk Railway had the only direct route; the Michigan Central hauled from the frontier to Welland, the Toronto, Hamilton and Buffalo from Welland to Hamilton, and the Canadian Pacific Railway from Hamilton to Toronto. The engine coupled on at the frontier will now run through to Toronto.

"Plans are being perfected for further unification of terminal and other facilities. We have reason to believe that except for possible contingencies of storm and zero weather, epidemics and labor shortage, the railway systems of Canada are in more nearly perfect condition to face peace conditions and the reconstruction period than any in the world."

UNITED STATES NEWSPRINT SUPPLY

Owing to the scarcity of newsprint in the United States, smaller papers have experienced difficulty in securing their supplies. When old contracts expire the pulp and paper companies are naturally most anxious to retain the business with the larger purchasers and where there is a shortage, therefore, the smaller buyers cannot secure their requirements.

Government control of the industry is being considered by the United States War Industries Board. A tentative plan has been worked out to provide for an equitable distribution of the supply to all newspapers in proportion to their requirements.

DECREASE IN SEPTEMBER FISH CATCH

Owing to the interference of enemy submarines and the prevalence of very stormy weather on the Atlantic coast, the quantity of sea fish landed in Canada during the past month was much less than in September of 1917, according to the monthly statement on deep sea fishing results issued through the naval department. Fourteen men of a Nova Scotia fishing vessel lost their lives during the month.

In spite of the decrease in the quantity of fish taken, its value, in first hands, amounting to $5,300,608, was greater than the value for the same month last year, by over half a million dollars.

Weather was good for fishing on the Pacific coast, but the salmon catch fell short of that for September of the preceding year by 100,000 hundredweights. The run of sockeye in the Fraser River district was small, but other varieties were fairly abundant. Good catches of pilchards were made on the west coast of Vancouver Island. The total for the month amounted to 14,266 hundredweights, against 175 hundredweights in September of 1917.

TRADE WITH SOUTH AMERICA

"Foreign Trade Thought of 1918" is a new publication issued by the Irving National Bank, of New York, in its foreign trade series.

In "Foreign Trade Thought of 1918, excerpts from addresses delivered at the Fifth National Foreign Trade Convention, held in Cincinnati, have been classified so as to emphasize outstanding ideas, such as Co-operation, The Need for Nationalizing Effort, For Creating an Adequate Merchant Marine, For Adjusting Vision to the Needs of the Whole World.

The Foreword urges the establishment of foreign trade. It does not advocate indiscriminate competition or a measuring of commercial progress in terms of "War after the War." But it does point out that the slogan of the five conventions, "Greater Prosperity through Greater Foreign Trade," will be realized only, through recognizing the value of wholehearted, concentrated effort, intensified zeal and activity.

The Irving National Bank has also published a Graphic Trade Chart and Commercial Map of Latin America. This map will be of great value to Canadian concerns who contemplate entering that field.

A total of $53,600 out of appropriation of $132,000 was spent by the department of public works of St. John, N.B., during the past summer on actual paving and sidewalk operations, according to figures given out by the department. Exclusive of salaries, interest and sinking fund, etc., the appropriation for actual operations was only $60,300, and on account of the heavy cost of snow removal and other unusual expenditures, the appropriations were pooled to take care of unforeseen demands. An overdraft of $11,000 was necessary to care for snow removal, in addition to money taken from appropriation for new asphaltic pavements

ONTARIO CROP REPORTS

Fall Wheat Prospects Good—Influenza Has Retarded Farming as Well as City Industry

The following is a summary of reports made by agricultural representatives to the Ontario Department of Agriculture:—

Fall wheat has done so well during the latter part of October that in most instances it will be ready for winter with a good top and a thrifty appearance generally. From Essex comes the only complaint of insect injury, the Hessian fly having appeared in some places in that county.

Potato digging is practically through. Rot has already done much injury in Dundas. The week has been most favorable for sugar beet lifting. Some remarkably good tonnages are reported from Lambton. Turnips have done better than was expected. A farmer in Peterborough reports 45 tons to the acre. Prices for turnips have fallen in Brant; only from 15 cents to 18 cents a bushel now being paid, as dealers fear a shortage of cars for shipping during the winter. Oxford reports that apples are being marketed freely, the inferior fruit going to the evaporators and cider mills, with but little waste.

Pastures up to very recently have been good, but are now well eaten off. Live stock are being stabled in good general condition. About the usual number of stockers are on hand, but Lanark reports that more young stock than usual will be fed this winter. It is stated from Grey that sales of livestock have been rather unsatisfactory this fall, as (with the exception of pure-bred shorthorns) cattle, sheep and hogs have been selling at low figures compared with sales held last year. On the other hand, a herd of grade Holsteins were sold in Brant last week at an average of $135, including an old cow which went at only $60, while some spring calves brought $42 each. Dairy cows have continued in fair milking condition.

Hogs have been going to market in good numbers despite falling prices. Small pigs have not been so much in demand during the week. Marketing of grain has been slow, which some attribute to the epidemic hitting both buyers and sellers. Hay is in much demand, but comparatively little is now changing hands. It has been selling at auction sales in York at from $20 to $25 a ton. Fodder supplies otherwise are fully sufficient for the winter, the clean straw making up considerably for the scarcity of hay. Coarse grains are plentiful, and there is a good supply of ensilage.

Fall plowing is nearly completed in Western Ontario, but wetter weather has prevailed in the eastern portion of the province, and work there is more backward.

Corn husking has been very active in Essex and Kent, and the recently extended leave of drafted men is said to have helped materially in this work. The effects of the influenza are still being felt in many rural sections.

SOLDIERS' LOANS IN EDMONTON

Payments on account of loans to soldiers already authorized by the government have now reached, for the Edmonton district alone, a total of $[illegible]00,000. This includes all the north country which has been the main stamping ground for veterans who want to take up farming on their own account. Cheques for these payments have been issued from the Edmonton office of the land settlement board.

Applications are still coming to the board from would-be farmers, and at the present time a stack of 100 is awaiting consideration. The majority of the applicants are getting the loans they ask for, but in some cases it has been found necessary to refuse the loans because of unsuitable conditions involved in individual instances.

The soldier farmers are still going north, it is reported by Major F. W. [illegible], in charge of the land settlement office in Edmonton. Only a small proportion of the men who have already gone on to the land have failed to make good, and in the great majority of cases they are giving promise of winning success as farmers. A feature of the soldier movement is that a number of the settlers are taking advantage of the lower prices on livestock to buy up small herds for themselves, and this is considered by the settlement board as good business, which it is prepared to encourage.

AN ENCYCLOPÆDIA OF BOND TERMINOLOGY

Practically all dealers in municipal and corporation bonds are familiar with a little booklet written some years ago by Mr. Montgomery Rollins, of Boston, explaining terms used in connection with bonds. This booklet has now been revised by Mr. Benjamin Fisher and is published by the Financial Publishing Company of Boston, the price being 85 cents for single copies and lower prices for large quantities with firm cards engraved upon the cover.

The booklet, which contains 200 pages, is a complete encyclopædia of expressions used with reference to bonds and trading in bonds. The new edition contains explanations of such terms as Federal Reserve Bank, war savings certificates, ten-twenties and other terms which have come into common use during the past few years.

RUSSELL MOTOR CAR COMPANY

The annual meeting of the Russell Motor Car Company, Limited, was held on Friday, October 25th. In the absence of Mr. Lloyd Harris, the president, who was detained in Washington by government business, the chair was occupied by Mr. T. A. Russell, the vice-president. The business transacted was largely of a routine character. In reply to a question for details regarding the $3,793,387 invested in other companies, it was pointed out that the companies in question were the Willys Overland Company, Canada Cycle and Motor Company and the Machine and Stamping Company. While information regarding the amounts invested in each company was also stated for the benefit of the shareholders present, they were not given out for publication. The old directors were re-elected, being Messrs. Lloyd Harris, T. A. Russell, E. B. Ryckman, J. N. Shenstone, A. E. Ames, C. R. Burt and H. D. Scully. Mr. J. W. Widdup was elected secretary and Mr. J. F. Mackay treasurer.

FURTHER PULP DEVELOPMENT

Presaging the further development of the sulphite pulp industry in British Columbia, a start has already been made in connection with the construction of an extensive plant at Beaver Cove, south of Alert Bay.

Among the eastern capitalists interested in the latest industrial venture is Cyrus McCormick, of the International Harvester Company. W. H. White, of Boyne City, Mich., was in Victoria recently in connection with the development of the new scheme.

It is proposed to erect a pulp mill at Beaver Cove capable of an output of 200 tons of pulp per day. Another interesting feature of the company's operations on this coast will be the manufacture of tannic acid from hemlock bark.

The corporation in which Mr. White is interested controls 80,000 acres, upon which it is estimated there is 5,000,000,000 feet of standing timber, 2,000,000,000 feet of which can be used for the manufacture of pulp. It is stated that $750,000 will be invested in the industry with the materalization of the company's present plans.

There can be but one verdict—Germany is guilty of wholesale murder. Prussianism must die in the electric chair—the electricity can be furnished by your investing in

NINETY MILLION BUSHELS FOR EXPORT

Western Canada will have from 90,000,000 to 95,000,000 bushels of wheat for export and for the use of eastern milling companies this year. Thrashing is practically completed all over three provinces, and a careful estimate made of the total yield, the quantity required for western mills and for seeding places the quantity available for shipment east at the above figures. It may run to 100,000,000 bushels, or may even run slightly higher than that, as the yield in Manitoba and Saskatchewan has gone higher than expected. The movement of grain to the east has been delayed a good deal as a result of strikes, but efforts are being made to speed up shipments before the close of navigation.

LABOR APPEAL BOARD AGAIN UNANIMOUS

Hon. T. W. Crothers, Minister of Labor, has been notified by Mr. Justice MacLennan, chairman of the Labor Appeal Board, that the board has arrived at a unanimous finding in connection with the appeal from the report of the board of conciliation which inquired into the difficulties between a number of Toronto firms and their employees. The employees involved in the dispute belonged to two labor organizations, the Blacksmiths' Union and the Amalgamated Society of Engineers. The details of the Labor Appeal Board's finding have not yet been received by the minister, but they are expected shortly.

This is the third appeal from the finding of a conciliation board that has been dealt with by the Labor Appeal Board and in each case the board has arrived at a unanimous conclusion.

GENERAL MOTORS AMALGAMATION

In order to take care of the after-the-war expansion which the directors of the company believe is in store for gasoline-propelled vehicles of all kinds including tractors, a consolidation of the McLaughlin Motor Car Company, Chevrolet Motor Company of Canada and McLaughlin Carriage Company with the General Motors Company has been consummated. The transfer took place on November 1st.

One of the primary objects is to increase the manufacturing facilities in Canada so that costs of production may be materially lowered. All of the present plans, branch houses and distributing stations in Canada will continue to be operated as heretofore, and in addition engines, which have formerly been imported, will be manufactured in Canada, together with axles, transmissions and all other important parts. With this in view, the General Motors Company has recently purchased a site at Walkerville, Ont., consisting of thirty-eight acres, where these manufacturing operations will be continued as soon as material can be obtained and buildings erected.

SOUTH VANCOUVER REDEEMS CERTIFICATES

The municipality of South Vancouver, B.C., in March, 1917, [illegible] $450,000 from the firm of Messrs. Spitzer, Rorick and Company on three-year treasury certificates. It is due in March, 1920, but as the firm said it would accept approximately $[illegible] on account of principal, on which interest would cease, the commissioner remitted to them on October 25th, including exchange, $204,250. The total amount collected for this fund since the loan was made to October [illegible], is $[illegible].15. There is still a balance in the bank on this account of $1[illegible]20.15.

Collections on account of this fund will gradually decline until the 1919 tax sale for which preparations are now being made. Since the 1st of last May there has been paid into this fund approximately $[illegible], or at the rate of about $[illegible],000 a month.

Total receipts of the municipality for the first ten months of the year 1918, compared with the same period for 1917, are as follows:

	Taxes.	Schools.	Water.	Sundries.	Total.
1918	$[illegible]	$67,[illegible]	$15,448.25	$[illegible]17.78	$702,800.31
1917	[illegible]	51,318.00	[illegible]4,991	[illegible].26[illegible].41	617,017.58

MUNICIPAL HAIL FUNDS SHORT

Farmers in municipalities under the operation of the Hail Insurance Act will receive payment for their losses this year to the extent of 80 per cent. The total hail losses by farmers this year is estimated at $1,030,000, and the total amount to be paid out by the Hail Insurance Association will be in the vicinity of $820,000 or $830,000.

NEW BRUNSWICK WANTS TO SELL ROAD

When in Ottawa to attend a meeting of provincial premiers, called for November 19, Premier E. Foster, of New Brunswick, will ask the Dominion government to take over the St. John and Quebec Railway (Valley Railway). He says: "The Dominion government has recently taken over the Canadian Northern system, involving the expenditure of hundreds of millions of dollars. Their action in this regard has been the means of relieving the other provinces of very large indebtedness in the nature of guaranteed bonds. The taxpayers of New Brunswick will, of course, have to pay their share of the expenditure involved, and I feel it is only fair and right that this province should receive something in return, and it seems to me that no better proposal can be made than that the Dominion authorities should assume the ownership of the Valley Railway."

He also will seek an arrangement by which the privately owned Caraquet and Gulf Shore line and the Kent Northern line will be placed under control of the Railway Commission of Canada until such time as an arrangement can be made for their operation by the Canadian Government Railway.

REGULATIONS FOR COAL DISTRIBUTION

Regulations to facilitate the equitable distribution of anthracite coal in each community in Canada have been approved by order-in-council at the instance of C. A. Magrath, fuel controller.

These regulations are devised to prevent disproportionate deliveries of anthracite to large consumers at times when the ordinary householder cannot be supplied. The fuel administrator is given the right to prohibit entirely, or to limit in any manner he may deem advisable, the use of anthracite coal in any building. This does not apply to private residences using less than forty tons of coal annually.

Whenever the fuel administrator decides that it is in the public interest at certain points to give effect to the regulations above outlined, he will issue a formal order through the local fuel commissioner of any city or town within his province. In the absence of such official, the administrator may notify any consumer to the same effect.

Heavy penalties are enacted for contravention of the regulations.

TOTAL COST OF WAR TO DATE

The war has cost Canada well over a billion dollars up to date. This comprises accounts which have actually passed through the finance department. It does not include recent overseas expenditures for which accounts have not yet been presented.

War expenditure by the Dominion since August, 1914, has been, for the different fiscal years, approximately as follows: 1914-15, $60,750,000; 1915-16, $166,197,000; 1916-17, $306,488,000; 1917-18, $343,835,000; seven months to October 31, 1918, $169,574,000; total, $1,046,844,000.

The expenditure for war purposes last month was $66,510,000, as compared with $44,481,000 in October, 1917. It is explained, however, that the figures for last month include some overseas accounts which had been delayed in the mail.

Revenue on consolidated fund account continues to increase. Last month it was $23,431,234, in comparison with $18,241,155 for October, 1917. During the seven months ending October 31, 1918, revenue was $164,414,136. This compares with $145,710,066, the revenue for the equivalent period last year. Expenditure on consolidated fund account was, in October, 1918, $10,685,407; October, 1917, $16,459,066.

The total net debt of the Dominion on October last was $1,287,035,500, an increase during the month of $62,807,616.

We have audited the above Balance Sheet with the Books and Records of the Western Canada Flour Mills Company, Limited, kept at the Head Office and Branches, and certify that in our opinion the Balance Sheet is properly drawn up so as to exhibit a true and correct view of the Company's affairs as at the 31st August, 1918, according to the best of our information and explanations given us and as shown by the books of the Company.

Inventories have been certified as to quantities by the Company's officials at the various points and have been valued on a reasonable basis and after making provision for abnormal market conditions.

Provision has been made in respect of Doubtful Accounts and Bills Receivable.

All our requirements as auditors have been complied with.

NEW INCORPORATIONS

New Transport & Trading Company, with Capital of $2,500,000, Receives Charter

The following is a partial list of charters granted during the past two weeks in Canada. The head office of the company is situated in the town or city mentioned at the beginning of each paragraph. The amount noted is the authorized capital, and the persons named are the provisional directors:—

Chatham, Ont.—Ontario Peat Products, Limited, $40,000; C. Kerr, J. G. Kerr, J. A. McNevin.

Cochrane, Ont.—R. V. Fraser, Limited, $10,000; A. E. Mallette, K. J. Fraser, J. W. Fraser.

Rothesay, N.B.—Realization Company, Limited, $3,000; G. R. McKean, O. Ring, F. R. Taylor.

Lachine, Que.—La Traverse de Lachine, Limited, $20,000; A. Pilon, H. Decarie, A. St. Denis.

Yarker, Ont.—Yarker Dairy Company, Limited, $10,000; J. Freeman, J. E. Freeborn, F. S. Martin.

Sackvile, N.B.—Sackville Rink Company, Limited, $5,000; H. M. Wood, C. W. Fawcett, A. B. Copp.

Petrolia, Ont.—Lambton Knitting Company, Limited, $40,000; R. J. Strauss, K. C. Kerr, G. Morris.

St. John, N.B.—St. John Amusement Company, Limited, $150,000; A. P. Keith, E. F. Albee, L. F. Albee.

Amherstburg, Ont.—Lake Erie Country Club, Limited, $29,400; W. S. Falls, F. M. Falls, O. E. Junvar.

Derby, Ont.—The Tara-Ready Telephone Company, Limited, $5,000; J. N. Henderson, J. McAsh, T. Morran.

Welland, Ont.—Gardner Construction Company, Limited, $40,000; F. J. Coyle, G. M. Crysler, J. H. Gardner.

Sudbury, Ont.—Sudbury County Orange Hall Company, Limited, $40,000; J. Taylor, R. A. Dorling, G. F. Charsley.

Cold Springs, Ont.—The Cold Springs Rural Telephone Company, Limited, $5,000; J. Grieve, G. Philbrook, C. Cole.

Sault Ste. Marie, Ont.—The Algoma Pyrites Company, Limited, $1,500,000; J. A. McPhail, A. E. Pickering, W. T. Scott.

Kenora, Ont.—The Lobstick Bay Stock Raising Company, Limited, $40,000; P. Dorion, C. W. Belyea, J. A. Kinney.

Halleybury, Ont.—United Iron Works and Machine Company, Limited, $500,000; A. B. Ullhorn, K. H. Ullhorn, G. G. T. Ware.

Montreal, Que.—La Compagnie de Chaussures Lasalle, Limited, $20,000; R. Robitaille, J. A. H. Dequey, F. Dequey. Fraser, Brace Shipyards, Limited, $750,000; D. Burley-Smith, F. M. Jordan, C. G. Macartney. The Pulp and Paper Mills Supply Company, Limited, $150,000; T. J. Coulter, W. S. Jones, L. V. Murphy. The Matane Lumber and Development Company, $2,000,000; L. A. Cannon, L. Casgrain, C. Delauriers. Stearne Lumber Company, $20,000; E. Languedoc, C. Sinclair, J. P. Charbonneau.

Toronto, Ont.—United States and Canada Transport and Trading Company, Limited, $2,500,000; J. M. Bullen, N. S. Robertson, W. Osborne. Compo Coal Company, Limited, $[illegible]; W. Clayton, J. Grindall, J. W. Robertson. Alloy Steel Works, Limited, $1,500,000; R. H. Parmenter, A. J. Thomson, S. D. Fowler. Matachewan Gold Mines, Limited, $4,000,000; M. F. Cherrier, L. C. Allen, H. G. Smith. The Oakwood Real Estates, Limited, $40,000; M. L. McKinnon, W. T. Sinclair, L. Macaulay. Richards Company, Limited, $40,000; H. R. Frost, E. M. Dillon, M. B. Banks. Dominion Produce Company, Limited, $40,000; J. Friedman, M. Fecht, J. Fecht. Mark-Winn School of Popular Music, Limited, $40,000; E. A. Ferris, J. Moffatt, G. Greenlaus. Perfect Motion Picture Contracting Company, Limited, $40,000; M. F. Cherrier, W. J. Boland, C. H. Bowyer. Depew [illegible] Company, Limited, $40,000; J. M. Bullen, N. S. Robertson, W. Osborne. The New Extension Mines, Limited, $[illegible]; A. L. Reid, W. W. Petry, C. H. C. Leggott. The [illegible] Investments, Limited, $50,000; A. L. Reid, C. H. C. Leggott, A. M. Borthwick. Osgoode Securities Corporation, Limited, $[illegible]; A. L. Reid, C. H. C. Leggott, A. M. Borthwick. Stanley Oil Producing Company, Limited, $[illegible]; W. A. McMaster, J. E. Stanley, E. I. Pratt.

LIFE COMPANIES UPHELD

The question of whether the late managing director of the Dominion Trust Company of Canada, Mr. W. R. Arnold, took his own life and thereby forfeited his rights under policies with three life insurance companies was finally decided by a judgment of the Judicial Committee of the Privy Council on October 19. The companies concerned were the New York Life Insurance Company, in which there were two policies for $50,000 each; the Mutual Life Assurance Company of Canada, which had granted a policy for $50,000; and the Sovereign Life Assurance Company of Canada, which had granted one for $10,000. Mr. Arnold died in a garage belonging to him at Vancouver in October, 1914, from a gunshot wound, and it was held that the wound was self-inflicted. The companies, therefore, refused to pay the sums insured. The Supreme Court of Canada decided against them, but the Court of Appeal reversed that decision, and the Judicial Committee now agreed with the Court of Appeal.

NO SUCCESSION DUTY ON VICTORY BONDS

The Ontario government has made an important announcement affecting the purchasers of Victory bonds outside of the province of Ontario. Then the point having been raised that Ottawa, being located in Ontario, and all Dominion of Canada bonds having a technical domicile at Ottawa, it might be possible for the government of the province of Ontario to set up a claim for succession duties on the death of owners of bonds outside Ontario, the provincial government makes it clear that it has no intention of setting up such a claim. In a letter to E. R. Wood, chairman Dominion executive, Hon. T. W. McGarry, provincial treasurer, says:—

"It is the intention of this government, at the next session of the legislature, to pass such an amendment to the act as will exclude from payment of succession duty in the province of Ontario Victory Bonds held by a person domiciled at the time of his death in another province, although registered at Ottawa."

EXPORTS TO AFRICA GROW

Figures of the imports into South Africa for the first six months of the calendar year show a total import of merchandise valued at £18,391,077, an increase of £2,429,755 over the corresponding period of 1917.

Canada's share of the total imports for that period was £403,266, showing an increase of £4,545 over the corresponding period of a year ago, while the total imports from the United States were £3,194,830, an increase of £100,090. In this connection it is pointed out that Canada's increase in value of export trade is remarkable when consideration is given to the fact that only one of the regular steamship sailings had arrived in South Africa up to the end of June. There was, of course, some tonnage shipped by sailing vessels, and a very limited amount on steamships via New York. On the other hand, there were many sailings from United States ports during the first four months of the year. The heaviest increase in Canadian exports to South Africa is in iron and steel lines.

October was made "President's Month" in honor of Mr. L. Goldman, president and managing director of the North American Life Assurance Company. The agency force responded with the largest amount of business for any October in the history of the company—viz., over $1,300,000 of received business. The three leading North American life producers for the month of October were: H. W. Slipchenko, Saskatoon; A. R. Piper, Moose Jaw; and E. W. Keenleyside, Vancouver.

Regina citizens paid $86,198 in taxes during the month of October. This amount is exclusive of license fees and is considered by civic authorities to be very satisfactory in view of the business depression that has been consequent to the influenza epidemic. Collections were made up of $34,625.82 current taxes for 1918; $51,481.42 arrears for 1917; and $91.26 arrears for 1916. In connection with the 1917 arrears collections, $[illegible],305.27 was paid in taxes by the city of Regina on property previously bought in at tax sales. A considerable portion of the 1917 business taxes was collected during the month.

CANADA REPRESENTED AT NEXT LYONS FAIR

The Minister of Trade and Commerce has applied for 30 booths at the next Lyons Fair, which opens on March 1, 1919, and continues for two weeks, and that most of these booths will be placed at the disposal of the Canadian Manufacturers' Association for allotment to manufacturers for a display of samples and catalogues or photographs of articles which will be available for exportation to France.

In accordance with the general system recognized by the management of the Lyons Fair the conditions attached will be that no booths shall be allotted unless proper arrangements are made for representation by qualified and authorized parties who can give information about the articles exhibited.

The Department of Trade and Commerce will pay for the booths and will also pay the freight upon the exhibits from the port of embarkation to Lyons.

Canadian manufacturers who are disposed to undertake representation should make application to the Canadian Manufacturers' Association for space immediately.

SILVER SHIPMENTS TO INDIA

A shipment of $3,000,000 in silver bullion, the largest ever sent out from the New York Assay Office, was started on its way on November 6th to the Secretary of State in Calcutta, India, 25 motor trucks being required to carry the metal on the first stage of its long journey. The bullion was obtained by the melting down of the silver dollars held in reserve against the one-dollar silver certificates, which are being retired by the issuing of Federal reserve notes. The silver thus set free is being shipped to India, under an agreement with the British government, which is obliged to pay the natives in India, in whatever capacity they are employed, in bullion.

It was learned that about $17,000,000 in bullion had been shipped to the Far East from the local assay office since the right to melt down the silver dollars was conferred by the act of Congress of April 23. It is estimated that the total amount thus far sent to India from the United States is between $60,000,000 and $70,000,000.

The British government has created a civil department of Demobilization and Resettlement, responsible to the Ministry of Labor, under a controller-general. At the request of the Prime Minister, Sir Stephenson Kent has consented to become controller-general. The department will deal with all questions affecting re-employment and resettlement of the navy and army and the air forces and of civil war-workers.

DIVIDENDS AND NOTICES

BANK OF MONTREAL

Notice is hereby given that a **Dividend of Two-and-one-Half per Cent.** upon the Paid-up Capital Stock of this Institution has been declared for the current quarter, also a **Bonus of One per Cent.**, both payable on and after Monday, the **Second Day of December** next, to Shareholders of record of 31st October, 1918.

By order of the Board.
FREDERICK WILLIAMS-TAYLOR,
General Manager.
Montreal, 22nd October, 1918.

THE CANADIAN BANK OF COMMERCE

Reports that the government's war bonus to members of the Inside Civil Service will be confined to those receiving salaries of not more than $1,880 per annum were confirmed by the memorandum in explanation of the order in council granting the bonus, issued on November 7th. The amount payable to any one person will not exceed $250. The Civil Service Federation asked for a flat bonus of $350. The Governor-General has approved the order.

TORONTO, ONTARIO

WESTERN CANADA FLOUR MILLS

During the year ended August 31st, 1918, the financial position of the Western Canada Flour Mills Company, Limited, was still further strengthened. The profits for the year, after making provision for depreciation, for bad and doubtful debts and for taxes, amounted to $543,844, as compared with $418,023 last year. To this was added $844,651 carried forward from the 1917 account. Over one-half of the profits for the year were derived from flour milling operations, the balance being obtained from investments and other sources. On December 15th, 1917, $212,470 was required for a stock dividend. The balance at the credit of profit and loss was therefore $1,176,026. Interest amounted to $87,889; dividends at 8 per cent. per annum with 2 per cent. bonus required $220,702; and the balance of $858,434 was carried forward.

The statement of assets and liabilities, which appears elsewhere in this issue, indicates some important changes in the company's business during the year. The amount of stock now outstanding is $2,340,100, as compared with $2,124,700 last year. The net bonded indebtedness has, however, been reduced through the growth of the sinking funds. Current liabilities are considerably less. The item of patents, trade marks and goodwill which appeared in the statement of 1917 has been reduced to a nominal figure. Investments have increased by about $500,000. Another change is the decided decrease in the inventory account and the new asset of $250,000 of Victory loan. The decrease in inventories was due to large wheat shipments for overseas consumption. This necessitated closing all the mills for a considerable period prior to the end of the company's fiscal year. Supplies in Canada were thereby materially reduced and could not be replenished until the new crop was available. Advantage was, however, taken of this idle period to, in a measure, overhaul the plants which are now in an unsatisfactory state of efficiency.

ADVANCES IN STOCK MARKET

The arrival of peace news brought about several advances upon the Toronto and Montreal Stock Exchanges. A few securities, on the other hand, declined. Brazilian Traction, which sold on November 7th at 50¼ to 51, sold on the 14th as high as 56. During the earlier part of the week, however, it went slightly above 60. Steel Company common, on the other hand, sold on the 14th at 63, as compared with 58½ the week previous. The majority of stocks, however, experienced small advances. The quotations of all stocks and bonds listed on the Toronto and Montreal stock exchanges appear on another page of this issue.

"I Wish I Had Taken Twice As Much!"

Nothing is more often repeated in letters received at our office than the expression "I wish I had taken twice as much insurance while I was about it." When endowments, dividends or cash settlements are paid, the assured very often acknowledges the remittance with that remark. The truth is very few men take as much Life Insurance as they can reasonably carry—and repentance often comes when additional Insurance is not procurable. Probably every reader of this paper believes in Life Insurance and carries more or less of it but one should ask himself the question, **Am I Carrying as Much Insurance as I Can Afford?** If the policyholders who are now entering the Company could read the evidence of gratified policyholders and beneficiaries, they would make a great effort to increase the amount applied for—and existing policy holders would double the amount of their protection. "One word more":— What income would your present insurance yield the beneficiary at say 6%?

NORTH AMERICA ONE INSURANCE FIELD

Canadian and United States Companies Do Not Stop at National Boundaries—Similarity in Legislation

Speaking at the life agency officers' convention, held on November 8th and 9th in Chicago, Mr. J. F. Weston, managing director of the Imperial Life Assurance Company, emphasized the close relations of the United States and Canada, both politically and industrially. His subject was, "Over the Top Together." After dealing with the joint war effort of both nations, Mr. Weston carried the discussion into the life insurance field.

"Amongst the financial institutions," he said, "none have rendered greater service than the life insurance organizations. The support which they have rendered the State in connection with government loans and in many other directions is something in which we should take just pride. It should stimulate us to greater effort to keep our methods abreast of the needs of society as it develops along modern lines. In this your association can render most valuable service. In making this an international association as between the United States and Canadian companies, you follow lines which the trend of their business had already determined. United States companies were the first to carry on business in Canada, and this some years before the first Canadian company was organized. It has always continued to be a productive field for them. Later when the Canadian companies had become firmly established, a number of them extended their operations to embrace various States of the Union, where they also had successful experience.

Uniformity of Insurance Laws.

"Geographical proximity, similarity of race, language and ideals of the people, together with development under very like conditions, made it inevitable that Canadian life insurance practice and regulation should follow American rather than English lines. This it has done, until there is less distinction between the Dominion Insurance Act and the insurance laws of most of your States than there is between them and those of other States of the American Union. In life insurance, as we have it on this continent, customs and existing business ignore national lines and boundaries. The only difficulties we encounter in applying a common practice are those which arise from the relative density of population as between the two countries. You have, therefore, practically the same conditions to consider in both countries, and have the same problems to solve in making your practices conform to them. It is good for the business and for the future of our peoples that you, while bettering the quality of service to be rendered, should continue to weave this thread of thrift and social stability into the web of our international relationship.

Risks in Canadian Business.

"Among the first tangible evidences we had of the real alliance which existed between us as peoples in this war was the action of some of your companies, which took, under most reasonable terms, a share of the risks which offered on the lives of Canadian soldiers. Our Canadian companies, already affected by the large percentage of their policyholders who had volunteered for service, could not assume the full burden of the additional risks which offered. You may regard it as a small matter for these American companies to have assumed the millions on this class which they did when it constituted such a small percentage of their total business in force, and at the time it seemed improbable that their own country would ever be drawn into the war. We may attribute it to an advertising motive, or anything else which our peculiar competitive instincts may suggest, but without a real sympathy with us and with our cause the executives of these companies would not have acted as they did. As a Canadian I feel grateful to them, and as an insurance man I feel proud of the fact that life insurance as an institution has kept [illegible] our international sympathies by extending its protection to our homes at this period of emergency. The [illegible] thousands of Canadian homes where [illegible] has relieved the pressing necessities of those who had been left [illegible] but the pride they took in the sacrifices they have made and in their relationship to fallen heroes.

"Just here, and in this connection, I would like to express my admiration, and I believe the admiration of every Canadian, for the big way in which your government met the problem of insuring your soldiers. It was in keeping with the spirit of America and the big way in which you have done everything you have undertaken in this war. It would have been impossible to have insured your troops in the ordinary way at rates which would have been practicable. It was the duty of the State to place protection within reach of those who sacrificed for the State, and it has nobly responded to that duty. Great credit is due to the men who worked out this scheme and who have managed it so successfully. I consider it a great privilege that we are to hear the Hon. Mr. Love tell us how this wonderful achievement has been accomplished.

Future of Insurance is a Great One.

"Great as your business has become in its application to peace conditions, it has not nearly caught up with the pressing need which exists for it in both countries. The need is growing enormously with the expansion of our industries, and must continue to grow after the war and with the influx of people who will come to these new countries from devastated Europe, just as they have always done after any great upheaval there ever since this country was first discovered. We will become more and more industrial. Industrialism holds that element of insecurity touching the individual life which has given rise to the broad application of the principle of life insurance as we now have it. This is a truth commonly admitted, and yet men will not insure without being pressed to do so by experts capable of convincing them of the importance of the act. How are we to increase the number and improve the quality of such experts? Not by shifting them from the service of one company to another. That gets us nowhere, for such practice can be reciprocal between companies. We can only do it by greater activity in the securing of men; by the exercise of greater care in their selection; and, chiefly, by devoting much more attention to their training in the future than we have done in the past. We have made decided advances in this direction during recent years, but only enough to demonstrate that we are working in the right direction. It promises well for the future of the business that you, gentlemen, who are so largely responsible for the selection and management of the vast number of men from whom the public will take its impressions of insurance, not of companies alone, but of the institution as a whole, should recognize the need of co-operation.

"After the years of separate groping through the dark places, where, one after the other, we stumbled into the same pitfalls, it is fine to think that we can co-operate in establishing a broad highway of common understanding which we can illumine by the light of each other's experience.

"Let us follow the same course in working out our duties of citizenship in the family of world democracies, co-operating in all things which can make for social advancement, and be ever ready, as we are now, to go over the top together in defence of human freedom."

NIAGARA FALLS POWER COMPANY

At an organization meeting of the Niagara Falls Power Company, held on the 6th inst., the following officers were elected: Jacob F. Schoelkopf, chairman of the board; Stacy C. Richmond, president; Paul A. Schoelkopf, vice-president and general manager; Philip A. Barton, vice-president; Morris Cohen, Jr., vice-president and counsel.

The Niagara Falls Power Company is a consolidation of the Hydraulic Power Company, the Cliff Electrical Distributing Company and the old Niagara Falls Power Company. The merger of the companies, with construction of new units now under way, it is estimated, will add approximately 200,000 horse-power to the combined output of the individual companies. This should help to relieve the acute shortage of power in Buffalo and the surrounding districts.

Directors of Canada Steamships Lines met in Montreal on November 12th, but it was announced afterwards that the much discussed question of a dividend on the common stock had not come before the meeting. In the absence of the president, Mr. James Carruthers, who was out of the city, it was stated that business was largely of a routine order. Earning reports submitted were satisfactory, according to vice-president Norcross, but no figures were given out for publication. General plans relative to the company's activities under peace conditions were considered.

Behind the Scenes—

TELEPHONE users whose instruments have remained in the same location for many years are prone to look upon the telephone as a fixture, requiring practically no attention.

In Toronto, during the first 6 months of the present year, we had a net gain of 2,628 telephones—that is, 6,339 telephones were connected and 3,711 were disconnected. Thus, for this net gain of 2,628 telephones we had the labor and material costs incident to installing, moving, or otherwise changing 10,050 telephones.

These numerous moves and changes necessitate our providing an "Information" service of 30 carefully trained operators, who work at a specially constructed switchboard equipped to care for enquiries from subscribers. "Information" in Toronto costs upwards of $30,000 a year.

To keep subscribers supplied with up-to-date lists recording these moves and changes, three issues of the directory are made yearly —255,000 books—the net cost of which, for preparation, printing and distribution is more than $55,000.

The telephone user sees only his own telephone. The colossal work of providing service goes on behind the scenes. It is the increased costs involving material and labor in many different branches which make necessary a readjustment of our rates.

The Bell Telephone Company
of Canada

LIFE PRESIDENT'S PROGRAMME

Government officials will participate with business and educational executives in the "Thrift" programme of the 12th annual convention of the Association of Life Insurance Presidents to be held at the Hotel Astor, New York, on Thursday and Friday, December 5th and 6th. Most of the problems to be discussed will be viewed largely from reconstruction angles.

While the programme has not been completed, it is possible to give the names of most of the speakers, with their respective subjects, as follows:—

Chairman of the convention, Mr. George B. Stadden, president, Franklin Life Insurance Company, Springfield, Ill.; "American Liberty: Its Rights, Its Obligations," Dr. John Grier Hibban, president, Princeton University, Princeton, N.J.; "Some Present and Post-War Problems," Hon. Charles S. Thomas, United States senator, Denver, Colo.; "Increased Capital and Credit Through Thrift," Mr. Joseph A. Chapman, vice-president, Northwestern National Bank, Minneapolis, Minn.; address by Hon. James W. Gerard, ex-ambassador to Germany, New York; "Life Insurance Thrift as a Constructive Force," Hon. Robert Lynn Cox, third vice-president, Metropolitan Life Insurance Company, New York; "Group Insurance," Mr. Eugenius H. Outerbridge, New York, ex-president, Chamber of Commerce of the State of New York; "Relationship of Life Insurance to the Development of our Nation," Hon. C. W. Fairchild, president, National Convention of Insurance Commissioners, Denver, Colo.; "Vocational Retraining: A National Conservation," Dr. C. A Prosser, director, Federal Board for Vocational Education, Washington, D.C.; "Epidemic Waste of Human Life," Mr. Henry Moir, president, Actuarial Society of America, New York; "Relationship of Dentistry to Health Conservation," Harvey J. Burkhart, D.D.S., director, Rochester Dental Dispensary and ex-president of International Dental Congress, Rochester, N.Y.

The accompanying table gives the assets and liabilities of Ontario loan companies as at December 31st, 1917, in comparison with the figures as at the same date on the previous year. Very considerable changes will be noted in this kind of business during the year. Deposits on the part of the public have increased substantially, so that the experience of loan companies in this respect is similar to the experience of banks in Canada. Holdings of debentures in Canada have also increased slightly, but during the two years from the end of 1915 to the end of 1917 debentures held outside of Canada have decreased from $77,675,000 to $69,094,000. Other liabilities to the public have fallen off extensively.

One of the most pronounced changes in the statement is the decline in the amount of mortgages held by the companies. This decline was over $11,000,000 this year, as compared with $4,000,000 last year, and indicates the prosperity in agriculture throughout Canada. Most of the funds so received have been invested in government and municipal bonds which items consequently show substantial increases in the loan companies' statements.

LATEST VICTORY LOAN FIGURES

The following table shows figures of loan subscriptions which had been received at headquarters in Toronto, up to midnight, November 14th, compared with total subscriptions last year:—

Province	Subscription 1917 Victory Loan	*Subscription 1918 Victory Loan.
British Columbia	$ 18,814,700	$ 20,251,650
Alberta	16,515,150	11,724,650
Saskatchewan	21,777,050	10,761,450
Manitoba	32,326,600	27,785,900
Ontario (including Toronto)	204,185,400	222,706,150
Quebec (including Montreal)	94,287,250	100,013,550
New Brunswick	10,463,350	11,328,600
Nova Scotia	18,588,150	19,220,450
Prince Edward Island	2,331,150	1,552,200
Grand total for Dominion	$419,[illegible]	$425,44[illegible]

*So far reported

Subscriptions in Toronto are reported at $[illegible],071,45[illegible], and in Montreal at $[illegible]. A list of large subscriptions appears elsewhere in this issue.

WATER POWERS OF NOVA SCOTIA

The water-power possibilities of the province of Nova Scotia which have been investigated up to the present time are capable of developing 200,000 horse-power, according to the statement of K. H. Smith, engineer in charge of the Water Power Commission for the Dominion. The commission is making investigations in New Brunswick similar to those made in Nova Scotia.

In Nova Scotia the results were obtained by estimates of stream flow, the dependable power available, with storage, and the capacities of the storage basins. The estimates of stream flow may, as fuller records are accumulated, be changed somewhat. The minimum flow was ascertained by taking the mean of the lowest two consecutive seven-day periods in each year, and the mean of these values for the period of record is considered as the minimum. The maximum flow was estimated by arranging the months of the year according to the day of the lowest flow in each, and the lowest of the six high months was taken as the basic month. The average flow of the lowest seven consecutive days in this month determined the maximum flow for the year, and the average of such maximum figures for the period of records was used as the maximum in calculation.

Canada Makes Financial Record

Our Second Victory Loan Greatly Over-subscribed—Number of Subscribers Increased to Over One Million—Large Subscriptions Greatly Exceed Those of Last Campaign—Ontario Leads Provinces, Subscribing Almost One-Half Total—All Provinces Exceed Objectives Based Upon Last Year's Subscription.

THE second Victory Loan campaign in Canada was an unqualified success, total subscriptions of over $675,000,000 being secured. It will, of course, be some little time before the exact final figures are tabulated.

This is Canada's fifth domestic war loan. The first three, however, were not popular loans as compared with the last two or as compared with the Liberty Loans in the United States. The following are the totals for the successive loans in Canada:—

First war loan, November 22nd, 1915	$ 103,729,500
Second war loan, September 12th, 1916	201,444,800
Third war loan, March 12th, 1917	260,768,000
*Fourth war loan, November 12th, 1917	419,289,000
*Fifth war loan, October 28th, 1918	676,027,217
Grand total of Canada's war loans	$1,761,258,517

---

*1st and 2nd Victory Loans.

Each province was given an objective based upon the subscriptions of the 1917 Victory Loan. The latter amounted to $419,289,000. Allowance was, however, made for the fact that the provinces of Alberta and Saskatchewan had had partial crop failures during the present year and their objective was placed somewhat lower than their previous subscriptions. This difference was made up by adding to the objectives of Quebec and the Maritime Provinces. The following table compares subscriptions to the two loans and gives the subscriptions per capita to the present loan, the figures being based upon the 1911 census of population:—

Province.	Subscription 1917 Victory Loan.	Subscription 1918 Victory Loan.	*Subscription per capita 1918.
British Columbia	$ 18,814,700	$ 35,306,667	$ 90.19
Alberta	16,515,150	18,189,600	48.55
Saskatchewan	21,777,050	23,889,000	48.50
Manitoba	32,326,600	43,639,900	95.78
Ontario	204,185,400	329,682,950	130.66
Quebec	94,287,250	175,757,250	87.55
New Brunswick	10,463,350	16,500,000	46.74
Nova Scotia	18,588,150	30,102,500	62.35
Prince Edward Island	2,331,350	2,000,000	28.81
Grand total for the Dominion	$419,289,000	$676,057,867	$ 93.83

---

*Population 1911 census.

The number of subscribers to this loan is 1,029,850, according to latest figures. The following statement compares the number in the case of the two Victory Loans:—

	1917 Applications.	1918 Applications.
British Columbia	50,563	75,000
Alberta	61,690	49,240
Saskatchewan	74,570	66,320
Manitoba	78,626	83,587
Ontario	403,541	514,113
Quebec	128,174	154,080
New Brunswick	26,436	31,000
Nova Scotia	45,438	51,010
Prince Edward Island	5,293	5,500
Total	874,331	1,029,850

The following table gives the day to day figures for each province and illustrates the effort which was put forth in each case to obtain the objective set. It will be noticed that in some cases the figures were not totalled every day. Several of the provinces passed their objectives considerably before the last day while others had to raise considerably more upon the last day of the campaign than they had done during previous days. Montreal and Quebec (outside Montreal) passed their objectives on the 12th instant, New Brunswick and British Columbia on the 13th, Nova Scotia, Ontario (outside of Toronto) and Toronto on the 14th. Alberta, Saskatchewan, Manitoba and Prince Edward Island, however, did not succeed in reaching the total until the last day, when special efforts were made to exceed the amount desired.

As was explained by the chairman of the Dominion executive, Mr. E. R. Wood, in speaking in Massey Hall, Toronto, on Monday evening, when the final returns were secured, the campaign in Prince Edward Island was badly affected during the first two weeks owing to the influenza epidemic, and during the last week bad weather and a snow storm greatly retarded communications on the Island. Under these circumstances the province did exceedingly well in obtaining the total of almost $3,000,000. The provinces of the west, as previously explained, were not in the best position to avail themselves of the loan owing to the crop conditions of the year. Returns from British Columbia were somewhat a surprise. It will be noticed that this province exceeded its objective by almost 100%. This figure was exceeded only by the returns from Quebec Province which were more than double the objective. The cities of Toronto and Montreal, and in fact all of these cities throughout the province of Ontario and Quebec, did remarkably well; the returns from the rural districts on the other hand were somewhat disappointing. Nova Scotia and New Brunswick both exceeded their objectives by about 50%.

The Newsprint Tribunal was formally constituted at Ottawa on November 1[illegible]th, and everything is clear for hearing of the appeals of both the manufacturers and the newspaper publishers against the price of $69 per ton for newsprint fixed by the paper controller.

DOMINION TO AID TECHNICAL EDUCATION

Legislation Planned to Distribute Funds to Provinces for This Purpose

In view of the exacting demands upon industrial skill and efficiency which will be made of every people in the competition for the trade of the world following the period of reconstruction, it is the intention in the next session of the House of Commons to bring in a bill to give force to a Federal policy for technical training of the rising generation. In the various Provinces there have been more or less successful beginnings along this line, and in some cities like Toronto and Montreal some creditable institutions have been developed.

It is not intended in any way that the Dominion Government shall attempt to compete with or supplant these, or even supplement them, because the thorny question of Provincial rights always crops up whenever the Government devises a policy with regard to road construction, education or anything of the sort. In this case it is expected that the legislation will take the form of providing a sum of money to be divided among the Provinces on the basis of population and the progress already made in the direction of technical education.

Certain Principles as Standards.

Although the Provinces are bound to insist that any money given them shall be spent by themselves as they see fit, certain principles deduced from the exhaustive inquiry made by a Government Commission before 1911, under Professor Robertson as chairman, and from experience in the world since that time, will be used as standards for judging the progress made in the various Provinces. It is hoped that manufacturers in the various districts, fully alive to the needs of the situation, as most of them are, will keep the Provinces alive to their duty in this respect, and the prospect of Federal help will stimulate them to renewed activity if the hopes of those preparing the bill are realized. That Canada must march face forward to an era of great industrial activity, and Canadians be thoroughly trained so that every emergency will find them ready as it arises, is the ideal before those who have agitated for this legislation for many years.

Other features of the problem have to be worked out yet, but the bill will certainly appear at the next session. Many laggards in the past have at length been convinced that action of some kind is urgently needed, and the matter will doubtless form an interesting part of the conferences of the Provincial Premiers with the Government, so that the policy may be worked out in details on which all can unite.

MANUFACTURERS WANT MILLION A YEAR

At a general meeting of the Council of the Canadian Manufacturers' Association held in Montreal on November 15th, attended by many leading manufacturers from all over Canada, it was decided to ask the Dominion Government to take active steps in reconstruction work, and to make a grant of not less than $1,000,000 a year for research work to find new outlets for Canadian trade. It was further decided to represent to the Government that no increase in export trade would be possible unless sufficient vessels were provided to carry such trade, and representations will be made to the Government requesting that strong action be taken to aid in the construction of sufficient shipping to see that Canada's foreign trade is taken care of.

President W. J. Bulman, Winnipeg, was in the chair, and others present included the First Vice-President, T. H. Howard, Montreal; Second Vice-President, J. S. McKinnon, Toronto; Major L. L. Anthes, Chairman Toronto Branch; C. Howard Smith, Chairman Montreal Branch; G. H. Murray, General Secretary, Toronto; H. MacDonald, Toronto; J. K. Bristol, Manager of the Tariff Department; J. E. Walsh, Manager of the Transportation Department; A. Marshall, Manager of the Commercial Intelligence Department; W. P. Hughes, Secretary of the Montreal Branch, and many others.

It is reported that the London County, Westminster and Parr's Bank is negotiating to absorb the important Lancashire and Yorkshire Bank. The latter institution has its chief offices at Manchester and branches in about 125 towns. It has a paid-up capital of £862,600 and a reserve of £580,000.

PROVINCIAL HEADS CONFER WITH DOMINION

Ministers from All Provinces Meet Federal Authorities at Ottawa to Settle Present Problems

Premiers of all the Provinces, and many of the Provincial Cabinets, gathered in Ottawa on Tuesday, November 19th, for a conference of vital importance, dealing particularly with after-war problems, while other matters came incidentally. The question of the land settlement of soldiers was one of the more vital subjects of consideration.

Nearly all the Provinces in one way or another have outlined a tentative programme for handling the returned men. It is the purpose of the present conference to co-ordinate the activities of the various Governments, Federal and Provincial, and outline some general systematic plan. Hon. F. B. Carvell, Minister of Public Works, presides at such parts of the conference as are in conjunction with the Dominion Government, and the formal welcome was delivered by Sir Thomas White, Acting Prime Minister.

A mass of statistical information as to lands for settlement has been prepared by the Government authorities. One of the questions considered was the necessary steps to make available the immense holdings of companies or individuals which are wholly unproductive, and are held only for purposes of speculation. It is considered of the utmost importance that they should be thrown open, and at a time when increased production is urged as being so vital that they should be fully cultivated. The question of agencies for placing the men on the land, instructing them in agriculture and assisting them financially, was also considered.

The Western Provinces want their natural resources of land, fisheries, forests and mines along with the maintenance of the subsidies they have received in lieu of them.

British Columbia wants the old railway belt and a block of land in the Peace River district. Saskatchewan is particularly interested in lands, fisheries and timber, and Alberta in lands and coal. Manitoba seeks the 178,000 square miles of land in the annexed portion. The lower provinces want $3,000,000 more of subsidy. While the conference is likely to lay down general principles, the actual carrying out of the land settlement will be in the hands of the provinces if their lands are surrendered to them.

Business Taken Up.

The business of the conference was taken up immediately on the conclusion of Sir Thomas White's remarks, with Hon. F. B. Carvell, Minister of Public Works, presiding, and the following Provincial Ministers in attendance:

Ontario—Premier Sir William Hearst, and Hon. G. H. Ferguson, Minister of Lands.

Quebec—Sir Lomer Gouin, Premier and Attorney-General; Hon. L. A. Taschereau, Minister of Public Works and Labor; Hon. Jos. Caron, Minister of Agriculture and Highways; Hon. Walter G. Mitchell, Provincial Treasurer.

Nova Scotia—Hon. G. H. Murray, Premier and Provincial Secretary; Hon. O. T. Daniels, Attorney-General; Hon. R. M. McGregor, Minister without portfolio; Hon. R. E. Finn, Minister without portfolio, and Hon. Wm. Chisholm, Minister without portfolio.

New Brunswick—Hon. Walter E. Foster, Premier and President of Council; Hon. J. F. Tweedie, Minister of Agriculture.

Prince Edward Island—Hon. A. E. Arsenault, Premier and President of Council; Hon. M. MacKinnon, Provincial Secretary, Treasurer and Commissioner of Agriculture.

Manitoba—Hon. T. C. Norris, Premier and President of Council; Hon. Thomas Johnson, Attorney-General and Minister of Telephones and Telegraphs.

Saskatchewan—Hon. W. M. Martin, Premier and President of Council; Hon. W. R. Motherwell, Minister of Agriculture; Hon. C. A. Dunning, Provincial Treasurer and Minister of Railways; Hon. W. E. Knowles, Provincial Secretary.

Alberta—Hon. Charles Stewart, Premier; Hon. J. R. Boyle, Minister of Education; Hon. C. R. Mitchell, Provincial Treasurer.

British Columbia—Hon. John Oliver, Premier and President of Council; Hon. T. D. Pattullo, Minister of Lands.

It is probable that all the Federal Ministers at present in the capital will be in attendance at various times. Those present when the deliberations opened on the 19th instant included Sir Thomas White, Hon. F. B. Carvell, Hon. J. A. Calder, Hon. Arthur Meighen, Sir James Lougheed and Major-Gen. Mewburn.

Mr. W. F. O'Connor, K.C., and Mr. G. Osborne, parliamentary counsel, are representing the Dominion Government at the conference in a legal sense, and Mr. Lanctot, K.C., is in attendance on behalf of the Province of Quebec.

CANADIANS CONFER WITH IMPERIAL GOVERNMENT

Sir Robert Borden, Sir George Foster and Hon. Arthur Sifton, the members of the Canadian Cabinet who will attend the Peace Conference, have been engaged on the subjects of peace, inter-Imperial trade, demobilization and repatriation of Canadian troops. They were first invited by Premier Lloyd George to visit the office of the War Cabinet. They there met Generals Currie and Embury and other officers. Following this meeting the Canadian Cabinet Ministers had an interview with General Smuts, and then Sir Robert Borden and Sir George Foster attended a meeting of the Imperial War Cabinet. Sir George Perley, Canadian High Commissioner in England, has conferred with Sir Robert Borden.

WAR DAMAGE CLAIMS NOW CONSIDERED

The Government has directed the preparation of a list of claims by Canadians arising out of the illegal methods of warfare by the enemies during the war. These claims arise through the torpedoing of ships without warning, the aerial bombing of unfortified places, and commandeering or requisitioning without compensation, destruction and similar illegal acts on land. The Canadian claims are largely limited to the first class mentioned. The claims relate to loss of life, as well as property.

A further list is also to be made covering claims for damages arising out of breaches of contracts with neutrals which were declared illegal because of the neutrals making the claims being on the statutory list of persons in neutral countries commonly called the blacklist. All persons having claims indicated should file them without delay. The making of this list does not imply an undertaking on the part of the Government to put forward the claims at the Peace Conference, or any assurance that if put forward they will be paid. But the list should be completed without delay so as to enable the Government to make a demand if an occasion arises.

Instructions showing the method of filing claims and the proof to be forwarded may be obtained from Thomas Mulvey, Under-Secretary of State, the officer appointed by order-in-Council to prepare, examine and report upon the claims.

GOVERNMENT ROADS ARE UNITED

Hon. J. D. Reid, Minister of Railways and Canals, announced on the 19th instant that an order-in-Council had been passed transferring the management and operation of the Canadian government railways of Canada, which consist of the Intercolonial Railway and its branch lines, and the National Transcontinental Railway between Winnipeg and Moncton, over to the board of directors appointed to manage the Canadian Northern Railway system. This transfer now places all railways owned by the government under the direction and operation of this board.

The following have been added to the board: Thomas Cantley, of New Glasgow, N.S.; A. P. Barnhill, of St. John, N.B., and Sir H. Laporte, of Montreal.

This change now makes a government system of about 14,000 miles, extending from Sydney, N.S., to Vancouver, B.C., and all under the one management.

The board of directors a few weeks ago reorganized the Canadian Northern system, and will now proceed with some changes that may be necessary on account of adding these railways to the Canadian Northern system.

It is understood C. A. Hayes, who has been general manager of the Intercolonial Railway, will relinquish this position and become general traffic manager of the whole government railway system, whose offices will be changed from Moncton to Toronto, and F. P. Brady, general manager of the Transcontinental Railway between Winnipeg and Quebec, is relieved of that position and becomes assistant to the general manager of all eastern lines, which includes the Intercolonial Railway. T. H. Brown, general superintendent of the Intercolonial Railway, will assume the position of chief operating officer of the Intercolonial Railway under F. P. Brady.

BANK DEPOSITS AND THE VICTORY LOAN

Size of Present Loan, and Fact That Much of It Has Been Spent Already, Will Affect Deposits During Next Few Months

BY R. D. LITTLE.

On September 30th, 1918, bank deposits, exclusive of Dominion and provincial government deposits, amounted to $1,843,925,000. Subscriptions to the second Victory Loan amount to $676,000,000, over one-third of the total public deposits. These are big figures for bankers to contemplate, but after the experience of financing over four years of war they have their resources so placed that no difficulty will be experienced in financing such a large amount as this.

The amount so subscribed to the Victory Loan falls short only $74,000,000 of the total allotments of the four previous war loans, thereby constituting a record in finance which Canada might well be proud of.

During the flotation of the first four loans very little strain, if any, was felt by the banks, largely due to the fact that withdrawals from each bank were automatically redeposited with such bank by the minister of finance, and the withdrawals by him were made pro rata on the banks according to the subscriptions placed through them.

Effect on Deposits.

The experience of our first four loans showed us that deposits were very slightly affected by such subscriptions. It was only during the flotation of the fourth loan, or, as we would call it, the First Victory Loan, that any real shrinkage was experienced; and in this connection it must not be overlooked that the fourth and fifth loans being floated in November were brought out at the period of the year when bank deposits are reaching their highest point, the early months of the year generally bringing about a natural shrinkage in deposits.

A considerable shrinkage occurred in deposits immediately following the flotation of the first Victory Loan: between November, 1917, and January, 1918, there was a drop in savings deposits of $100,000,000, but the rate at which the people of Canada are saving soon began to assert itself, and in three months one-third of this loss had been made up. By August it had been completely recovered, and by September they were $30,000,000 ahead. The government returns for October will no doubt show a further considerable increase. These facts are a wonderful tribute to the Canadian propensity for making and saving money. There are still some millions to be realized from our crops which ordinarily would further swell the deposits in the banks, but which now will offset to some extent the loss caused by the Victory Loan withdrawals.

Why the Effects of the Fifth War Loan will be Different.

The proceeds of our war loans have been spent in Canada, which means that while large sums of money have been borrowed from the people, it has been redistributed among them in the form of payment for goods, wages, etc. On the occasion of the fifth war loan the government has started further behind in its finances than before, as approximately $175,000,000 of the present loan has already been spent, and has, therefore, already been distributed and its benefit felt in the country. For this reason it would appear that withdrawals from the banks will be larger than has been the case previously and the immediate shrinkage in deposits will be greater.

There is only one thing to offset this, and that is the thrift of the people. The organizers of our Victory Loan campaigns have conducted in a brief period such an effective appeal for saving that the results are likely to be felt for years to come. They have developed the appetite of the people for investment and saving to such an extent that even for the present huge loan only a temporary shrinkage is likely to be experienced. In other words, subscribers are going to meet their payments from their earnings during the [illegible] months. They have such faith in Victory Loan bonds as an investment that they are most [illegible] to meet the splendid [illegible] of [illegible] to be [illegible]. It is good business, and it has taught the people of Canada [illegible] would not attain.

BANK OF MONTREAL STATEMENT

This year it is somewhat difficult to compare the annual statement of the Bank of Montreal, details of which appear on page 28 of this issue, with that of the previous year, owing to the absorption that has taken place of the Bank of British North America. Still, the very great strides made in the regular business during the twelve months reflect the marked assistance the Bank of Montreal has been able to lend the British and Canadian governments, and at the same time cater to the growing requirements of Canadian trade and industry.

In 1914, the first year of the war, the total assets stood at $289,562,678, while to-day they have increased to $558,413,546. Liquid assets alone now stand at $370,351,000, being $80,000,000 above what the total assets were four years ago, are equal to 71.28 per cent. of the total liabilities to the public and compare with $276,298,397 last year.

The measure of assistance lent the Dominion and British governments is reflected by Dominion and provincial government securities of a value of $46,870,586 as compared with $28,573,322 a year ago, and Canadian municipal securities and British, foreign and colonial public securities, other than Canadian, of $52,085,835, up from $33,455,254. The expansion of the general commercial business is indicated by current loans and discounts of $146,028,861, as compared with $97,607,404, while at the same time loans to cities, towns and municipalities have gained to $15,598,069 from $11,415,383, and current loans and discounts elsewhere than in Canada $14,640,836 up from $10,045,811.

Savings deposits have increased by about $100,000,000, and current deposits by about $50,000,000. Profits for the year are $2,562,720, or slightly more than last year. The balance carried forward to profit and loss is now $1,901,613, as compared with $1,664,893 at the end of the previous year.

The chief items in the statement of the bank, as of October 31st, with comparisons with those of the previous year, are as follows:—

	1918.	1917.
Total assets	$558,413,546	$403,980,230
Deposits bearing interest	345,552,764	246,041,786
Deposits not bearing interest	124,175,047	71,114,641
Current loans and discounts	146,028,861	97,607,404
Dominion and provincial government securities	46,870,586	28,573,322
Railway and other bonds	11,375,100	12,571,625
Canadian municipal securities and British, foreign and colonial public securities	52,085,835	33,455,254
Gold and silver coin	25,492,841	20,592,801
Dominion notes	68,531,256	30,760,233
Deposit in central gold reserves	27,700,000	14,500,000
Profits for year	2,562,720	2,477,961
Balance of profit and loss carried forward	1,901,613	1,664,893

DECREASING GOVERNMENT BORROWING

In its November commercial letter, the Canadian Bank of Commerce says:

"The coming of peace will not justify any relaxation in our efforts to increase the thrift and economy of the nation in order to keep the public purse filled. Fighting may soon end but our men will require to "stand to" for an indefinite period until many difficult international problems have been settled, and in the meantime the war-racked and devastated countries of Europe must be supplied with many necessaries. In providing these the burden of the financial aid required will fall upon those of the allies who are able to supply the necessary funds from their own resources.

New legislation regulating loan companies in Ontario is being planned, a conference having just been held at the Parliament Buildings in Toronto.

The Dominion government will proceed with its war savings stamp campaign. The stamps are to be redeemable in January, 1925, and are to be sold at a price, which, increasing from month to month, yields a little more than 4½ per cent. compound interest to the purchaser.

OUR FIFTH WAR LOAN

Canada's second Victory Loan, which is our fifth domestic war loan, has achieved a success which was beyond the expectations of the most extreme optimists. The total subscribed to the loan was $676,027,217, details of which will be found elsewhere in this issue. This is about 225% of the original official objective of $300,000,000 and about 135% of the objective of $500,000,000 which was assumed by the loan organization. The amount officially required would, however, scarcely have met the requirements of the government until the end of the year so that the half billion objective was the one which was really aimed at. It was confidently anticipated that this sum would be secured. Some expected that a total of $600,000,000 or even $650,000,000 would be obtained, but the latter figure was generally agreed upon as being the maximum.

The definite prospect of an early peace was responsible in a considerable degree for many of the larger subscriptions being increased during the last few days of the campaign. So long as another Victory Loan could be looked forward to, financial and industrial institutions were not inclined to exhaust even their present resources in taking part in the present campaign. It is now fully expected, however, that, if it is at all necessary for another domestic issue to be floated, the rate will be much less attractive than that of the present loan.

Among the notable features of the results, is the size and number of the large subscriptions gathered by the Special Subscriptions Committee. This organization achieved results much beyond the objectives. These facts, however, bear out views previously held in some quarters in Canada regarding the relative attractiveness of the bonds to large as compared with small investors. This difference is due to the fact that the bonds are exempt from taxes imposed by the parliament of Canada. In an editorial in the *Monetary Times* of September 20th, 1918, it was stated that "tax exempt bonds are peculiarly attractive to the man of large income in Canada who now pays a considerable rate of income tax. He is willing to purchase them on a lower interest basis and his bidding on the market supports the price in which they are traded in; his heavy subscriptions conribute largely to the success of the flotations and make it possible to issue them at lower prices than would be the case were the bonds taxable. This buying competition must be met by the small investor who does not worry about the income tax and in subscribing for our loans or purchasing them in the market he is, therefore, paying for something of little or no value to him. He might easily profit better by investing in higher yielding securities which are subject to taxation."

Not only is the Canadian able to avoid income tax in this way but United States investors have also found the Canadian bonds a desirable purchase and several cases have been recorded of substantial American subscriptions to the loan.

The small investor was induced to subscribe to the limit of his ability, frequently mortgaging his future earnings for the purpose of his subscription. This frequently reacted to his direct disadvantage because there are many cases where subscribers have themselves to meet interest on their own obligations at the rate of six or seven per cent., while they are only receiving 5½% upon the money which they invested in Victory Loan bonds. The total of less than ten million dollars from employees in the city of Toronto, in spite of a thorough canvassing organization, is a case in point.

OUR GROWING NATIONAL CAPITAL

For over a decade preceding the year 1915 enormous sums of capital arrived in Canada annually; of course it did not come in the form of money, but was represented by adverse trade balances; and in settlement of these balances we gave promises to pay sums of money in the future, with interest in the meantime. In other words, Canada was, at least in the eyes of other countries, a great consumer; this was not the rash extravagance of a spendthrift who is going rapidly into bankruptcy, but rather the financing of a great company starting out into the business world. Investors loaned us capital, because they had confidence in our ability to succeed and to repay our borrowings with interest. We cleared lands, and built great roads, railways, towns and cities, expecting through the use of these facilities to meet our obligations and reap a substantial profit for ourselves.

This processs came to an abrupt end in 1914, when our various enterprises, some completed, some merely commenced, were called upon not only to stand upon their own feet but to restore some of the capital wealth they had absorbed. Under the stimulus of high prices and war orders, our industries have made good, and prosperity has reigned throughout the land. External borrowing decreased to almost nil in the case of the present year, and a substantial part of our own income has been saved and applied to capital account. During the past year we have saved the prodigious sum of $600,000,000. Have our capital assets increased by this amount, as they did when we were borrowing such sums abroad?

Let us examine how these savings have been invested. By far the greater part of our savings during the year 1918 have been absorbed in the second Victory Loan. For purposes of current expenditure we have therefore borrowed on capital account. This expenditure is not directly productive in the economic sense, however necessary it may be from the political point of view. The remainder of our savings have been applied to necessary municipal and provincial works, and to private enterprises; very few industries have, however, extended their operations, so that they would be in a position to produce more.

These great savings have not, except in a small degree, added to Canada's capital wealth, nor redeemed our external obligations. But if they could be maintained even for a few years, what wonderful achievements would we not be able to accomplish? This surplus income, instead of supporting an army of men in Europe, can now employ an equal number throughout our own Dominion; we do not need them to maintain current production, because we have done that without them, and have in addition exported vast amounts of food, munitions, and other products. But we can use them in the development of our resources, so that Canada may become a greater and a wealthier country, and a nation inhabited by people who are financiers as well as wage earners.

It is of course scarcely to be expected that, with the cessation of war orders and a decline in the prices of those primary products which it is our principal function to produce, our present prosperity should continue, and that we should be able to save as much in future years as we have in the past. But there is no reason why that practice of thrift, which has been inculcated by a vigorous government campaign, and which has been at least to some extent responsible for our savings, should be suddenly dropped. It is seldom that the motives of the individual are clearly defined, and the very momentum of the patriotic campaign should carry us some distance past the period of necessity. The advantages of savings must now be apparent to thousands of Canadians who were at first influenced by patriotic motives. When there are no more government bonds offered for private subscription, such funds will be diverted into banks, trust companies, and other institutions which are in a position to handle small accounts. The later effects of the thrift campaign may accordingly be turned to profit by such organizations; in fact by some continued and vigorous encouragement, a permanent change in the financial status of the individual may to some extent be accomplished.

RECONSTRUCTION AND THE INDIVIDUAL

A new organization to deal with problems incident to the return of peace has been formed under the name of "Canadian National Reconstruction Groups." The organizing committee is located in Montreal, the chairman being Mr. Warwick F. Chipman, K.C., and the honorary secretary Mr. Francis Hankin, 201 Coristine Building, Montreal. The other members are also prominent Montreal men. It is intended that similar groups should be formed throughout the Dominion of Canada, the activities of which would be co-ordinated by a standing committee on plans and propaganda. For the time being the organizing committee act in this capacity. The wish is expressed that groups consisting of from ten to fifteen members each should represent as far as possible different phases of activity, including representatives of the returned soldier, organized labor and production.

Movements of this kind have not in the past been successful in Canada and it is unfortunate that this is the case. There is in this country a deplorable lack of discussions and opinions other than those which directly relate to the interests of the individual concerned. Canada in this respect compares unfavorably with countries such as England and the United States, which have developed societies for the consideration of such problems. In those countries organizations of this kind exercise a leavening influence upon economic and political difficulties. They afford the individual an opportunity to express his unprejudiced opinion apart from his judgment of the interests of the particular business or profession in which he may be engaged.

There are few countries where geographical conditions lead to sectional tendencies as much as in Canada. In boasting of our varied resources and vast extent we must, in fact, admit that these very assets bring problems which are difficult to settle. Then we have also differences in race and religion. The consequence is that there are few national problems which do not split upon the rock which divides east and west, French against English, or native against foreigner. This emphasizes the peculiar necessity of developing the spirit of citizenship in Canada, and of developing opinions based upon national rather than sectional or individual interests.

The program announced is rather too extensive and will doubtless be reduced. Associations of this kind usually succeed only by limiting their topics to one or a few issues. The movement as a whole, however, should be assisted in every possible way by the people of Canada as something which will assist in some degree in arriving at an amicable settlement of acute problems which will undoubtedly face this country.

VICTORY LOAN SUBSCRIPTIONS

List of Subscribers Whose Names Have Been Announced During the Past Week

(*The Monetary Times* will appreciate being advised of any subscriptions of $5,000 and over, which have not appeared in this or in the lists previously published.—EDITOR.)

The following is the fourth list of large subscriptions to the Second Victory Loan. The third list appeared in *The Monetary Times* last week:—

LIFE INSURANCE COMPANIES.

COMMITTEE ON REPATRIATION

Function of New Section of Cabinet Is to Co-ordinate Activities of Other Departments

A committee of the Cabinet, composed of Sir James Lougheed, Hon. N. W. Rowell, Hon. T. A. Crerar, Hon. Gideon Robertson, Hon. Arthur Meighen and Hon. J. A. Calder, has been appointed to co-ordinate the efforts of the various departments, which have been giving close study to problems of reconstruction arising with the conclusion of the war. Hon. J. A. Calder will be chairman of the committee, whose members represent the Departments of Soldiers' Civil Re-establishment, Agriculture, Immigration and Colonization, Privy Council, Interior and Labor. While the committee, which will be known as the Repatriation Committee, is not charged with responsibility for demobilization, that being the function of the Department of Militia, questions related to the return of our soldiers will be given the fullest possible consideration in working out the problems of reconstruction.

In connection with the repatriation of soldiers a great deal of groundwork has already been done and necessary machinery has been established: This important work has been in the hands of Sir Jas. Lougheed, head of the Department of Soldiers' Civil Re-establishment; Hon. Arthur Meighen, Minister of the Interior, and Hon. Gideon Robertson, who has been directing the activities of the Sub-committee of Labor. When the results of the efforts of these agencies have been announced, as they will be at an early date, it will be found that the most careful provision has been made for the returned soldier, having regard to his inclination and capacity.

Problems of Unemployment.

Preparations have also been made to deal with problems of unemployment which will arise with the cessation of the manufacture of munitions. Several departments of the Government have been busily engaged on these problems, and considerable progress has been made. The newly appointed committee over which Mr. Calder is to preside will co-ordinate the work which has been done by various departments. Its object is to secure the fullest possible co-operation of all the departments and agencies created to deal with problems of demobilization and reconstruction, and, if necessary, to create new agencies to carry on the work. The Government fully realizes the importance of the problems that have come with the termination of the war, and has decided to establish without delay a nation-wide organization to deal with the situation.

FINAL VICTORY LOAN MEETING

At a mass meeting held in Massey Hall, Toronto, on the evening of Monday, the 18th instant, the Victory Loan returns, up to and including Saturday, the 16th instant, were received. There will doubtless be small additions in each Province owing to the rush of subscriptions towards the end of the campaign and the difficulty of getting them all tabulated in time. The figures received are given elsewhere in this issue.

The meeting was attended by a large crowd of citizens of Toronto and was addressed by Mr. E. R. Wood, chairman of the Dominion Executive; Mr. J. H. Gundy, chairman of the Special Subscriptions Committee, Mr. G. H. Wood, chairman of the Ontario Committee, Mr. J. W. Mitchell, chairman of the Toronto Committee, and Hon. H. J. Cody, Minister of Education for Ontario. The various city teams were also present, so that the meeting jointly represented the effort of the city of Toronto and the Dominion as a whole.

In a report made to the West Vancouver council, Municipal Clerk James [illegible] states that the total receipts from January 1st to October 31st amounted to $118,080. The receipts for the month of October, including ferry receipts and a previous balance, amounted to $10,472.

The Belgian government already has taken steps to compute the enormous total of the damage done to property in Belgium by the Germans during their occupation of the country, said a cablegram received on the 20th inst., by the Belgian Legation. The Council of Ministers met at Havre and adopted measures for verifying claims for damages to civilian and public property. These will be employed as a means for determining the total compensation to be demanded.

NEWSPRINT PRICE AGAIN DISCUSSED

Sittings of the newsprint control tribunal were held on Thursday and Friday, November 14th and 15th, to hear appeals by the Canadian newspaper and newsprint manufacturers against the order of Commissioner Pringle fixing the minimum newsprint price at $69 per ton. Evidence was admitted from both sides, including the evidence of Mr. G. T. Clarkson, government auditor, and his assistant, Mr. W. D. Taylor. The publishers contend that sufficient evidence has not yet been heard in the court and that the price of $69 is too high. The tribunal was, however, adjourned until January 6th.

GERMAN-OWNED INSURANCE COMPANIES

The German interest in the insurance business in the United States is to be dissipated, according to A. Mitchell Palmer, Alien Property Custodian, who has announced that he would sell the German-owned United States companies. Mr. Palmer named sixteen companies, with annual premium accounts in 1917 of $16,761,424.

In a statement announcing the taking over of the insurance companies, which hitherto have been allowed to attempt liquidation under their own management, Mr. Palmer charged that not only had investigation disclosed that the Germans had used devious methods to maintain their hold on the business, but that their United States representatives had aided them even to the extent of "concealment and evasion of law." No intimation as to whether there would be prosecutions was given.

DEFERRED PAY AWAITING SOLDIERS

Plans for demobilization are proceeding rapidly. Inquiry at Militia Headquarters reveals the fact that there is in the hands of the Receiver-General a credit of soldiers of the C.E.F. of approximately $16,000,000 deferred pay. This represents money saved by members of the C.E.F. since the commencement of the war. In other words, it is pay earned but not drawn, with accumulated interest.

Now that demobilization is in sight there is no doubt that great benefits will accrue from these savings, which have been effected under a policy inaugurated by the Government in 1915, under which soldiers serving in France have been required to leave on deposit with the Government a portion of their pay which could not profitably be spent overseas but would be a useful provision for a rainy day. As a result the majority of the men will have a sum of money which they themselves have saved, immediately available on discharge.

Under the regulations adopted there will be paid to every man a further sum by way of free grant commonly called post-discharge pay. This will amount to a sum equivalent to three months' pay and allowances, payable in three monthly instalments, including separation allowance to the soldiers' dependents entitled to receive it.

On discharge every soldier who has donned the uniform will also receive $35, which is intended to provide for the purchase of civilian clothing.

The total sum subscribed to the latest Australian war loan amounts to £13,850,000 sterling.

That the present is the opportune time for the Provincial Government to grant pensions to mothers was the unanimous opinion of the Ottawa Council of Women at the meeting on November 19th over which Mrs. Adam Shortt presided, and a request will again be sent to the Ontario Government to deal with the question. The war has brought widowhood to hundreds of women in Canada, and the recent spread of illness all over the Dominion has added still more widows to the list.

All the difficulties between the city and the Halifax Power Company in the matter of the contract undertaken by the latter to develop and build the hydro-electric plant at Northeast River, St. Margaret's Bay, have not yet been cleared up. The contracts recently prepared have been signed by only part of the signatories, and there has been a temporary hitch in the proceedings. Under the agreement the company is to undertake the development and operation of the system for three months after completion, and then if it satisfies the city's engineer, the municipality is to pay it $400,000 in cash or bonds, the city being fully secured.

PERSONAL NOTES

Mr. P. Barnhill, K.C., of St. John, N.B., has been elected to the directorate of the Canadian Northern Railway.

Mr. George Taylor, who since the formation of the Temiskaming and Hudson Bay Mining Company, has been president and director, has retired on account of ill-health.

Mr. Andrew Stewart, who has recently resigned as liquidator of the Dominion Trust Company, Vancouver, has left for New York where he is rejoining his old firm Marwick, Mitchell, Peat and Company, chartered accountants.

Mr. Thomas Cantley, chairman of the board of the Nova Scotia Steel and Coal Company, New Glasgow, N.S., and ex-president of the Canadian Manufacturers' Association, has been elected to the directorate of the Canadian Northern Railway.

Lieut. L. G. Cronyn, of the 11th Battalion, Engineers, who went overseas with the 166th Battalion in October, 1916, has been officially reported wounded. Before enlisting Lieut. Cronyn was a member of the firm of Glazebrook and Cronyn, exchange brokers.

Sir Hormisdas Laporte, president of Le Banque Provinciale du Canada, and president of a wholesale grocery company in Montreal, of which city he is one of the business magnates, has been elected to the directorate of the Canadian Northern Railway.

Mr. Stambury R. Tarr, editor of "Canadian Finance," Winnipeg, died recently in Woodstock, Ontario, following an operation for appendicitis. Mr. Tarr at one time attended McMaster University. Later he entered the advertising department of the Canada Life Assurance Company, then went into newspaper work in Montreal and finally to Winnipeg. For the past two years he was chairman of the Bureau of Research in Winnipeg.

At the annual meeting of the Canadian Bankers' Association at Montreal, Mr. Edson L. Pease was re-elected president and the vice-presidents re-elected were Sir Frederick Williams-Taylor, C. A. Bogert, H. A. Richardson, and Sir John Aird. The council composed of the general managers of banks, remains unchanged.

At the annual meeting of the Royal Trust Company on November 12th, Mr. C. W. Dean was elected a director, filling the vacancy left by the resignation of Mr. A. D. Braithwaite. Mr. Huntley R. Drummond was elected vice-president, Sir Montagu Allan having asked to be relieved of the duties of the office owing to the uncertainty as to when he will return to Canada. Sir Montagu, however, continues on the board.

CANADIAN RAILWAY WAR BOARD

A Billion Dollar Railway Group

One bomb, dropped in the middle of the above six men, would have paralyzed at least for a little while, the entire railroad system of Canada. The above group, presided over by Lord Shaughnessy (third figure from the left-hand side of the picture), represents Canada's national railroad directorate, the executive committee of the Canadian Railway War Board. Under their control are Canada's 51,[illegible]59.74 miles of railway track in Canada, about 6,000 locomotives, 220,000 freight cars and 7,000 passenger coaches. Formerly five out of these six men were fighting each other relentlessly to obtain and hold trade. To-day they are working together as a single railway management. This picture was taken on November 6th in the Canadian Pacific Railway's board room where the executive met to discuss railroad problems in the reconstruction period after the war. The figures are (reading from left to right) Mr. Howard G. Kelley, president of the Grand Trunk Railway; Mr. D. B. Hanna, president of the Canadian Northern (government) Railway; Lord Shaughnessy, chairman of the Canadian Railway War Board and chairman of the Canadian Pacific Railway board of directors; Mr. A. H. Smith, formerly president of the New York Central Railway (now regional director of the United States railroad administration, but still representing the United States lines in Canada; Mr. E. W. Beatty, K.C., president of the Canadian Pacific Railway, and Mr. W. M. Neal, general secretary of the Canadian Railway War Board.

BOND HOLDINGS OF A LIFE INSURANCE COMPANY

A Paper Read Before the Annual Convention of the Actuarial Society of America, at Montreal

By FREDERICK H. JOHNSTON.

The question of the method of valuing the bond holdings of a life insurance company is at all times important, but at the present time, in view of the low market value, it is especially so and must receive careful consideration before the close of the year. It is therefore in order to take a general view of the matter to pave the way for some reasonable solution to the problem.

Formerly it was the universal practice of reporting bonds on the basis of market values as of December 31st, but it is obvious that the use of momentary values is not always a proper measure of the real condition of a company whose obligations are long term contracts. In this connection it might be pointed out that the bonds are also long term contracts and that the essential fact is not their immediate values but the fundamental security as to their ultimate fulfilment. Apart from this fact is the artificial effect of fluctuating values on the apparent earnings of a company in any given year, showing a profit or loss as the case may be.

These facts were recognized in the State of New York in 1909, when a law was passed permitting the use of the amortized value of bonds not in default as to interest as a measure of their values and prescribing that in finding such values the cost value should be taken as a starting point. Since that time many companies have taken advantage of this plan and some States adjust the annual statements of all companies reporting to them on this basis. On the other hand, for one reason or another, many companies have stuck to the market value basis. In the past five years, however, there have been two notable instances (at the end of 1914 and 1917) where the market values used were not in accordance with the actual selling price.

Different Bases for Valuation.

With these facts in mind it is instructive to note the combined values on different bases of several New York companies for the past five years. These values on the basis of $1,000 are given in the following table:

Year.	Par Values.	Book Values.	Market Values.	Amortized Values.
1913	1,000	978	909	975
1914	1,000	974	*914	964
1915	1,000	968	902	957
1916	1,000	966	912	959
1917	1,000	964	*885	956

In view of the arbitrary values of 1914 and 1917 the market value fluctuations are not so great as would have been the case had they been in accordance with actual sales. The amortized values are necessarily more regular, but exhibit what at first thought might be unexpected changes. When it is remembered, however, that these values in accordance with the legal provision are based on cost it is apparent that the more recent purchases in a low market would tend to reduce the average.

Another feature of the question might here be noted, and that is that its importance varies directly as the ratio of bond holdings to total assets. For instance, in the case of the companies on whose returns the various values quoted above are based their bond holdings are over 50 per cent. of the total assets, so that a variation of ten points in the market value would make a difference of approximately five points in the total surplus, whereas, if they constituted only 25 per cent. of the assets the change in surplus would only be half as great.

From what has been said it is manifest that the amortization method avoids some of the difficulties of fluctuating values, but, as already pointed out, the statutory provision permitting the use of this method goes back to the original cost and the changing over to its use would cause an abnormal condition in the case of any company heretofore using the so-called market value basis.

The figures above quoted show that at the end of 1917 there was a difference of 71 points between the amortized values and the market values, so that in the case of a company changing its basis its apparent progress would be a distortion of the facts. It would seem, therefore, that to meet the situation a system which would cause less disturbance should be [illegible]. Such system should also be one which will obviate the necessity of any future adjustment.

Incidental to the subject and as an aid in working out a concrete case which will be given later the following table has been prepared. This table shows the proportion of bonds included in the above calculations which mature in each decade in the present century:

Up to 1919 ..	.. 16.07
1920-1929	. 44.43
1930-1939	8.35
1940-1949	10.54
1950-1959	10.45
1960-1969	2.96
1970-1979	.21
1980-1989	1.16
1990 and after	. 5.83
	100.00

The average time to maturity is slightly under twenty years.

Surrender of Market Valuation.

In considering a possible solution to the whole question there are two circumstances to be remembered:

First, that a precedent was created at the end of 1914, at which time the Stock Exchange was closed and the values authorized were as of June 30th of that year, and again at the end of 1917, though the Stock Exchange was not closed, the National Convention of Insurance Commissioners "recognized the probability that the participation of the United States in the World War would affect the bond and stock markets to such an extent that market quotations on any fixed date would not represent the real values on standard securities." A committee appointed for the purpose decided "to prepare the values by adding together the market values as of November 1st, 1916, February 1st, May 1st, August 1st and November 1st, 1917, and dividing them by five enter the results in the book as the proper values to be allowed as of December 31st, 1917."

Second, the legal provisions in some States permitting the use of the amortization method. The following States have such a provision: California, Connecticut, Massachusetts, New Jersey, New York, Oregon, Pennsylvania, Wisconsin. This provision is substantially the same in each State and describes the method of amortization, using the purchase price if not in excess of the then market value as a starting point, and also excludes any bonds in default as to principal or interest. With the exception of Connecticut the section of the law on this subject also provides that a corporation may return such bonds at their market value or their book value, but in no event at an aggregate value exceeding the aggregate of the values calculated according to the rule prescribed.

Amortization Basis.

The statutory provision for amortization supplies a sound principle for ascertaining the values, but falls short of meeting the present condition by fixing the purchase price as the initial amortization value, and hence involving a violent change in going from the market value basis. It supplies, however, a hint which is helpful in the proviso that book of market values may be used if not in excess of amortized values. The proposition which suggests itself is to find a set of values (which might be called "amortized market values of 1917") following the principle of amortization but avoiding any shock by taking some other starting point than the original purchase price. The logical starting point would obviously be the values used at the end of 1917. The result would be a set of values thereafter free from any abnormal fluctuations and always well within the statutory amortized values. This method would also have the further advantage that the amortized market value of a bond purchased prior to the end of 1917 would be the same at the same point of time by whatever company it was held; whereas, under the regular amortization plan it has different values at the same point of time according to its original cost. Of necessity all new purchases would have to be amortized from cost value. As concrete examples of this proposition two cases have been worked out. One of a bond bought at a premium and one bought at a discount, having about eighteen years to run, which is slightly less than the average time to maturity of present bond holdings as shown earlier in this paper.

The bond purchased at a premium was a 5 per cent. bond, maturing January 1st, 1937, for which $1,086 was paid in 1910. Its regular amortized value on December 31st, 1917, was $1,071, while its market value by the five-point method was $920, and its quoted value was $820.

The bond purchased at a discount was a 4 per cent. bond maturing October 1st, 1936, for which $813 was paid in 1908. Its regular amortized value on December 31st, 1917, was $881, while its market value by the five point method was $730, and its quoted value was $610.

ATTEMPTED SWINDLE INSURANCE COMPANY

Frederick Fredericks, alias Captain Fritz Joubert Duquesne, who pleaded guilty in New York on October 31st to trying to collect a fraudulent $33,000 claim from an insurance company, will probably be turned over to the British Government to face a charge of murder in connection with an explosion aboard the steamship Tennyson, off the coast of South America in 1916, according to a statement by District Attorney Swann.

According to the British Government, the explosion occurred among boxes of ''mineral'' shipped by Fredericks, and three sailors were killed. Although these boxes were insured for $80,000, Fredericks never attempted to collect the money.

Mr. Swann said that he had informed representatives of the British Government that he would turn Fredericks over to them, provided he is returned to this country for sentence in the event that he is acquitted in England or is sentenced there to less than life imprisonment.

COBALT ORE SHIPMENTS

The following is a statement of the shipments of ore, in pounds, from Cobalt station for the week ended November 15th 1918. Beaver M., 85,733; Mining Corporation, 208,104; McKinley-Darragh, 149,475; Buffalo Mine, 175,930; Coniagas Mine, 172,533; La Rose Mine, 113,316. Total, 905,091.

The total shipments since January 1st now amount to 28,965,376 pounds or 14,482.6 tons.

Under the title ''Speaking Friendly to Bank Presidents,'' Mr. Harvey A. Blodgett, of St. Paul, Minnesota, criticizes the laxness of banks in not using a more aggressive policy to attract deposits. They should, he says, take a stronger lead by advertising and other means, thus increasing at the same time their own resources and those of the nation.

VANCOUVER AS A BOND CENTRE

Victory Loan Campaigns Have Increased Appreciation of Bonds as Investments—Market for Future Local Issues

That Vancouver is the natural financial centre of the Pacific coast, and that increased trading in bonds will therefore stimulate its importance, is the belief of Lieut.-Col. G. H. Dorrell, western manager of the Canadian Financiers Trust Company. In discussing this question recently with the Monetary Times, he said:

"One beneficial result of the Victory Loan campaign on the Pacific coast will be the enlightenment of investors as to the nature and comparative advantages of bonds—whether government, municipal or industrial—over other forms of investment. Prior to 1917 the number of investors who would consider the purchase of even government or municipal bonds was very small. Many who would lend on mortgage of city property in Vancouver or Victoria would not consider the municipal securities of the same cities even when they could be bought to yield approximately the same rate of interest. They ignored the outstanding fact that in the ultimate result the city's bonds must rank first, and that the funds from which they would be repaid must be derived from a first charge on all the real estate in the city. They were unfamiliar with bonds as securities and doubted the unknown.

"The successful Victory Loan campaign of 1917 was the means of bringing the nature and convenience of this class of securities home to the average investor. He has been brought to appreciate the simplicity, the punctuality of interest payments, and the facility of realization attaching to Victory bonds. From that to purchasing the bonds of provincial governments and the larger municipalities was only a step. In 1918, for the first time in British Columbia, there was a steady and growing market for these classes of security.

"This should mean much to the provincial government and also to the municipalities. In the past nearly the whole of the public borrowing has been done outside the Province. If British Columbia can absorb thirty to forty millions of Victory bonds in little over a year, and establish a demand for other bond securities besides, in a province where bond investments were previously almost unknown, the future surely holds great possibilities for the local marketing of local issues.

"Sir Thomas White in his recent speeches at the coast pointed out that until recently the idea of the Dominion of Canada raising even $5,000,000 within Canada itself would have been regarded as a doubtful undertaking. We have progressed far since then. In the same way no province in the west and few municipalities have ever attempted to market locally even a portion of their own loans. A great change in that respect is now not only possible, but probable.

Resale of Local Securities.

"The debt of the provincial government of British Columbia is now in the neighborhood of $30,000,000 and that of the municipalities $95,000,000. Here are figures representing securities in which there must be many dealings from time to time. Holders from death and other causes will be wanting to realize and a local demand once established should not lack supplies. This would pave the way for the absorption of new issues, as they become necessary. The reconstitution period is close upon us and public borrowings will again have to be resorted to. With the knowledge of all the advantages that bond investments offer, it is not very much to expect that the habit of buying bonds for investments and reserve now established, will continue to appeal to investors, and that much of the money required in the future for public undertakings may be found locally. Bond buying is an appetite which grows in feeding and the time when Vancouver will be regarded as the natural financial centre of the Pacific coast for the flotation of the public loans of British Columbia may not be so very distant."

A report issued by the British Columbia provincial horticulturist on September 30th concludes that the apple crop of the province will be fully equal to that of 1917, for, while the lower mainland and Okanagan districts are estimated to be 5 and 10 per cent. less respectively than 1917, the Kootenays, which are now producing in quantity of comparative importance, will more than double the previous year's production. On Vancouver Island the yield is estimated to be equal to 1917. Pears are estimated to exceed 1917 by 15 per cent. in the coast and island sections, 10 per cent. in the Okanagan, and 50 per cent. in the Kootenays, with quality very good throughout.

BRITISH COLUMBIA'S INDUSTRIES

Developments of the Year in Agriculture, Mining, Fishing and Shipbuilding

Remarkable changes have taken place in British Columbia during the past year, according to Mr. W. Godfrey, of Vancouver. Mr. Godfrey is manager of one of the former branches of the Bank of British North America, now taken over by the Bank of Montreal.

"Agriculture during the year has shown greatly increased results," said Mr. Godfrey, when interviewed by the Monetary Times. "The fruit crop especially has been largely increased and while no figures are available at the present time, there is no doubt that it will show probably a record production.

"Potatoes and root crops have also materially increased, the crop of potatoes for the Province being estimated at about 3,000,000 bushels, worth, say, about $3,500,000.

"In lumber the first half year showed a large increase, but the last few months it has slackened off on account of the smaller demand from the prairies. The mills at the present time have agreed to a curtailment of the output, which is no doubt wise.

"Gold mining in British Columbia on account of the economic conditions will show some falling off. Silver and lead show an improvement. The copper production will probably be about the same as last year, and the zinc production amounted to about 10,000 tons. On account of the high price of platinum—$105 an ounce—properties on the Tulameen and in other parts of the Upper Country are being developed. The Dominion Assay Office in Vancouver now purchases this metal.

"The coal production on the island has increased but on account of labor troubles in the Upper Country, it has been somewhat hampered in that district.

"The total mining output for the year will probably run in the neighborhood of $35,000,000 as aganist $37,000,000 for 1917.

"While this has been an off year for the fishing industry the pack will probably be larger than any year in the history of the Province, although the Fraser River pack of sockeye is practically eliminated, being down to 25,000 cases. The fish has been commandeered by the Government at a fair price.

"Shipbuilding still continues to show marked progress. A total of 52 vessels have been launched in British Columbia since the commencement of this industry to date, having a total deadweight tonnage of 175,600. This is in addition to small craft.

"While it is difficult to forecast the future as regards shipbuilding after the war, it would appear that unless we have local production of steel, that it will be difficult to build this description of craft here, and bring the material from the East. On the other hand, it is contended that these vessels being built here carry a cargo right away, which would more than counterbalance any freight on the steel from the East. It is also contended and this is pretty well known, that the climate is exceptionally suited for shipbuilding and that practically open air work can be carried on all the year round.

"The pulp and paper production continues to increase and it is getting to be a very important industry on the coast. The demand from Australia and the Orient has grown quite large.

"Bank clearings for the Province show a satisfactory increase, those in Vancouver up to the end of September (nine months) standing at $391,732,000 as against $419,610,000 for the whole of last year. Credit conditions have been good and payments well met."

FOOD REGULATIONS MODIFIED

The first order of the Canada Food Board issued after the signing of the armistice fulfils the board's undertaking to withdraw as many war-caused restrictions on food as possible at the earliest moment. Following the action of the Allied Food Controllers, all orders and rulings requiring the sale, purchase, use or consumption of substitutes for wheat flour are repealed from Thursday, whether in the trade or in private homes. The main factor enabling this to be done is the immediate release of allied shipping to make the voyages from Europe to Argentina, India and Australia where there are accumulated stocks of wheat. Wheat substitutes only are affected by the new order. The same regulations as hitherto remain for milling extraction of standard flour.

Make Your Will—It is an Important and Immediate Duty

To live from day to day, without having your Will made, is risking leaving your family to the unfeeling letter of the law in the apportionment of your Estate. You know best how your property should be divided, so Make Your Will NOW and provide for the unexpected. In selecting your Executor, consider the long experience and practical facilities possessed by this Corporation for efficient handling of your Estate. Literature and full particulars on request.

LIABILITY FOR RECOMMENDATION TO BANK

Decision in Iowa Court Affected by Banking Law of that State

By M. L. HAYWARD, B.C.L.

Cases are frequently decided by the United States courts which lay down sound law on points which have not yet been passed upon by the courts of this country.

For instance, the case of Farmers Savings Bank vs. Jameson decided by the Iowa Supreme Court, and lately reported in the official reports, involved a neat little point of banking law.

In this case Jameson, the president of an Iowa bank, wrote the following letter to the Farmesr Savings Bank:

"The Central Iowa Granite Company is doing a large business in your territory and have very good paper to handle from time to time.

"They are good customers of this bank, and I have suggested to them that they give you whatever business they have there to be done at your bank. They are thoroughly reliable and good for any arrangements which they may make with you. Just now they are buying up large supplies for their fall business, and, of course, use considerable money. Their business is very large and this stock is rapidly turned into money again.

"Any favors that you may show them will be appreciated by me, and I shall be glad to turn you any favors that I can."

Company Was Insolvent.

Acting on this letter the Farmers Savings Bank loaned the Iowa Granite Company over $60,000, which the Granite Company was totally unable to pay, in fact it was insolvent at the time Jameson wrote the letter, and he knew it. The Farmers Savings Bank then brought action against Jameson, the writer of the letter, for recommending an insolvent customer, and it was held by the court that the letter quoted above rendered Jameson liable to the Savings Bank.

It appeared, however, that by the law of Iowa the Farmers Savings Bank belonged to a class of banks which could not lawfully lend more than $2,000 to any one borrower, and Jameson promptly raised the point that he could not possibly be liable for the $60,000 loan, and that, if he were liable at all, he was only liable for the $2,000 which the Farmers Savings Bank could lawfully loan.

The Iowa Supreme Court adopted this view, and held that if one party recommends a customer to a bank as being good, he cannot be liable for any greater amount than the bank could lawfully loan to that customer, even although the party making the recommendation acted fraudulently.

"The utmost that may be claimed for the Farmers Savings Bank in this case," said the Iowa Court in delivering judgment, "is that a false representation by Jameson concerning the solvency of the Central Iowa Granite Company induced the bank to loan $2,000, to its loss in that amount. All who do business in the State are conclusively held to know this law. It is not strange to assume that both parties, bankers, actually knew the statute law on banking. In our view, such law does declare that a loan here of more than $2,000 is unsafe and discredited banking, and forbids it."

Liability Not Established in This Case.

The result of the decision therefore was that Jameson could not be liable for more than $2,000, but the final result of the case was that he did not even have to pay the $2,000 for which he might have been liable under some circumstances, because, after the Granite Company had borrowed $2,000 and more from the Savings Bank, the Granite Company afterwards repaid to the bank an amount in excess of $2,000, and the court held that under these circumstances Jameson could insist that the amount repaid should be applied to the first $2,000 borrowed, and for which he was liable, so that when that was done Jameson was liable for nothing at all.

"If, after parting with $2,000 caused by a wrong done by Jameson," said the court on this point, "the Savings Bank had compelled the Granite Company to repay that sum, it would be clear that, no matter what the wrong of Jameson, he would be absolved from liability, for the simple reason that his wrong had ceased to be injurious. Now, how is this changed, because a borrower who had fraudulently obtained $2,000 by the help of Jameson, and, say $18,000 more through an act of the Savings Bank, not induced by Jameson, pays back $10,000!

"In a sense Jameson is a surety for $2,000, in the sense that of a large aggregate of loans lost he is holden to save the bank harmless for but $2,000, and may urge that the applying of $10,000 received on what he is not liable for at all is to give undue preference to the bank, whose act caused the loss above $2,000 as much as Jameson caused the loss up to $2,000. We think that in these circumstances Jameson may insist that, when the fraudulent borrower restores more than $2,000, the sum received should be applied as far as necessary to extinguish Jameson's liability for the loss of the smaller sum, and should not be devoted by the bank in payment of the loss above $2,000 which, so far as Jameson is concerned, would never have happened but for the act of the bank in disobeying the banking laws of its own State."

PUBLIC STOCK YARDS FOR SASKATCHEWAN

The rapid growth of the live stock industry in Saskatchewan is bringing to a head the question of establishing public stock yards in one or more of the cities of the Province. Hitherto most of the live stock of Saskatchewan has been marketed in the neighboring Provinces, chiefly at the Union Stock Yards at Winnipeg, Man. Farmers in the northern part of the Province, which is particularly suited to the raising of all kinds of live stock, are eager to see the establishment of stock yards, and other facilities for the handling of live stock at Saskatoon, and a plan is under consideration whereby a co-operative company shall be formed for this purpose. The proposed company would be capitalized at $130,000, the greater part of which would be subscribed by farmers. The establishment of stock yards at Saskatoon would do much to develop to the capacity of the district an industry, which, although of considerable importance, is still only a fraction of what is possible there.—Western Canada Week by Week.

JOINT WATER POWER DEVELOPMENT

With the return to a peace basis, the Dominion Government will, it is understood, take up the question of joint development with the United States of St. Lawrence water powers. A large scheme has already been tentatively submitted in its broad outlines. While regarding increased navigation facilities as paramount in the St. Lawrence, the scheme, it is estimated, would result in the development of enormous additional water power. Surplus power generated under the scheme and not needed in Canada, it is suggested, could be exported to the United States under treaty arrangements which would permit of its return when required on this side of the international boundary.

One phase of the scheme would entail the practical abandonment of the present canal system of the St. Lawrence, as the result of the creation of a deeper waterway by means of dams.

International development of St. Lawrence water powers was urged on the Government of the United States when the application of the St. Lawrence Power Company was before the International Waterways Commission. It was represented to Washington that the endeavor should be to design at the outset a complete scheme into which successive developments might be fitted from time to time, when occasion might demand. But in such a scheme, it was pointed out, there was always present the great danger that the ultimate possibilities of St. Lawrence navigation might be neglected or irreparably injured. "On the other hand," reads an order in council passed at the time, "it is certain that the subordinate and incidental but important use of these international boundary waters for power purposes can never be rendered as efficient and productive through a policy of simply permitting a haphazard series of unrelated private enterprises as through a carefully considered and comprehensive scheme of development carried out under public auspices by the two countries; and obviously it is only by agreement and concerted action between the two countries that such development can be undertaken."

Western Canada uses a large quantity of dried fruits and is dependent almost entirely for its supply on California market. A survey, it is understood, is to be undertaken by the United States authorities to see if the situation is as serious as it is reported. If it is not found to be so serious and the embargo is lifted, the board of trade will endeavor to secure a fair share for this section of the west. A meeting of the wholesale section of the board may be called to consider the matter.

AGRICULTURE FOR RETURNED MEN

Government Has Extensive Plans for Training Discharged Soldiers for Farm Work

Hon. Arthur Meighen, Minister of the Interior, in a statement just issued, announced the plans under the land settlement for soldiers scheme under which returned soldiers without agricultural experience will be given an opportunity to qualify to go upon the land. The announcement is as follows:

"Adequate facilities are being provided by the Soldiers' Settlement Board to enable men desirous of taking up land under the Soldier Settlement Act to obtain the experience and qualifications necessary. In order to utilize the demobilization period, which will extend over many months, a number of training farms will be established in Great Britain. Preliminary steps have already been taken to this end by the Board in conjunction with the Canadian Department of Militia and the Khaki University. The farms will be organized as schools of instruction in the essentials of farming under Canadian conditions. They will provide an intensive course of about three months' duration, the staffs being selected from service men who were formerly connected with agricultural teaching.

To Train the Inexperienced.

"A course of work has been prepared at the request of the Board by the Commissioner of Agricultural Instruction, Mr. W. J. Black, for use in both Canada and Great Britain. It bears little similarity to the regular agricultural college course, being designed to teach inexperienced men the every-day operations of the farm, rather than the scientific principles underlying agriculture. It is proposed by its means to carry the men along from a point where they know nothing of farming to a point where they will have sufficient working knowledge to become self-supporting, virtually from the time they go on the land. The following synopsis indicates the scope of tho course:

"Instructions in the handling of horses in association with vehicles and the implements of tillage; in the construction and use of the common farm implements, and in the operation of gas engines; in carpentering, blacksmithing and general repair work; and in the planning and construction of buildings. Instructions in farm management and the importance of good business methods in relation to successful farming. Instruction in the preparation of tho soil and the growing and harvesting of crops; instruction in the selection, care, feeding and management of horses, cattle, sheep, swine and poultry.

Option on Returning.

"Inexperienced men returning at once to Canada will be offered two plans under which to qualify, the choice being optional. They may either gain experience by working with successful farmers or take the course outlined above at an agricultural college or similar institution in Canada. Arrangements to this end are now being concluded at two institutions, and it is the expectation that this course will be offered in many of the Provinces by the beginning of the new year.

"While in framing the course outlined above, practical utility has been made the essential feature, it is recognized that the best school is the well-managed farm, provided this farmer himself is sympathetically disposed. So much depends on this aspect of the matter that a very careful selection will be mado among the progressivo farmers of the country who are prepared to render public-spirited service in this connection.

Follow-up Scheme.

"It is the intention to inaugurate a follow-up scheme with the co-operation of Provincial Agricultural Departments, whereby the men will be advised and instructed after they go on the land. This plan contemplates the provision of local short courses dealing with the more advanced phases of instruction, similar to those now provided for farmers and farmers' sons by the local representatives of Agricultural Departments and by other extension services.

"Attention is called to the fact that the programme outlined relates only to those inexperienced in farming. Experienced men who satisfy the Soldier Settlement Board that they possess a reasonable fitness for farm life and the other qualifications called for by the Act will be permitted to go upon the land without further instruction."

At a meeting of the directors of the Canadian Pacific Railway Company held on Wednesday, the 13th instant, the usual dividend was declared.

LEGALITY OF CHANGE IN INSURANCE POLICY

Quebec Court Rules that Alteration Must Be Approved by Company—Agent's Approval Not Sufficient

The legal importance of taking proper precautions to assure that any change made in an insurance policy is authoritatively sanctioned on behalf of the insurance company, is demonstrated in a case just decided in the First Division of the Quebec Court of Review. The Court dismissed the action of Joseph Courville, liquidator of the Megantic Manufacturing Company, Limited, against the Central Canada Mutual Fire Insurance Company, claiming $4,000 fire insurance.

The Megantic Manufacturing Company took out two policies—one for $1,000, and the second for $3,000—in 1912, both being issued on sawn timber. In 1913, in order to widen the scope of the policies, plaintiff said the Megantic Company changed the policies to cover a schedule then attached to the policies, and signed by Ormsby, Clapp and Anderson, Limited, who were said by plaintiff to be the authorized agents of the defendant insurance company. Further, it was said, the insurance was effected through W. S. Dresser and Company, of Sherbrooke, described as the local agents representing the insurance company.

Property of the Megantic Manufacturing Company was destroyed by fire on March 28th, 1913, and proof of loss was furnished by plaintiff as liquidator.

Insurance Company's Defence.

The company defendant, however, denied liability under the policies as sued on, and denied the authority of Ormsby, Clapp and Anderson, Limited, and W. S. Dresser and Company or anyone else to change the contract from sawn lumber to schedule. The alterations in the description of the property covered by the policies and the binder were declared to have been wholly unauthorized, and for that reason it was submitted they were not binding upon the insurance company.

"The Court of Review is of opinion that the judgment dismissing the plaintiff's action should be confirmed," said Justice Archer. "The evidence clearly establishes that neither Dresser and Company nor Ormsby, Clapp and Anderson, Limited, were defendant's agents. The change from lumber to schedule was made by Mr. Johnson, local manager in Montreal, for Ormsby, Clapp and Anderson, Limited. The binding receipt, which was for lumber, was changed to schedule by one Sims, Dresser's partner. Dresser and Company were plaintiff's agents. Ormsby, Clapp and Anderson, Limited, were, as regards plaintiff and defendant, insurance brokers. They had no authority whatsoever to bind the company defendant. It is clearly proven that the goods mentioned in the schedule were not at the time of the fire within the protection of the policy. The policy had been issued on lumber, and no claim was made for the same.

"Taking the facts as proven, it is not necessary to discuss the question of agency or the conditions of the policy. It was for the company for which plaintiff is acting to make sure that the change they had asked to Dresser and Company was made by the parties duly authorized so to do. It is through the Megantic Manufacturing Company's employees' negligence and through Dresser and Company's misinformation that plaintiff has to suffer the loss of the amount claimed. The insurance company has, in my opinion, proved its plea beyond a doubt."

"NO STRIKE" ORDER REVOKED

The following statement was handed out on November 11 by the Minister of Labor:

"On the recommendation of the Minister of Labor, the Government yesterday revoked the 'no strike' order-in-Council, passed on October 11th, 1918.

"The immediate necessity of the original order was caused by a threatened strike staged for Thanksgiving Day, by some 5,000 labor men.

"The order was not regarded by the Government as placing any disability upon the great majority of labor organizations who had accepted the Government's war labor policy as announced by order-in-Council in July last, and were submitting all their grievances to the tribunals designated, which were being operated with perfect success.

"The 'no strike' order was issued only for the purpose of maintaining industrial peace during the continuatioo of the war, and is cancelled because it has served its purpose and is no longer necessary."

VICTORY LOAN RESULTS IN ONTARIO

Subscriptions Obtained by Canvassers and Special Subscriptions Committees in Each Unit—Numbers of Subscriptions

The accompanying table gives in detail the total subscriptions received for the second Victory Loan in each divisional and county organization in Ontario. The objective which was really in the minds of the members of the Ontario executive committee was one-half of the total of the loan. This would be $250,000,000, based upon the Dominion objective of $500,000,000. For the official working objectives, however, the actual subscriptions of the previous loan, totalling a little over $400,000,000, were used as a basis. This meant $220,425,000 for Ontario. The objective of each district and county was based on this figure, with due allowance being made for their wealth, as well as for what they did on the last loan. This is the objective upon which the percentage figures are based.

W. L. McKINNON,
Secretary, Ontario Victory Loan Committee.

The first three columns give the figures for the canvassers. Those in the second three columns are for the special subscriptions committee. There were, of course, many counties where subscriptions of $25,000, which is the minimum required in the special subscriptions class, or over could not be secured. The seventh, eighth and ninth columns give the combined figures for both sections of the work. It will be observed that Kent county is the only unit which fell below its objective, and the provincial executive committee has announced that late returns bring their total up to the desired figure.

The last four columns show the numbers of applications received by canvassers, banks and special subscriptions committees, with the total.

One of the obvious features of the results is the fact that, while the canvassing units exceeded their objective by 33.01 per cent., the special subscriptions branch in the province exceeded its quota by 82.87 per cent. These results illustrate the relative importance of large and small subscriptions in this campaign as compared with the last. Large subscriptions did a great deal to boost the totals of the cities and of the divisions, which include cities with substantial industries.

The following shows the average amount of each special subscription for each division:—

Toronto	$200,000
Ottawa valley	77,000
Eastern	40,000
Central	40,000
Western	42,000
Hamilton and Niagara	$ 80,000
Hamilton and southern	81,000
Northern	90,000

The Ontario organization has been a thorough one, and a considerable part of the success of the loan in the province has been due to the assistance rendered from headquarters in Toronto. Figures similar to those given herewith were prepared at provincial headquarters each evening and sent out to be in the hands of the different divisional and team organizers the following day. In this way each organizer was in a position to compare his exact position with that of other units in the province, and with his final objective. The figures herewith given are merely taken from the report for the last day of the loan, as, being cumulative, they give the totals for the whole period. This part of the work was under the direction of Mr. W. L. McKinnon, secretary of the Provincial Victory Loan Executive.

MONTREAL PLEASED WITH LOAN SUCCESS

On the evening of Monday, the 18th inst., a meeting was held in Montreal at the Windsor Hotel, to receive the Victory Loan figures from throughout the Dominion. Mr. J. W. McConnell, chairman of the Victory Loan campaign, presided, and with him on the platform were Lord Shaughnessy, Sir Vincent Meredith, Bart., Lady Meredith, Sir Herbert Ames, R. C. Holden, E. A. MacNutt, A. P. Frigon, Huntly R. Drummond, Edwin Hanson, R. A. Stephenson, J. M. Mackie, A. D. Anderson, R. T. Leclerc, P. P. Cowans, Zephirin Hebert, Mrs. Huntly Drummond and J. W. Ross.

The competition between Toronto and Montreal has, from the beginning, been close. When the final results were received on Monday evening, and it was seen that Toronto had exceeded Montreal by a small margin, there was at first disappointment, succeeded, however, by enthusiastic cheers for Toronto. The meeting was addressed by Mr. McConnell, Sir Lomer Gouin, premier of Quebec, and Lord Shaughnessy.

WEEKLY BANK CLEARINGS

The following are the bank clearings for the weeks ended November 17th, 1917, and November 14th, 1918, respectively, with changes:—

	Week ended Nov. 14, '18.	Week ended Nov. 17, '17.		Changes.
Montreal	$100,735,665	$ 75,740,530	+	$24,995,135
Toronto	57,957,760	54,446,102	+	3,511,658

RE-ASSURING BANK OF MONTREAL STATEMENT

Assets Exceed $550,000,000—Interest-Bearing Deposits Total $345,000,000—Bank Lends Full Assistance to Governments and Industry

The annual statement of the Bank of Montreal for the year has just been made public. It indicates a thoroughly sound position together with substantial growth for the year. Owing to the fact that the absorption of the Bank of British North America took place during the year, a comparison of the figures with those of 1917 is scarcely satisfactory.

Statement of the result of the business of the Bank for the year ended 31st October, 1918.

Balance of Profit and Loss Account, 31st, October, 1917		$ 1,664,893.08
Profits for the year ended 31st October, 1918, after deducting charges of management, and making full provision for all bad and doubtful debts		2,562,720.14
		$ 4,227,613.22
Quarterly Dividend 2½% paid 1st March, 1918	$ 400,000.00	
Quarterly Dividend 2½% paid 1st June, 1918	400,000.00	
Bonus—1% paid 1st June, 1918	160,000.00	
Quarterly Dividend 2½% paid 1st September, 1918	400,000.00	
Quarterly Dividend 2½% payable 1st December, 1918	400,000.00	
Bonus—1% payable 1st December, 1918	160,000.00	
	$1,920,000.00	
War Tax on Bank Note Circulation to 31st October, 1918	160,000.00	
Subscriptions to Patriotic Funds	46,000.00	
Reservation for Bank Premises	200,000.00	
		2,326,000.00
Balance of Profit and Loss carried forward		$ 1,901,613.22

GENERAL STATEMENT—31st October, 1918.

Liabilities.

Deposit with the Minister for the purposes of the Circulation Fund			1,038,166.60
Other Assets not included in the foregoing			216 650.26
			$558,413,546.12

VINCENT MEREDITH,
President.

FREDERICK WILLIAMS-TAYLOR,
General Manager.

To the Shareholders of the Bank of Montreal.

We have checked the Cash and verified the Securities of the Bank at the Chief Office on the 31st October, 1918, and also at another time as required by the Bank Act, and we have found them to be in accord with the books of the Bank. We have also checked the Cash and verified the Securities at several of the Principal Branches of the Bank at various times during the year. We have obtained all information and explanations required, and all transactions that have come under our notice have been, in our opinion, within the powers of the Bank. We have compared the above Balance Sheet with the books and accounts at the Chief Office of the Bank, and with the certified Returns received from its Branches, and we certify that in our opinion it exhibits a true and correct view of the state of the Bank's affairs according to the best of our information, the explanations given to us, and as shown by the books of the Bank.

Montreal, 20th November, 1918.

J. MAXTONE GRAHAM,
JAMES HUTCHISON,
GEORGE CREAK,
} Auditors.
Chartered Accountants.

Monetary Times Annual

1919

YEAR after year the MONETARY TIMES ANNUAL finds a most cordial reception at the hands of business and financial interests in Canada. Its intrinsic value as a work of reference is recognized in the offices of financial and commercial houses not only throughout Canada but in all financial centres of the world—in fact, wherever there are those who have investment and commercial interests in Canada.

The 1919 Annual, on which our editorial organization is now at work, will contain statistics covering banking, clearing houses, insurance, bonds, dividend records, fire losses, war finances, loans, exports, imports, etc., which it would be almost impossible for anyone to gather together without an expenditure of much time and effort.

Orders for advertising space are now being received for this issue. The earlier orders are received the better can we serve you in the matter of position.

Read what a few of Canada's leading men of affairs have to say concerning the *Monetary Times Annual*:

"I also wish to congratulate you on the splendid New Year issue of your paper. To my mind there is really more information between the covers of that issue for the benefit of Canada generally than I have ever seen in any magazine published in Canada or elsewhere, and I am sure you really deserve our congratulations in this respect."—E. F. HUTCHINGS, President, Great West Saddlery Company, Winnipeg.

"To my mind your annual publications are head and shoulders over anything of the same nature that I have ever seen in all my wanderings. Your Annual always finds a permanent place on the shelves of my library: and I notice that it also does so in the libraries of most of the thoughtful community throughout the country. It is a great work."—F. MACLURE SCLANDERS, Commissioner, Border Chamber of Commerce, Windsor, Ont.

"I have received a copy of your Annual, and am very much pleased with it. It is very full and covers an immense deal of ground, and gives information to the seeker of knowledge that is valuable."—SIR GEORGE FOSTER.

"You have certainly condensed a wonderful body of information into a form which cannot but prove of enormous educational value."—G. FRANK BEER, Toronto.

"I find the number exceedingly interesting, as there are many articles which have a direct or indirect bearing on the work of this Board."—MAXWELL SMITH, Chairman, Land Settlement Board, Victoria, B.C.

"I have to thank you for the copy of the annual review of *The Monetary Times*. It is indeed a most valuable document both in business and finance."—SIR EDMUND WALKER, President, Canadian Bank of Commerce.

"In acknowledging receipt of the annual number of *The Monetary Times*, I would like to take the opportunity of saying that it is welcomed just as one welcomes an old and tried friend. It is never disappointing, but responds to one's inquiries in the most satisfactory manner. It lives because it deserves to live."—S. R. PARSONS, Past President, Canadian Manufacturers Association.

"The general appearance and compilation are excellent and the publication constitutes a valuable record of Canadian financial events during the past year"—SIR FREDERICK WILLIAMS-TAYLOR, General Manager, Bank of Montreal.

"It is a magnificent issue."—MR. T. BRADSHAW, City Treasurer and Finance Commissioner, Toronto

MUNICIPAL BOND MARKET

The Monetary Times Weekly Register of Municipal Activities and Financing

Quebec, Que.—Borrowing powers for a sum of $274,000 will be sought by the city of the legislature for new paving and waterworks. Included is $26,816.95 to defray damages caused during the riots last spring and $21,800 for war expenses during the past year.

Prince George, B.C.—The following certificates, dated November 8th, have been issued by the municipal department of the province of British Columbia: Municipal hospital, Nos. 1, 2, 3, 4, 5, $1,000 each, payable May 7th, 1933, interest 6 per cent., payable half-yearly; city hall, Nos. 1, 2, 3, 4, $1,000 each, payable May 7th, 1928, interest 6 per cent., payable half-yearly; streets improvement, Nos. 4, 5, 6, 7, $1,000 each, payable May 7th, 1928, interest 6 per cent. payable half-yearly; electric light, Nos. 6, 7, 8, 9, $1,000 each, payable May 7th, 1933, interest 6 per cent. payable half-yearly; waterworks, Nos. 10, 11, $1,000 each, payable May 7th, 1933, interest 6 per cent. payable half-yearly.

Saskatchewan.—The following is a list of authorizations granted by the local government board from September 27th, 1918, to October 31st, 1918:—

School Districts.—West Gap, $2,500, annuity, 10-years; W. S. Empey, Elrose, Sask. Queensville, $1,200, annuity, 10-years; J. W. Cunningham, Carlyle. McPherson, $450, instalment, 5-years; Chris. A. Walshe, Grenfell. Watson Creek, $2,800, annuity, 10-years; J. Standring, Arras. Saline Creek, $2,800, annuity, 10-years; Norman Pollard, Raymore. Thornfield, $700, instalment, 5-years; A. N. Mann, Venn. Eclipse, $2,500, annuity, 10-years; Geo. Buttimer, Aylesbury. Margo, $700, annuity, 10-years; A. Laurie, Margo. Sambor, $2,600, annuity, 10-years; F. H. Forster, Dysart. Allanville, $2,600, annuity, 10-years; N. Jackson, Tisdale. Prairie Lane, $2,500, annuity, 10-years; T. O. Christopherson, Cadillac. Pleasant Butte, $3,000, annuity, 10-years. Gunness, $2,500, annuity, 10-years; R. A. Warcup, Sonningdale. Storthoaks, $2,500, annuity, 10-years; W. C. Rightmyer, Storthoaks. Gumbo Flat, $2,500, annuity, 10-years; Wm. C. Inkster, Lucky Lake. Gergovia, $2,000, annuity, 10-years; J. E. Very, Gergovia.

Rural Telephone Companies.—Plymouth, $500; H. L. [illegible]gh, Watrous. Lipton, $35,000; J. Pendergast, Lipton. [illegible] Park, $2,500; J. R. Haunsell, Birch Hills. Pleasant View, $2,750; J. McLachlan, Briercrest. Zealandia, $1,700; H. L. Morrison, Zealandia. Coleville, $1,650; A. G. Bridger, Coleville. Wheat Valley, $1,100; W. Mahoney, Success. St. Leonards, $1,000; A. R. Hartley, Kamsack. Smiley Western, $[illegible]; Ed. Swan, Smiley. Oak Hill, $1,600; F. J. Ashford, Melville. Goldeye, $8,000; A. Ashley, Teepee. Bright, $3,300; W. P. Hill, Loreburn. Yeomans, $850; H. Walker, Yeomans. Cudworth, $50,000; L. Aussem, Cudworth. Mawer, $6,200; J. L. Grant, Mawer. Naisberry, $7,500; J. Rutledge, Melfort. Ernfold, $750; J. F. Hyce, Ernfold. North Ernfold, $2,300; J. F. Beer, Ernfold. Aneroid South, $6,100; A. M. Murray, Aneroid. Leipzig, $2,700; M. Reppel, Leipzig. Norden, $2,500; P. W. Cossna, Kinistino. Elkhead, $850; F. L. Child, Mortlach. Kincora, $700; C. G. Annable, Glidden. Kimberley, $[illegible]700; D. Kerr, Rosetown. Willow Heights, $1,000; C. W. Dawson, North Battleford. Luton, $1,400; A. O. Hallmark, Stockholm. Manitou Lake, $1,000; G. W. Lawson, Artland. Torondel, $1,700; H. F. Martin, Raymore. South Gravelbourg, $750; J. A. Nobert, Gravelbourg.

Villages.—Lampman, $1,800, 15-years, not ex. 8 per cent., union hospital; F. C. O'Neill, Lampman. Kisbey, $1,[illegible], [illegible]-years, not ex. 8 per cent., road improvements; W. C. Smith, Kisbey.

Rural Municipalities.—Browning, $8,[illegible], 15 years, not ex. 8 per cent., union hospital; A. C. M[illegible], Lampman. [illegible], $5,[illegible], 15-years, not ex. 8 per cent., union hospital; J. B. McConica, [illegible].

Towns.—Regina, $[illegible], 10-years, [illegible] per cent., paving; G. B[illegible], Regina. Town of Leader (authorized), $10,000, [illegible] years, [illegible] per cent., fire protection; W. Mortimer, Leader.

The following is a list of debentures reported sold from September 28th, 1918, to October 31st, 1918:—

City.—Saskatoon, $2,[illegible]25; Saskatoon sinking fund.

Town.—Kamsack, $800, Canada Foundries, Limited, Montreal.

Rural Telephone.—Wiwa Hills, $1,000; A. C. Coughton, Wiwa Hills. Minot, $500, Success, $1,[illegible], [illegible], $2,400; W. L. McKinnon and Company, Regina. Richburg, $706, Goldeye, $8,000; Kerr, Fleming and Company, Regina. Mossbank, $5,000, Herschel, $2,200; Drake-Ballard and Company, Moose Jaw. Perdue, $9,000; Great-West Life Assurance Company, Winnipeg. Keddleston, $830; O. L. McQuay, Regina. Baljennie, $2,300; E. Mitchell, Baljennie. Lipton, $35,000; L. G. Wilkinson, Lipton. Zealandia, $1,700; Regina Public School Sinking Fund and Town of Biggar Sinking Fund.

School Districts.—Lancer, $3,500, Fisher, $2,100; Drake-Ballard and Company, Moose Jaw. Mountain Cedar, $2,500; Great-West Life Assurance Company, Winnipeg. Griffin, $2,500; J. S. Jacobson, Griffin. Etna, $2,400, Saline Creek, $2,800, Badgerdale, $2,000, Watson Creek, $2,800, Ruth, $2,500; Waterman-Waterbury Manufacturing Company, Regina.

DO NOT NEED CONSENT OF FINANCE MINISTER

War-time restrictions have been rescinded on the issues of securities of provincial governments, municipalities, commissions and local governments. Under an order-in-council last December it was provided that such issues could only be made or sold with the approval of the minister of finance. The object of the order was to conserve the Canadian financial market for war issues of the Dominion government and to prevent issues being made for purposes which might well be deferred till the end of the war.

Provision was also made, however, for issues considered absolutely necessary.

On the recommendation of the minister of finance an order-in-council has now been passed which provides that the issues mentioned can be made without his consent being necessary. The minister, it is pointed out, regards it as no longer necessary that war-time restriction should be placed on the borrowings of these public bodies.

The restrictions still stand in so far as the issue of security and stocks of corporations are concerned. But it is probable that they will also be removed at an early date.

GERMAN INVESTMENTS IN CANADA

The federal authorities in the United States have begun an investigation to discover the identity of a syndicate of German-Americans who are said to be the nominal holders of property valued at several millions of dollars, which is held by them as agents for prominent German interests, including the ex-emperor. The principal agent is supposed to be Count Alvo Von Alvensleben, who is now a prisoner at the internment camp at Fort Douglas, Salt Lake City, Utah. A considerable portion of the property in question is in Canada and includes millions of dollars worth of timber and mineral lands in British Columbia and the west.

The Count Von Alvensleben came to Canada about 1904. He first began salmon fishing on the Fraser River and afterwards established himself in Vancouver as a financial agent. In this capacity he built up a large financial business and had transactions with some of the leading institutions in Canada. It is about this time that he is supposed to have received large quantities of money for investment.

Assessment Commissioner G. D. Hastings, of Guelph, has completed his assessment for the present year and expects the figures will show an increase of at least 1,000 in the population and the increase in the total assessment in the city will be approximately $600,000, which means that with the present rate of taxation in force next year there will be an increase of over $18,000 in the collectable taxes of the city. The value of property all over the city has been increased during the year, but there is not much new property.

A tax sale of all South Vancouver properties in arrears for 1914 taxes will be held as early in the new year as possible. At the present time there are 4,429 parcels in arrears, 1,102 being located in Ward One. The amount of taxes amounts to $70,000. If the taxes for 1914, with interest, are paid promptly the property will not be included in the sale. If the property goes to sale, the whole of the arrears and interest up to and including 1918 will have to be paid before the property can be redeemed.

REFORMATION OF FIRE INSURANCE POLICY

Important Decision Handed Down in Case Before United States Court

The Appellate Division of the Supreme Court of New York State, First Department, has just handed down a decision in an action brought by George V. Coe against the London & Lancashire Fire Insurance Company, Limited (Western Department), in which the Appellate Division affirms with costs the judgment rendered last spring by Supreme Court Justice Weeks, in favor of Mr. Coe, reforming the policy in question and granting him judgment thereon as reformed for the sum of $9,206.67.

The facts are set forth somewhat in detail in the opinion of the Appellate Division, which is as follows:

Appeal by defendant from a judgment in favor of the plaintiff for the sum of $9,206.67; Robert N. Holt, of counsel (Charles R. Barge, attorney), for appellant; William B. Ellison, of counsel (Bruce Ellison and Andrew A. Fraser with him on the brief; Ellison & Ellison, attorneys), for respondent.

SMITH, J.:—The Gulf Pipe Line Company, plaintiff's assignor, was the owner of a number of oil tanks in Oklahoma, which had been insured in two insurance companies, one of which will be called the Boston Company and the other the Norwich Union. Johnson & Higgins, insurance brokers in New York City, were acting for the Gulf Pipe Line Company in taking care of this insurance. Carr & French, insurance brokers located at Tulsa, Oklahoma, had placed the insurance in the Boston Company as agents for that company and knew the contents of the policy issued. When first issued the Boston policy contained a clause pro-rating the liability upon the different tanks, but thereafter the pro-rating clause was expunged and a rider attached making the policy a full liability policy. Thereafter Carr & French notified the Gulf Pipe Line Company that the Boston Company cancelled its risk under the terms of its policy, and a time was fixed at which the liability of the Boston Company should cease. Thereupon, Johnson & Higgins, acting for the Gulf Pipe Line Company, communicated with Carr & French and asked them to secure other insurance to replace the Boston policy. On June 21st, 1915, Carr & French assumed to bind liability in the defendant company for $1,000,000 of insurance and on the same day telegraphed to the defendant company that they had bound them for that sum and that the Norwich Union had $5,000 concurrent insurance on each tank.

Error in Instructions.

Upon the 23rd, 24th and 25th of June, 1915, certain of these tanks were burned. The policies had not then been issued. Upon June 24th, pursuant to a request previously made, Johnson & Higgins sent to Carr & French a slip to be attached to the policies specifying the nature of the risk. In this slip was a provision for pro rata insurance. This provision was left in the slip through a mistake of a clerk in the office of Johnson & Higgins. Such a slip was originally attached to the Boston policy but the pro-rating clause was afterwards expunged, as above stated. The Boston policy as amended was in the hands of Carr & French when Johnson & Higgins asked them "to replace" the Boston insurance. Carr & French issued a policy of the defendant which complied with the request of Johnson & Higgins "to replace" the Boston Company policy in all particulars except that the liability was limited to a "pro rata proportion."

The defendant company did not contest liability upon the policy, but has paid the amount of the policy upon the basis of a pro rata liability. The plaintiff claims that the policy should be reformed so as to strike out that clause which would give to the plaintiff a judgment of about $8,000 additional, as it would increase the defendant's liability to that amount, and the plaintiff asks judgment for this sum after such reformation.

The trial judge has found that Carr & French were acting as the agents for the defendant company, that they had full knowledge of the exact terms of the Boston policy and that it was their intention, as well as the intention of the plaintiff's assignor, to insure upon full liability and not upon the basis of a pro rata liability and has given judgment to the plaintiff for the sum of $8,000. The sole question in the case is whether the contract should be reformed.

Upon this question defendant first contends that Carr & French were not their agents. But the defendant has recognized them as their agents in the correspondence that afterwards took place. In a letter of December 14th written by defendant, they were spoken of as the defendant's agents. Moreover, upon June 21st Carr & French notified the defendant that they had bound this risk for the defendant and they signed the defendant's policy as agents. Upon this policy the defendant afterwards made partial settlement. This would seem to be strong proof that they were acting as the agents for the defendant. If there was any conflict of evidence as to agency, the fact was found in favor of the plaintiff.

Carr & French being the agents for the defendant, there was ample evidence to authorize the reformation of the contract. This pro rata clause had been in the Boston policy at first and had been expunged therefrom. Carr & French, with the possession of this policy and having acted for the Boston Company in notifying the plaintiff's assignor of its cancellation, had full knowledge of just what that policy was. They had knowledge that the insurance sought was to replace this Boston liability. Their bill for premiums was upon the basis of absolute liability and not of pro rata liability. The attachment of the slip furnished by Johnson & Higgins was not until after the fire and after the defendant's liability had been fixed. The finding of the court that both parties intended to create full liability instead of pro rata liability is founded upon abundant evidence.

The judgment should therefore be affirmed, with costs.

MISREPRESENTATION CASE IN HAMILTON

On Wednesday, November 13th, action was brought by Mr. S. B. Thomson against Morris & Wright, of Hamilton, brokers, et al, for the recovery of money paid for National Pulp and Paper stock. Tho plaintiff charged C. S. Wilcox, Sir John Hendrie, James Turnbull, Cyrus A. Birge, R. S. Morris and Messrs. Hobson, Wright and McDonald with deliberate conspiracy to defraud the public.

On the recommendation of Mr. P. R. Bradley, Mr. Thomson purchased shares in the National Pulp and Paper Company at $11 per share. He said that Mr. McDonald, manager of the Mercantile Trust Company, had told him he would be lucky to get them at that price. The Mercantile Trust Company made him a loan upon the security of this stock and a statement was made by the company's accountant that a total of $18,600 of their money had been loaned to different persons from capital funds on security of 1,950 shares of the stock. The action against the Mercantilo Trust Company was dismissed on tho grounds that it was not to their advantage to make a loan upon stock which was not of value, and evidence was produced to show that the stock of the National Pulp and Paper Company was actually of some value. As regards Mr. McDonald, personally, it was held that he could not be liable for merely expressing his opinion regarding the stock.

The case against the other defendants was also dismissed with costs.

MINING PRODUCTION IN THE BRITISH EMPIRE

The Imperial Institute has, with the advice of the Mineral Resources Committee, prepared a map and diagram showing the chief British countries of occurrence and production of metallic ores and the relation of their outputs to those of other countries. The statistics aro for the year 1915. The following table compares the British output with the world output of some of the most important metals:

	World's Output.	Total British Output.
Gold	23,000,000	14,477,167
Silver	200,000,000	37,899,263
Platinum	148,574	·97
Copper	1,100,000	102,000
Tin	100,000	67,780
Lead	1,200,000	208,259
Zinc	1,000,000	103,247
Antimony ore	100,000	5,704
Aluminium ore	650,000	12,599
Bismuth ore	600	45
Iron ore	150,000,000	15,890,827
Manganese ore	850,000	456,496
Chromium ore	180,000	69,633
Nickel	40,000	30,392
Tungsten ore	12,000	4,268
Molybdenum ore	300	142
Vanadium	2,000	....
Mercury	3,500	3

PRODUCTION OF BREAD IN CANADA

August Cost Shows Slight Decrease—Flour Costs a Shade Easier

From the reports of 122 bakers tabulated from the various districts of the Dominion by the Cost of Living Branch of the Department of Labour, the tables show a total for August of 74,817 barrels of wheat and substitute flours used, of which the latter formed a little over 10 per cent.

Flour costs were a shade easier. The totals for the twenty-five districts under report showing an average of 6 cents per barrel less than July.

The total materials used cost 60 per cent. of the whole, leaving 40 per cent. for manufacturing and selling costs.

An examination of the quantity of flour and flour substitutes used for the period shows there was a small general increase in the August consumption over that of July in Montreal, Ottawa, Toronto, Winnipeg and Vancouver.

The yield of bread per barrel of flour kept steady for August, and was fully up to the normal average.

In the distribution of costs it is to be noted that materials, including ingredients, are practically the same as July, while baking shows a small increase, delivery and management slight decreases, all resulting in one-fifth of a cent decrease for the total of the Dominion.

Cost of Materials.

As the cost of materials is perhaps the easiest for the baker to report with accuracy, the figures bear witness to the fact, that after including such a representative number of reports, covering the districts named, the figures show the following comparison for July and August:

	For July.	For August.
Wheat flour and others	4.168c. per lb.	4.165c. per lb.
Ingredients	.508c. "	.508c. "

The success of the bakers in the use of substitutes such as rye, corn and oat flours during the past months is creditable to their skill, for they have given a palatable and nutritious loaf on a 10 per cent. basis of substitutes, and now with the new government standard flour on the market even better results may be expected.

Slight decreases in cost are shown in the Halifax district, Montreal, Ottawa, Group No. 1 Toronto, Hamilton, Brantford, while Quebec, Sudbury, Barrie, Winnipeg and Edmonton give a fractional increase, the other zones remaining about the same as in July.

Cost of Production.

The following statement shows the cost of producing one pound of bread and the cost of flour per barrel in the principal cities of Canada for the month of August, 1918:

Locality.	Cost of Flour per Barrel	Total Cost of one pound of Bread
Halifax, Amherst, New Glasgow, Sydney and Truro	11.39	6.522
Montreal, Group No. 1	11.23	7.527
Montreal, Group No. 2.	11.06	6.881
Quebec	11.37	6.263
Sherbrooke and St. Hyacinthe	11.01	6.753
Ottawa	11.12	6.479
Kingston, Belleville, Napanee and Gananoque	11.16	6.384
Iroquois and Martintown	11.16	6.486
Toronto, Group No. 1.	10.93	6.696
Toronto, Group No. 2	11.21	6.774
Sudbury, New Liskeard and Cobalt	11.91	6.661
Barrie	11.26	6.212
Hamilton and Beamsville	11.38	6.420
Brantford	11.52	6.339
St. Catharines and Niagara Falls	10.99	6.522
Guelph and Stratford	11.85	6.830
London and Ingersoll	10.74	6.338
St. Thomas, Sandwich and Ridgetown	11.14	6.277
Windsor and Sarnia	11.87	6.304
Shelburne and Owen Sound	11.23	6.553
Port Arthur	10.75	6.708
Winnipeg	10.46	6.785
Edmonton	10.23	6.210
Calgary	9.95	6.574
New Westminster, Victoria and Vancouver	10.67	7.354
Dominion average	10.99	6.783

RUSSIAN GOLD RESERVE

Russian gold valued at 800,000,000 rubles, taken from Petrograd by the Bolsheviki, has been saved at Kazan by the Omsk Government, generally recognized as a foundation for the reorganization of Russia, A. J. Sack, director of the Russian Information Bureau, announced in New York on the 4th November, on authority of the Russian Embassy at Washington.

The gold, representing two-thirds of the reserve in the Russian Treasury when the Bolsheviki gained control of the capital late in 1917, was transported by them to Kazan and thence to Samara. Agents of the Omsk Government, obtaining possession of it, took the metal to Omsk.

News of the coup was cabled to Washington by I. A. Michailoff, Secretary of Finance at Omsk, Mr. Sack said. The gold is worth approximately $400,000,000. The Omsk Government, according to recent advices from Russia, is rapidly gaining recognition among the anti-Bolshevik councils, as the nucleus for the formation of a Conservative Government.

CANADA'S TRADE DECREASES

Canada's trade for the first seven months of the fiscal year, as shown by the October statement issued from the Customs Department on the 15th inst., reached a total of $1,294,493,887. This is a decrease of $280,991,996, compared with the same period a year ago.

The decrease for the month of October in comparison with October, 1917, is $30,799,966, the total for the present year being $207,261,007.

The decline in domestic exports during the seven months period, as compared with the same period in 1917, amounts to $201,817,516, while imports total $68,027,671 less than they did in the first seven months of the past year. Domestic merchandise exported during the first seven months of the present year amounted to $720,139,950, and imports for the same period amounted to $560,074,029.

The decrease in exports is due largely to a falling off in the total of domestic agricultural products sent out of Canada, amounting to $141,160,355. The export of Canadian manufactured articles also is less than it was during the seven-month period of 1917 by $67,291,079.

DOMINION VITAL STATISTICS

A long step towards the solution of public health problems will be taken with the completion of the work now in hand by the Dominion Bureau of Statistics in organizing the Vital Statistics (births, deaths and marriages) of Canada. A conference of officials was held in the Bureau at Ottawa in June last, and preliminary action taken towards a scheme of Dominion and Provincial co-operation. The report of the conference was recently issued and is now available for distribution. In addition to the Provincial Departments, representatives of the Canadian Medical Association, the American Society of Actuaries and of the United States Vital Statistics Division were present.

The chief difficulty lies in the fact that the Provinces have different legislation and different methods of collecting and compiling results, so that it is impossible to make comparisons or to unite the returns into comprehensive totals, though health problems are essentially of a kind that must be studied on a broad basis. The object of the conference was to arrive at a scheme of uniform legislation and administration by the Provinces and the setting up by the Dominion of a central clearing house. Agreement was reached on the general principles involved, and a model bill and set of forms was sketched out for reference to a committee for final adjustments. A copy of the report of the conference which contains a full description of the situation now reached may be obtained on reference to the Dominion Bureau of Statistics at Ottawa.

On November 14th President Carranza of Mexico signed a decree, which will be published to-day, reforming the monetary system of Mexico, by placing it on a strictly gold basis. The recent monetary crisis was caused by the exportation of silver half-peso pieces, which, as the result of the high price of silver, were worth more as bullion than as coin. Business has been seriously handicapped for a fortnight by the scarcity of change. Under the new decree peso and half peso pieces will be coined with less silver in them, making their exportation profitless.

Union Bank Building - WINNIPEG

BUSINESS BETTER THAN LAST YEAR

According to Winnipeg Bank Manager, Present Conditions are Better Than at Same Time Last Year

"As to general trade conditions throughout Canada in general and the west in particular," says Mr. C. W. Rowley, the manager of the Canadian Bank of Commerce in Winnipeg, "I would say that they are equally as good this year as they were last, if not a little better. Of course, prices are higher all along the line, and the cost of living is greater, and no doubt there will have to be an adjustment in this respect.

"It is a good time for all to carefully examine their affairs, check up their stocks so as not to be overstocked at high prices, keep financially strong and liquid, keep well insured, and above all, prevent losses by fire in home, office, store, factory, mill, etc., and help to decrease Canada's yearly fire loss.

"Deposits in the banks at the close of September amounted to over $1,626,000,000, which means $200,000,000 more than a year ago, and the available funds of other financial institutions are somewhat larger than they were at this time last year. These are the largest figures in the financial history of this country, are cold hard facts with regard to our present conditions, and augur well for the success of the Victory Loan.

"As an evidence of financial conditions in Winnipeg, one understands that the taxes paid to date are in the neighborhood of $2,000,000 more than they were at this time last year, which shows Winnipeg's financial ease, which can be taken as a criterion for Canada. This has no doubt been brought about by the discount of 1 per cent offered for payment prior to October 31.

Banks Assist Business.

The banks are prepared in the future as in the past to assist any reasonable business proposition, and to give every assistance in increasing the agricultural resources of the whole Dominion, as well as its manufacturing business. The enormous increase in Canada's exports is a gratifying result. One has no hesitation in saying that with a United Canada from ocean to ocean and taking into consideration what Canada has done since the outbreak of war, there is nothing impossible to a resourceful, resolute, ready, reliable people such as we claim to be; in fact, Canada has already done a great many hitherto impossible things. Our domestic Victory Loans since August, 1914, to October 28, 1918, were $750,000,000, plus subscriptions to Patriotic Fund, Red Cross Society, Belgian Relief Fund, Secours Nationale, Serbian Relief Fund, Y.M.C.A., Salvation Army, Knights of Columbus, etc., which are simply assurances of all necessary future demands being met. Here's to the Fifth Fighting Victory Loan.

Our days of easy export are past and gone. Canada must now realize that exports of all kinds from this time on are on a competitive basis. With the past four years of experience we should be able to take our place in the world markets as to goods and prices. The war must be paid for and increased production for export all along the line is vitally necessary. We need busy people and busy land—idle land and idle people are useless to the state.

Forty years ago that great Canadian, Sir John A. Macdonald, said: 'You cannot check Canada,' and I think we Canadians cannot, save by a universal upheaval of the earth's surface, be deprived of the two hundred or more million acres of agricultural land which we possess, of our unlimited forests, coal and mineral deposits of all kinds, untold water power, our unlimited supplies of fish in the Atlantic and Pacific oceans, Hudson's Bay and inland fisheries (Manitoba has untold assets in respect to fish and water power as yet untouched), the development or exploitation of any one of which on a large and businesslike scale would support five times our present population.

Spirit of Confidence.

Never [illegible] there exist throughout Canada the spirit of confidence and faith in the country which [illegible] the [illegible] which no passing storm can kill. When we consider that we went into war after two years of poor crops and the [illegible] strain of the over inflation of real [illegible] to hold our [illegible] with the world [illegible] with a war on our hands [illegible] we were going to do—thank God, we decided to run that grand old flag with the Christian crosses in it, that has stood and stands for so much—the Union Jack—up to the masthead and nail it there and throw the hammer away; and from that day to this Canada has gone steadily forward, let us hope, in the eyes of God and man. One is safe in saying that we and the world have unlimited confidence in our future—confidence in the capability, capacity and energy of those in authority, and of our citizens, our industrial resources and the fundamental soundness of our finances and business conditions, and our present and future prosperity and certainties.

"Times of depression will come and go and come again, but with sound, common, horse sense in those in control of our Dominion and provincial affairs, as well as the heads of our large financial and manufacturing institutions, our agricultural and labor leaders, confidence will remain and withstand all, for the reason that the future of this country promises to equal the record of any other country. Last, but by no means least, in the development of the country will be the returned soldiers. They will come back with a very much increased knowledge of the world, its ways and requirements, and no doubt with a much enlarged vision, and those brave crusaders who are so incapacitated to 'carry on' as of old, will be given every facility to take up some other vocation; and they and their physically fit comrades will be great factors in enlarging and building up a British Canada on sound foundations.

Means Harder Work.

"Our untold natural resources are as yet practically untouched. To my mind, after living and doing business in Canada from the Atlantic to the Pacific, there has never been a time when the confidence and essential soundess of our people in business conditions and in the agricultural, commercial and financial future of this country were better justified than now. It means harder and longer work. Save more and spend less. All together for a great British Canada!

"With the drawing closer of the great English-speaking people it simply means that the people of the empire and of the United States will take a livelier interest in our development in the future than in the past, and long may there be

> 'Two empires by the sea,
> Two nations great and free.' "

TELEPHONE COMPANY MUST BRING EVIDENCE

The Dominion Railway Board, in a judgment handed down on November 11th, grants the application of the municipal corporations of the cities of Montreal, Toronto and Hamilton, and by the Union of Canadian Municipalities, for an order directing delivery by the Bell Telephone Company of evidence in support of the company for an increase in rates. In the opinion of the board, the request made is a reasonable one, and the company is ordered to return covering its operations from 1913 to 1917. The return must cover gross operating revenue, operating expenses, annual maintenance, depreciation, taxes, net operating revenue, etc. Other items called for include the amount of the company's capital, charges, including stocks, bonds and floating debt, the value of the company's lands and plant, a statement showing increases in labor costs, and a statement showing the estimated increase in revenue that would be enjoyed by the company under the tariffs now submitted; the statement to show in detail the increases expected under the different rate changes brought about by the new tariff. The company must also supply particulars as to the increased cost of materials, as well as particulars of increases in overhead charges, including capital charges and taxes, incident to the carrying on of its business.

The British output of shipping in October was 136,000 gross tons, more than 15,000 less than the September losses. The output of the world for the quarter ending September 30th exceeded the losses by nearly 500,000 tons. The British total losses for the submarine war were nearly 9,000,000 tons, of losses for the submarine war were nearly 900,000 tons, of which 750,000 tons have been replaced or rebuilt. New tonnage is now a complete gain, while the submarine inactivity lasts.

DOMINION TRUST ASSETS OVER HALF A MILLION

The total assets of the Dominion Trust Company, which Mr. Andrew Stewart, retiring liquidator, is handing over to his successor, Mr. J. C. Gwynn, have been valued at $577,368.98. This valuation has been made as of November 7, 1918, the date on which the formal change of liquidators took effect. The valuation is made up as follows: Loans, advances to estates and clients, mortgages and debentures, notes and accounts receivable, $195,976.63; amounts due from contributories, $100,000; real estate, $68,000; vault lining, door, safe deposit boxes and furniture, $29,600; total unrealized assets, $393,576.63; cash on hand and in bank, $183,792.35; total assets, $577,368.98

Advices received at Ottawa indicate that New South Wales has fixed three pounds ($15) as the new standard minimum wage. This is an advance of $1.08 per week over the old minimum wage.

NEED FOR LIVE STOCK EMPHASIZED

Conference of Producers and Packers Meets with Dominion Government

Because it was estimated that 115,000,000 head of all live stock had been lost to Europe through depletion in stocks due to the war, it was urged at the meeting of live stock producers and packers with the Ministers of Agriculture at Ottawa on November 19th that Canada should lay special stress on this branch of farming in the future. It was stated that Germany grows ten months of the grain supply needed for her people, and that with all the countries the cereal supplies would be those most quickly replaced, but that it took a long time to build up or restore a live stock industry. The claim that there was starvation in Germany must be translated, according to some of the speakers, to mean that there was a dearth of animal fats and meat. In the whole world there was a shortage of three billion pounds of animal fats. The shortage of wool stocks, and the fact that the price had more than quadrupled since the war began, made the sheep an important animal for Canadians to deal with. Hides would also be in great demand for a long time. In the face of these unexampled opportunities it was urged throughout the sessions that packers and growers should get together and co-operate in such a way as to build up a great industry to their mutual profit.

Pay Off National Debt.

Dr. J. H. Grisdale, Deputy Minister of Agriculture, presided at the opening meeting, which was addressed by Hon. T. A. Crerar, Minister of Agriculture; Chairman H. B. Thomson of the Canada Food Board, and Mr. H. S. Arkell, Live Stock Commissioner.

Emphasis was laid throughout the discussion upon the important part live stock may be made to take in paying the national debt incurred by the war.

"Annual interest upon our war debt alone will amount to over $55,000,000," said Chairman Thomson. "Most of that amount has got to come out of the top six inches of the soil. It is my firm conviction that the live stock industry's development is the most important part of reconstruction work that can come before the Government.

"Great Britain will depend upon Canada and the United States for animal fats for some time to come. The abnormal demand for wool during the war, and the shortage of sheep is shown in the increased price of wool. In 1912 raw grease wool was worth 14 cents a pound. In 1918 it had risen to 68 cents. The farmers of Canada won't be taking any chances by increasing their live stock operations in every direction. By increased production of live stock we can pay the interest on our national debt, wipe it off entirely, and start the era of peace time prosperity Canada is entitled to."

Not Normal for Four Years.

It was the general opinion of the representatives of the packing houses present, based on several cases from the reports of their agents overseas, that the market for live stock products will not become normal for at least four years. At the present time the export of beef is limited only by the refrigerator capacity of the ships available.

Mr. E. C. Fox, of the William Davies Company, declared that the market for hogs was greater than Canada could supply. Denmark was short 1,800,000 hogs. Irish killings have fallen off from 16,000 per week before the war to between four and five thousand. England's supply was 75 per cent. normal. Seven or eight million head of cattle had been lost to Belgium, while 800,000 head had been driven from northern France by the Germans.

Hon. T. A. Crerar agreed with the meeting upon the importance of impressing the Government with the views of the live stock men, and a meeting of the conference with the Cabinet was arranged for the 20th instant.

WESTERN CANADA FLOUR MILLS COMPANY, LIMITED

In reviewing the report of the above company in our issue of the 15th instant, it was stated that the plants of the company were in an "unsatisfactory" state of efficiency. This was, of course, a typographical error. Owing to the unusual conditions in the grain trade during the year the plant was idle part of the time. Advantage was accordingly taken of this idle period in order to some extent to overhaul the plants, which have now been placed in a satisfactory state of efficiency.

POWERS OF BANK AS CREDITOR

Important Judgment Rendered by Court in Montreal Surprises Financial Men

The Quebec Court of Review recently rendered judgment in harmony with an elementary principle of law founded nearly two thousand years ago, Mr. Justice Lafontaine said, by the Roman Emperor Marcus Aurelius. The principle is that no creditor can justly administer justice to himself, and on this principle the Banque Nationale was held to have been in error when it deducted from a cheque, payable to J. B. A. Pelletier, a sum of $102 claimed to be due on an unpaid cheque of Pelletier, held by the bank, to the order of one Gervais.

The case is interesting to the public generally, and to the banks particularly. Judgment of the first instance, as herein inscribed in review, was in favor of the bank. By the present ruling it is reversed.

In January, 1915, Pelletier was bearer of a cheque for $1,021 drawn by one, Corbeil, on the Banque d'Hochelaga, and accepted by that bank. Pelletier presented the cheque for payment at the Banque Nationale, where he was known by the assistant manager, who agreed to cash it. At that time the Banque Nationale had to hand a cheque of Pelletier's to the order of Gervais which had not been paid, and in cashing the Corbeil cheque for $1,021, the bank official deducted therefrom the sum of $102 claimed to be due on the unpaid cheque. Pelletier opposed this proceeding, maintaining that the unpaid amount was not his affair, but was the liability of Gervais, who had undertaken to look after the matter. The question submitted now for the court's consideration was whether the bank had a legal right thus to reimburse itself. Justice Lafontaine pronounced the court's unanimous opinion to be that the bank acted in error.

Not According to Law.

"The bank," said the judge, "submitted through counsel that its proceeding was quite proper; that any other bank would have acted in the same way under the circumstances; and that in financial circles it was a matter of surprise that the bank's action should be questioned.

"The court," Justice Lafontaine proceeded, "has not to occupy itself with any particular state of mind of men of finance who often look at things from quite a different standpoint to that of ordinary people. What we have to decide is the law governing the question."

In deciding the point, the court found that the bank's proceeding was absolutely unjustifiable, contrary to the principles of law, and in violation of the rights of the owner of the cheque in question.

In further justification of its conduct, the bank had pleaded legal compensation, but the judges in review could not concur in the judgment of the Superior Court, which held this plea was well founded. A third plea was that Pelletier acquiesced in what the bank had done. This plea was rejected in the light of the evidence submitted, the court's conclusion on the whole issue being that there was error in the judgment of first instance which ruled in favor of the bank.

Final Judgment Rendered.

"At the same time," concluded Justice Lafontaine, "this court cannot ignore the fact that Pelletier, who claims from the bank payment of a sum of $102 in the circumstances mentioned, is himself debtor to the extent of the amount stated. If there is a law in favor of Pelletier under which he can demand the restitution of $102 illegally withheld by the bank, there is equally a law that compels a debtor to pay what he legitimately owes. The bank was wrong in appropriating to itself the sum which is here claimed, or, in other words, in administering its own justice. Pelletier, on his side, was wrong in not, before entering his action, having made provision for the payment of his cheque, for he cannot claim from the bank that which is due without acquitting himself towards the bank. He ought at least to have offered, with his action, to return his cheque to the bank in order that the latter might recover the amount from whomsoever it was due. He has done this in response to the bank's pleadings, but this does not regularize the situation. If it is true that in the instance there has not been legal compensation, and if the two credits—that of Pelletier against the bank, and that of the bank against Pelletier—still exist, then in the absence of legal compensation there may be compensation ordered by the court itself—in other words, judicial compensation. And this is the conclusion the court has reached in order to render full justice to the two parties.

"The judgment a quo is reversed and the inscription of Pelletier maintained with costs; and, in granting judicial compensation, the court declares the credit of Pelletier compensated by the clear and exigible credit of the defendant bank to a like amount. But the bank, being by its illegal conduct the author of this litigation must pay all the costs, the action of the plaintiff Pelletier being therefore maintained for the costs only."

Justices Panneton and Loranger concurred.

TO GET CANADIAN TRADE

Four steel fabricating mills, costing $15,000,000 and to employ 1,600 men when operated at normal capacity, are to be built at Duluth, Minn., at the close of the war by the United States Steel Corporation. An agreement to that effect has been reached at a conference between Judge Gary and other steel corporation officials and a Duluth committee. The plants to be erected will include tinplate mills, a sheet mill, a wire mill and a nail mill.

The plants are to be of sufficient capacity to take care of the demands of the Uinted States and Canadian northwest, and their erection is to be rushed through immediately after the close of the war. Enlargements and additions are to be made from time to time, according to the requirements of the territory covered.

For this concession on the part of the steel corporation Duluth agreed to discontinue the basic price agitation, and co-operation between the city and the industrial corporation is provided in the agreement. With the completion of these proposed plants the steel corporation's capital investment in Duluth will aggregate $40,000,000.

POTATO YIELD BEST ON RECORD

The Dominion Bureau of Statistics, in a bulletin issued on November 18th, reports on the area, yield and value of potato, root and fodder crops in Canada for 1918, as compared with 1917, the acreage and condition in October of fall wheat sown for 1919, and the progress of fall plowing.

The returns already published showed that the total area planted to field potatoes in Canada this year was 735,192 acres, as compared with 656,958 acres in 1917, both years establishing records. The estimated yield per acre for Canada this year is 143½ bushels, as compared with 121½ bushels last year, and with 150¼ bushels, the average for the ten years 1908-17. The total estimated yield of potatoes for 1918 is 105,579,700 bushels, as compared with 79,892,000 bushels last year. The yield for 1918 is the highest on record, the previous record being over ninety-nine million bushels in 1909. By provinces, the highest average yield per acre is in British Columbia, 228 bushels, the other provinces ranging in order as follows:

Nova Scotia, 194; Manitoba, 185; Prince Edward Island, 170; New Brunswick, 158; Quebec, 147; Ontario, 123; Saskatchewan, 116¼, and Alberta, 70½ bushels per acre. The largest acreage was 38,936,000 bushels from 264,871 acres in Quebec, the yield in Ontario was 20,443,000 bushels from 166,203 acres. The average value per bushel of the potato crop is 98 cents, as compared with $1 last year, and the total value is $103,636,100, as against $80,804,400 last year.

The total yield of turnips and other roots is estimated at 120,767,900 bushels from 343,037 acres, an average per acre of 352 bushels, as compared with last year's total of 63,451,000 bushels from 218,233 acres, the average yield per acre being then 290¾ bushels. Hay and clover give the record yield of 14,595,500 tons from 10,544,625 acres, an average per acre of 1½ tons. The corresponding figures last year were 13,684,700 tons from 8,225,034 acres, or 1¾ tons per acre. The previous record yield of hay and clover was 14,527,000 tons in 1908. The average value per ton of hay and clover is $9.75, as against $10.38 per ton last year. Alfalfa shows a yield of 448,600 tons from 196,268 acres, or 2¼ tons per acre, as compared with 262,400 tons from 196,428 acres, or 2½ tons per acre last year. Of fodder corn the estimated yield is 4,203,150 tons from 502,069 acres, an average per acre of 8¼ tons.

The total area under root and fodder crops, including potatoes, turnips, etc., hay and clover, alfalfa and fodder corn, amounts to 12,321,351 acres, as compared with 9,576,568 acres in 1917. In total value at local prices, these crops amount in 1918 to $330,975,825, as compared with $268,310,300 in 1917.

The area estimated to be sown to fall wheat for 1919 is five per cent. less than that sown last year, the area being 840,000 acres, as against 886,000 acres, the revised estimate for 1918, based upon the returns collected in June last.

DIVIDENDS AND NOTICES

BANK OF MONTREAL

Notice is hereby given that a **Dividend of Two-and-one-Half per Cent.** upon the Paid-up Capital Stock of this Institution has been declared for the current quarter, also a **Bonus of One per Cent.,** both payable on and after Monday, the **Second Day of December** next, to Shareholders of record of 31st October, 1918.

By order of the Board.
FREDERICK WILLIAMS-TAYLOR,
General Manager.

Montreal, 22nd October, 1918.

THE CANADIAN BANK OF COMMERCE

DIVIDEND No. 127.

Notice is hereby given that a quarterly dividend of 2½ per cent. upon the capital stock of this Bank has been declared for the three months ending 30th November, 1918, together with a bonus of 1 per cent., and that the same will be payable at the Bank and its Branches on and after Monday, 2nd December, 1918. The Transfer Books of the Bank will be closed from the 16th to the 30th of November next, both days inclusive.

By order of the Board.
JOHN AIRD,
General Manager.

Toronto, 18th October, 1918.

UNION BANK OF CANADA

DIVIDEND No. 127

Notice is hereby given that a dividend at the rate of 9% per annum upon the paid-up Capital Stock of the Union Bank of Canada has been declared for the current quarter, and that the same will be payable at its Banking House in the City of Winnipeg, and also at its branches on and after Monday, the 2nd day of December, 1918, to shareholders of record at the close of business on the 15th day of November next.

The Transfer Books will be closed from the 15th to the 30th day of November, both days inclusive.

By order of the Board.
H. B. SHAW.
Winnipeg, Oct. 17, 1918. General Manager.

THE CANADA LANDED AND NATIONAL INVESTMENT COMPANY, LIMITED

DIVIDEND NO. 127.

Notice is hereby given that a **Dividend of Two and One-Quarter per Cent.** (being at the rate of nine per cent. per annum) on the amount paid up on the Capital Stock of this Company, has been declared for the quarter-year to the thirty-first day of December, 1918, and that the same will be payable at the office of the Company, 23 Toronto Street, Toronto, on and after the **second day of January, 1919,** to Shareholders of record at the close of business on the fourteenth day of December, 1918.

By Order of the Board.
EDWARD SAUNDERS,
Managing Director.

Toronto, 20th November, 1918.

As a result of the court of revision of the assessment, held in the city hall, Regina, on November 7th, some $250,000 of assessable property has been added to the roll on which taxes will be imposed for the current year. The most important addition was the Eaton property, assessed at $180,000, the balance being made up principally of additional business assessments.

YOUR MONEY—
HOW TO MAKE IT EARN

To invest his savings where they will be absolutely safe, accessible, and earn their right rate of interest, is the desire of every investor.

Time saved is money earned. Nothing shows this so clearly as the fact that—

$100 invested at 5½% doubles itself in less than 13 years.
$100 saved at 3% takes 23½ years to do the same thing.

Standard Reliance 5½% Mortgage Corporation Debentures

are issued in sums of $100 and upwards for a fixed period to suit your convenience. Interest at 5½% is payable on the day it is due.

No trouble, no worry, no inconvenience. Your security never fluctuates.

Not a dollar has ever been lost by an investor in these debentures.

An interesting booklet about "PROFITS FROM SAVINGS," will be sent free on request.

Paid up Capital and Surplus Funds

FOOD COMMODITIES IN CANADA

The Cost of Living Branch reports to the Minister of Labor regarding stocks of goods in cold storage in Canada on the first of November. The stocks of butter reported amount to 18,306,549 pounds of creamery and 1,532,060 pounds of dairy. This is a distinct decline in the quantity of creamery butter as compared with last month, as would be expected from the enforced sales of overseas shipment. It is, however, about six per cent. more than the supply of this date last year in spite of these large shipments.

There are on hand 6,064,137 pounds of cheese, which is a slight increase over last month, but only about one-third of last year's stock.

The egg stocks are 6,521,176 dozen in cold storage, 1,039,149 on hand other than cold storage, and 2,085,983 pounds of frozen eggs. This is 25 per cent. less in cold storage than last month, and 15 per cent. less than last year at this time.

Oleomargarine shows total stocks of 684,842 pounds; not enough to have much effect on the butter market.

Of pork there are 2,870,880 pounds of fresh frozen, 3,057,794 pounds unfrozen, 4,359,681 pounds dry salted, 14,944,918 pounds sweet pickled and 18,203,891 pounds in the process of cure, making a total of 43,437,164 pounds. This is a slight increase over last month and over last year. The amount in process of cure still remains the largest single class of pork.

Beef supplies consist of 24,977,745 pounds of fresh frozen, 6,084,518 pounds not frozen, 417,764 pounds of cured and 342,847 pounds in process of cure, making a total of 31,822,874 pounds. This is an increase over last month, but is less than the supply a year ago.

Mutton and lamb supplies consist of 4,531,275 pounds frozen and 241,673 pounds unfrozen. This is a hopeful increase of supply to relieve the demand on other meats. It is noteworthy that over one-half of this mutton and lamb is in Vancouver, the port of entry from New Zealand.

The stock of fowl consists of 761,204 pounds of chicken and 510,429 pounds of other poultry.

The stock of fish in storage is 20,454,212 pounds, a 62.3 percentage increase over last year.

The influenza epidemic has delayed some of the reports from the firms reporting, but considering all conditions there are few important delinquents.

The Canadian War Trade Board has removed the restriction prohibiting the use of platinum in the manufacture and repair of jewelry. The restriction has been in force since June last.

The income tax which is now being collected in the district of Quebec will according to estimates bring over $500,000 to the Federal Treasury, while the business tax will reach the million mark.

LARGE CONTRACT FOR COAST SHIPBUILDING COMPANY

One of the largest transactions ever made in ocean-going wooden ships on the Pacific coast has just been completed by the shipping firm of Thorndyke & Trenholme. It was announced on November 16th that the firm has purchased for French interests six wooden motorships being built by the Lyall Shipbuilding Company, of Vancouver, B.C. The consideration was given as about $3,000,000. The ships are of 3,000 tons deadweight capacity each.

Shipping firms in Seattle are also in receipt of definite advices from Italian, French and Belgian interests stating that conclusion of hostilities would find them in the market for all available wooden cargo steamers.

PRINCE RUPERT HAS BEST YEAR IN HISTORY

The year 1918 has been the best business year in Prince Rupert's history. The steady development of the deep-sea fisheries, the expansion of the aeroplane lumbering industry, together with the canneries, the mining and milling, have all contributed toward a very prosperous season.

Things have been on a substantial basis. There has been an actual exploitation of the resources with which central British Columbia has been so richly endowed. Practically every line of business has felt the effect of improved times. Wholesale and retail merchants report healthy commercial conditions and Prince Rupert's rightful position as the financial and mercantile centre of a vast district is coming more into evidence.

The halibut fishing has had much to do with the prosperity enjoyed this year. Close to 500 boats, counting all types, have operated from this port. As an example of the magnitude of the business, it might be noted that weekly catches of 255,000, 674,000, 506,000 and 511,800 pounds of fish have not been at all uncommon. The shipment of aeroplane spruce through here has assumed very big proportions. Millions upon millions of feet are being handled, giving steady and remunerative employment to hundreds of men.

It is officially announced that the $2,500,000 drydock and shipbuilding and repair plant at Prince Rupert, which is admittedly the largest and best equipped on the coast, has been leased to the Mullen Contracting Company, of Pittsburg, Pa., and a contract entered into for the building of a certain specified number of steel ships. Preliminary arrangements are now in progress, and an early start on ship construction is anticipated.

With the transfer this week of the Intercolonial, National Transcontinental, Prince Edward Island and other Federal lines of railway to the control of the Canadian Northern Railway board of directors, approximately 14,000 miles of State-owned roads will fall under single corporate control.

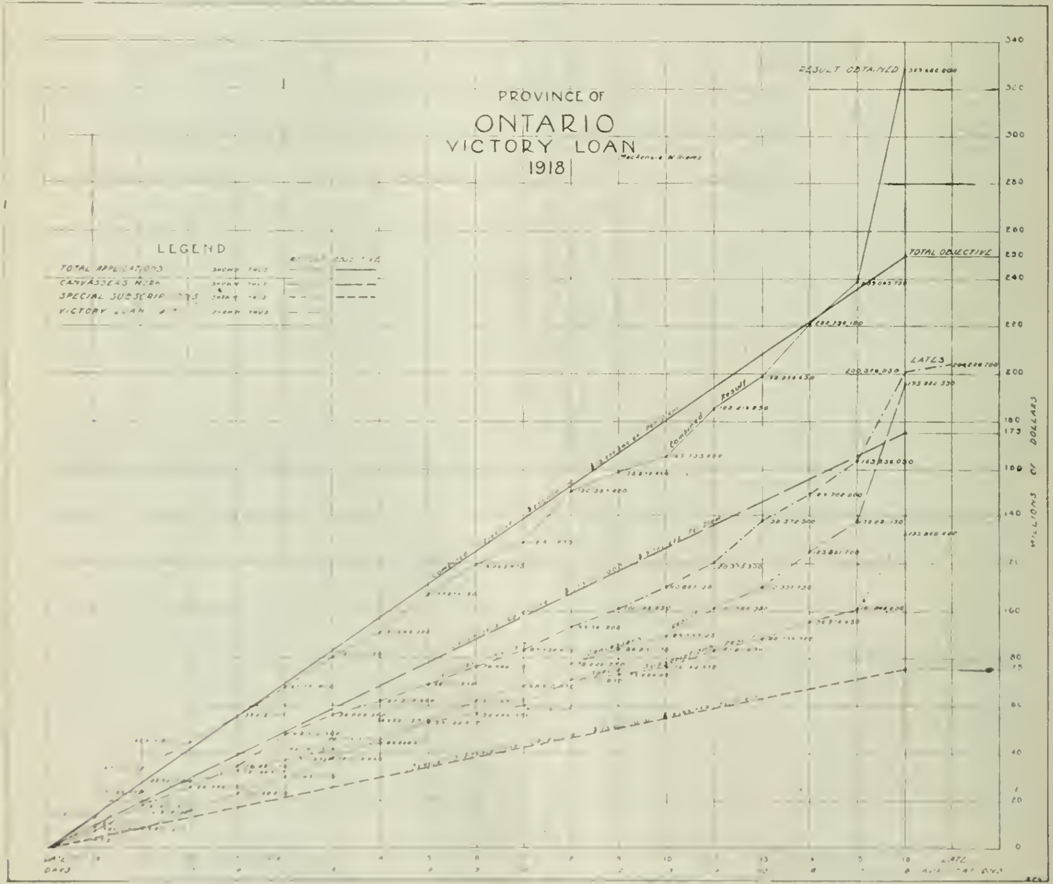
VICTORY LOAN IN ONTARIO

The accompanying chart illustrates the day-by-day progress of the Victory Loan campaign in Ontario. The figures for Ontario are given on page 6, along with those for each of the other provinces of Canada. It will be observed that the total objective for Ontario of $250,000,000, spread over the eighteen days of the campaign, required an average of $13,888,888 in subscriptions each day. During the second, third and fourth days the totals for the province were ahead of the required rate. From the fifth until the second last day, however, the combined results were behind, the large surplus over the objective being entirely accounted for by the results of the last day's work.

The amount assigned to the canvassing teams was $175,000,000. They were substantially behind from the start, and succeeded in passing the day-to-day objective only on the last day. The special subscriptions branch, on the other hand, which aimed at a total of $75,000,000, were far ahead from the very beginning. Until about the end of the first week, in fact, they were credited with higher totals than were the canvassing teams. It will be remembered that on the first two days of the campaign large subscriptions were announced by way of giving it a good start. About the end of the first week the canvassers' results began to climb more rapidly.

An examination of the line illustrating the progress of the 1917 Victory Loan will indicate that it progressed in a similar manner, although the achievements of the final day were not quite so spectacular as they were in the case of the present campaign.



TRUST COMPANY TO OPEN OFFICE IN VANCOUVER

A branch office of the Westminster Trust Company, of New Westminster, is to be opened in Vancouver. Offices have been secured in the Rogers building, Granville Street, where a general trust and insurance agency business will be conducted.

The first transaction of the new branch office was to subscribe $25,000 to the Victory Loan. The Westminster Trust Company has extensive business connections all through the Fraser Valley and interior towns. It is the oldest provincial trust company in British Columbia, and is closely connected with the Okanagan Telephone Company and the Elk Creek Waterworks Company, of Chilliwack, the directorate of these last two companies being practically identical with the trust company's board, F. A. Riddell, manager of the Westminster Trust Company, being also secretary-treasurer of these concerns. The local office will be in charge of Stanley Tytler, who is well known and highly respected in business circles of the coast.

"SOLID AS THE CONTINENT"

HEAD OFFICE - TORONTO

"I Wish I Had Taken Twice As Much!"

Nothing is more often repeated in letters received at our office than the expression "I wish I had taken twice as much insurance while I was about it." When endowments, dividends or cash settlements are paid, the assured very often acknowledges the remittance with that remark. The truth is very few men take as much Life Insurance as they can reasonably carry—and repentance often comes when additional insurance is not procurable. Probably every reader of this paper believes in Life Insurance and carries more or less of it but one should ask himself the question, **Am I Carrying as Much Insurance as I Can Afford?** If the policyholders who are now entering the Company could read the evidence of gratified policyholders and beneficiaries, they would make a great effort to increase the amount applied for—and existing policy holders would double the amount of their protection. "One word more":— What income would your present insurance yield the beneficiary at say 6%?

The Mutual Life Assurance Co. of Canada

Waterloo Ontario

SPEEDY SETTLEMENT

Prompt payment of claims without a moment's unnecessary delay, is one of the first rules of The Great-West Life Assurance Company.

Scores of letters from beneficiaries show how much this promptness often means to them. Here is one letter, from Ontario:

> "Thank you for the prompt and thoughtful way you remitted insurance. Of all the Companies in which my husband was insured, you were the first to remit, although so far away."

Investigate The Great-West Life Policies, and you will find that in all points they leave nothing to be desired

INVESTMENTS AND THE MARKET

News and Notes of Active Companies—Their Financing, Operations, Developments, Extensions, Dividends and Future Plans

Hollinger Consolidated Gold Mines, Limited.—The company's plant is operating at only half capacity, owing to shortage of men, but when the mill is operated at its capacity of about [illegible] tons a day it is believed that the old dividend rate of one per cent. every four weeks can be restored. The last annual report showed upwards of $40,000,000 in gold ore reserves, and a prominent member of the company is quoted as saying that more than forty known veins remain to be developed on the property, with a strong probability of encountering others.

North American Pulp and Paper Company.—The company is reported to be planning an increase in its capacity that should result in a very large gain in its earning ability. It is said to be the plan to increase the capacity to 300,000 tons of pulp and 120,000 tons of newsprint paper annually, as against 115,000 tons of pulp at present.

New and powerful interests recently have become prominent in the company's affairs. Their entry into control was said to mean the inauguration of a more progressive policy in the conduct of the affairs of the company, which has large holdings and apparently excellent facilities for turning out large quantities of pulp and paper.

Dominion Steel Corporation.—As the date draws near for the board meeting of the Dominion Steel Corporation for action on the quarterly dividend on the common, interest and discussion has been revived in the "street" regarding the probabilities of an increase in the rate from 5 to 6 per cent.

Recent reaction in the price of the shares in the course of a couple of weeks from 64½ to 60, coupled with the uncertainties in the minds of many respecting the future of the industry under peace conditions, suggested to some the possibility of a continuance of the extreme conservation which has marked the action of the board in the past.

On the other hand the assurance that the plant will be kept busy on rail orders seems to others reasons why the board may go ahead with what was believed to be a determination to increase the distribution.

It is believed that the government will fix the price of the rails on a basis sufficiently profitable to enable the company to continue the present rate of pay to the workmen until such time as the cost of living shows signs of moderating and also to prevent any disruption in the labor situation at the present time.

Brazilian Traction, Light and Power Company.—The net increase in the earnings of the company in September, amounted to 965,000 milreis and is only exceeded by the net in July and August last, which, in each instance, ran well beyond the million mark. The operating expenses continue high, showing an increase over the similar month a year ago of 191,000 milreis.

The gross earnings for the month amounted to 9,081,000 milreis compared with 9,491,000 in August—a figure that constituted a record in the company's history—and 9,465,000 in July, but being larger than any other month in the current year.

The figures for September, approximated as nearly as possible, but subject to final adjustments in the annual accounts of the subsidiary companies—compare as follows:—

	1918, Milreis.	1917, Milreis.	Increase, Milreis.
Total gross earnings	$9,081,000	$7,925,000	$1,156,000
Operating expenses	4,216,000	4,025,000	191,000
Net earnings	4,865,000	3,900,000	965,000
Aggregate gross earnings from January 1st	77,730,000	68,430,000	9,300,000
Aggregate net earnings from January 1st	39,840,000	36,168,000	3,672,000

International Nickel Company.—The total income of the company for six months ending September 30th last amounted to $[illegible], composed of $7,744,128.68 from earnings and $[illegible].77 from other sources. Administration and general expenses involved $381,843.27, and there was reserved for United States and other taxes the sum of $2,749,125.53, leaving a net income of $4,678,373.65. After $995,090.42 had been set aside for depreciation and mineral exhaustion, there were profits for the half year of $3,683,283.23. Dividends on the preferred and common stock involved $1,940,762, making a balance for the period of $1,742,521.23. The following is the consolidated balance sheet as at September 30th:—

Assets.

Property		$48,544,990.60
Investments—		
United States government securities	$1,318,500.00	
Other securities	537,317.44	
		1,855,817.44
Inventories		8,017,627.65
Accounts receivable		3,238,371.52
Loans		15,000.00
Certificates of deposit		830,000.00
Cash		3,449,124.40
		$65,950,931.61

Liabilities.

Preferred stock	$ 8,912,600.00
Common stock	41,834,600.00
Accounts payable and tax reserves (as provided)	5,130,683.81
Preferred dividend No. 52, payable November 1st, 1918	133,689.00
Accident and insurance funds	273,074.97
Surplus April 1st, 1918	7,923,762.60
Profit and loss (balance as per statement)	1,742,521.23
	$65,950,931.61

RAILROAD EARNINGS

The following are the earnings of Canada's transcontinental railways for the first two weeks in November:—

Canadian Pacific Railway.

	1917.	1918.	Inc. or dec.
Nov. 7	$3,204,000	$3,437,000	+ $233,000
Nov. 14	3,575,000	3,247,000	— 328,000

Grand Trunk Railway.

Nov. 7	$ 944,110	$1,342,941	+ $398,831
Nov. 14	959,136	1,471,654	+ 512,518

Canadian Northern Railway.

Nov. 7	$ 895,400	$1,049,300	+ $153,900
Nov. 14	1,039,800	1,065,900	+ 26,100

Negotiations are under way whereby Canadian Northern Railway trains will run over the lines of the Grand Trunk Pacific Railway between Regina and Moose Jaw. In exchange for this concession the Grand Trunk Pacific will have the use of Canadian Northern Railway terminals at Moose Jaw.

The government will soon be complete owner of the Canadian Northern Railway stock. The minority stock is being purchased, and all but seven thousand shares held in England has been turned over to the government at the same price as was paid to Mackenzie and Mann for their shares. This stock is on the way to Canada. The Dominion will then own all but five shares. The one minority holder is a San Francisco man, who owned five shares of income convertible stock and insisted on his rights to transfer to common stock. He refuses to sell out, so that the Canadian Northern Railway will be owned by the Dominion of Canada and a San Francisco citizen.

GOVERNMENT TO RELIEVE UNEMPLOYMENT

Federal Labor Bureaus to Work in Co-operation with Those of Provinces

A general Governmental policy for handling unemployment is being discussed at a series of conferences held in Ottawa concurrently with the gathering of Dominion and Provincial Ministers. The unemployment conferences will be attended by officers of the various employment exchanges in each Province, and by officers of the two Federal employment exchanges now in process of formation. The Labor sub-committee of the Cabinet will be in touch with the proceedings throughout.

Among the subjects for determination are:

(1) Creation of advisory committees, representative of employers and employed, in all the principal centres.

(2) Preparation, as far as possible, of full lists of the various Dominion, Provincial and municipal public works proposed for the coming year.

(3) Adoption of a common basis of trade classification.

The scheme is the outcome of legislation passed last session. Provision was then made for an expenditure by the Dominion of $50,000 in the first year, $100,000 in the second, and $150,000 in the third. The Dominion Government establishes the two Federal clearing houses—one for the West at Winnipeg; the other for the East at Ottawa. The Provincial Governments, with assistance from the Dominion, maintain their own employment exchanges and work in close co-operation with the two Federal exchanges. It is expected that when the scheme gets well under way additional expenditure will be required on the part of both Dominion and Provincial Governments.

The main idea of the scheme is to systematize employment. The Provincial exchanges, from information furnished by the Federal clearing houses, will be in a position to know exactly where any particular class of labor is required. Thus, it is hoped, an applicant for employment can learn where vacancies exist without unnecessary expenditure to himself.

For the present, the Cabinet Sub-committee on Labor, of which Senator Robertson is chairman, is acting as Central Advisory Committee. Bryce M. Stewart, editor of The Labor Gazette, is in charge of the work of organizing the Federal bureaus.

SEED GRAIN LOANS FROM COMPANIES

Special legislation will be enacted at the coming session of the Saskatchewan Legislature to enable the loan companies to make advances for seed grain to their borrowers, it was announced on November 19th by Hon. George Langley, Minister of Municipal Affairs, and a measure of control will probably be retained by the Government respecting the rate of interest which may be charged by the companies in regard to the additional advance made necessary by financing the mortgagees with seed grain.

The decision of the mortgage companies to finance their own creditors was communicated to the Government recently, following a conference some weeks ago between loan company representatives and the Government. It is estimated that the decision of the loan companies means that 76 per cent. of the seed requirements of needy farmers in the Province will be met in this way.

WORK OF PRESS IN LOAN CAMPAIGN

Sir Thomas White, Canadian Minister of Finance, has written the following letter to the Canadian Press Association, in appreciation of the efforts of the press in the loan campaign:

To the Publishers and Editors
of the Press of Canada:

I desire personally and on behalf of the Government to express our most earnest thanks to the press of Canada for the splendid support given so freely and generously to the Victory Loan. This fine patriotic service is the more deeply appreciated by reason of knowledge of the many difficulties which have been imposed upon the press by war conditions and of the disorganization of staff in so many parts of the Dominion owing to the prevailing epidemic. I feel that the success of the Loan will be in large measure attributable to the invaluable assistance of the press.

W. T. WHITE.

MERCHANTS' BANK REPORT

The financial statement of the Merchants' Bank of Canada for the half-year period ending October 31st last, issued from the bank's headquarters at Montreal on November 18th, shows some remarkable gains. Total assets amount to $165,924,436, an increase of $35,355,783 over the corresponding date last year. Of this total the readily available portion amounts to $72,448,217, being an increase of $16,933,191, showing that the liquid position of the bank is being well maintained. An interesting feature of the gain in readily available assets is the increase of $13,913,837 under the headings of securities of the Dominion and Provincial Governments and of Canadian municipalities and British, foreign and colonial governments, an increase which indicates that a full measure of assistance has been extended to the Canadian and Imperial authorities in the important matter of war finance. Deposits amount to $126,941,581, against $91,357,619 on October 31st, 1917, being an increase for the period of $35,583,962, or more than 36 per cent., with the whole of the increase in deposits bearing interest. Deposits not bearing interest remain at practically last year's figures.

On Tuesday, November 19th, Mr. Edwin B. Parker, Priorities Commissioner in the United States, announced that the entire preference list had been discarded by the War Industries Board.

RECENT FIRES

The Monetary Times' Weekly Register of Fire Losses and Insurance

Brockville, Ont.—November 11—Residence of Mr. W. G. Holmes was damaged. Caused by defective fireplace. Estimated loss, $4,500.

Burlington, Ont.—November 16—Thirteen summer homes at Station 24 were destroyed. Estimated loss, $34,000. The burned homes belonged to the following: Lewis Johnson, 43 Augusta Street; Charles Nash, Charles Wilson, 22 Cannon Street West; Mrs. Frank Hutton, two; Mrs. Mary Thompson, W. H. Yeates, Mrs. McMullen, Mrs. Margaret Irwin estate, J. P. Shepard, two, and Mrs. R. B. Hill, 130 Charlton Avenue West, two. A cottage, owned by W. J. Kingdon, Markland Street, on the lake side, was seriously damaged.

Burnaby, B.C.—November 10—Shingle mill of A. H. McDonald was destroyed. Caused by defective wiring. Estimated loss, $6,000.

Chatham, Ont.—November 15—Storehouse at the rear of W. T. Loggie's residence was damaged.

Elora, Ont.—November 19—Plant of T. E. Bissell Company was destroyed. Estimated loss, $75,000, covered by insurance.

Halifax, N.S.—November 17—Building at 150 Hollis Street was damaged.

NEW ROYAL TRUST BOARD FORMED

A newly-formed advisory board of the Royal Trust Company branch in Ottawa consists of Sir Henry Egan, managing director of the Hawkesbury Lumber Company, Limited, and director of the Bank of Ottawa and of the Ottawa and Hull Power and Manufacturing Company; J. B. Fraser, president of Fraser and Bryson Lumber Company and director of the Bank of Ottawa and of the Ottawa and Hull Power and Manufacturing Company, and A. G. Parker, manager of the Bank of Montreal at Ottawa.

TORONTO INSURANCE INSTITUTE MEETING

The November meeting of the Insurance Institute of Toronto was held in the board of trade dining-room on Thursday evening, November 21st. The October meeting, which was to be the first of the year, had to be postponed owing to the epidemic. The inaugural address of the president, Mr. H. W. Crossin, was accordingly delivered at this meeting, and Mr. Wm. J. Graham, third vice-president of the Equitable Life Assurance Company, of New York, spoke on the subject of group insurance.

Mr. Crossin reviewed insurance activity during the past few months. In the field of life insurance, he said, the outstanding feature is the heavy loss resulting from the epidemic of Spanish influenza. The result would be that losses would very likely be up to the expectancy under the mortality tables, something which the war losses alone of this year or previous years had not accomplished. On the other hand, he pointed out, the catastrophe emphasized the necessity and value of life insurance. The total losses from this cause are not known at the present time. Fire insurance men, he said, awaited with interest the outcome of the investigation being made in Ontario by Mr. Justice Masten. Anxiety was felt regarding the legislation policy of the provincial government. The speaker also mentioned the good work which the Ontario fire marshals' department is doing to assist in reducing the excessive fire losses in Canada.

In the casualty department the most growth has been in the automobile field, resulting from the increased ownership of motor cars throughout Canada. In the personal accident field contracts have become considerably more liberal. Regarding workmen's compensation, he referred to the fact that, while the funds of the province of Ontario is still in a solvent state, that of Nova Scotia was also in good condition until the Halifax disaster occurred. Regarding marine insurance rates, he said it was scacely to be expected that they would drop immediately to the pre-war standard.

Group insurance is a branch of the business in which the Equitable Life, of which Mr. Graham is third vice-president, is specially interested. He outlined the nature of group insurance, pointing out how it tended to link labor and capital more closely together. It does not, he said, replace life insurance, but is intended merely to act as an absorber of the shock resulting to a dependent family when its supporter meets death, whether expected or unexpected.

Total subscriptions to the fourth Liberty Loan were $6,989,047,000, the Treasury Department announced on November 19th after final tabulations had been completed. The oversubscription of $989,047,000 was 16.4 per cent. Every Federal Reserve district exceeded its allotted quota.

Canada's Bank Assets Grow in October

Large Increase in Savings Deposits—Total Deposits Now Over $1,800,000,000—Current Loans Increase, But Other Credit Extensions Contract—Circulation Jumps By Almost $20,000,000—All Important Branches Have Increased During Year

	October, 1917.	Sept., 1918.	October, 1918.	Year's inc. or dec.	Month's inc. or dec.
Deposits on demand	$495,058,449	$ 588,940,119	$ 644,220,998	+ 30.1	+ 9.5
Deposits after notice	985,790,850	1,037,498,920	1,076,514,627	+ 9.1	+ 3.7
Current loans in Canada	883,986,860	942,802,018	1,003,593,603	+ 13.5	+ 6.5
Current loans elsewhere	93,821,865	109,850,161	112,869,399	+ 20.4	+ 2.8
Loans to municipalities	41,204,381	47,977,472	46,275,106	+ 12.2	— 2.1
Call loans in Canada	71,653,719	74,137,860	73,685,136	+ 2.8	— 1.3
Call loans elsewhere	151,018,747	159,680,810	157,040,858	+ 3.9	— 1.3
Circulation	195,298,212	213,066,909	232,438,622	+ 18.9	+ 8.9

The above are the principal figures shown by the bank statement supplied by the chartered banks of Canada to the Dominion government at the end of October. It will be noticed that substantial changes are recorded in deposits, current loans and circulation; also that all of the branches above mentioned have increased in volume during the past year. This increase in bank deposits is a good omen, as withdrawals will certainly be shown during the month of November as the result of Victory Loan subscriptions.

The number of banks is now nineteen, as the Bank of British North America ceased business at the end of September. As no new capital was issued by the Bank of Montreal when it made this purchase the total capital authorized has consequently been reduced from $183,866,666 to $179,000,000. Subscribed, paid-up capital and reserve funds are also cut down in a similar manner.

The following table gives record of deposits for the past thirteen months:—

	Deposits payable on demand.	Deposits payable after notice.
1917—October	$ 495,058,449	$ 985,790,850
November	538,869,362	1,008,657,874
December	569,441,871	995,978,013
1918—January	559,777,237	900,314,256
February	565,266,642	908,822,988
March	561,042,236	921,080,803
April	558,509,221	933,644,668
May	535,655,731	947,757,337
June	549,327,078	[illegible]
July	549,068,651	992,015,737
August	554,906,517	1,014,711,865
September	588,940,119	1,037,498,920
October	644,220,998	1,076,514,627

The course of the deposits account during the past six years is shown in the following table:—

October.	On demand.	After notice.	Total.
1913	$389,856,507	$ 621,511 207	$1,011,367,714
1914	348,732,830	659,806,682	1,008,539,512
1915	392,042,193	701,336,850	1,093,379,043
1916	489,230,234	814,297,404	1,303,527,638
1917	495,058,449	985,790,850	1,480,849,299
1918	644,220,998	1,076,514,627	1,720,735,625

The trend of the Canadian loans account for the past thirteen months is shown in the following table:—

Loans.	Current in Canada.	Call in Canada.
1917—October	$883,986,860	$71,653,719
November	868,973,714	72,178,345
December	858,533,298	71,779,020
1918—January	855,506,506	76,239,201
February	859,363,147	76,722,163
March	886,995,222	74,257,877
April	884,089,402	77,497,360
May	894,817,113	78,466,582
June	897,226,012	76,970,920
July	905,677,233	74,382,762
August	920,775,269	73,509,571
September	942,802,018	74,137,860
October	1,003,593,603	73,685,136

The following table shows the call loans abroad in October as compared with previous returns:—

	1915.	1910.	1917.	1918.
January	$ 85,796,641	$134,248,552	$155,747,476	$132,687,066
February	89,890,982	139,138,651	162,344,556	160,239,494
March	101,938,685	141,889,989	161,616,735	167,296,701
April	121,522,971	147,146,443	159,156,054	179,818,531
May	136,098,835	163,400,659	168,692,675	172,259,879
June	124,604,875	182,757,015	159,309,133	170,034,476
July	117,821,174	177,121,733	151,875,676	167,112,836
August	120,607,677	171,380,353	176,610,625	160,544,090
September	135,108,412	173,877,586	166,480,004	159,680,810
October	120,681,624	189,346,216	151,018,747	157,040,858
November	135,530,562	183,250,389	139,832,552	... .
December	137,157,869	173,878,134	134,483,482	....

The following table shows the course of the principal loan accounts during recent years:—

October.	Current loans in Canada.	Current loans elsewhere.	Call loans in Canada.	Call loans elsewhere
1913	$ 862,313,367	$ 58,171,884	$71,118,255	$ 93,346,810
1914	816,623,852	42,040,716	70,201,939	81,201,671
1915	780,785,754	49,612,985	74,574,270	120,681,624
1916	774,028,222	79,459,621	90,412,023	189,346,216
1917	883,986 860	93,821,865	71,653,719	151,018,747
1918	1,003,593,603	112,869,399	73,685,136	157,040,858

(For complete figures see pages 36-7.)

FINANCING LIVE STOCK PRODUCTION

Ottawa Conference Submits Proposals to Government, Which Promises Suitable Measures

When the live stock men and meat packers, who had assembled in convention at Ottawa on November 19th, met Sir Thomas White, acting Prime Minister, on the 20th, they presented five recommendations, embodied in the following resolution:

"Whereas the war debt of Canada can best be paid off by developing its natural resources, particularly as having reference to the Canadian live stock industry.

"And whereas, in view of the existing acute shortage of animal products of all kinds existing in England and European countries to-day and the certainty that these cannot be replaced for many years, this convention of live stock producers and packers meeting in conference with officials of the Department of Agriculture resolve:

Loans to Farmers.

"1—That a policy of rural credit, sanctioned and supported by Federal Governments, has proven of enormous assistance to agriculture in European countries, and also has recently been adopted by the United States and that such loans to farmers of Canada would assist greatly in equalizing markets, improving and increasing all herds and flocks, and in the better finishing of meat animals, that the Department of Agriculture be empowered to immediately outline such a system for approval and adoption by this Government.

"2—That in view of the demand for agricultural products that exists in France, Belgium and Italy, the Government take steps to establish credits in France for these countries.

"3—That with the view of establishing immediate commercial connection in Europe, in order to secure the maximum of business for Canada, the Government appoint a representative, preferably Mr. H. B. Thomson, in the continuation of his present capacity, whose business it would be to obtain the fullest possible recognition for Canadian interests in supplying such products.

Marketing Facilities.

"4—That the Government be requested to provide the necessary marketing facilities which will make possible the development of a permanent and extensive export trade in chilled beef and other meat and animal products, and that immediate steps be taken in connection with the Government's programme of shipping and railway transportation to provide adequate controlled temperature space in railway cars at the terminal harbor fronts and on ocean-going vessels.

"5—That the Government give authority and the necessary financial support to the Department of Agriculture in launching a propaganda throughout Canada, first, for the maintenance and immediate increase of production in live stock and, second, for a campaign of education for the improvement of the breeds of live stock."

Sir Thomas White received the deputation in his office. With him were Hon. N. W. Rowell, Hon. A. K. Maclean, Hon. J. D. Reid and Hon. T. A. Crerar, Minister of Agriculture, who introduced the deputation.

In his reply, the acting Prime Minister expressed approval of the movement to increase production of every kind, and while financial considerations prevented him acceding to some of the points suggested, he asked that the plans for the necessary educational propaganda be submitted to the Minister of Agriculture and, if they proved feasible, he had no doubt that the campaign would be approved by the Government.

TRANSFER OF STOCK DISPUTED

The legality of a stock transfer "inter viros" came up for settlement recently in a Quebec court. Shares in the H. Corby Distillery Company, valued at $15,000, were owned by a party who transferred them to herself in trust for a second party. The first party left this property by will to be equally divided between the second and a third party. The second, however, claimed the entire estate as a consequence of the transfer made upon books of the company. The third party disputed this claim on the grounds that the donation was not completed; that it was not legal in form; that it was not accompanied by actual delivery, and that it could have been made only by authentic act in accordance with the civil code. Judgment was rendered in favor of the third party, the transfer being held to be not complete according to law.

SAVINGS CAMPAIGN TO BE MAINTAINED

Details of Dominion Government's Scheme of War Savings and Thrift Stamps—Redeemable 1st January, 1924

The cessation of hostilities and the possible return of peace in the near future has not materially altered the plan of the Dominion Government to inaugurate a war savings campaign here similar to that which is in operation in Great Britain and in the United States. Particulars regarding the plan have just been made public. The Government will issue war savings stamps and thrift stamps. These are respectively inserted in folders which are called "War Savings Certificates," and "Thrift Cards." The war savings stamps are redeemable on the 1st of January, 1924, at their face value.

The face value of each war savings stamp is $5. No interest is paid on it but it is purchased at a discount increasing gradually from now until maturity, five years hence. The yield obtained is a little better than 4½ per cent. The cost of a $5 certificate in December, 1918, or January, 1919, is $4. From then onwards it increases at the rate of one cent per month until June, 1921, when the cost is $4.29. Thenceforward the monthly increment in cost is two cents until November, 1923. In December, 1923, the cost becomes $4.90.

The war savings certificate contains spaces for ten war savings stamps so that it will have a maximum value of $50 upon the 1st of January, 1924. The certificate forms are not, of course, issued separately but the purchaser secures one upon buying the first war savings stamp and fills in the remaining nine spaces as he purchases further stamps.

The purpose of the thrift stamps is merely to facilitate the accumulation of sufficient savings to acquire a war savings stamp. Each thrift stamp is for 25 cents and the thrift card contains sixteen spaces, so that when completely filled it will have a face value of $4. This would just purchase a thrift stamp at the present time and also during the year 1919 with a small additional cost. These thrift stamps bear no interest. They cannot be registered, as can war savings stamps. The purpose, therefore, is merely a temporary one. The thrift card containing the thrift stamps cannot be surrendered for cash, and have value only in so far as when complete. They may be exchanged for a war savings stamp which when placed in a certificate form has value. In case the holder of a war savings certificate wishes to receive his money before 1924, he can redeem his investment according to exactly the same scale to which he makes his purchase.

UNITED STATES TREASURY HEAD RETIRES

Mr. William G. McAdoo, secretary of the United States treasury, has retired. When this announcement was made a few days ago the cause was said to be that he found the remuneration of a public officer to be insufficient to meet the expenses of living in Washington. According to the Providence Journal, however, the real reason was a disagreement in policy between Mr. McAdoo and the President upon the subject of public ownership and control of public utilities. It is understood that President Wilson is firm in his purpose to promote government control and ownership, whereas Mr. McAdoo is not of the same opinion.

Upon hearing of the resignation on Saturday, the 23rd instant, Sir Thomas White, Canadian Minister of Finance, forwarded to Mr. McAdoo the following message in acknowledgment of Canada's appreciation of his services not only to his own country but also to others:

"It is with deep regret that I learn from the press of your resignation as secretary of the treasury. I feel I should not be fulfilling the obligation of personal and national duty if I did not at this time express to you my sincere appreciation of the most friendly relationship which we have had in connection with the many serious problems of the war in which both our countries have been interested and with which we have had to deal from time to time. Particularly, I desire to make public acknowledgment of your extremely friendly attitude to Canada in all our negotiations. I assure you this has been greatly appreciated by the Dominion."

The Minister of Labor has received applications for boards of conciliation from the Montreal firemen, and from a union which includes the Montreal civic employees engaged as chauffeurs, teamsters, drivers, etc.

PULP AND PAPER EXPORTS STILL GROW

But Rate of Increase in September Was Not so Great as it Was in Previous Months

Canadian pulp and paper exports for September, 1918, while showing a total increase of $232,582 as compared with September, 1917, fail to keep pace with the rate of increase established during the previous five months of the current fiscal year. The total for the month was $7,689,134 as compared with $7,456,552 for September, 1917.

The falling off was due to a decrease in the quantity and value of the exports of ground wood, which amounted to $337,565 against $1,274,470 in September, 1917.

Exports of paper, sulphite pulp and pulpwood maintained their rate of increase, printing paper alone showing an increased value of $42,564 in spite of a decrease of 30,690 tons in the total tonnage exported. The details supplied by the Canadian Pulp and Paper Association follow:

Month of September:	1917	1918
Paper and manufactures of	$3,323,910	$3,549,837
Pulp chem. prep.	1,742,288	2,584,097
Pulp mech. ground	1,274,470	337,565
	$6,340,668	$6,471,499
Pulpwood	1,115,884	1,217,635
	$7,456,552	$7,689,134
		7,456,552
Increase		$232,582

The total value of pulp and paper and pulpwood exported during the first six months of the current fiscal year amounted to $49,964,820, as compared with $24,141,105 in 1916 and $36,274,954 in 1917, an increase over last year of $13,689,866. This brings the industry within measurable distance of the $100,000,000 mark set for the current year, if the pace set in the first half year is maintained throughout. The figures for the six months' period are as follows:

Six months.	1917	1918
Paper and manufactures of	$18,074,595	$22,221,644
Pulp chem. prep.	9,492,754	15,903,189
Pulp mech. ground	4,140,819	2,512,086
	$31,708,168	$40,636,919
Pulpwood	4,566,786	9,327,901
	$36,274,954	$49,964,820
		36,274,954
		$13,689,966

The value of the exports of unmanufactured pulpwood for the six months' period is practically double what it was in 1917. This year 980,652 cords were exported against 609,854 in 1917. Had this wood been manufactured in Canada and exported in the form of paper instead of in its raw state it would have added to the trade of the country not less than $50,839,600 instead of $9,327,001, which it actually brought in. The exportation of unmanufactured wood shows no signs of abatement, but, on the contrary, is likely to continue to increase as the United States supply of available pulpwood becomes more and more depleted.

LIABILITY OF TENANT FOR FIRE LOSS

Legal cases frequently arise from loss of leased property by fire. In such cases the assumption is that it was caused by the fault of the lessee, and the burden of proof, therefore, rests upon him. A case recently decided in a Montreal court, however, freed the lessee from responsibility. This was a case in which the tenant had engaged the services of a plumber who used a gasoline lamp to assist in his work.

The house was destroyed with a loss of $4,000. It was not proved, however, that the loss resulted from the use of the gasoline lamp and it appeared equally likely that defective electrical equipment may have been the cause. Consequently the lessee and the plumber, against both of whom action had been brought, were absolved from liability.

The Canadian Bank of Commerce has secured premises on Main Street, Weston, Ont., opposite the Bank of Montreal, for a branch office.

RECENT FIRES

The Monetary Times Weekly Record of Fire Losses and Insurance

Campbellton, N.B.—November 18—The Hotel Dieu Hospital and the convent school of the Sisters of Charity were destroyed. Estimated loss, $39,000, covered by insurance.

Charlottetown, P.E.I.—November 21—Building and stock owned by Grant & Kennedy, International Harvester Company agents, were destroyed. Estimated loss, $30,000.

Dunstaffnage, P.E.I.—November 12—Home of Mr. J. D. Hume was destroyed.

Hamilton, Ont.—November 23—Factory of the Wentworth Leather Specialty Company, 57 Merrick Street, was damaged. Caused by defective gas heater. Estimated loss, $2,000.

Hamilton, Ont.—November 23—Dry goods store of Wm. Garrett, 242 York Street, was damaged. Caused by defective flue. Estimated loss, $800.

Kensington, P.E.I.—November 16—Old house known as the "Black Horse," owned by Dr. T. Tuplin, was destroyed.

Lacolle Junction, Que.—November 25—Chicory factory was destroyed. Estimated loss, $12,000.

New Waterford, N.S.—November 18—Star Treatre and adjoining business block, owned by M. Feinberg, were destroyed. Estimated loss, $20,000.

Ottawa, Ont.—November 25—House occupied by Jos. Cairns at 289 Kent Street was damaged. Caused by defective chimney. Estimated loss, $400.

Owen Sound, Ont.—November 25—Barn and contents of C. Lipske were destroyed. Estimated loss, $5,000, partly covered by insurance.

Prince Rupert, B.C.—November 15—Home of Mr. W. Sherman, 736 Taylor Street, was destroyed. Estimated loss, $2,000. Insurance carried, $1,000.

Stavely, Alta.—November 18—Barn of P. La Verne was destroyed. Cause reported as incendiarism.

ADDITIONAL INFORMATION CONCERNING FIRES ALREADY REPORTED

Charlottetown, P.E.I.—November 21—The damage by fire to Grant and Kennedy building is estimated as follows:

Grant and Kennedy building, owned by R. Grant, $5,000; their stock of sleighs, carriages, agricultural implements, etc., $10,000; commercial travellers' samples of Greenshields, Gault Bros., Montreal, and Manchester, Robertson and Allison, Brock and Patterson, St. John, about $4,000; Connelly Estate building, $3,000; R. F. Maddigan, grocery, $1,500; Simon Joseph, dry goods, $2,000; total, $25,000. Insurance about $20,000.

Ontario.—The official record of the fires in Ontario and the complete loss for the month of October is now complete. While the number of fires is less this year than in 1917, the total loss is nearly 400 per cent. greater. There were in Ontario 576 fires in October of this year, compared with 722 in the corresponding month of last year. The total loss of October, 1918, amounts to $3,694,713; in October, 1917, it amounted to $821,862. The higher total of this year is accounted for by the enormous loss sustained by the British Chemical Company, of Trenton, amounting alone to $2,800,000. As this plant was on Government property there was no insurance. Another fire in October was that of the Canada Carriage Company's works at Brockville, a loss of $500,000. The total insured loss for October, 1918, was $786,016, as against $629,841 for October of the preceding year.

It is now estimated that one-fourth of the munition employees in Canada have been discharged. Out of about 25,000 in the Toronto district alone, 6,000, consisting mostly of unskilled labor, have been discharged. Skilled mechanics are retained wherever possible.

At the ninth annual meeting of the British Imperial Association of Canada, which was held in Toronto on November 26th, a resolution was passed protesting against any provision to remove the head office of the Canadian Government Railways from Toronto. A resolution was also passed asking the Government to proceed immediately with the construction of public works.

PERSONAL NOTES

Prof. W. J Black, of the agriculture department, has been appointed chairman of the Soldiers' Settlement Board.

Sir Clifford Sifton, who has been chairman of the Commission of Conservation since its organization, has resigned.

Mr. H. J. Daly, head of the H. J. Daly Company, of Ottawa, has been appointed director of reconstruction and repatriation

Mr. K. W. McKay, treasurer of the county of Elgin, has resigned. He has performed the duties of treasurer, in conjunction with his other work, for nearly thirty years.

Sir Edgar Bowring, who represented Newfoundland on the Dominions Royal Commission before the war, has been appointed high commissioner for the colony in London.

Mr. Charles F. Roland, commissioner for the Soldiers' Land Settlement Board, Winnipeg, has resigned. He will become western secretary of the Dominion Reconstruction Board.

Major R. F. Massey, president of the Dominion Fire Insurance Company, was this week presented with the D.S.O. by the Lieutenant-Governor of Ontario. Major Massey served with the Canadian artillery in France and was badly wounded.

Mr. R. S. McLaughlin, of Oshawa, president of the McLaughlin Motor Car Company, Limited, has been elected a director and member of the executive of General Motors Corporation, a three hundred million dollar corporation, with main offices in New York.

Hon. Walter Scott, former premier of Saskatchewan, will return to the editorship of the Moose Jaw Evening Times. Since his retirement from public life Mr. Scott has lived at Victoria, B.C., where he will remain for the winter, but will return to Saskatchewan in the spring and resume his permanent residence.

Mr. W. E. Bell has been appointed acting division superintendent of telegraphs (lines in Alberta and British Columbia). Mr. Bell has been associated with the Grand Trunk Pacific telegraphs at the headquarters in Montreal since 1915. He succeeds Mr. W. J Rooney, who has been granted leave of absence.

C. W. I. Woodland, manager for Canada and Newfoundland of the Employers' Liability Assurance Corporation, Limited, has been elected to the presidency of the Casualty Underwriters' Association of Canada. The annual meeting of the International Association of Casualty and Surety Underwriters will be held in New York, December 4th, and Mr. Woodland will attend the gathering as representing the casualty underwriters of Canada.

OBITUARY

Mr. Frederick Charles Watson, private banker, broker and realty man at Sarnia, is dead at the age of sixty years from heart failure. He has been mayor of the city, warden of the council, and at the time of his death was United States vice-consul at that city.

Hon. E. H. G. Hay died at Winnipeg on November 23rd of heart disease. He was seventy-seven years old, one of Manitoba's pioneer citizens, and a member of its first legislature in 1870. Four years later he was made minister of public works and agriculture of Manitoba. He took an active part in pioneer legislation in that province.

Mr. John Maughan, of Toronto, after being ill for more than one year, died on November 27th at his residence, Tyndall Avenue, Toronto. He was a prominent figure in commercial, financial and insurance circles for upwards of sixty years. The deceased gentleman, who was in his eighty-fourth year, was a pioneer in fire insurance business, and was the oldest established broker in the city.

SIR CLIFFORD SIFTON HAS RESIGNED

Sir Clifford Sifton has placed his resignation as chairman of the Commission of Conservation in the hands of the government. He has been chairman of the commission since its organization, and has been personally responsible for the conservation policies of that important body since its inception.

Sir Clifford's reasons for resigning from the chairmanship of the commission are not known. He is now en route to England after spending several weeks in Canada.

MORE APPOINTMENTS ON CANADIAN NORTHERN RAILWAY LINE

As a result of the co-ordination of the various Canadian Northern Railway lines, and for the purpose of effectively consolidating the management and operation, the following appointments have been made in addition to those announced recently from Ottawa:—

Mr. S. J. Hungerford, formerly general manager of the Canadian Northern Railway, eastern lines, has been appointed assistant vice-president, with headquarters at Toronto.

Mr. W. A. Kingsland, heretofore general superintendent of the Canadian Northern Railway lines in the province of Quebec, is appointed assistant general manager of eastern lines, with headquarters at Montreal.

Mr. E. Langham, who for many years has satisfactorily filled the position of general purchasing agent for the Canadian Northern Railway Company, will have his jurisdiction extended to cover the entire system.

Mr. Louis Lavoie, who has been purchasing agent for the department of railways and canals at Ottawa, and who has rendered most effective service in that capacity, has been appointed assistant general purchasing agent for the system.

WEEKLY BANK CLEARINGS

The following are the bank clearings for the weeks ended November 24th, 1917, and November 21st, 1918, respectively, with changes:—

	Week ended Nov. 21, '18.	Week ended Nov. 24, '17.		Changes.
Montreal	$104,812,295	$ 81,065,009	+	$23,747,286
Toronto	83,456,214	57,985,769	+	25,470,445
Winnipeg	72,720,582	75,708,426	—	2,987,844
Vancouver	12,607,370	10,046,308	+	2,561,062
Ottawa	9,657,453	5,749,906	+	3,907,547
Calgary	8,053,596	10,598,371	—	2,544,775
Hamilton	7,090,915	5,264,838	+	1,826,077
Quebec	5,857,322	4,075,461	+	881,861
Edmonton	3,711,349	3,768,806	—	57,457
Halifax	6,075,843	3,101,750	+	2,974,093
London	3,431,204	2,098,598	+	1,332,606
Regina	5,334,314	4,645,050	+	689,264
St. John	2,777,418	2,063,207	+	714,211
Victoria	2,033,808	1,864,456	+	169,352
Saskatoon	2,319,273	2,651,604	—	332,331
Moose Jaw	3,001,641	1,792,547	+	1,209,094
Windsor	1,774,400	....		....
Brandon	1,025,724	832,394	+	193,330
Brantford	1,118,206	960,201	+	158,005
Fort William	936,454	1,002,512	—	66,058
Lethbridge	1,074,478	1,139,115	—	64,637
Medicine Hat	510,800	718,860	—	208,060
New Westminster	614,018	394,064	+	219,954
Peterboro	1,064,381	766,460	+	297,921
Sherbrooke	1,118,928	842,641	+	276,287
Kitchener	896,130	754,582	+	141,548
Prince Albert	427,734	....		....
Totals	$343,501,949	$280,790,944	+	$60,508,781

The Toronto bank clearings for the current week are $66,065,912, compared with $53,841,647 for the same week in 1917, and $56,624,145 in 1916.

The Lethbridge bank clearings for the month of October totalled $4,649,387.

The Calgary clearings for the same period amounted to $34,442,575.

DOMINION FINANCES

Bankers and investment houses have awaited with interest the announcement of the finance minister regarding the allotments of the Victory Loan. When the campaign was commenced the general opinion was that the government could use every dollar which was likely to be raised, and if it had not been for the recent political events, this would undoubtedly have been the case. The prospect of peace, however, and the new financial conditions which will follow, have changed the outlook. Whereas, formerly the interest rate could not be expected to decline so long as the war continued, it is now expected in most quarters that it will fall off considerably.

Since the end of July the war cost in Canada has been financed by advances made to the Dominion Government by the Canadian banks. The total floating indebtedness of this kind is now about $175,000,000. It is also planned that Canada shall finance certain credits to the British and other governments to enable them to make purchases here. This will involve, according to a recent announcement of the finance minister, the expenditure of about $250,000,000. When these items are deducted the balance remaining of the Victory Loan would be about $250,000,000 or sufficient to finance the Dominion Government at its present rate of expenditure for seven or eight months.

It is fully expected, however, that from now on the government's war outlay will continually decrease and instead of spending around $30,000,000 per month, in six months they may be spending only $10,000,000 or $12,000,000. Were the government to accept all the Victory Loan subscriptions, therefore, no further borrowing might be necessary for a period of about one year.

In view of these facts, therefore, the soundest policy would seem to be to accept only a portion of the subscriptions. There is, however, another aspect which must be considered. If the government accepts only say $500,000,000 of the subscriptions the effort and expense involved in raising the additional $175,000,000 is entirely wasted. This waste always takes place when allotments are not made in full, and they are unavoidable in so far as the committee in charge of the campaign, being unable to estimate the exact result of their efforts, must make a sufficient effort to secure the minimum required.

The equivalent of this expenditure might very easily be saved to the Dominion Government in the better conditions under which a future loan might be raised. If the government were to cut down the allotments at the present time, they would, of course, require further funds in the near future and would be able to secure them at a lower rate of interest. The very fact that peace is in sight and an absence of high-grade investments from the market has already caused a strengthening tendency in government and municipal bonds.

The government will, according to an announcement just made, accept all subscriptions of $500,000 and under, in full. Larger subscriptions will be cut down. Over $500,000 and up to and including $1,000,000, will be accepted in full up to $500,000, and 80% of the balance. In the case of those over $1,000,000, the allotment will be the same as in the case of subscriptions up to $1,000,000, and 60% of the amount in excess of that. On a subscription of $1,000,000 the allotment would therefore be $900,000; on one of $5,000,000 it would be $3,300,000; and on one of $10,000,000, $6,300,000.

MUNICIPAL GRANTS TO CHARITY

A grave situation in municipal politics and finance has arisen from the practice on the part of many municipalities, of supporting voluntary organizations connected with the war. In most cases these grants have been regarded as expenditures on capital account, a policy which is fundamentally unsound. Quite apart from this point, however, it is not the proper function of such public bodies to take upon themselves the responsibility of supporting private organizations, whatever their object.

Some months ago the city of Toronto secured special legislation from the province, to enable it to make a grant to the Y.M.C.A. A few weeks ago another grant was made to the Catholic Army Huts, to be used for similar purposes. The legislation, however, did not provide for grants to institutions other than the Y.M.C.A., and accordingly an application was made to have the new grant quashed as being invalid. During the course of the hearing before Chief Justice Meredith on the 16th October, it developed that both of these grants, and more in addition, were not being made out of funds collected this year, but would have to be provided for by an overdraft to be met out of next year's taxes. On this score alone the grants were adjudged to be illegal. Over $1,400,000 of expenditures have been voted by the council, which will have to be met in this way. About one-half of this consists of votes to patriotic societies, including $500,000 to the Patriotic Association, $75,000 to the Y.M.C.A., $50,000 to the Sailors' Fund, and $15,000 to the Salvation Army.

This situation illustrates the degree of laxness into which municipalities may be led. It is bad enough to make such grants at all; worse to finance them by borrowing; and worse still to vote them when provision has not been made in the municipal budget, and the funds are not on hand. Toronto, as one of our leading cities, is expected to display skill and wisdom in civic management; it might learn many lessons from the methods of smaller cities both in east and west. We await with anxiety what may happen if the street railway is purchased, and administered like the civic railway, or the civic abattoir.

Apart from the question of mismanagement, however, the support of voluntary organizations does not come within the proper scope of municipal activity, because a municipality is a political body erected to satisfy the public requirements of the inhabitants of a given area. No plebiscite is taken on the question, and no provision made in the estimates, yet councils take upon themselves the responsibility of passing judgment upon the merits of charitable organizations, and of supporting them out of the public purse. If voluntary contributions will not ensure the maintenance of essential services, the proper body to provide these services is the Dominion of Canada. The cost would then be equitably distributed throughout the whole field, and not according to the views of municipal councils, or the pressure which is brought to bear upon them. The spirit of voluntary giving will not in this way be stifled, because there would remain many useful but unessential activities, the support of which would depend upon the individual. Municipal grants are a partial and unjust method of levying compulsory contributions.

WAGES AND THE COST OF LIVING

In ordinary times alterations in the cost of living are valid and, it may be said, conclusive, arguments for corresponding changes in the wage scale. If this were used as an argument now, labor, and in fact services of all kinds, would seem to be underpaid; for with a few possible exceptions wages and salaries have certainly not advanced proportionally to the rise in cost of living since 1914. That arguments of this kind are not now valid is due to the fact that the belligerent nations have been engaged in military operations on a tremendous scale, part of the expense of which must be borne by wage earning and salaried classes.

It is quite impossible that when such a considerable proportion of our population is engaged in work which is economically unproductive, others should continue to enjoy their customary comforts and luxuries. Labor and capital which would ordinarily be applied to the production of articles and services of use and pleasure, have been employed in military operations, in the manufacture of munitions, and in other manifold activities which are essential to the prosecution of a modern war. This diversion of effort is reflected in the cost of production of all commodities, which increase must be borne to greater or less extent by all classes. In the case of those of small income this is their sole contribution to the cost of the war. Those of larger income must also contribute, not only by buying more, but by paying the special taxes with which they are assessed because of their possession of that income.

A concrete illustration of this point is found in a recent announcement of the United States War Labor Board. A few weeks ago wage increases to the extent of about seventy per cent. were granted to street railway employees in New Orleans; at the same time an increase in fares was recommended, which was opposed by the employees; as a result the Board was compelled to announce that, if this opposition were maintained, it would have to suspend the entire award, including the increase in wages, pending a re-hearing of the entire case.

The advance in the cost of living is a valid and weighty argument for wage increases, but it is not a just measure of what that increase should be. This was recognized by the new Canadian Labor Appeal Board in its first case, that of the Ottawa Electric Railway Company. The amount of the advance in the cost of living was, it is true, used as a basis, but was discounted in consideration of the part that the employees should bear in paying the cost of the war, represented in this case by higher living expenses. Generally speaking, labor has proved itself willing to accept this situation, and consider the position of employers who find themselves confronted with the same rapid rise in costs of production, while revenue grows at a slower rate.

Building permits of some of the western cities for the month of September show a great improvement. In Winnipeg the total is $144,850, against $94,800 in the same month last year. The total permits for the nine months this year are less than that of the corresponding period last year, but in the latter case there was included $175,000 for the parliament buildings, which would more than account for the difference. In Regina the figures for the month of September, 1917, are almost trebled. In Calgary the permits for the nine months of this year have crossed the million mark for the first time since 1914.

MONEY MARKETS

Messrs. Glazebrook and Cronyn, exchange and bond brokers, Toronto, report the following exchange rates to The Monetary Times as follows:—

	Buyers.	Sellers.	Counter.
N.Y. funds	1 15-32	1½	....
Mont. funds	par	par	⅛ to ¼
Sterling—			
Demand	$4.82.50	$4.82.75	$4.84½
Cable transfers	4.83.45	4.83.70	4.85½

Rate in New York: Sterling demand, $4.75½.
Bank of England rate, 5 per cent.

POPULAR INTEREST IN ECONOMIC TOPICS

Classes which have been organized by the Workers' Educational Association in Toronto, are meeting with considerable success. This association was organized some months ago to offer workers a course in economics, history and some other subjects. The financial support is derived partly from trades unions who originally suggested the organization. Nominal fees are also charged to students upon enrollment. The subjects include economics, public finance, constitutional history and political philosophy, most of the teachers being members of the staff of the University of Toronto.

RESPONSIBLE FOR MEDICINE TAX

A recent decision in a Canadian court places the responsibility for affixing the stamp required by the special War Revenue Act, 1915, upon the party selling to the final consumer. The case in question was one in which a medicine had been purchased by the Canadian Pacific Railway Company for dispensation by one of its district physicians. It was held that as the wholesaler had not sold the drug to the final consumer it was not necessary for him to affix these stamps.

MUNITIONS BOARD APPRECIATED

At a dinner of the chairman and members of the staff of the Imperial Munitions Board, held in Ottawa on November 25th, cablegrams, which had been received by the chairman, were read. They were as follows:

From Lloyd George to Sir Joseph Flavelle:

"Now that hostilities have ceased, I am anxious to send you, on behalf of myself and my colleagues in the War Cabinet, our congratulations on the great work of the Imperial Munitions Board for three years, which has been of such signal assistance to the British Empire and to the allied cause.

"It is a great and varied achievement for your board, not only to have produced so great an output of munitions, representing no small proportion of the shells used by the British armies, but also to have built over three hundred and fifty thousand tons of shipping for the Ministry of Shipping, to have assisted to so great a degree the Royal Air Force in Canada, to have developed the great output of airplane timber which has been essential to our air service.

"As the board was appointed by me, when I was Minister of Munitions, it is particularly pleasurable to me to recognize the success, efficiency and value of its work, and to thank you, and through you, your staff, the Canadian manufacturers and the grand army of workers who have so splendidly assisted you, for the great services so rendered."

From Mr. Winston Churchill to Sir Joseph Flavelle:

"As the armistice with Germany has now been concluded, I wish, as Minister of Munitions, to congratulate you, and through you, all your staff on the splendid work of the Imperial Munitions Board during the last three years.

"You have carried through a work of the greatest magnitude with uniform success and efficiency, and I wish to pay my personal tribute to the great output, energy and organizing power you, as chairman, have shown.

"Canada's remarkable output of munitions has played a large part in the munitioning of the British armies, and will remain a testimony to the high value in that great struggle of the work of the board and of all those, whether manufacturers or work people, who have shared the burden with you."

COBALT ORE SHIPMENTS

The following is a statement of the shipments of ore, in pounds, from Cobalt station for the week ended November 22nd, 1918: Peterson Lake, 102,045; Dominion Reduction, 87,300; Buffalo Mine, 329,800; Mining Corporation, 151,200; McKinley-Darragh S. M., 149,539; O'Brien Mine, 128,855; total, 948,739.

The total shipments since January 1st now amount to 29,914,115 pounds or 14,495.7 tons.

NATURAL GAS IN ONTARIO

On November 26th, Hon. G. Howard Ferguson, Minister of Lands, Forests and Mines for Ontario, announced the intention of the government to present legislation at the next session of the House dealing with the production of natural gas in Ontario. He stated that an advisory board or committee is being formed to deal with the matter. There is no intention, he said, to take away from the Ontario Railway and Municipal Board its administration of such affairs.

PROGRESS IN TECHNICAL INDUSTRY

The Toronto section of the Society of Chemical Industry was addressed on November 21st by Mr. J. W. Bain, on the subject of "Canadian War Mission at Washington and Canadian Industry."

Professor Bain gave up his work at the University of Toronto to act as a technical adviser to the Canadian War Mission at Washington, and his experience there should prove of value to the Canadian manufacturers as a whole.

Dealing first with the work done in Washington by the War Trade Board he showed how raw materials had been obtained for Canadian manufacturers on the one one hand, and contracts placed for raw materials or finished products coming from Canada on the other.

His subject naturally led to speculation as to what will be done now that war activities are over. For instance, during the war the output of sulphuric acid in the United States has increased in the last three years from four to eight million tons. The utilization of these plants and their products now becomes a problem. A great part of it will be used in production of acid phosphates for use as fertilizers. The Canadian situation presents a similar appearance.

"The subject of the fixation of atmospheric nitrogen is becoming increasingly important," he said. "We are already producing cyanamide in Canada, but with our cheap power, the nitrogen may be extracted from the air in one of three or four methods as successfully as in any country in the world. These problems are closely allied with our electrical power carbide production on the one hand, and with the fertility of our soil on the other. Canada as a producing nation must look for cheap fertilizers to compete for world trade.

"The question of an American dye industry also links up closely with production of acids, nitrates and nitrites, which form the basis of Germany's dye industry.

"Another application of our cheap electrical power is in the manufacture of ferro alloys, which are used in the manufacture of special steels."

Quebec province has just completed a successful campaign for the Red Cross, Navy League and Canadian War Contingent Association. The total desired was $1,400,000. Montreal alone contributed $1,293,480, the provincial government donated $100,000, and the returns from the province outside Montreal, which have not yet been received, will, no doubt, greatly exceed the balance required.

An announcement was made in Montreal last week that additional Victory Loan subscriptions reported by Montreal banks to the amount of $2,600,000 increased the total subscriptions in that city to more than the total of Toronto. It was, of course, impossible that the banks in either city could turn in all subscriptions received by the evening of November 18th, when the official totals were announced. There are, therefore, late subscriptions to be received from both cities and from other points in Canada which will be included in the final figures which will be issued by the finance department in the near future.

ONTARIO LOAN ACT TO BE AMENDED

New Regulations Regarding Investments and Furnishing of Statement Will Be Much More Stringent —Loan Officers Consulted

The Ontario Government is preparing important amendments to the Loan and Trust Corporations Act. These amendments will be embodied in a bill which will be submitted at the next session of the Provincial Legislature. This work is under the direction of Hon. I. B. Lucas, attorney-general for the Province. The bill has already been drafted and has been sent to loan company officers in Ontario, and others who are interested in the subject. A meeting is to be held at the Parliament Buildings on Thursday, December 5th, at 2 p.m., where a general discussion will take place, and suggestions received regarding the proposed amendments.. The annual statement form which is also required from loan and trust companies at the end of each year has been mailed to them by the attorney-general's department.

The principal changes required by the new Act are as follows:

(1) Instead of the statement being certified by a "competent" accountant it will be necessary that it be certified by a "chartered" accountant, which means a member of the Institute of Chartered Accountants of Ontario, or any person being a member in good standing of the Dominion Association of Chartered Accountants on the 16th day of December, 1909, was on that date entitled to membership in the institute or to apply therefor.

(2) A verified statement of assets, liabilities, income and expenditure of the corporation must be delivered to each shareholder at least two weeks before the annual meeting.

(3) For the purpose of incorporation, at least $300,000 of stock must be subscribed for and taken up by at least 25 subscribers, each of whom must hold at least ten shares. In the case of trust corporations, at least $100,000, and in other cases at least $30,000, of such subscribed stock must be paid in cash into a bank in Ontario in trust for the proposed corporation.

(4) Where money is received by a trust company on what is known as the guaranteed investment plan, such money should be invested only in securities authorized by the Trustee Act and for every $100 of such guaranteed investments received, $115 of securities should be set aside definitely as security therefor. A statement of these investments must be made quarterly to the Government.

(5) Clause (b) of Sub-Section 1 of Section 27 of the Loan and Trust Corporations Act is repealed and the following substituted therefor:

(b) Any securities of or guaranteed by the United Kingdom of Great Britain and Ireland, the Dominion of Canada or any of the Provinces of Canada or any other Government the interest on whose securities has been paid regularly for the previous ten years;

(c) Debentures, bonds, paid-up stock and other securities, except bills of exchange and promissory notes, of any municipal corporation or school corporation or of any chartered bank or incorporated company, if such bank or company is incorporated by Canada, or by any Province of Canada or by any former Province now forming part of Canada.

(6) On and after the 1st of January, 1920, no corporation shall:

(a) Invest money in any one security or make a total investment in any one corporation including the purchase of its stock or other securities, the leading to it on the security of its debentures, mortgages or other assets or any part thereof, of more than 15 per cent. of its own paid up capital stock and reserve funds;

(b) Make any investment the effect of which will be that such corporation will hold more than 15 per cent. of the stock and debentures of any one corporation;

(c) Invest in the stocks, debentures or funds of any chartered bank or incorporated company which has not paid a dividend of 6 per cent. per annum on its capital stock for the previous three years.

(7) Section 29 of the Act is amended by adding the clause that the amount of such real estate shall not exceed 15 per cent. of the paid up capital and reserve funds of the corporation. A similar addition is made to Section 30.

(8) Extensive powers are given to the auditors to secure access to books, documents, etc., and to take the cash and verify the securities of the corporation. A certain form of auditors' report is also required.

(9) The form of the general statement of affairs is laid down by the Provincial Registrar. Such statements must be attested by the signature of the president or vice-president, and of the managing director, or some other principal officer of the corporation. The auditor's certificate must also be accompanied by an independent opinion as to the condition of the company.

(10) Every circular, etc., issued by a corporation for the purpose of soliciting business from the public, offering debentures or other securities for sale, or offering its own shares for sale, must bear upon its face a notice stating that the statements contained in the circular are the statements of the corporation only and do not indicate any guarantee from the Provincial Government.

LIFE PRESIDENTS' DISCUSSIONS

The programme, which appeared in the Monetary Times of November 15th, for the annual convention of the Association of Life Insurance Presidents which will be held in New York on December 5th and 6th, is approximately correct. It has been arranged in addition, however, to have an address on "Failure of German Compulsory Insurance—a War Revelation," by Mr. Frederick L. Hoffman, LL.D., third vice-president and statistician of the Prudential Insurance Company. Mr. John B. Lunger, vice-president of the Equitable Life, will speak on "A Great National Service—How Life Insurance Has Discharged Its Duty to the Nation," and Major-General Williams C. Gorgas, former surgeon-general of the United States army, will speak on "Thrift in Health—Application of Lessons of Military Sanitation to Peace Times."

ILLEGAL DISTRIBUTION OF FUNDS

It has been decided by a court of appeal in Quebec Province that a distribution of $1,500,000 of bonds by the Great Northern Construction Compaay among its shareholders was not according to law.

The Great Northern Construction Company in March, 1899, undertook the construction of the Great Northern Railway and sub-let the work to a firm of contractors. The above distribution was made before the contractors were fully paid. The distribution was made possible as the company had collected from the Great Northern Railway Company cash, bonds and stock of the railway company in accordance with its contract. When the time came to complete payment to the contractors it was found that the company was insolvent. The whole of its capital, totalling $500,000, had been employed in the construction of the railway and all the receipts had already been expended.

Action was accordingly taken against one of the shareholders who had received $6,000 in bonds which he had disposed of for $3,418.54. The judgment was that as he had sold the bonds he was liable for the amount which he received for them.

READY FOR RETURNING ARMY

"The Provincial Governments of Canada, so far as it could be shown at the recent conference between the Provincial Ministers and the Dominion Government at Ottawa, will do their share to maintain business and prosperity throughout the country," said Hon. Edward Brown, treasurer of Manitoba, in a statement to the press on his way home. "It was agreed that we should co-operate to restore confidence on the part of the public by putting into effect plans involving expenditure which had been in abeyance. We would endeavor to influence business organizations to do the same, and any additional cost compared with what it would be, say, a year from now, would be regarded as a contribution to the solution of a difficult problem. As a consequence, I think there will be great activity in the various Provinces."

"The returned soldier problem will not be as formidable as many of us expected," said Mr. Brown. "Those who went from business, commercial and professional life will go back to their places without assistance. So will farmers' sons. Many of the laboring classes will return without assistance. There remain the maimed men who will need help and guidance and who should be generously treated. General Mewburn made a good impression on the conference by the revelation of his plans for demobilization, and the Government has issued a booklet with the names of all soldiers and the point at which each one should be discharged."

SINGLE TAXERS MEET IN TORONTO

That the present system of taxation is fundamentally wrong was maintained by Mr. J. W. Bengough at the annual meeting, in Toronto, on November 22nd, of the Single Tax Association of Canada.

The natural law of revenue was being violated, he said, and it was this rankling injustice at the basis of society that must be removed before the world can have permanent peace. He declared that universal free trade was the only means of making the world safe for democracy.

The following officers were elected: President, Mrs. Hector Prenter; vice-presidents, J. W. Bengough, A. C. Thompson, Frank Barber, A. W. Roebuck, K.C.; secretary-treasurer, W. A. Donglass; recording secretary, J. C. Martin; executive: Charles Phillip, Donald Walkinshaw, Mrs. S. T. Wood, J. A. Martin, Harold Bonsall, L. B. Welling, J. Dousley, W. R. Williams, Julian Sale, E. B. Mansfield, R. F. Choate, Walter Ingram, R. A. Stencil, Mrs. J. Selick, Mrs. W. R. Barker, Miss Ollerhead, Miss Perry, Joseph Watson, Sydenham Thompson, T. Pallister, F. W. Armstrong, Sanford Leppard.

DAIRYMEN CONFER.

A four-day conference of the dairying interests of Canada was held in Ottawa on November 25th-28th, at the invitation of Hon. T. A. Crerar, Minister of Agriculture, to discuss matters relating to the advancement of Canadian dairying. The delegates present comprised the dairy representatives of provincial agricultural departments, nominees of the dairy and creamery associations throughout the country, of the associations of breeders of dairy cattle, of the milk distributors, condensaries and other commercial organizations, together with the agricultural press.

BOND TRADING RENEWED

On Monday, November 25th, bond dealers renewed ordinary business transactions, following the Victory Loan campaign. Several weeks previous to the Victory Loan subscription period, an agreement was made among the bond dealers of Canada that further efforts to dispose of such securities should cease until the government loan had been floated. The week intervening between the close of the campaign, November 16th, and November 25th, was allowed to permit of all bond dealers being back at their offices before trading commenced.

On Monday, December 2nd, dealing in Victory Loan bonds will be recommenced. The market for both Victory Loan issues will be handled similarly to that for the first Victory Loan. Prices have been fixed at which purchases and sales will be made. They are as follows: The first column shows the price which bond dealers will pay to those desiring to sell and the second column the price which buyers must pay for the several issues. Accrued interest will be added to the price in each case:—

	Seller.	Buyer.
First Victory Loan:		
1st December, 1922	99	100
1st December, 1927	99¼	100¼
1st December, 1937	100	101
Second Victory Loan:		
1st November, 1923	99	100
1st November, 1933	99¼	100¼

The French government will shortly announce the flotation of a loan in Canada, presumably with a view to providing credits for the purchase of materials to enter into the reconstruction work in France.

As a result of the conference of builders from throughout Canada, which was held in Ottawa on November 26th, 27th and 28th, a permanent organization has been formed. This is to be known as the Association of Canadian Building Industries, and headquarters will be at Ottawa. It is the intention that all builders, exchanges and similar bodies will be invited to affiliate and co-operate with the national body. Mr. George Oakley, of Toronto, has been appointed chairman.

UNITED STATES PREPARES FOR FIFTH LOAN

In preparation for the fifth war loan, the United States treasury has announced the issuance of $600,000,000 or more of certificates of indebtedness, payable May 6, 1919, and paying 4½ per cent. interest.

The subscription period will run from December 5 to December 10. The maturity date of the issue indicates that the fifth loan will be floated in April.

ROSS RIFLE CLAIMS

Sir Charles Ross, Bart., is claiming compensation of $18,897,724.08 for the expropriation of the Ross rifle factory at Quebec by the government of Canada and for consequent losses of profits on Canadian and Imperial contracts. The claim, which has been presented in the form of a petition of right to the Secretary of State, is made up of three items. They are $10,000,000 damages for breach of contract before the factory was taken over by the government on March 23rd, 1917; $10,921,133.17 cited as the estimated value of the property as a going concern, and $11,697.65 said to be still owing for rifles and bayonets which were supplied to the government.

EXPORT AND IMPORT ARE CO-ORDINATED

The War Trade Board announces that it has arranged with the War Trade Board of the United States to coordinate their respective policies of export and import control. New regulations have been adopted for the purpose of simplifying the procedure for the licensing of goods in transit from Canada or to Canada through the United States.

The War Trade Board has issued a special import license authorizing the importation into the United States without individual import license of shipments of all commodities originating in or destined to Canada when the same are conveyed in transit through the territory or via any port of the United States. The board has also issued a special export license number, authorizing the exportation without individual license of such shipments. Any person desiring to export commodities from Canada will obtain an export license from the Canadian War Trade Board.

LABOR TO EXERT POLITICAL INFLUENCE

Many recommendations, some of them quite fundamental, were made on November 27th by labor representatives to the Dominion government. The recommendations were along the lines of resolutions passed at the recent annual Trades and Labor Congress in Quebec City. The requests included pensions for widows and children; a Dominion system of old-age pensions; Federal insurance for soldiers; higher land taxes; aid for the co-operative movement in Canada; stronger fuel and food control; the abolition of private employment agencies; eight-hour day on all public works; minimum wages varying throughout the country.

SOLDIERS WANT TO GO FARMING

Of 124,000 members of the Canadian Expeditionary Force who do not wish to follow agricultural pursuits after the war, more than 50,000 say that the positions they held before enlistment are open to them on their return. This figure has been made available to the repatriation committee of the Cabinet by the analysis of National Service cards signed overseas by 230,000 soldiers early in 1917.

In addition to 51,306 who definitely stated their positions were being held open for them, 14,422 said they were uncertain or doubtful. There were 13,656 who did not answer the question and 45,154 who asserted that their positions were not open.

Over 105,000 members of the Canadian expeditionary force have expressed the definite wish to take up farming in Canada after the war. This figure was obtained by interviewing 230,000 members of the forces overseas and indicates that 43.9 per cent. of these men wish to go on the land.

BETTER BALANCED FARMING

Land Must Sometimes be Diverted from Wheat-growing —Financial Soundness of Mixed Agriculture

BY C. R. MARNOCH,
President, Lethbridge Board of Trade.

Nature, that kindly mother, seems to have to resort once in a while to rather drastic measures to enforce attention to the lessons she tries to teach us, day in and day out. She has given us many lessons in the management of farms, and we ought to have realized ere now that her patience in some regards was being stretched to the limit. She sends us the message this year that the quantity of humus or fibre that she provided for our soils is in many places pretty nearly worked out, and that it is up to us to replace it.

All through a long summer day in the middle of June this year Dame Nature had arranged a demonstration of her teaching of this lesson. Looking out from the observation car of the Canadian Pacific Railway train at Moose Jaw in the early morning we saw the beginning of the demonstration, and it continued the whole lee-long day, through Regina, Broadview, Brandon and Portage la Prairie, right into Winnipeg. A strong, cool north-west wind was blowing steadily all day; and the whole country, instead of lying at peace, was standing up vertically to the skies, and moving rapidly to the south-east. Not only that—every single field, heavy soil or light soil, was pock-marked by the strong winds that had already passed over earlier in the season.

What is the reason for all this? Simply that we have been going on, year after year, cultivating our soils into a finer and finer state of tilth, until now we discover that the greater part of the fibre is worked out, and that we have been neglecting to do anything to replace it. We knew well enough that such practice was not in accord with the teachings of our forefathers; but the easy thing to do was to think that there was some special virtue in our soils that would enable them to stand this treatment; and we will have to admit that it was due to us that we should receive the lesson. Here in the southern plains of Alberta we get this lesson in a modified form every year; and, while we leave the Saskatchewan and Manitoba farmers to work out their own salvation, we had better look around and see what we can do for ourselves.

All of the plans that may be devised boil down to a very simple formula. How are we to replace the fibre in the soil? Cow-dung is what we want. How are we to get it? We can't get cow-dung without cows. We can't have cows without pasture. The minister of agriculture for Saskatchewan has been telling his people to get both pasture and a physical means of holding the soil during the time of the spring winds by growing winter rye; and it would be well for southern Alberta to heed what Hon. Mr. Motherwell says as to that. Some of our leading farmers have already been giving attention to this means of holding their soils together in places that are subject to drift: and Mr. C. S. Noble has grown considerable quantities of rye for seed on his farms at Nobleford near Lethbridge.

Envies Them.

But Mr. Motherwell never talks on this subject without expressing regret that up till now he has not seen any chance for the great bulk of the grain farmers in Saskatchewan to improve their farms by irrigation, and he always envies those farmers in Alberta who already have, or who may by-and by get irrigation waters for some portion of their lands, for if that anchor is available, a strong chain can be formed to link us up with a stable agriculture. Given irrigation water, the growing of pasture, and that of the finest kind, is easy; that starts the cows, then we get the cow-dung, then the fibre is back into the soil and the problem is solved. Fortunately, too, every grain farmer now feeds his straw to his cattle, and the burning of the straw piles belong to the heathenish rites of past ages.

The grain farmer has been inclined to smile these last few years of high prices at the irrigation farmer growing alfalfa and selling it at low prices; but the boot is on the other foot this year and the grain farmer is glad to pay a pretty stiff price for alfalfa hay, or any other kind of hay that he can lay his hands on within reasonable distance, so that he may bring his [illegible] through the winter

Many of our farmers are still not quite alive to the fact that considerable quantities of water that might be used for irrigating their lands are running to waste in the rivers and streams that come from the Rocky Mountains and flow past our doors. Others who have been aware of this have been anxious to get these waters; while others again, although they have had the knowledge, have said that they think the cost of getting the water on to their farms would be too great, and that they prefer to go on grain farming because they do not know enough about irrigation farming to be able to make a success of that business. It is a striking fact, however, that you meet hardly a single farmer who does not say, "Oh, if I could only get enough irrigation water to grow enough alfalfa or other hay to feed my stock through a dry season, and to help out with my water supply, I would not trade this farm for anything under the sun." And when you tell him that besides all that he might rotate the use of the water around the farm, putting, say, forty acres of his quarter-section under alfalfa for a few years, and then change around to another forty acres, he becomes enthusiastic at once and wants to know more about it. The irrigation engineers have now begun to look at the matter from this angle. Hitherto, and naturally, they have been thinking along the lines that were laid down for the use of irrigation water in the United States, where the projects were so costly that it was an economic necessity to keep the available waters within concentrated areas. But we are not exactly in that position; and there is this other point of difference here: that all our lands in southern Alberta are of agricultural service, whereas in the arid regions of the States the irrigated lands are now worth as much as two and three hundred dollars an acre, while the lands immediately adjoining are not worth thirty cents.

The minister of the interior, Hon. Arthur Meighen, has recognized that further investigation of these matters should be carried out, and the commissioner of irrigation, Mr. Peters, is now making survey to see if the waters available in the Old Man River above Macleod can be carried farther afield than was at first contemplated, for it is recognized that the duty of a government is to make the greatest use of any public asset available for the greatest number of people. When these surveys have been completed it will be possible to say how many farms can derive benefit from these waters, and what the cost per acre will run to, so that those farmers who are fortunate enough to find their lands under the proposed canals will know whether they should get together to find ways and means to have the project gone on with.

Other projects for getting irrigation waters to other parts of this district will then be considered in the light of what is developed in the Lethbridge-Northern project above referred to, and farmers in the regions to the south-east of Lethbridge will wait with some impatience to learn what transpires up around Carmangay, Monarch, Barons, Kipp, Iron Springs and Turin, for if the plan for bringing irrigation water to 100,000 acres in those districts comes to be successfully developed,, it will mean a great deal to the farmers that are situated among the 350,000 irrigable acres within another area south-east of Lethbridge that preliminary surveys have shown may be irrigated from other streams, for it will help them to consider how they, in turn, may set about getting other waters down on to their lands.

There is a continuing temptation in a new country to put the cart before the horse; to omit enquiry into such questions as to how we should harness the land and the water together, and then to proceed to heroic measures in the emergencies that suddenly arise. We are apt to forget that it is one of the important parts of our business to provide against emergencies—aye, more than that; we forget that we should always have our scout out to see that the country is being prepared for the advancing needs of our people. The present urgent emergency is the provision of green feed for the greatly increased numbers of cattle that have been growing up on our grain farms since our farmers started out in this profitable direction from 1914 onwards. It is true we have made considerable advances these last few years in developing well water supplies, and that has helped the cattle raising industry not a little. But we have practically been asleep in the matter of developing the rivers and streams for further irrigation and all the time these valuable waters have been flowing uselessly past our very door. We have been niggardly in the use of our wits and parsimonious in the use of our farmers' and trade organizations which should have been devoting more of their efforts to studying these resources, and to impressing upon the governments that we

A Newspaper Devoted to Municipal Bonds

THERE is published in New York City a daily and weekly newspaper which has for over twenty-five years been devoted to municipal bonds. Bankers, bond dealers, investors and public officials consider it an authority in its field. Municipalities consider it the logical medium in which to announce bond offerings.

Sir EDWARD H. HOLDEN, Bart., *Chairman*

were earnest in our desire that these water resources should be developed.

It may be possible a little later on to ascertain just what has been the cost of moving hay from the north and cattle from the south this season; but the guess may readily be hazarded that the amount that has been spent during the last few years in further enquiries into the possibilities for making use of these valuable irrigation waters will not amount to a fraction of the cost of moving hay and cattle during this one season of emergency. Maybe we shall presently come to the reluctant and belated conclusion that we want better balanced citizenship in order to come at better balanced farming. Just think of it! Here we are sitting by and looking at irrigation water flowing by our door, with all its great potentialities for the raising of hay; and then waking up suddenly and making a wild and woolly rush upon the governments and the railway companies for assistance to move our live stock to feed, and feed to our live stock. There is the situation over a considerable part of our prairie country. They are just about as foolish over in British Columbia; acres and acres of fine hill pasture there grow up and die every year; and thousands of cubic feet of water are allowed to run down past fine bench lands that would make splendid irrigated farms for the raising of winter feed for the cattle that would come down, rolling fat, when the winter snows began to cover up the mountain pasture. It is at least gratifying to know that even a small fraction of these pastures is being utilized this summer for some of our prairie cattle; and it would be well to have in mind that this asset should not be neglected in the intervening year or two that must elapse before the mountain waters can be made available for irrigation. Unfortunately, not a sufficient number of our prairie farmers have been aware of these British Columbia pasturages to make any considerable movement of cattle up to the mountains, and consequently it has not seemed feasible to ask for the same reduced rate privileges westwards that have been available northwards for live stock; but these hill grasses should be carefully kept in mind with a view to their further economic use.

We have now before us two eminently practical demonstrations that irrigation will greatly improve the fruitfulness of the farms in the Lethbridge district in southern Alberta. The standing illustration is, of course, the one hundred and fifty thousand acres around Magrath, Raymond, Coaldale and Lethbridge that have been drawing water these fifteen years back from the St. Mary's River. These lands steadily produce crops of three to four and a half tons per acre of alfalfa. Such of these lands as are put into wheat make crops of forty bushels and over if the ground is irrigated the previous fall, and if the water is applied at the right time during the summer. And it will be remembered that nature gave us just the same means to produce the phenomenal grain crop of 1915; the great fall irrigation in October, 1914, and rains at the right time during the spring and summer of 1915, which brought the fifty and sixty bushel wheat crops of that year of blessed memory. The quantities of the chemical constituents of our soils—nitrogen, phosphoric acid and potash—are perhaps almost illimitable, but the soil itself, and these chemicals in it, cannot be held together unless we keep up the physical condition by seeing that the soil there is not allowed to become depleted.

PULP INDUSTRY CAN USE LABOR

The Canadian Pulp and Paper Association headquarters has received a request from Hon. G. D. Robertson, Minister of Labor, for information as to the number of additional men for whom the industry can find employment this winter, in view of the discontinuance of war industries and the certain dislocation of labor conditions as a result thereof. Normally the industry gives regular employment to about 25,000 mill operatives and office employees, and, at certain seasons of the year, to about as many more woodsmen. For the past two years labor, especially of woodsmen, has been scarce and difficult to get. Work can probably be found for several thousand men at the present time, provided they are of the right kind. The industry has contributed about 2,500 men to military service. Most of these men were assured by their employers that their jobs would be restored to them when they returned to civilian life. These constitute a first claim upon the manufacturers, but it will be some time before many of these men will be available, and in the meantime officers of the association have notified the Labor Department that the mills are prepared to give employment to every man they can possibly make room for, preference being given to those who have had previous paper mill experience.

COAST CAPITAL GOING AHEAD

Victoria Has Ideal Climate — Shipbuilding Activities Will Continue—Active Demand for Homes

(Staff Correspondence)

Victoria, B.C., November 22, 1918.

The city of Victoria, capital of the Province of British Columbia, has undoubtedly one of the most ideal climates in Canada. The writer picked raspberries in the middle of November in the garden of a residential district; also violets and roses were still in bloom and the grass is green all the year round. Business in Victoria and on the Pacific coast generally is very good, a great deal of money from shipbuilding, fisheries and other industries is circulating each month and the effect is noticeable.

In discussing the real estate outlook in Victoria, a prominent dealer said to the Monetary Times' representative:

"Victoria and Vancouver Island are on the eve of an era of development such as we have not had at any time in our history. While we are optimistic we do not predict a real estate boom, nor do we want such a thing, but there are many sound reasons to warrant our optimism.

"In the first place the climate of Victoria is a guarantee that we shall always have the choicest residential city in the Dominion, while the development of our natural resources is bound to create an important industrial centre. A shipbuilding programme involving an expenditure of some fifteen to twenty millions makes a grand start for Victoria's future payroll, while the steady output of our mines, mills and canneries combine to produce an activity which warrants optimism.

Demand for Property is Anticipated.

"Needless to say Victoria will be an important centre after the war; not hundreds but thousands left our city to go overseas, and when the war is over, those of them who have not paid the price for Canada's honour and world freedom will no doubt return to us again, only too happy to settle down in our midst; also many from the east, middle west and Yukon who mobilized here became so infatuated with Victoria that they, too, will wish to return here. There will also be the new arrivals from the old lands, to say nothing of the many of our own Dominion who will wish to come to the ideal climate of the Pacific to make a permanent home.

"We look for a heavy demand for suburban homes and small farms, where returned men with their families and retired men from the east may enjoy life and yet produce something to help feed the population.

"At present the housing problem in the city is demanding considerable attention. We have scarcely a vacant house to rent and some of our progressive property owners are taking this opportunity to fix up some of the old houses for rent again."

Shipbuilding Will Undoubtedly Continue.

From well-informed circles the programme of shipbuilding on the Pacific will continue. At present there is approximately $1,000,000 a month being paid out in wages in the various shipyards of British Columbia. Large orders are in the hands of builders and even although the war is now over there will be a good demand for shipping, it is generally felt, for the next ten years.

The Vancouver and Victoria Boards of Trade are taking active steps to see that the coast gets its full share of concessions for Canada in the great period of reconstruction in Europe that will follow the close of the war.

NEW DIRECTORS FOR DOMINION PARK COMPANY

An entirely new board of directors was elected at the annual meeting of the shareholders of the Dominion Park Company, Limited, held in Montreal on November 20th, the changes following a recent shifting of control into new hands. A large block of stock owned by the late H. A. Dorsay, formerly president of the company, was acquired in the past summer by a syndicate, representing existing interests in the company, and their nominees were elected to the board without opposition.

The situation was well understood before the meeting opened and no contest developed over the election of directors. Before the nominations were made, W. G. Ross, the retiring president, stated that the members of the old board were not offering themselves for re-election. The new directors nominated and elected without opposition are: J. H. Redpath, L. R. Cooper, R. S. Clift, Leon Garneau and G. D. C. Dobbin.

QUEBEC SUCCESSION DUTY

By a decision of Mr. Justice Lemieux on November 22nd, it was decided that the Quebec Provincial Government has a perfect right to collect a tax on all successions, even on legacies made outside of the Province by residents of this Province. The case was that of the Sharples estate against the Government. Plaintiffs denied that the Government had the right to levy a tax on certain legacies made outside of Quebec Province. Mr. Justice Lemieux dismissed the Sharples action.

INVEST YOUR MONEY IN CANADA

The Dominion Government urges that Canadian Securities should be held by Canadian investors. Taxation is likely to be imposed on non-Canadian Securities. You can be patriotic and at the same time, obtain a certain 5½% for your money by investing your funds in

Standard Reliance Mortgage Corporation Debentures

This Canadian Security does not fluctuate in value. It is repayable at certain fixed periods. Meantime it bears interest at 5½%, payable half-yearly, in cash, on the day it is due.

Thousands of people have invested their savings in these debentures without the loss of one dollar invested. The debentures are issued in amounts of $100 and upwards for a fixed period to suit your convenience.

Write for our booklet entitled "PROFITS FROM SAVINGS."

INVESTMENTS AND THE MARKET

News and Notes of Active Companies—Their Financing, Operations, Developments, Extensions, Dividends and Future Plans.

Twin City Rapid Transit Company.—The gross revenue of the company for October, 1918, amounted to $751,696, compared with $805,687 in October, 1917. The net revenue totalled $201,440, a decrease of $12,176 compared with last year.

Granby Consolidated Mining and Smelting Company.—The company produced in October 2,549,474 pounds of copper, of which 1,932,870 pounds were from the Hidden Creek mines at Anyox, and 616,604 from Phœnix. The total compares with 3,371,535 pounds in September.

Porto Rico Railways Company, Limited.—The following is a comparative statement of earnings of the company for October, 1918, and ten months ended October 31, 1918:—

	1917.	1918.	Increase.
Gross	$ 72,493.79	$ 86,047.48	$ 13,553.69
Net	32,447.77	35,546.18	3,098.41
For Ten Months:			
Gross	744,454.06	865,213.26	120,759.20
Net	332,387.10	362,533.24	30,146.14

Woods Manufacturing Company.—Directors of the company met on November 20th and declared the regular dividend on the common and a bonus of 5 per cent., which brings up the distribution to 12 per cent. for the full year. The company has been paying quarterly at the rate of 7 per cent. per annum this year, compared with a 5 per cent. rate started last year, but an extra of 3¼ per cent. at the end of the year made the distribution 7 per cent. The company has been doing a large business and making good profits and a good-sized bonus was generally looked for. The stock sold at 93 recently. Dividend of 1¾ per cent. and bonus are payable December 2 to stock record of November 26.

Montreal Power Company.—The monthly statement of the company for October reflects increased earnings both in the matter of gross and net. For the month the gross amounted to $970,106, as compared to $905,216 in October, 1917, being an increase of $64,890. Net, after operating expenses, amounted to $527,507, against $495,116 last year, while the surplus increased $29,880. For the six months ending October 31, the surplus increased $145,199. As the first half of the company's year includes the summer months, during which period consumption of power for lighting purposes is at a minimum, it is fair to assume that the second half of the year will be equally as encouraging as the first. Comparisons follow:—

	Oct., 1918.	Oct., 1917.
Gross	$970,106	$905,216
Operating expenses	442,599	410,099
Net	527,507	495,116
Charges ..	83,268	82,757
Surplus ..	442,238	414,358

The surplus for the six months is equal to 3.53 per cent. on the capital stock of $63,717,200, or at the rate of over 7 per cent. per annum.

Barcelona Traction, Light and Power Company.—The annual report of the company for the year 1917 is satisfactory in view of difficult war conditions. Combined surplus earnings of the operating companies in Spain showed an increase over 1917 of $497,648. The total surplus earnings amounted to $1,976,612. This compares with $1,219,927 in 1915.

The following comparative table shows the net revenue from all sources available in 1915, 1916 and 1917, for the payment of the interest on the prior lien "A" bonds of the company:—

	1915.	1916.	1917.
Net revenue	$1,316,282.72	$1,875,315.73	$2,354,964.46
Interest on prior lien "A" bonds	96,355.70	331,900.31	378,352.04
	$1,219,927.02	$1,543,415.42	$1,976,612.42

The chief changes in the balance sheet, as compared with 1916, were caused by an increase of $3,038,187.49 in the amount of 5 per cent. notes issuable in payment of interest on bonds, in accordance with the agreement of April 9th, 1915, and further advances to associated companies, the money thus advanced having been applied to construction.

Computed in Spanish currency, gross earnings amounted to 22,966,847 pesetas, an increase of 2,741,020 pesetas, or 13.55 per cent. Net earnings increased 2,643,395 pesetas, or 12.49 per cent. Following is the comparative table:—

	1917.	1911.
	Pesetas.	Pesetas.
Gross earnings	22,966,847	20,225,827
Operating expenses	6,758,841	6,661,217
Net earnings	16,208,005	13,564,609

Increase.	Pesetas.	Per cent.
Gross earnings	2,741,019	13.55
Operating expenses	97,623	1.47
Net earnings	2,643,395	19.49

DOMINION SYSTEM OF LABOUR EXCHANGES

Nation Wide Organization Will Be Represented in All Important Industrial Centres

It was stated in *The Monetary Times* last week that the Dominion Government had a plan to relieve unemployment. An official announcement, just made, describes the scheme in detail, as follows:

"The plan of organization drawn up by the Department of Labor was submitted to the Provincial officials, and with their co-operation and criticism the whole organization scheme was outlined in the most minute detail. A local office will be opened in every important industrial centre, and in the larger cities it is proposed to have separate offices for unskilled labor and for skilled workers. These offices will report daily to a Provincial clearing house the number of workers unplaced and the situations unfilled, by trades, and on the clearing house personnel will fall the duty of matching up vacancies in one part of the Province with unabsorbed workers in another locality. Upon the Provincial organizations will be superimposed a Federal system of two clearing houses, located probably at Winnipeg and Ottawa.

Two Dominion Bureaus.

"When the Provincial clearing houses have done their best to relate workers to positions in the Provinces and find that there is still a deficiency or a surplus of labor in some parts, the Federal clearing house will take up the work at this point and will try to locate the surplus labor or secure the labor required in other Provinces. The clearing house at Winnipeg will function in this way for all the Western Provinces, while the Ottawa clearing house will perform a similar task for the East. By this plan the Dominion Government will have always at hand accurate information as to the demand and supply of labor in all parts of the country, the extent to which private industry is absorbing the returned soldiers and demobilized war workers, the volume of public employment that must be provided to take up any surplus, and the localities and trades in which such employment is required.

Advisory Committees.

"In placing this machinery at the disposal of employers and employees the Dominion and Provincial Governments are anxious that it shall be operated for the common interests of both classes, and to that end advisory committees, specially representatives of employers and employees, will be connected with all the larger offices. A National Advisory Committee, to be called the Employment Service Council of Canada, will be organized at once to supervise the administration of the entire organization. The Provincial Governments will appoint one member each on this committee, and the Soldiers' Civil Re-establishment Department, the Great War Veterans, the Canadian Manufacturers' Association, the Trades and Labor Congress, the Railway War Board, the Railway Brotherhoods and the Canadian Council of Agriculture will also be represented. The Department of Labor appoints three members, two of whom will be women. A Provincial Advisory Committee to safeguard the interests of employers and employees in each Province will also be appointed to each Province."

A NARRATIVE

"It seemed but over-night when we reached the great Hinterland back of Lake Superior, with its innumerable rivers clothed to the edge with a tangle of forest, interspersed here and there by rocky ridges—the bright green of the underbrush and the shadowy white of the birch breaking indiscriminately the dark evergreen of the predominating pines.

"Nearing the head of the Lakes the country becomes more broken and Nipigon Forest Reserve with its world-famed trout streams is soon traversed. At Port Arthur we saw the largest grain elevator on the Continent, and were informed that the immense shipbuilding industries here, and its rapidly increasing trade as the distributing point for the great undeveloped territories lying to the north and west, is rapidly developing a great, metropolitan city. Leaving Port Arthur, the route lies through the picturesque Rainy Lakes district and Quebec National Park, reaching Winnipeg by a fertile and gradually rolling prairie.

"West of Winnipeg the prairie continued with its teeming activities, and innumerable clusters of grain elevators standing silent sentinel will long be remembered as we rolled along over the flat country. A choice of routes is available west of Winnipeg, taking one either through Brandon, Regina and Saskatoon, the southern route; through the Central Districts; or by Northern Manitoba and Saskatchewan to Calgary and Edmonton. We chose the second because of its through train service. At Calgary and at Edmonton our short stay was well spent in studying the great commercial and agricultural opportunities of this Last Great West with its infinite possibilities as the outpost of a mighty nation. Here, work, enterprise and prosperity go hand in hand.

"From Edmonton west the prairie is soon replaced by the haze-clothed mountains in the distance, and following the banks of the Athabaska River the Canadian Northern passes through Jasper National Park, a second Yellowstone, to Yellowhead Pass—the Great Divide. Yellowhead, as tradition has it, is named after a mighty Iroquois-Scotch trapper known as Tete Jaune, or Yellowhead, who hid or cached his furs at this spot and stood a tower of strength and a goodly beacon to the luckless wayfarer in the tempestuous days of old.

"The scenery at this point is grand—a rocky gorge covered with dark pines and light green shrub above surmount the seething currents of the Fraser, while towering on either side and lost in the clouds are the snow-capped peaks of the giant Mount Robson, the highest known in Canada. Such is the surrounding chosen by a grateful country in its selection of a fitting tribute to the memory of the famous British nurse martyred by Germans in Belgium, October, 1915—'Mount Edith Cavell.'

"Journeying south from the Yellowhead we followed the Canoe and Albreda rivers, which are in turn succeeded by the North and Main Thompson rivers, reaching at Lytton the lower waters of the main Fraser. From here west we crossed and re-crossed, hugging its mighty and picturesque banks through to Vancouver.

"Nowhere in this mountainous and river-valley route of over 700 miles from the gateway to the Rockies clear through to the Pacific did it grow monotonous or time hang heavily, so insistent were the attractions which flashed past the windows of the comfortable Observation Car."

MUNICIPAL BOND MARKET

The Monetary Times' Weekly Register of Municipal Activities and Financing

Saskatoon, Sask.—Tenders are invited on $30,000, 15-year 6 per cent. debentures, dated January 1st, 1919, interest payable July 1st and January 1st. Sealed tenders are to be forwarded to C. J. Yorath, city commissioner, on or before December 16, 1918.

London, Ont.—A by-law will be submitted to the ratepayers at the January elections to raise $100,000 by debenture issue for a new medical school in connection with the Western University. A site for the proposed new medical school has already been purchased at a cost of $23,000.

London, Ont.—City bonds to the value of $146,000 and bearing interest at 6 per cent. are now on sale at the office of City Treasurer Bell. Already $30,000 worth of the allotment has been taken by eager purchasers and it is expected that the big demand for the bonds, the sale of which was discontinued during the period of the Victory Loan canvass, will be renewed.

Edmonton, Alta.—Series "A" debentures, numbered from 4 to 1231, and series "B" debentures, numbered from 23 to 1170, have been drawn for redemption on January 1st, 1919, and will be paid on that date at any of the places mentioned on the debentures. Any holder of these debentures may have the same redeemed at par and accrued interest, New York funds, at any time previous to January 1st, 1919, by having the same forwarded to the Imperial Bank of Canada, Edmonton, Alta.

Chatham, Ont.—The stability of Chatham debentures as a safe means of investment is becoming more widely known, as is indicated by the demand for these securities at the office of City Treasurer Mr. Tom Cottier. Although an issue of waterworks debentures to the value of $9,720 was made, within 48 hours these had been bought by citizens eager to invest their money. The debentures pay 6 per cent. interest. "We have no difficulty in disposing of city debentures," said Mr. Cottier. "During the past year it is safe to estimate that $200,000 worth of city debentures have been sold. At the present time we have only some $30,000 worth of debentures on hand, for local improvements and Hydro. They mature in from 12 to 20 years from now."

Edmonton, Alta.—Separate sealed tenders will be received by the debenture branch of the Department of Education until December 12th, 1918, on nine blocks of school district debentures, amounting to $30,000. Block No. 1, Rurals, 10-years, 7 per cent.—Frankland S.D., $2,000; Bezanson S.D., $1,200; Moy Hall S.D., $1,500; Maple Glen S.D., $600; total, $5,300. Block No. 2, Rural, 6-years, 7 per cent.—Haig S.D., $1,200. Block No. 3, Rural, 6-years, 7 per cent.—Cariboo S.D., $800. Block No. 4, Rurals, 10-years, 7 per cent.—Echodale S.D., $1,800; Buffalo Lake S.D., $600; Rolly Point S.D., $1,800; Chedder S.D., $1,000; total, $5,200. Block No. 5, Rural, 5-years, 7½ per cent.—Hay Croft S.D., $1,000. Block No. 6, Rural, 5-years, 7 per cent.—Silver Lake S.D., $500. Block No. 7, Rurals, 10-years, 7 per cent.—Hillanvale S.D., $600; Forestry S.D., $1,100; Layden S.D., $2,500; Knobbch S.D., $1,800; total, $6,000. Block No. 8, Rurals, 10-years, 7 per cent.—Maple Tree S.D., $1,800; Cromer S.D., $400; Sunny Range S.D., $2,600; Kirkdale, $3,000; total, $7,700. Block No. 9, Rural, 15-years, 7 per cent.—Ranton S.D., $2,300.

Saskatchewan.—The following is a list of authorizations granted by the Local Government Board from November 1st, 1918, to November 14th, 1918:—

Rural Telephone Companies.—Kerrobert Northern, $9,000; Sidney Stewart, Kerrobert. Southcote, $475; W. L. Graves, Strasburg. Lewven, $1,500; C. M. Cochrane, Lewven. Ingleside, $2,000; W. A. Conn, Marchwell. Bertville, [illegible],400; W. J. Totten, Roadene. North Kisbey, $3,000; W. C. Smyth, Kisbey. Luseland West, $2,050; J. B. McCo[illegible]ien, Luseland. Dayton, $3,800; Oscar Moxness, Brock. Glen [illegible], $1,[illegible]00; W. Dobson, North Battleford. White Shore, $1,600; P. A. Deroche, Landis. Marquis, $2,400; F. E. Burd, Marquis. Reymore, $1,000; H. E. Martin, Raymore. Englefield, $2,550; E. J. Nordick, Englefield. Kansas, $2,[illegible]00; J. R. Funk, Drake. Acme, $5,100; A. L. Lamb, Windthorst. Findlater, $1,900, E. J. Topping, Findlater. North W[illegible], $1,600; P. W. Co[illegible]ene, Waldon. Bruce, $3,700; A. J. Hindle, Assiniboia. Dewar Lake, $13,500; Milton Schroeder, Dewar Lake. East Yorkton, $2,000; J. Seywell, Rokeby.

School Districts.—Willow Lake, $1,200, annuity, 10-years; J. McNevin, Delmont. Rosemary, $2,800, instalment, 10-years; J. Brownlee, Unity. Light, $800, instalment, 10-years; Paul Adrack, Perdue. Barvas, $350, instalment, 7-years; Thos. Howsey, Barvas. Dafoe, $2,500, annuity, 10-years; J. S. McKay, Dafoe. Highcroft, $3,500, instalment, 10-years; C. P. Lee, Kincaid. Beaver Flat, $3,000, annuity, 10-years; J. W. Smith, Waldeck.

Rural Municipalities.—Orkdale, $3,846.16, 10-years not ex. 8 per cent., Union Hospital; J. Brent, Coleville. Mariposa, $4,487.21, 15-years not ex. 8 per cent., Union Hospital; J. A. McLellan, Broadacres.

The following is a list of debentures reported sold from November 1st to November 16th, 1918:—

Rural Telephone Companies.—Sunnyside, $4,000; John Robert Colbert, Loney, Sask. Bright, $3,300; W. L. McKinnon and Company, Regina. Cudworth, $23,000; various purchasers. Bund Plain, $2,200; W. Hall. Bund Plain, $1,000; S. M. Atkinson. Bund Plain, $500; A. Hall. East Lockwood, $400; Mrs. Mary Hislop. Mawer, $6,250; Thos. P. Taylor, Regina.

School Districts.—Tyner, $750; Canada Landed and National Investment, Winnipeg. Allanville, $2,600, Sambor, $2,600, Stoney Plain, $2,000, Gunnson, $2,500, Pleasant Butte, $3,000; Waterman-Waterbury Manufacturing Company, Regina.

Village.—Lampman, $1,600; W. L. McKinnon and Company, Regina.

GRAND TRUNK RAILWAY'S DEBENTURES

The Grand Trunk Railway Company gives notice in the Canada "Gazette," that it will apply to Parliament for an act authorizing the creation and issue, for the general purposes of the company, of additional Grand Trunk consolidated debenture stock, bearing interest at 4 per cent., to an aggregate amount the annual interest upon which shall not exceed £100,000. Interest payable quarterly at London, England.

CLAIMS UPON ENEMY COUNTRIES AND RUSSIA

Mention was made, in the Monetary Times of November 22nd, regarding certain claims for loss resulting from the war, which the Dominion Government would now consider. A later announcement has been made, stating that the Government has directed the preparation of further lists, as follows:

(1) Property, credits, securities or claims in Canada of enemy governments or enemy subjects, showing their nature and how they are now held, and whether vested in the custodian or not.

(2) Property, credits, securities or claims of Canadians held in each enemy country, with a statement, if possible, whether any disposition of the property or securities has been made by the enemy government, or whether the property has been dealt with in any way.

(3) Property, credits, securities or claims of Canadians in the Russian Empire (including Finland) as it stood on the first of August, 1914, or claims against the Russian Government, revolutionary or otherwise, and also claims against any person, firm or company, or against any local authority in Russian territory.

Particulars and instructions for the filing of claims may be obtained, with respect to the first two clauses, from James H. Forsyth, Accountant, Department of Finance, and, with respect to the third, from Thomas Mulvey, Under-Secretary of State.

The filing of any claim does not imply an undertaking on the part of the Canadian Government to put it forward, or any assurances that, if put forward, it will be satisfied. Nevertheless, claims should be sent in as speedily as possible, so that the Government may be furnished with such information as will enable it to take action on behalf of Canadians having claims in enemy or Russian territory.

The mining community in Northern Ontario will start an agitation for better roads connecting it with the main part of Ontario. Now that there are definite prospects of the financial strain upon the Province of Ontario being removed, it is considered advisable to urge developments of this kind.

Premiers' Conference Unable to Reach Agreement

Control of Lands Remains Unsettled—Dominion Retains Western Lands—Adjustment of Deal by Means of Subsidies Unsatisfactory—Provincial Representatives Discuss Land Settlement, Finance, Education

THE conference of Provincial Ministers, which met in Ottawa on November 19th, dissolved on the 22nd without coming to an agreement upon the principal point at issue, viz., control of Western lands. In the "Monetary Times" of November 22nd, a list was given of those in attendance at the meeting.

As a result of the inability of the Provincial Governments to come to any agreement, and their demands for new subsidies running into millions annually, the Western natural resources will continue in the hands of the Dominion. The Cabinet has no alternative, although the absolute decision may not yet have been made.

When the conference opened the Government made its proposals for the handing over of the public domain. They proposed to turn over all lands and minerals, reserving only certain coal and oil areas to be used for the public-owned railways. The water-power rights, it was suggested, should be developed as a national asset, and the Government was preparing to launch upon such a policy. It was also proposed that the parks and the forest reserves should remain with the Dominion. It was felt that the cost of administration was large and the revenue small, and the Provinces would not be in a position to finance their administration.

Proposals Agreed to.

All of these proposals were agreed to by the Western Cabinet Ministers. The Government then pointed out that they desired this to be a final settlement of the whole question, and did not want the problem to be left in such a position that it might be opened later. They urged, therefore, that the Provinces should come to an agreement on any terms of transfer. If there was not agreement, then a dissatisfied Province could reopen the whole question.

The Western Provinces first asked that, in addition to being handed over the public domain, they should be allowed to retain the present annual subsidy which was voted them in lieu of their lands. The conference was asked if this was satisfactory. The Eastern Provinces at once objected, and a separate meeting of all the Provincial representatives was held. This meeting failed absolutely to agree, and the Eastern Provinces pressed the proposal that if the Western Provinces were given a subsidy in lieu of lands they should be paid a similar subsidy, based on population. This would have amounted to from five to seven million dollars.

But this did not complete the proposals. The Western Provinces then countered with additional demands. By this time the three Western Provinces and the Eastern Provinces along with British Columbia were so far apart that it was agreed to disagree, and the question was dropped and the memorials and various proposals left in the hands of the Government.

With such enormous demands and with utter failure of any agreement the only outcome must be that the Dominion will continue to own and administer the Western domains until the demands for additional subsidies can be either modified or agreed upon.

The land settlement policy of the Dominion which provides for co-operation, expropriation and settlement of wild lands sold by corporations and speculators was approved by the conference and it is likely every Province will introduce necessary legislation to carry into effect the proposals this coming year.

The introduction of bills, at the next session of Parliament, to enable the land colonization and soldiers' settlement schemes to be brought into effect, is considered likely. The first of these projects, which was introduced to the conference by Hon. J. A. Calder, Minister of Immigration and Colonization, involves the purchase by the Provinces, with money lent to them by the Dominion, of privately owned, undeveloped land, and the sale of this land, on easy terms, to settlers. The second scheme, suggested by Hon. Arthur Meighen, Minister of the Interior, provides for giving additional aid to returned soldiers desirous of settling on the land.

Vast Areas of Land.

The following table shows, in acres, the amount of lands involved in the discussion:

	Manitoba.	Saskatchewan.	Alberta.
Acres under homestead, including military homesteads	8,423,000	27,128,800	18,106,700
Pre-empted homesteads	....	5,897,000	2,854,900
Half-breed scrip, etc.	5,085,454	2,289,800	1,215,000
Granted to railways	3,566,997	15,177,063	13,170,014
Hudson's Bay Company	1,212,300	3,090,100	2,094,800
School endowment	1,585,400	3,967,400	3,457,800
Sold under irrigation	....	76,921	980,680
Under timber leases	1,119,400	1,141,100	1,315,200
Under grazing leases	66,500	2,723,200	2,563,100
Forest reserves parks	2,606,400	6,195,700	16,813,400
Reserved for forest railway purposes (inside track)	746,300	1,430,000	1,666,000
Road allowances	972,848	1,464,041	1,275,049
Parish and river lots	503,647	82,542	118,564
Indian reserves	433,860	1,131,122	1,368,156
Surrendered reserves	87,560	332,746	302,046
Water-covered land	4,257,637	1,902,336	2,284,610
Area available for entry	5,304,700	4,896,600	17,120,900
Total surveyed	35,972,003	78,925,471	86,656,919
Of unsurveyed land not yet allocated, the total acreage is	111,856,332	75,317,185	74,506,351

Hon. Gideon Robertson, Minister of Labor, also brought up the question of technical education at the conference. In the discussion that followed, the consensus of opinion appeared to be that the Provinces should control this matter themselves. They might be assisted by the Dominion with subsidies and grants when necessary. The Minister of Labor also introduced the question of Federal and Provincial employment agencies, the establishment of which, it is hoped, will prove instrumental in solving the problem of unemployment in Canada. These agencies have already been in operation in two Provinces for some years, and an effort is now being made to broaden their scope and co-ordinate their work so as to make it Dominion-wide in its effect. The discussion of this matter appeared favorable to the project. Consideration of a scheme for the housing of workmen also took up some of the time of the conference.

Sir Thomas White, Minister of Finance, gave a review of the financial and economic condition brought on by the war, and raised the question of the overlapping of taxation. He asked if some arrangement could not be arrived at whereby there would be a proper division of taxation. A suggestion which was put forward for the consideration of the conference by the Finance Minister was that the income tax might be handed over to the Dominion Government in toto, the Dominion Government relinquishing taxation on land and licenses generally. Sir Thomas did not put this forward as a proposal, but merely as a suggestion for consideration.

The Provinces will also be willing to co-operate with the Dominion in a policy for the construction of highways, a bill for this purpose was twice introduced by Hon. Frank Cochrane only to be rejected by the Senate. Legislation will likely be again introduced

RAILWAYS AND DEMOBILIZATION

The Dominion Government has decided to have the Canadian Railway War Board appoint a committee to make all railway arrangements in connection with the demobilization of the Canadian Expeditionary Force now overseas. Representatives from the three chief Canadian railways will act together, and complete all arrangements for the transportation of the forces from the disembarkation port of landing to their ultimate destination in Canada.

H. H. Molanson will represent the Canadian Government Railways, C. W. Johnston the Grand Trunk Railway, and Lieut. Col. Walter Maughan will represent the Canadian Pacific Railway as chairman of the committee.

The headquarters of the committee will be in Ottawa, where the committee will be in direct touch with the Canadian Government.

A preliminary meeting of the committee was held on the 21st instant in Montreal. The Minister of Militia was represented by Col. E. E. Clark, Director General of Supplies and Transport, Ottawa.

CO OPERATIVE MILLS FOR BRITISH COLUMBIA SOLDIERS

To complete arrangements for launching 1,500 returned soldiers in the lumber business in British Columbia, Sir Douglas Cameron and Thomas Meredith leave Vancouver soon for England, where they will make a personal selection from the men coming from the war zones. A federal charter is being sought for the Returned Soldiers' Co-operative Lumber Company, Limited, with an authorized capital of $10,000,000 and a paid up capital of $1,500,000.

The mills will be operated on a co-operative basis, the soldiers having full share in the management. It is explained that each of 1,500 returned men should take $100 in stock.

Only returned men will be employed in mills and camps and in the agencies which the company proposes to establish throughout Canada, the United States, Europe and elsewhere. The workers will live in community settlements, and will be paid current lumbermen's wages. The company has secured an option on eight large saw mills in British Columbia with a capacity of 150,000,000 feet yearly, and on timber limits aggregating 5,000,000,000 feet. The provisional officers of the company are: Sir Douglas Cameron, president; R. W. Gibson, Victoria, vice-president; Thomas Meredith, general manager

ONTARIO MINING OUTPUT GROWS

Values Twenty Per Cent. Greater than Last Year—More Nickel, Cobalt, Lead and Iron—Gold Production Kept Up

Returns received by the Ontario Bureau of Mines from the smelters, refining works and metalliferous mines of the Province for the nine months ending September 30th, 1918, are summarized in the table below, which, for purposes of comparison, gives figures for the corresponding period in 1917:

Summary of Production, First Nine Months, 1918.

	Quantity		Value $	
Product	1917	1918	1917	1918
Gold, ounces	....	....	6,754,535	6,875,766
Silver, ounces	15,236,002	13,145,596	12,001,875	12,500,980
Cobalt, metallic, lbs.	295,866	317,291	433,739	702,717
Copper, metallic, lbs.	....	559,713	....	79,137
Nickel, metallic, lbs.	166,921	582,992	67,499	....
Nickel oxide, lbs.	10,831	5,592	3,025	1,731
Cobalt oxide, lbs.	276,769	397,728	323,162	572,845
Other Cobalt and Nickel Compounds, lbs.	276,217	367,923	30,025	53,784
Molybdenite, lbs.	65,827	43,631	83,550	54,671
Lead, pig, lbs.	1,080,000	1,291,571	139,948	115,117
*Nickel in matte, tons	31,064	33,508	15,532,000	20,105,087
*Copper in matte, tons	15,928	17,052	6,371,200	6,820,785
Copper ore, tons	2,658	16	33,419	318
Iron ore, tons	138,808	154,243	559,099	697,839
Pig iron, tons	513,232	541,564	9,841,438	14,728,461
Totals			$52,174,514	$63,309,238

*In 1917 nickel and copper in the form of matte were valued at 25 and 20 cents per pound respectively. For 1918 the values have been placed at 30 cents for nickel and 20 cents for copper.

Gold.

Gold production has been well maintained for the period, considering adverse war conditions which have been aggravated rather than improved during 1918. The signing of the armistice on November 11th will have the effect of releasing men almost immediately from munition plants and this will tend to relieve the labor shortage from which the mining industry as a whole has suffered. The value of the output, $6,875,766, exceeds that for the corresponding period in 1917. This was produced from 711,185 tons of ore milled. In addition 65,939 ounces of silver, worth $64,029, were recovered. Hollinger and McIntyre continue to be the largest producers, tho output respectively being valued at $4,685,586 and $1,206,875. New producers this year include Davidson at Porcupine, Patricia at Boston Creek and Lake Shore at Kirkland Lake. From the last mentioned, since milling operations started in March, 11,253 tons of ore were treated, with a recovery in gold and silver of $271,265 or $24.10 per ton. At Boston Creek a new find of gold telluride on the Miller-Independence has attracted a great deal of attention to this camp.

Silver.

Despite a decline in ounces produced, the output of silver for the first nine months of 1918, if maintained for the balance of the year, will probably equal in value that of any other year in the history of the Cobalt camp. The average New York price of the metal for the period was 95.21 cents per fine ounce, the present price of silver being $1.01¼. Mines shipping 750,000 ounces or over are given in order: Nipissing, Mining Corporation of Canada, Kerr Lake, O'Brien. Shippers this year to date include mines that have been idle for some time. Some of these are Edwards & Wright, Limited, operating the Green Meehan at North Cobalt; the Silver Eagle and Keeley mines in South Lorrain, and Petersoo Lake. Many of the mines are now treating slimes and tailing dumps by flotation methods.

Refineries: The southern Ontario refineries treated 2,758 tons of ore, 1,208 tons of concentrates and 1,847 tons of residues with a recovery of 3,655,975 ounces of silver in addition to cobalt and nickel in the form of metal, oxides and other compounds of these metals. About one-third of the output of cobalt metal by the Deloro Smelting and Refining Company was used in the production of "stellite." Nickel metal from silver-cobalt-nickel ores was marketed to the extent of 224,787 pounds worth $89,275.

The only copper ore shipment was a trial lot by the Hudson Copper Company of Havilah. High operating costs, increased freight rates and smelter charges, and lack of a customs smelter within the Province contribute to make copper mining unprofitable at the present time. As a result of the operations at the new Port Colborne refinery of the International Nickel Company of Canada, there was a production of metallic nickel and copper from nickel-copper matte. The refinery started last July, and up to the end of September had produced 358,295 pounds of nickel and 359,713 pounds of copper. The Copper Cliff and Coniston smelters treated 1,141,089 tons of ore, producing therefrom 64,926 tons of matte containing 33,688 tons of nickel and 17,232 tons of copper.

Iron Ore and Pig Iron.

During the first nine months of this year 154,243 tons of iron ore were shipped. Of this total 84,886 tons were shipped to Ontario points and 69,357 tons outside the Province. In addition to the output of the Algoma Steel Corporation and Moose Mountain, Limited, shipments were made by the Poe Mining Company from Palmerston township, Frontenac county, and by the Canadian Union Iron Mines Corporation from Drummond township, Lanark county.

Pig iron production came from 1,083,456 tons of ore smelted, of which only 87,106 tons were of Ontario origin. Although the tonnage of pig iron produced was only slightly in excess of the 1917 figures, the value shows an increase of nearly 50 per cent. Eight furnaces were in blast, operated by four companies. The steel production was 668,333 tons worth $21,601,144. As a result of the war's ending, the character of the output will be changed almost immediately from shell steel to structural steel and rails.

Miscellaneous.

Production of pig lead was in excess of the 1917 output but a decline in price is reported. The only mine and smelter operating is that of the James Robertson Estate at Galetta, on the Ottawa River. The entire product is shipped to the headquarters of the company at Montreal. The output of molybdenite concentrates shows a decrease. Molybdenum is one of the war metals, and as a result of the armistice the demand has declined. Early in the year the International Molybdenum Company, of Orillia, and the Tivani Electric Steel Company, of Belleville, produced ferro-molybdenum to the extent of 19,410 pounds worth $59,153. Electric Foundries, Limited, of Orillia, produced in experimental work 1,800 pounds of ferro-manganese. This last mentioned company and the Tivani company are now engaged in the electric furnace production of low phosphorus pig iron.

SIR THOMAS WHITE THANKS LIFE INSURANCE MEN

The life insurance companies of Canada had placed at the disposal of the Minister of Finance the services of their entire agency forces, as well as loaning large numbers of company officials and office employees for use in various other capacities.

In having at his disposition the life underwriters Sir Thomas White had the largest body of trained salesmen of any one particular calling, and their training makes them par excellence Victory Bond salesmen. In all parts of the country they were at work.

As recognition of the work done Sir Thomas White has sent to the president of the Life Underwriters Association of Canada, Mr. P. A. Wintemute, the following wire:

"At the close of the Victory Loan campaign, which has been such a remarkable success, I desire to express to you my sincere appreciation of the assistance rendered in the campaign by the Life Underwriters Association. Kindly accept also my best thanks for your personal efforts."

(Signed) Thos. White.

It is also interesting to note that the life insurance companies eclipsed all other financial or commercial institutions in the amount subscribed. They had previously decided to hold all their investable assets at the disposal of the Government. This accounted for the enormous sum of over $50,000,000 being subscribed by the life insurance companies. The subscriptions to the other domestic loans exceed $112,000,000. These facts place the life insurance companies as leaders in these loan campaigns, the beneficial effects of which are extended to all lines of trade and commerce.

A reader of the Monetary Times desires a copy of the issue of November 30th, 1917. Any subscriber who can furnish this copy will have his own subscription extended one month.

SASKATCHEWAN HAIL INSURANCE RESULTS

This Hazardous Business Has Resulted Favourably to Companies This Year

Companies writing hail insurance business in Saskatchewan, exclusive of the Saskatchewan Hail Insurance Association, enjoyed a premium income of $2,116,330 this year with losses of $772,767, the loss ratio being as reported 36.51 per cent., according to a statement prepared by A. E. Fisher, superintendent of insurance for Saskatchewan. The figures as given below are preliminary net returns and are subject to head office revision when reinsurance is taken into consideration. The premium income and losses as reported are as follows:

Company.	Premiums.	Losses.
Acadia Fire	$ 63,108	$ 32,185
Arcola Mutual	39,968	22,903
British America	49,275	16,097
British Crown	81,457	29,405
Canadian Indemnity	154,110	74,089
Canada Security	111,067	58,752
Connecticut Fire	176,471	60,692
Dominion Fire	57,012	11,731
Employers' Liability	212,063	54,314
Excess	115,462	44,383
Farmers Fire & Hail	29,682	9,763
Great North	97,967	62,845
Home	293,507	109,741
Hartford Fire	204,073	84,666
Nova Scotia Fire	50,971	14,221
New York Underwriters	37,104	7,858
Rochester Underwriters	68,913	47,100
Winnipeg Fire	22,236	5,209
Westchester Fire (not reported)	....	....
United Assurance	51,752	26,803
Total	$2,116,330	$772,767

Drought Affected Business.

A comparative statement regarding the hail business, prepared by the superintendent, shows that in 1918 there was a falling off in the amount of hail premiums due largely to the condition of the crop in the western part of the Province. The early frost of July 23rd and 24th resulted in the cancellation of many contracts, all of which had an appreciable effect on the income of the companies. In all 24,556 policies were issued by the companies in 1918, the cancellations totalling 567 in number.

Comparative Statement.

Year.	Premiums.	Losses.	Loss Ratio.
1909	$ 281,035	$ 180,213	64
1910	547,995	237,537	43
1911	787,253	532,840	67
1912	1,051,125	757,640	72
1913	783,194	485,305	61
1914	747,838	173,443	23
1915	1,363,001	438,619	32
1916	1,417,853	1,872,408	132
1917	2,409,746	687,085	28
1918	2,116,330	772,767	36

No Control Over Rates.

When questioned as to what effect the showing of the companies during 1918 would have on the rate charged in 1919, Mr. Fisher stated that the question of rates does not come under the jurisdiction of the insurance department, but that the rates are decided upon by the Canadian Hail Association of which practically all the companies are members, due regard being given to the individual experience of the companies in various districts of the Province.

In the course of a discussion relative to hail insurance, Mr. Fisher spoke most favorably of the work done by the adjusting bureau during the past season, the first year that there has been any uniformity of adjustment on the part of the stock companies. In former years each company had its own adjusters, but this year loss claims were sent to the central bureau by which the appraisal of damage was made.

"I am pleased to say," said Mr. Fisher, "that in 1919 a number of hail insurance companies will be larger than in any year since hail insurance was written in the Province. Several very strong companies have signified their intention of entering the Saskatchewan field. In 1919 there will certainly be a greater demand for hail protection due to the increased acreage. This year the volume of hail insurance underwritten in the western part of the Province was much less than in former years, due, undoubtedly, to the storms of the first week in June. With new crop areas broken and the exceptional opportunities for plowing this fall there should be a larger crop acreage next year than in 1918, the result being that these companies will be called upon to give larger covering. Our companies will be well able to handle all the insurance that may be offered them."

The Saskatchewan Hail Assurance Association, which does not come within the jurisdiction of the superintendent of insurance, had losses of $1,030,000, with which it has funds of $820,000 wherewith to settle.

ECONOMIC OUTLOOK DISCUSSED

Reconstruction came in for another discussion at a meeting of St. James Literary Society, Montreal, held on November 21st. Papers were read by Mr. Francis Hankin and by Mr. W. F. Chipman, who are officers of the Canadian National Reconstruction Groups.

In opening up his subject, Mr. Hankin spoke of the new psychology in the people which resulted from the war, and that the very fight for democracy had resulted in new conceptions of the real meaning of the term, the soldiers as much as the civilians having pondered over conditions that existed before the war. "Any attempt to perpetuate the bureaucratic methods which have been tolerated during the war, or to legislate for any particular class," declared the speaker, "will meet with strenuous opposition." Developments that had emerged out of the war period were the recognition of the power of the workers, a clearer understanding as to the duty of the state and, conversely, the wider duty of the individual towards the state, also the responsibility of individual states for the maintenance of international goodwill.

Tracing the work which had to be undertaken by the Canadian Reconstruction Groups, Mr. Hankin said that demobilization was not merely a military arrangement, since there was wrapped up in it such questions as the proper absorption of men, the interests of labor in regard to the keeping up of wages, etc., and for this reason railways, boards of trade and other economic interests were rightly being consulted. In regard to the employment question, he urged that a federal body would be highly desirable, and that all bureaux of this sort should be conducted by those really fitted to deal with the clientele.

On the human side, Mr. Hankin talked much of the new conceptions of looking after the welfare of employees, not only in giving them living wages, but in enlarging their recreational and educational scope. As regards big corporations and such organizations, the tendency seemed to be in the direction of still increasing, and the two alternatives seemed to be either that these would cause considerable trouble, or that they might become democratized, so that the workers would share the profits and management. One development in Great Britain which Mr. Hankin suggested was of great importance, was the establishment of national councils for various trades and industries. Other phases touched upon were education, women's place in industry, land settlement, aliens as immigrants, taxation and Imperial relations.

Mr. Warwick Chipman followed with a short paper. He put forward as a possible condition of things to be expected, first six months for demobilization, then three or four years of general activity and progress, followed by a slump in industry. This slump, combined with a certain amount of discontent among returned men, might produce a dangerous atmosphere, and in order to keep out Bolshevism, class differences must be overcome. He thought the Whitley report on industrial councils in Great Britain showed how much could be done in the way of a better understanding of labor. "We don't want to treat the labor question as a mere matter of bargaining," he said; "we have to consider that working people want not only money, but some security, some surplus, and the whole question is to consider not merely matters of justice, but mutual sympathy between both parties."

The meeting was presided over by Mr. A. T. Chapman, and among the general business transacted, a resolution was adopted calling for extradition and trial of "fugitive rulers, councillors and commanders" responsible for launching the war, and for brutal and illegal methods in prosecuting it.

The board of directors of the Canadian Northern Railway intend shortly to make a trip of inspection over the eastern lines of the Government railways. It will be remembered that a trip over the western lines of the Canadian Northern was recently completed.

ST. LAWRENCE DAM ONLY TEMPORARY

The International Joint Commission, in an opinion which has been placed in the hands of the Government, defends its action of some weeks ago in approving the application of the St. Lawrence Power Company for permission to construct a submerged weir in the Long Sault channel of the St. Lawrence River. It will be recalled that the application was vigorously opposed by the Dominion Government, which was represented at the hearings by Hon. Hugh Guthrie, Solicitor-General.

The opinion was prepared by Mr. Commissioner Mignault, now Mr. Justice Mignault of the Supreme Court Bench, who points out that the principle which dominates the order for approval of the application is that the construction of the submerged weir is approved merely for a term of five years, or until the termination of the war. The question, the opinion proceeds, therefore remains an open one, and no right of any Government or interest to object to the weir as a permanent structure is affected by the order of approval.

"The order goes further," the document proceeds, "and obliges the applicant to remove the weir at the expiration of the period specified. There does not, therefore, seem to be any ground for the fear expressed by Hon. Mr. Guthrie, in his argument before the Commission, that 'if it goes in it will never come out,' for it must come out, unless the Commission, on a new application, and after hearing all parties interested, allows it to be retained. If the applicant builds the weir, it can only build it as a temporary structure."

It is understood here that the construction of the weir by the St. Lawrence River Power Company was commenced about the middle of September, and that it is now complete, or practically so.

Of the deposit in Central Gold Reserves $10 500,000 is in gold coin : the balance is in Dominion Notes.

T. C. BOVILLE, *Deputy Minister of Finance.*

NEW BANK OF MONTREAL OFFICERS

As a result of the large expansion of business in the past few years, reflected in the annual statement just published, the directors of the Bank of Montreal have decided to enlarge the executive staff by the appointment of four assistant general managers in place of one, as formerly.

The appointments to the four offices were announced on November 22nd, and are: Francis J. Cockburn, H. B. MacKenzie, G. C. Cassels and D. R. Clarke. Each of the new assistant general managers will continue in charge of territory now under his supervision. Mr. Cockburn's duties will be in connection with the Quebec, Maritime Provinces and Newfoundland branches, of which he has been superintendent. Mr. MacKenzie, general manager of the Bank of British North America, when it was recently absorbed by the Bank of Montreal, will supervise the branches of his old bank, now part of the Bank of Montreal system. Mr. Cassels will continue at the head of the London office. Mr. Clarke's duties will be connected with the Ontario branches, of which he has been superintendent for some months past. With the exception of Mr. Cassels at London, the headquarters of the different assistant general managers will be in Montreal.

MORTGAGE COMPANIES AND SEED GRAIN LOANS

Saskatchewan Government Prepares Legislation Permitting Companies to Make Loans

Mention was made last week in the Monetary Times that at the next session of the Saskatchewan Legislature a bill would be introduced by the Government enabling loan companies to make advances to their borrowers for the purpose of purchasing seed grain. Further details regarding this plan have now been received.

The announcement is the result of negotiations which have been going on for some time between the Government and the loan companies. The companies have signified their desire to fulfil the seed grain requirements of their own borrowers, and this arrangement, it is anticipated, will take care of a very substantial proportion of the total requirements in the Province to the extent of probably 75 per cent.

Relief for needy farmers on patented lands in the organized districts will be looked after by the municipalities and it is expected that some assistance will be forthcoming from the Government where it is necessary. In the case of the unorganized lands, the Government itself has undertaken to provide sufficient grain for seed purposes where there is a shortage. So far as unpatented lands are concerned, whether in organized or unorganized territories, the cost of supplying seed grain will be borne by the Federal Government.

Early in the fall, it will be remembered, an embargo was placed on the movement of grain from districts where there was a shortage of seed, but after thirty days in operation the embargo was lifted, the scheme being found to be impractical.

Relief Measures.

Under the relief measures which are now being put into operation, the department of agriculture will receive applications for seed grain requirements for patented and unpatented lands in the local improvement districts, while the department of municipal affairs is sending out printed instructions to the secretaries of the municipalities advising them, where assistance is required in the organized districts, how to proceed.

"Seed grain required by farmers in the west, as far as patented lands are concerned, will to a large extent be supplied by the loan companies holding mortgages on those lands, and special legislation will be enacted by which the cost of the seed will be added to the mortgage," said Mr. Langley, in explanation recently. "The question of the amount of interest to be allowed the mortgagee," he added, "is a matter that will have to be settled by the Legislature. Speaking generally it will, beyond question, be the interest payable on the original mortgage, but there may be cases where the interest on the mortgage may not be reasonable.

Will Relieve Municipalities.

"This method of supplying seed grain will not cover the needs of the Province," he continued, "but will relieve to a very large extent the necessities of municipalities bearing this burden. There will still be, however, a considerable number of applicants for seed grain to the municipalities in many parts of the Province, and it is possible that the provincial government may have to assist many of the municipalities to efficiently meet the demand.

"It is regrettable that the formulation of these methods consumed so much time, the danger being that much local grain that was available for seed will be sold and seed will have to be purchased at central points, entailing some additional cost for transportation, but as far as possible local supplies will be utilized."

Hon. F. H. Phippen and Mr. H. W. Harper have been appointed as members of the Board of Conciliation which was requested by the Toronto Street Railway Employees' Union. The men are asking for 43 cents an hour for the first three months, 46 cents an hour for the next nine months and 48 cents an hour for the second year. This is a considerable increase over the present wage scale.

Consumers of gas for lighting, heating and cooking purposes in Cornwall, Ont., are up against a problem. A short time ago the Stormont Electric Light and Power Company, operators of the Cornwall Gas Works, gave notice to their customers that after the September reading gas would have to be paid for at the rate of $1.80 net ($2 less 10 per cent. for prompt payment), it being claimed that it cost the company $2 per 1,000 cubic feet to deliver the gas.

BANK BRANCHES OPENED AND CLOSED

The following is a list of bank branches opened and closed in Canada during October, 1918:—

Branches Opened—Three.

Exhibition Camp, Toronto....	Bank of Montreal.
Leaside, Ont.	Imperial Bank of Canada.

"SOLID AS THE CONTINENT"

Throughout its entire history the North American Life has lived up to its motto, "Solid as the Continent." Insurance in Force, Assets and Net Surplus all show a steady and permanent increase each year. To-day the financial position of the Company is unexcelled.

1918 promises to be bigger and better than any year heretofore. If you are looking for a new connection, write us. We take our agents into our confidence and offer you service—real service.

"SOLID AS THE CONTINENT"
HEAD OFFICE - TORONTO

"THE DAWN OF A TO-MORROW"

The war having ended so happily it is believed that a better world will rise out of the ruin—More of beneficence, equality, fraternity and sympathy with "The Other Fellow" will prevail in the great "To-morrow" that is dawning. Life insurance embodies these great conceptions and will be one of the big movements that "Will Come Into Its Own." Now is the time to make Life Insurance your life work. The war has given the institution of Life Insurance a great impulse and it is appreciated to-day as never before. It is a calling for men of the highest abilities and the finest character. Sell Life Insurance, and sell Mutual Life Insurance for the Mutual system is popular because it is based upon strictly democratic principles. If not as an agent then ss a member you will be welcomed into our organization.

The Mutual Life Assurance Co. of Canada

Waterloo Ontario

SPEEDY SETTLEMENT

Prompt payment of claims without a moment's unnecessary delay, is one of the first rules of The Great-West Life Assurance Company.

Scores of letters from beneficiaries show how much this promptness often means to them. Here is one letter, from Ontario:

> "Thank you for the prompt and thoughtful way you remitted insurance. Of all the Companies in which my husband was insured, you were the first to remit, although so far away."

Investigate The Great-West Life Policies, and you will find that in all points they leave nothing to be desired

CASUALTY ACTUARIAL AND STATISTICAL SOCIETY

Canadians Represented at Annual Meeting—Subjects of Interest to Actuaries and Statisticians

The fifth annual meeting of the Casualty Actuarial and Statistical Society was held in New York City on November 15th, 1918. The president, Mr. James D. Craig, read an address entitled "The Relation Between the Actuary and the Statistician." There was also the routine business consisting of enrolling associate members and fellows. Out of three men elected to fellowships without examination, two were Canadians. One was Mr. F. W. Hinsdale, secretary of the Workmen's Compensation Board of British Columbia. The other was Mr. W. T. Perry, manager for Canada of the Ocean Accident and Guarantee Corporation.

The following is an abstract of Mr. Craig's address:

The fields in which the actuary and statistician operate are different. The statistician brings together facts calculated to illustrate the condition and prospects of a society and diffuse statistical information in the different departments of human knowledge. His field is unlimited and we find his methods adapted to physical sciences, biology, meteorology, demography, etc. He tabulates and examines the data in many fields, but differs from the actuary in that he does not combine interest with his statistical probabilities. The actuary does not extend his field of operations beyond the general field of insurance, but in this field he finds occasion to use all the statistical methods in the tabulation of his probabilities and then carries his operations further by dealing with the question of interest.

Strictly speaking, the statistician draws no deductions. He collects, arranges, describes, like a careful experimentist. He presents evidence, but not conclusions, and it is only when the statistician, as a distinct operation, assumes the role of the economist that, in addition to conducting the experiment, he fits the theory.

It is probably the extensive use of statistical methods by the actuary in the tabulation and graduation of his data before introducing the factor of interest that has caused him to be looked upon as a statistician. It is only natural that he should avail himself of statistical methods and he has shown no hesitancy in adopting them.

The actuarial work on its technical side depends largely upon the results of statistical enquiries and all developments and improvements are of interest. The connection between the two sciences has had its first official recognition in this body, which has been organized under the name of the Casualty Actuarial and Statistical Society of America. The actuaries have had their organizations in the past, while both the Royal Statistical Society and the American Statistical Association have been developing various phases of inquiry, but, apparently, this is the only organization where both actuarial science and statistical methods are recognized in its name. We have a large field and one that is offering many opportunities.

GRAIN DEALERS' CROP ESTIMATE

The Northwest Grain Dealers' Association has issued its crop estimate for 1918, as follows:

Wheat:	15,526,000	acres at	10.3	bus. per acre,	159,918,000	bus.

South German Reinsurance Company of Munich	1,032,410
Swiss National Insurance Company	2,710,112
Total	$16,761,424

On November 22nd Frank X. Anglim, representing the Alien Property Custodian, sold the entire capital stock of the International Insurance Company to the Chase Securities Company for $576,500. The stock, 2,000 shares of a par value of $100 each, was auctioned in the lobby of the building at 80 Maiden Lane, where the International had its offices.

The International was organized in this State nine years ago. Until the outbreak of the war in Europe it did a small business. After that time, however, it expanded, and in 1917 collected more than $7,000,000 in premiums. It was controlled by the Hamburg Assurance Company, of Hamburg, Germany, which in turn was controlled by Mutzenbacher & Stahl, the insurance kings of Germany. This group controlled the insurance cartel, formed for the purpose of controlling the insurance and reinsurance business of the world.

POWER OF DOMINION OVER COAL AREAS

The Dominion Coal Company has appeared before the Privy Council of Canada to register opposition to the report of the Fuel Controller recommending that the Crown should expropriate certain coal areas of the Dominion Coal Company lying immediately adjacent to the workings of the Nova Scotia Coal Company, and should authorize the Nova Scotia Coal Company to work these areas with a view to increasing the output of coal for the present season.

In urging that this report should not be adopted, the representatives of the Dominion Coal Company argued that the Government has no jurisdiction and that it is a matter of property and civil rights within the jurisdiction of the Province; they argued further that even if the Dominion had jurisdiction to take such action as a war measure in the interests of national defence, it should not exercise it in view of the fact that the war is practically over; the jurisdiction would in any case cease as soon as peace was declared, and the coal areas covered by the order of Fuel Controller Magrath could not possibly be mined within the next three or four months, before peace was declared. Such action could be justified only on the ground of necessity, and that necessity did not exist in the Maritime Provinces.

The order of Mr. Magrath was made because the latter felt that the Nova Scotia Coal Company could economically work these lands of the Dominion Coal Company while the latter was working other portions of the area which it had leased from the Provincial Government. The Nova Scotia Coal Company has other leased areas, but it was not in a position to get them working in time to affect the situation this winter, whereas it could drive from its present workings, which are nearly exhausted, directly over into the Dominion Coal Company's leased areas.

The Cost of Smoking

Do you know that the cost of your two or three cigars—say a quarter a day---will maintain about $4,000 of life assurance for a man between 25 and 30?

You can afford to smoke, sure! But you can also afford an Imperial Life Policy to provide for your wife and little ones should death call you suddenly. For particulars write to

It has been announced that the Massey-Harris Company, of Toronto, have bought the Structural Steel Company's plant at Weston, and will at once remove their gasoline engine manufacturing department from the city to the new factory. Besides the gas engine, the company will manufacture at the new factory cream separators on a large scale, for the increasing European trade, and farm tractors, for which there is now a great demand in the West.

The civil servants of the Dominion of Canada are not satisfied with the award recently announced by the Government. The original demand was for a bonus of $350 per year to all civil servants irrespective of present wages. The award granted by the Government was approximately $175 to those in receipt of salaries less than $1,800. On the 22nd instant a petition was prepared by the Civil Service Federation urging upon the Government the necessity of revising this previous decision.

DEBENTURES FOR SALE

CITY OF EDMONTON

SERIES "A" AND "B" DEBENTURES

The Debentures numbered as below have been drawn for redemption on January 1st, 1919, and will be paid on that date at any of the places of payment mentioned on the Debentures.

Any holder of these Debentures may have the same redeemed at par and accrued interest, New York funds, at any time previous to January 1st, 1919, by having the same forwarded to the Imperial Bank of Canada at Edmonton, Alberta.

CITY OF SASKATOON, SASKATCHEWAN

TENDERS FOR DEBENTURES

Tenders are invited on $30,000.00 fifteen-year six per cent. debentures, dated January 1st, 1919, interest payable July 1st and January 1st.

Sealed tenders to be forwarded to the undersigned on or before five p.m. on Monday, the 16th day of December, 1918. Further particulars may be had on application to the City Commissioner.

C. J. YORATH,
City Commissioner.

Saskatoon, November 20th, 1918.

TWO BOND FLOTATIONS

Announcement is made that the Greater Winnipeg Water District will float $3,000,000 worth of bonds soon after the first of the new year. The Water District secured $4,400,000 during 1918, of which sum $4,000,000 was authorized by the minister of finance. The balance was obtained in the United States.

It is also stated that Saskatchewan got $[illegible] from the minister of finance this year, which sum will be returned by means of bonds to be floated in the open market. As yet no time has been set for the undertaking.

DIVIDENDS AND NOTICES

UNION BANK OF CANADA

DIVIDEND No. 127

Notice is hereby given that a dividend at the rate of 9% per annum upon the paid-up Capital Stock of the Union Bank of Canada has been declared for the current quarter, and that the same will be payable at its Banking House in the City of Winnipeg, and also at its branches on and after Monday, the 2nd day of December, 1918, to shareholders of record at the close of business on the 15th day of November next.

The Transfer Books will be closed from the 15th to the 30th day of November, both days inclusive.

By order of the Board.
H. B. SHAW,
Winnipeg, Oct. 17, 1918. General **Manager.**

NOVA SCOTIA STEEL AND COAL CO., LIMITED

Outlook for Commercial Credits

Present Condition of Prosperity is Temporary, and Explains Excellent Condition of Credit Accounts — Legislation Places Bank and Commercial Credits upon Different Footing — Need for a Thorough Examination of Advances on the Part of Commercial Houses

BY WALTER A. SADLER
Barrister at Law, and Director of the British Canadian Credit Clearing House, Limited

In no sphere of human endeavor is the problematical effect of the advent of world peace causing more concern among those who are best informed than in the matter of commercial credits. The vital part of every business is the credit end. Salesmanship is of prime importance, of course, but the tendency (only human) is for the salesman to make the credit standing of his customer subservient to the (to him) all important matter of selling his goods. It is the duty of the intelligent, modern and capable credit man to say whether or not a particular customer is entitled to the credit asked for. The loss of even a few thousand dollars a year by reason of the pursuit of lax credit methods makes a big hole in net profits.

This cardinal point is overlooked by alas too many managers of large business houses to-day, and the average credit man is not equipped with proper tools to do his work, while his brother in business, the salesman, is too often treated lavishly by comparison.

For the past several years the matter of the extension of credit by wholesalers, jobbers and manufacturers has been given scant consideration by them. The fictitious prosperity existent throughout Canada and the United States is caused in the first place by inflated prices. The farmer is receiving comparatively speaking fabulous prices, in real money too, for his grain, garden truck, cattle and hogs. In turn he is to-day paying the local retailer in cash for his purchases, and the latter in turn is paying off the jobber and wholesaler in most instances promptly and in cash.

In the second place the wage-earner is earning much higher wages than ever before in the history of the world; this is true with some classes of workers, even after taking into consideration the decreased purchasing power of money. He is buying in his turn more extensively than at any other period in our history. The savings bank deposits were never as large as they are to-day.

In fine, the enormous amount of money raised by all the governments in the world, and, in the case of the United States and Canada being spent within the confines of these territories for the purchase of purely war supplies for Europe, has created what appears to-day to be country-wide prosperity, but what in reality are fictitious, unsound and temporarily favorable credit conditions.

Under such circumstances those who control credits, with the possible exception of the bankers on whom the burden of war financing has largely devolved, need not have been possessed of any extraordinary amount of financial prescience to keep their accounts in apparently excellent condition.

What effect then will the cessation of hostilities have on the general abnormal prosperity of the country? Will prices and wages fall or rise, and whichever the result, how will the credit fabric be affected?

Without entering into a detailed discussion of the matter, as our subject is essentially the granting or withholding of credit and not economics purely and simply, it is common knowledge that those in the best position to judge of these matters—bankers and financiers—with one accord not only believe but by dint of repetition have tried earnestly to warn the entire country that we are undoubtedly in for a protracted period of hard times during the process of reconstruction of the world fabric. Taxes will be enormously high for years to come. Skilled labor which has been occupied almost exclusively in manufacturing war supplies, will perforce be compelled to look elsewhere for employment, and this condition will not be improved but rather aggravated by the necessity of restoring huge numbers of returning soldiers to civil life. Wages of labor must out of necessity decrease as well as the prices of the staples of life, with the over supply of the former and the diminished demand from Europe for the latter.

Storm signs have been constantly hung out during the past year by financial and responsible men of affairs. Wholesalers and manufacturers have been told that accounts that are even a little slow now will be absolutely bad when that time arrives. Yet what is being done to minimize resultant loss? Are the dispensers of credit fully alive to the true condition of affairs? In the main, it seems to me that they are on a parallel with the old sourdough who makes fabulous money during any particular mining boom,—he cannot see an end to his affluence, makes no provision for a lean period to come and when that time does arrive, as it inevitably does, he is "broke" or practically so.

If we take this view of after-the-war conditions, what can any wholesaler, jobber, manufacturer or financier do even at the present late moment to forestall considerable loss in the lean years to come?

The most effective way is to refuse to grant any credit at all from now on. Unfortunately the banks are the only favored institutions who can adopt this radical measure to protect themselves, and they are doing it with a vengeance. Witness your futile efforts to borrow anything even on standard stocks and securities at the present time. Witness the drastic rules passed by the influential banks in New York City, under which brokers are no longer permitted to carry stocks and securities for their clients by borrowing on them from the banks.

Unfortunately the wholesaler and manufacturer are not in this enviable position. What can they do to protect themselves?

Discrimination is Required.

My answer is a very simple one, viz.: merely by thoroughly assailing each individual account on their books and weeding out those that do not intrinsically stand the acid test. The trouble is, with the majority of men in this class, that they do not apply the acid test; they get some general information about their customer compiled in a haphazard fashion, and for which they pay practically nothing, and this information does not contain the slightest quantity of basic data as to the true condition of their customers' affairs. On receipt of this information they perform some mysterious and unfathomable mental gymnastics, as a result of which the customer is either granted or refused credit.

If I happen to be in the wholesale dry goods business and am depending on the information supplied to me by my competitors as to their experience with a particular customer, in nine cases out of every ten I am going to be left sadly—but more wise—in the lurch. Dependence on these sources of information are nearly always fatal, because they are directly opposed to the fundamental principle underlying all business, viz: the innate selfishness of the individual. He believes in protecting himself, or his house, first, last and all the time, not caring how his competitors suffer so long as he is protected, and if he did not observe this basic principle he would not remain long in business.

The constant fight of all reputable credit agencies (and by these I mean, those that recognize the falsity of the former associations while they themselves are organized on a strictly business basis) is to educate credit men to paying real money for real, dependable and basic credit information. Unfortunately they have been educated to pay comparatively nothing for this information and the information obtained in this way is correspondingly invaluable.

United States Better Organized.

The credit system—if one may say so—is more highly organized in the United States than in Canada. Across the border larger and successful wholesalers and manufacturers are and have been for a considerable time convinced that if they are asked for an important line of credit from any particular customer, that they are entitled to the fullest disclosure of his business affairs. If this information is refused then the customer becomes *ipso facto* an undesirable one and cannot obtain credit.

Not only must the customer, however, make full disclosure of his books of account, but the facts and figures revealed there must be verified and substantiated through the proper channels. The old theory of simply requesting a customer to disclose his true state of affairs to a prospective creditor has gone by the board. If he says he owns real estate which he values at a certain stated amount, a proper search in the Land Registry Office will reveal the all-important facts, too often concealed and glossed over, as to whether the customer or his wife really owns the property, whether he is simply purchasing it under a sale and purchase agreement, and in all cases the size of the mortgage on it.

In the case of limited liability companies, searches in other places will reveal mortgages and bond issues, and other relevant data of this kind, which data is too often inaccessible in any other way, by reason of Section 88 of the Bank Act* and other similar legislative enactments.

These are the real facts on which to base a true analysis of a customer's credit standing, and until the credit men of this country are willing to pay a fair and reasonable amount of money for this kind of credit service they will continue to have their perennial losses and their potential net profits will continue to be reduced.

With the undoubted lean years rapidly approaching, it behoves all dispensers of credit to employ the best means available to protect themselves. These means are available but they must be paid for, even as a creditor expects his debtor to pay for the merchandise which he sells to him.

---

*Section 88 of the Canadian Bank Act (3 George V., 1912-13), reads:—

1. The bank may lend money to any wholesale purchaser or shipper of or dealer in products of agriculture, the forest, quarry and mine, or the sea, lakes and rivers, or to any wholesale purchaser or shipper of or dealer in live stock or dead stock and the products thereof, upon the security of such products, or of such live stock or dead stock and the products thereof.

2. The bank may lend money to a farmer upon the security of his thrashed grain (of any kind) grown upon the farm.

3. The bank may lend money to a rancher upon the security of his cattle.

4. The bank may lend money to any person engaged in business as a wholesale manufacturer of any goods, wares and merchandise upon the security of the goods, wares and merchandise manufactured by him, or procured for such manufacture.

5. The bank may allow the goods, wares and merchandise covered by the security referred to in the preceding subsections of this section to be removed and other goods, wares and merchandise, such as mentioned in the said subsections, to be respectively substituted therefor if the goods, wares and merchandise so substituted are of substantially the same character and of substantially the same value as, or of less value than, those for which they have been so substituted, and the goods, wares and merchandise so substituted shall be covered by such security as if originally covered thereby.

6. Any such security, as mentioned in the foregoing provisions of this section, may be given by the owner of the said goods, wares and merchandise, stock or products.

7. The security may be taken in the form set forth in Schedule C to this act, or to the like effect.

8. The bank shall, by virtue of such security, acquire the same rights and powers in respect of the goods, wares and merchandise, stock or products covered thereby, as if it had acquired the same by virtue of a warehouse receipt

---

A rich asbestos mine has been discovered at Lake Frontier, Montmagny county, Quebec, near the United States border. The mine is situated about four miles from the tracks of the Quebec Central Railway.

FARMERS' PROPOSALS DRAWN UP

Drastic Tariff Revision, Reciprocity with United States, Free Trade with Great Britain, Recommended—Land Tax and Progressive Income Taxes—Council Declares for Public Ownership in Some Cases—Claim of Returned Soldiers Recognized

COMPREHENSIVE resolutions were drawn up by the Canadian Council of Agriculture, which met in Winnipeg, Manitoba, on Friday, November 29th. The council represents farmers of Ontario, Manitoba, Saskatchewan and Alberta.

The resolutions, most of which relate to economic questions, constitute a political platform, not of one party, but rather of one interest. Hon. T. A. Crerar, Minister of Agriculture, was in attendance at the meeting of the council, of which he is a member.

The platform adopted reads as follows: The Canadian Council of Agriculture hereby recommend the following measures, adopted at their meeting in Winnipeg on November 29th, 1918:

(1) A League of Nations as an international organization to give permanence to the world's peace by removing old causes of conflict.

(2) We believe that the further development of the British Empire should be sought along the lines of partnership between nations free and equal, under the present governmental system of British constitutional authority. We are strongly opposed to any attempt to centralize Imperial control. Any attempt to set up an independent authority with power to bind the Dominions, whether this authority be termed Parliament, Council or Cabinet, would hamper the growth of responsible and informed democracy in the Dominions.

Agriculture Should be Promoted.

(3) Whereas Canada is now confronted with a huge national war debt and other greatly increased financial obligations, which can most readily and effectively be reduced by the development of our national resources, chief of which is agricultural lands;

And whereas it is desirable that an agricultural career should be made attractive to our returned soldiers and the large anticipated immigration, and owing to the fact that this can best be accomplished by the development of a national policy which will reduce to a minimum the cost of living and the cost of production;

And whereas the war has revealed the amazing financial strength of Great Britain, which has enabled her to finance not only her own part in the struggle, but also to assist in financing her allies to the extent of hundreds of millions of pounds, this enviable position being due to the free-trade policy which has enabled her to draw her supplies freely from every quarter of the globe, and consequently to undersell her competitors on the world's market, and because this policy has not only been profitable to Great Britain, but has greatly strengthened the bonds of Empire by facilitating trade between the Motherland and her overseas Dominions—we believe that the best interests of the Empire and of Canada would be served by reciprocal action on the part of Canada through gradual reductions of the tariff on British imports, having for its object a closer union and a better understanding between Canada and the Motherland, and at the same time being about a great reduction in the cost of living to our Canadian people;

Criticism of Tariff.

And whereas the protective tariff has fostered combines, trusts and "gentlemen's agreements" in almost every line of Canadian industrial enterprise, by means of which the people of Canada—both urban and rural—have been shamefully exploited through the elimination of competition, the ruination of many of our smaller industries and the advancement of prices on practically all manufactured goods to the full extent permitted by the tariff;

And whereas agriculture—the basic industry upon which the success of all other industries primarily depends—is unduly handicapped throughout Canada, as shown by the declining rural population in both Eastern and Western Canada, due largely to the greatly increased cost of agricultural implements, and machinery, clothing, boots and shoes, building material and practically everything the farmer has to buy, caused by the protective tariff, so that it is becoming impossible for farmers generally, under normal conditions, to carry on farming operations profitably;

And whereas the protective tariff is the most wasteful and costly method ever designed for raising national revenue, because for every dollar obtained thereby for the public treasury at least three dollars pass into the pockets of the protected interests, thereby building up a privileged class at the expense of the masses, thus making the rich richer and the poor poorer.

And whereas the protective tariff has been and is a chief corrupting influence in our national life because the protected interests, in order to maintain their unjust privileges, have contributed lavishly to political campaign funds, thus encouraging both political parties to look to them for support, thereby lowering the standard of public morality;

Recommendations—Tariff Proposals.

Therefore, be it resolved, that the Canadian Council of Agriculture, representing the organized farmers of Canada, urges that as a means of remedying these evils and bringing about much-needed social and economic reforms, our tariff laws should be amended as follows:

(a) By an immediate and substantial all-round reduction of the customs tariff.

(b) By reducing the customs duty on goods imported from Great Britain to one-half the rates charged under the General Tariff, and that further gradual uniform reductions be made in the remaining tariff on British imports that will ensure complete free trade between Great Britain and Canada in five years.

(c) That the reciprocity agreement of 1911, which will remain on the United States statute books be accepted by the Parliament of Canada.

(d) That all foodstuffs not included in the reciprocity agreement be placed on the free list.

(e) That agricultural implements, farm machinery, vehicles, fertilizers, coal, lumber, cement, illuminating fuel and lubricating oils be placed on the free list, and that all raw materials and machinery used in their manufacture also be placed on the free list.

(f) That all tariff concessions granted to other countries be immediately extended to Great Britain.

(g) That all corporations engaged in the manufacture of products protected by the customs tariff, be obliged to publish annually comprehensive and accurate statements of their earnings.

(h) That every claim for tariff protection by any industry should be heard publicly before a special committee of parliament.

(4) As these tariff reductions may very considerably reduce the national revenue from that source, the Canadian Council of Agriculture would recommend that in order to provide the necessary additional revenue for carrying on the government of the country, and for the bearing of the cost of the war, direct taxation be imposed in the following manner:

Direct Tax on Land Values.

(a) By a direct tax on unimproved land values, including all natural resources.

(b) By a graduated personal income tax.

(c) By a graduated inheritance tax on large estates.

(d) By a graduated income tax on the profits of corporations.

(e) That in levying and collecting the business profits tax the Dominion government should insist that it be absolutely upon the basis of the actual cash invested in the business, and that no consideration be allowed for what is popularly known as watered stock.

(f) That no more natural resources be alienated from the Crown, but brought into use only under short-term leases, in which the interests of the public shall be properly safeguarded, such leases to be granted only by public auction.

(5) With regard to the returned soldier we urge:—

(a) That it is the recognized duty of Canada to exercise all due diligence for the future well being of the returned soldier and his dependants.

(b) That demobilization should take place only after return to Canada.

(c) That first selection for return and demobilization should be made in the order of length of service of those who have definite occupation awaiting them or have other assured means of support, preference being given first to married men and then to the relative need of industries, with care to insure so far as possible the discharge of farmers in time for the opening of spring work upon the land.

(d) That general demobilization should be gradual, aiming at the discharge of men only as it is found possible to secure steady employment.

(e) It is highly desirable that if physically fit discharged men should endeavor to return to their former occupations, and employers should be urged to reinstate such men in their former positions wherever possible.

(f) That vocational training should be confined to those who while in the service have become unfitted for their former occupations.

(g) That provision should be made for insurance at the public expense of unpensioned men who have become undesirable insurance risks while in the service.

(h) That facilities should be provided at the public expense that will enable returned soldiers to settle upon farming lands when by training or experience they are qualified to do so.

(6) We recognize the very serious problem confronting labor in urban industry resulting from the cessation of war, and we urge that every means, economically feasible and practicable, should be used by Federal, Provincial and municipal authorities in relieving unemployment in the cities and towns, and further recommend the adoption of the principle of co-operation as the guiding spirit in the future relations between employer and employees—between capital and labor.

(7) Land settlement scheme based on a regulating influence in the selling price of land. Owners of idle areas should be obliged to file a selling price on their lands, that price also to be regarded as an assessable value for purposes of taxation.

(8) Extension of co-operative agencies in agriculture to cover the whole field of marketing, including arrangements with consumers' societies for the supplying of foodstuffs at the lowest rates and with the minimum of middleman handling.

Public Ownership of Utilities.

(9) Public ownership and control of railway, water and aerial transportation, telephone, telegraph and express systems, all projects in the development of natural power, and of the coal mining industry.

(10) To bring about a greater measure of democracy in government, we recommend the immediate repeal of the War Time Election Act; the discontinuance of the practice of conferring titles upon citizens of Canada, the reform of the Federal Senate, and immediate check upon the growth of government by order-in-council, and increased responsibility of individual members of parliament in all legislation; the complete abolition of the patronage system; the publication of all contributions and expenditures, both before and after election campaigns; the removal of press censorship upon the restoration of peace, and the immediate restoration of the rights of free speech; the setting forth by daily newspapers and periodical publications of the facts of their ownership and control; proportional representation; the establishment of measures of direct legislation through the initiative, referendum and recall, and the opening of seats in parliament to women on the same terms as men.

Approve of Education.

(11) An eleventh resolution, passed in the evening read :—

That the council recognize the great importance of such an educational system as will train the rising generation in the highest ideal of citizenship, and that we co-operate with those who are promoting a national congress on education.

That the council approve strongly of the work done by the laboratory in Winnipeg, and urge upon the Dominion government the elaboration and extension of system of laboratories for making accurate milling and baking tests of Canadian wheat, in order to secure more nearly the intrinsic value of the wheat upon the market.

That the executive take steps to investigate the conditions surrounding the marketing of stock, particularly the various items of expense that are charged against shipments.

That the post-discharge allowance to returning soldiers be increased to cover a period of six months instead of three months.

That the executive be given authority to take action in connection with any movement toward national standardization of text books in the schools of Canada.

That the council recommend to the provincial associations that they take action in whatever manner they deem advisable to secure the nomination and election of candidates at the next Federal election who will endorse and support the platform adopted by the council.

PERSONAL NOTES

Brig.-General R. F. M. Sims has been appointed agent-general for Ontario, temporarily, in the British Isles. This position became vacant a few weeks ago by the death of Mr. Richard Reid.

Mr. E. R. Wood, president of the Dominion Securities Corporation, Toronto, has left for a holiday in California, and will be absent for an indefinite period. Many of the other bond dealers of Toronto and Montreal are having a rest after the Victory Loan campaign.

Mr. C. E. Jenney, formerly of Toronto, has been appointed general agent, passenger department of the Grand Trunk Pacific Railway and Grand Trunk Pacific Steamship Company, with headquarters at Vancouver, and jurisdiction over a large territory.

Mr. T. G. McMaster, manager of the Bank of Nova Scotia, Guelph, has been promoted to the managership of the branch of his bank at Hamilton, which is one of the most important offices of the bank in Canada. Mr. McMaster will be succeeded at Guelph by Mr. B. M. McLeod, who has been on the inspection staff of the bank for some time, and was formerly manager of the Edmonton branch.

OBITUARY

Mr. Charles McGill, former general manager of the defunct Ontario Bank, died in Montreal last week.

Mr. William Walsh, general superintendent of the eastern branch of the Dominion Express Company, an outstanding figure in the business life of Toronto, died on December 2nd, after ailing but for a short time.

Mr. F. J. J. Stark, general manager of the Dominion Gresham Guarantee and Casualty Company, died suddenly on the 4th inst. Interment takes place at Oshawa on the 6th.

Mr. James Muir, president of the James Muir Company, boot and shoe manufacturers, Maisonneuve, died at the Ross Memorial Pavilion of the Royal Victoria Hospital in his 78th year on November 30th. Mr. Muir had long been identified with the shoe manufacturing industry of Canada, and was regarded as an influential man in that industry.

Mr. Robert Kilgour, Toronto, died, after being in failing health since his retirement from active business five years ago. Although of a retiring disposition the late Mr. Kilgour had taken a most important part in the commercial affairs of the community. He probably was best known as the head of the firm of Kilgour Brothers, the largest manufacturers of paper bags in Canada, and as vice-president of the Canadian Bank of Commerce for a time.

Mr. Cawthra Mulock, second son of Chief Justice Sir William Mulock, died on Sunday, December 1st, in New York City. The late Mr. Mulock was born in 1884, educated at Upper Canada College, Toronto, and later at the University of Toronto. In 1908 he was elected a member of the Toronto Stock Exchange, and became a director of the Penny Bank of Toronto, Confederation Life Association, Guardian Trust Company, Imperial Bank, vice-president of the National Trust Company and head of the Canada Bread Company. He was also responsible for the erection of the Royal Alexandra Theatre, Toronto; was a member of the National Horse Show Association and the advisory board of the Civic Art Guild. As a financier he was head of the firm of Cawthra Mulock and Company.

Messrs. Hearne and Van Norman, insurance brokers, Toronto, have moved their offices from 34 to 24 Toronto St.

THE GOVERNMENT'S HOUSING PROGRAM

The Dominion Government has announced that it will loan funds to the provinces up to a total of $25,000,000, for the purpose of assisting in the construction of houses throughout the Dominion. Quite apart from the wisdom of a measure of this kind it is obvious that it is a violation of the spirit if not of the letter of the terms upon which the second Victory Loan has been raised. The official prospectus stated that the proceeds of the loan would be used for war purposes only and the purpose in question cannot by any stretch of argument be shown to be an essential part of the prosecution of the war or of demobilization. The money will be loaned to the province at 5 per cent. so that the Dominion Government loses one-half per cent. upon the money handled by it, and in addition, the expenses involved both in raising that portion of the Victory Loan used in this way and the expense of making the loans to the provinces. Upon the total of $25,000,000 this would be $125,000.

If the Dominion Government responds in such a fashion to every agitation which is raised for money on easy terms, the proceeds of the Victory Loan will soon be used up. The housing problem, if there is such a problem at all, is certainly not a national one, but has been recognized in the United States and in Great Britain as merely an extraordinary condition which has arisen in centres of urban war industries. The causes which have been maintaining this unusual condition are now being removed.

The municipality of Toronto, which was one of the cities most affected, appointed a commission last August to report upon the housing question. The findings of the commissioners have just been made public and they arrived, therefore, at an opportune time in view of the Dominion Government's action. Valuable information, not only regarding the city of Toronto, but regarding the Dominion as a whole, is given in this report. The population of Toronto decreased during 1915 and 1916, but has increased during the last two years when the munitions business has been at its height and when improved general conditions attracted an influx of population from outside centres. Consequently the number of vacant houses has decreased but owing to the high costs of construction very few building permits have been issued during the war years. The commissioners express the opinion that there will be a demand for small houses costing from $2,000 to $3,000 in the near future.

The most valuable feature of the report, however, as regards the present question, is the summary it gives of housing conditions throughout Canada. The commissioners circularized the principal cities of the Dominion, municipalities of Ontario, and industrial companies throughout the country. Most of the municipalities report that there is no housing problem and none of them intimated any intention of going into the building business. This is in line with the experience of the Ontario Government in connection with its recent housing scheme by which it offered to loan funds to municipalities at 5 per cent. for building purposes provided the municipality financed part of the cost itself. Practically no advantage has been taken of this offer. So long, in fact, as money rates remain high municipalities cannot gain much by borrowing part of the funds at 5 per cent. and having to pay from six to seven per cent. for the remainder.

The erection of houses is a decidedly speculative enterprise and the action of the Dominion Government in encouraging the provinces to enter such a business is ill-advised. The Toronto commission reports that the solution can best be left in private hands and that with the decreasing cost of supplies and the presence of a valuable supply of labor there will soon be no place where the question can be of sufficient gravity as to warrant any government action.

LABOR UNREST

Indications of labor unrest in Canada draws sharp attention to the fact that if workmen are deluded by the false economic philosophy of mere agitators, permanent injury will be done to their cause. It is as absurd as it is untrue that the rich are growing richer and the poor poorer during the present period of industrial activity; or for that matter, that such has occurred during any period of the past fifty years. No one will deny that profiteering during war time is abominable; but that profiteering may be just as characteristic of the demands of labor as it has ever been among war contractors. In fact, and to their everlasting honor, it may be truthfully said that Canadian manufacturers and financiers have accepted every manner of risk with the possibility of the heaviest losses, in order that the war may be won.

A prevalent idea that labor can progress only if it secures a monopoly position in the field of industry, finds no foundation in present or past experience. Before the labor union became a factor worth mentioning in the economic life of Canada or the United States, labor made amazing progress. During the half century, 1850-1900, the hours of labor were reduced from 12 and 14 to 8 and 10 per day, while wages in terms of money, as well as of purchasing power, doubled. It cannot be truthfully said that the unionizing of labor effected this remarkable transformation in the wellbeing of the working class. The false doctrines of the sympathetic strike, and of the solidarity of the interests of labor against those of capital, need no refutation by those who understand the phenomenal advance that has been made by labor, with respect to the standard of living and material wellbeing, before the union became a significant factor in the labor world.

No doubt the rapid accumulation of wealth, and particularly its control by the idle rich in Canada and the United States, has had much to do with unrest among the working class. Nevertheless, it should not be forgotten that industrial activity and control does not make for the creation of a leisured class. The manager of a business enterprise certainly cannot escape responsibilities, and holds no sinecure simply because he manages property which is largely owned by others. His reward is not disproportionate to the strain under which he works, nor the responsibility thrust upon him. And, as Mr. Schwab recently stated, there were never greater opportunities to rise from the ranks than are presented to efficient workers to-day. A survey of industrial leaders occupying prominent positions in the economic world in the United States and Canada, discloses the fact that the majority of them have reached the top of the ladder by starting at the lowest rung.

Behind much of present-day agitation is the false teaching that large fortunes have been accumulated at the expense of the laboring class. Such beliefs are largely the result of ignorance and intolerance, rigidity of opinion, and reliance upon emotion rather than upon coolheaded investigation. The extremists and irreconcilables base almost every statement upon *a priori* conceptions, and not upon a scientific analysis of facts,—of which, indeed, they are incapable. This is especially true of their allegation that labor alone creates value; and that, therefore, the entire product should be distributed in wages among the working class.

Too frequently agitators make impossible demands, with respect to hours and wages, because they misunderstand completely the fundamental principles which underlie the industrial process. Hours of work are shortened, a limit put upon piece work, strict regulation enforced with respect to methods of work because of the futile conception of "making work." Such acts are ruinous to efficiency in production, raise the price of products, prevent the employer from getting contracts in competition with others, and in the end dislocate industry and lessen work.

Both from the economic as well as from the patriotic point of view, there is at present altogether too much talk of the "sympathetic" strike in Canada. The sympathetic strike is based upon the false premise that labor can acquire a complete monopoly of the working force within the country. Census figures disclose the fact, however, that not fifteen per cent. of all males gainfully employed in the Dominion belong to labor unions. Were it possible, nevertheless, to bring all workers within one vast union, the supply of labor relatively to demand would remain as before, and wages could reach no higher level. We have no hostility to the labor union as such; but it should be constantly emphasized that the rewards of labor depend not so much upon monopoly as upon skill, industry and efficiency.

LIFE COMPANIES AND THE EPIDEMIC

Statistics are not as yet available regarding the losses of life insurance companies as the result of the influenza epidemic, and it is doubtful if this loss will ever be accurately known. The disease is not one which is readily identified and there will, therefore, be some vagueness in the reported causes. Evidence received, however, indicated that the blow to insurance companies is a considerable one and it is stated that the expected mortality rate for 1918 may be fully experienced.

In an address recently given before the Insurance Institute of Toronto, by its president, Mr. H. W. Crossin, some figures were given which, while not exhaustive, indicate the importance of these losses. The figures are derived from the United States. At the beginning of November a total death rate of 59,000 was reported from 46 cities, and it was understood that there had been a total of 36,000 deaths in the cities of Massachusetts and Pennsylvania alone. Mr. Crossin stated that he had been advised privately that the deaths in Pennsylvania alone, up to November 21st, the date of his address, had reached a total of 40,000.

An epidemic of this kind strikes the insurance companies at their weakest point. This is for two reasons. In the first place the influenza epidemic has spread throughout practically the whole civilized world, which is the field under which life companies operate. Ordinarily, wide geographical extension of business is a protection, but in this case it has been so only in a small degree. In the second place it attacks people from fifteen to forty years of age, which is a class which carries heavy insurance. An epidemic in this class, therefore, affects insurance companies to a greater degree than would an epidemic among people of less or greater ages.

It is not to be understood from this, of course, that companies operating locally or nationally are in any better position. The United States War Risk Bureau, which undertook to insure its soldiers at the insignificant cost of $8 per 1,000 has had to face over 15,000 death claims with an insurance loss of $140,000,000. Insurance rates, it is obvious, must be sufficiently high to leave a substantial margin in ordinary years so that a reserve for such a contingency as this may be accumulated.

NOVEMBER FIRE LOSSES

Large Decrease for the Month—Total to Date Shows Increase of Over $10,000,000 Over Same Period Last Year

The Monetary Times' estimate of Canada's fire loss during November, 1918, is $1,059,580, compared with the October loss of $5,119,145 and $959,049 for November, 1917. The following is the estimate of the November losses:—

Fires exceeding $10,000	$ 850,000
Small fires reported	22,250
Estimate of unreported fires	187,330
Total	$1,059,580

The Monetary Times' record of the past three years and this year to date, shows the following monthly losses:—

	1915.	1916.	1917.	1918.
January	$ 1,249,886	$ 1,649,217	$ 1,918,660	$ 2,688,556
February	1,019,556	3,275,600	2,009,953	2,243,762
March	1,632,696	1,406,501	2,050,650	1,682,286
April	1,463,747	1,460,437	1,317,714	3,240,187
May	881,855	1,850,205	1,163,110	3,570,014
June	1,157,156	494,557	1,184,627	3,080,982
July	773,269	3,039,634	1,101,734	3,369,684
August	403,693	1,057,109	1,230,183	3,110,445
September	1,116,109	981,703	1,301,700	917,280
October	1,290,325	1,077,815	704,605	5,119,145
November	1,087,980	923,235	959,049	1,059,580
December	1,595,255	3,271,496	5,144,100	....
Totals	$13,671,527	$20,487,509	$20,086,085	$30,081,927

The fires in November at which the losses amounted to $10,000 and over were:—

Halifax, N.S., November 5th, relief commission building, $15,000.

Quebec, Que., November 3rd, marine stores building, $75,000.

Burlington, Ont., November 16th, residential section, $34,000.

Elora, Ont., November 19th, plant of the T. E. Bissell Company, $75,000.

London, Ont., November 15th, Belvedere Hotel, $10,000.

Montreal, Que., November 19th, plant of the Patterson Manufacturing Company, $10,000.

Windsor, Ont., November 11th, apartment house, owned by Winter, Williamson and Little, $300,000.

Campbellton, N.B., November 18th, Hotel Dieu Hospital and convent school of the Sisters of Charity, $39,000.

Charlottetown, P.E.I., November 21st, building of Grant and Kennedy, $25,000.

New Waterford, N.S., November 18th, Star Theatre and adjoining business block, $20,000.

Lacolle Junction, Que., November 25th, chicory factory, $12,000.

Toronto, Ont., November 29th, Appleford building, $10,000

Toronto, Ont., November 29th, plant of the British Forgings Company, Limited, $200,000.

Montreal, Que., November 28th, premises of the Charland and Bissaillon hay depot, $25,000.

Destroyed or Damaged.

Among the structures damaged or destroyed last month were: Photography establishment 1, rock house 1, business buildings 5, plants 4, vacant building 1, vacant house 1, residences 10, shingle mill 1, storehouse 1, barns 3, hotels 3, apartment houses 2, convent 1, factories 2, store 1, theatre 1, business block 1.

Among the causes reported last month were: Defective gas heater 1, defective flue 1, defective chimney 1, defective fireplace 1, defective wiring 1, defective stovepipe 1, incendiarism 1, spark from passing locomotive 1, ashes left in cellar 1, explosion of test oven 1.

Total of Fatalities Small.

The following is a list of fires at which fatalities occurred last month:—

Hull, Que., November 6th, trapped in burning house	1
St. Catharines, Ont., November 23rd, clothing caught fire from gas stove	1
Brantford, Ont., November 26th, playing with matches	1
Total	3

The following table, compiled by *The Monetary Times*, shows deaths caused by fire during November, 1918, as compared with previous returns:—

	1911.	1912.	1913.	1914.	1915.	1916.	1917.	1918.
January	27	27	14	26	3	10	21	28
February	12	11	21	18	11	23	19	87
March	18	24	22	27	23	23	20	34

Totals	317	203	226	175	142	531	207	215

BANK OF MONTREAL ANNUAL MEETING

Some of the larger industrial and financial problems which are facing Canada were discussed at the annual meeting of the Bank of Montreal, held on Monday, the 2nd inst. Sir Vincent Meredith, the president, dealt particularly with the problems immediately ahead of the country. The most important, he said, was how the country was to meet the interest on the vast debt of possibly $1,800,000,000, which would exist after the war. Increased production would relieve the country of a portion of this burden, and this with strict economy and growing population would in time adjust the difficulties.

Taxation cannot easily be lessened and may be increased, added Sir Vincent. A levy on capital, advocated in some quarters, must only result in the stifling of individual incentive and enterprise and the penalizing of industry, self-denial and thrift. Taxing capital to the point of unemployment in industrial enterprise would involve unemployment of labor and produce serious consequences. If placed principally on consumption, the burden of taxation is distributed.

If Canada were to share in the business opportunities during the period of reconstruction, the president said, the banks must stand ready to arrange liberal and probably long-term lines of credit, providing the necessary funds from their own resources or availing themselves of rediscount with the Dominion government. At present all signs point to a great demand for capital for reconstruction, refunding and replacement purposes, and interest rates in consequence will in all probability rule high for some time to come.

With particular reference to the affairs of the bank, Sir Vincent announced that the distribution to the shareholders would now take the form of a straight dividend of 12 per cent. per annum, instead of a dividend of 10 per cent. and a dividend of 2 per cent. With a view to enabling Canada to be closely in touch with the affairs in France during the period of reconstruction, the bank was also making arrangements for the opening of a branch in Paris

Sir Frederick Williams-Taylor, the general manager, dealt more especially with the growth and development of the business of the bank and financial conditions in the principal centres of the world. Sir Frederick pointed out that there never was a time when Canada was more in need of sound economic thinking and a sane financial policy as at present.

With the acquisition of the Bank of British North America the resources of the bank now totalled $558,413,546, of which $34,468,283 belonged to the shareholders and $523,945,262 was entrusted to the care of the bank by the public. It was worthy of note that the bank's total assets are now as great as were the combined total assets of all the Canadian chartered banks 17 years ago.

A branch of the Bank of Hamilton has been opened at Bluevale, Ontario. The branch, which is in charge of Mr. W. P. Pugh, is under the direction of the Wingham branch of the Bank of Hamilton.

DOMINION TO FINANCE HOUSING

Government Sets Aside $25,000,000, Under Authority of War Measures Act, to be Loaned to Provinces for Building of Homes

The Dominion government has created a fund of $25,000,000 which will be available by way of loan to the several provincial governments in connection with the carrying out of the programme for the better housing through municipalities or otherwise.

In the order-in-council authorizing the transaction the minister of finance points out that at the conference recently held at Ottawa between the premiers and other members of the governments of the several provinces and representatives of the Dominion government one of the most important subjects of discussion was that of the creating of better housing conditions for the industrial population of our larger centres. The minister points out that, owing to the practical cessation of building operations during the war, there is at present a great scarcity of housing accommodation in most cities, and this condition will become intensified with the return of soldiers from overseas and their re-establishment with their families in civil life and occupation. The minister further states that at the conference it developed that some of the provincial governments were considering the adoption of a policy of making loans to municipalities and otherwise extending advances over a long period, and repayable upon the amortization plan, for the purpose of promoting the erection of dwelling houses of a modern character to relieve the congestion of population in cities and towns in their respective provinces, and the question was raised as to whether the Dominion government would aid the several provincial governments in carrying out such a policy by making loans to them to place them, to the extent that might be necessary, in funds for the purpose.

Terms of Loans to Provinces.

The minister has accordingly made the following recommendations:—

(1) That the minister of finance be authorized, under the provisions of the War Measures Act, upon request from the government of any province of Canada, to make loans to such government for the purpose mentioned.

(2) That the aggregate amount to be loaned to all provinces shall not exceed $25,000,000, and. the amount of loan to any one province shall not exceed the proportion of the said $25,000,000 which the population of the said province bears to the total population of Canada.

(3) That the loans made may be for a period not exceeding twenty years, with the right of any province to pay off the whole or any part of the principal of the loan at any time during the said term.

(4) That interest at the rate of five per cent. per annum, payable half-yearly, shall be charged upon the advances from the dates thereof respectively.

(5) The minister of finance may accept bonds, debentures or such other form of security as he may approve, evidencing the indebtedness of any provincial government for loans made to it.

(6) Advances are to be made from the war appropriation.

(7) Advances may be made as soon as a general scheme of housing shall have been agreed upon between the government of Canada and the government of the province applying for the loan hereunder.

Will Provide Employment.

Speaking on Tuesday of the action of the government, Sir Thomas White said that apart from the recognized value of better housing from the standpoint of national health, comfort and morality, the problem was of exceptional importance at the time because the carrying out of a vigorous policy of better housing by the provincial governments and municipalities would find employment during the reconstruction period for a great army of artisans and workmen. The building trades in all branches, when fully occupied, always require a large amount of labor, skilled and unskilled.

If plans for model house construction for individual workers should be taken up at once by municipalities having congested areas of population, a great deal of employment would be afforded during the coming winter in getting prepared the necessary material for beginning construction in the spring. This would beneficially affect the lumber industry, carpentering, plumbing and other trades. A considerable amount of actual construction could be done during the winter.

Low Rate of Interest.

The Dominion government had fixed a rate of interest lower than that at which it was able to borrow money. It felt justified in doing this owing to the national importance of the matter, and as a contribution toward the carrying out of programmes of better housing by the provincial governments and municipalities throughout the Dominion. It was recognized that a low rate of interest to borrowers was of vital importance in making better housing schemes effectual. It was necessary also that the loans should be for a long period, in order that the amortization of principal should not impose too heavy an annual burden upon borrowers.

Through Municipalities.

The minister stated that in his view the immediate benefit resulting from the creation of better housing facilities would be to the municipalities immediately concerned and the provinces in which they were situated. In his view there should be no hesitation on the part of municipalities in proceeding with better housing programmes, provided the congestion in their industrial areas warranted such action. The question of risk of loss was of minor consideration, having regard to the ultimate benefit to the communities concerned and the desirability of affording employment in advantageous undertakings during the reconstruction period. He hoped that with the financial means provided provinces and municipalities would at once proceed to formulate better housing.

Sir Thomas White has been in close touch with certain of the provincial governments which are known to be favorable to the prosecution of a vigorous programme in the construction of model houses for industrial workers. It is not known whether the provincial governments will confine themselves to making loans to municipalities or will engage otherwise in carrying out their policy. It is thought they will prefer to act through the municipalities which, it is pointed out by Sir Thomas White, are immediately concerned, and would be the chief beneficiaries of the carrying out of a better housing policy.

WELLAND CANAL TO BE COMPLETED

As a part of the reconstruction programme of the Dominion government, Hon. Dr. Reid, minister of railways, will at once proceed with the completion of the Welland Canal. The estimated cost of the work embraced in the four main contracts under which construction was being carried on at the outbreak of the war was 20 million dollars, of which 12 million dollars has already been expended. In addition to the estimated value of the main contracts referred to, there were other estimated necessary expenditures in contemplation for land, cement, structural steel bridges, lock gates, valves, etc., amounting to about eight million dollars, of which four million dollars has already been expended. The minister of railways expects that there will be engaged during the winter a force of about 800 men preparing for the reopening of the work in the spring, when some 4,000 will be engaged. Hon. Dr. Reid also expects to finish up work remaining to be done to complete the Trent Canal. This will employ a few hundred men.

As already announced, orders have been placed through the war board, here, for 200,000 tons of steel rails to meet the requirements of the Canadian Pacific, Grand Trunk and the government railway systems. The value of this order is about $10,000,000. In addition the boards of directors of the several railway companies will proceed with the construction of such car equipment and locomotives as are needed. It is understood that the Canadian Pacific and the Grand Trunk will fill their requirements in their own shops. The aggregate value of car and locomotive equipment required by the several railways will be some 12 to 15 million dollars.

The Honorary Advisory Council for Scientific Research has advised the expenditure by the Dominion government of $500,000 for the construction of a Central Research Institution

Western Municipals in October.

During the month of October many blocks of Saskatchewan School District bonds, totalling $23,100, were sold; also a block of Saskatoon sinking fund bonds totalling $2,325 and a small block of bonds of the town of Kamsack, Sask., amounting to $800, were sold. This makes a total of $26,225 sold in October which was not reported in our record. Adding this to the $103,000 which was reported in October, the amount of municipals sold in Canada for that month total $129,225.

WEEKLY BANK CLEARINGS

The following are the bank clearings for the weeks ended December 1st, 1917, and November 28th, 1918, respectively, with changes:—

Life Insurance a Thrift Factor

Constructive Aspects Emphasized at 12th Annual Convention of Association of Life Insurance Presidents in New York—Prominent Insurance Leaders Addressed Gathering, Which Included Many Canadians—Effect Upon Life Insurance of Losses From War and Influenza Epidemic

"FREEDOM and Thrift in Nation and World," was the theme of the Association of Life Insurance Presidents' convention, which has just been concluded in New York City, after sitting for two days, December 5th and 6th. The convention was attended by representatives of all the leading companies in the United States and Canada. Among the Canadians present were: Mr. H. C. Cox, president of the Canada Life, and Messrs. McConkey, Ramsey and Saunders, of the same company; Mr. G. B. Woods, president of the Continental Life, Toronto.

The chairman of the convention, Mr. Geo. B. Stadden, president of the Franklin Life Insurance Company, in opening the meeting at 10.30 a.m. on Thursday, December 5th, dealt briefly with some of the wider aspects of the present position of life insurance. "The processes of the life insurance business," he said, "are gigantic, not only in meeting the exigencies of a world-war, but in the faithful discharge during times of peace of its regular obligations, all of which are made possible through the agencies of thrift. The very foundations of the institution of life insurance is embedded in, its entire structure is supported by, and its whole scheme of operation is based upon the principles of thrift."

Referring to the future of the thrift campaign, Mr. Stadden said: "This generation has been rudely, but let us hope effectually, awakened to its responsibility in preserving and promoting the welfare of the country by re-establishing among all the people genuine permanent habits of thrift, so that the comfort and enjoyment of the present may be greater, and that the heritage of the future may be augmented."

Later Mr. Stadden emphasized the dual position of banking and insurance institutions as promoters of thrift. "With an ever-increasing population and its multitudinous affairs, including expansion of commercial interests throughout the world, there was long ago emphasized the necessity for the establishment of public institutions to safeguard the thrift and the freedom—synonymous terms, perhaps—of this growing people.

"There has been the evolution of numerous valuable agencies, having for their object greater advancement and security of the products of thrift, and a consequently firmer basis for national and international transactions. The most prominent financial and beneficent factors in this regard are the two great institutions of banking and life insurance—the history of the former in America, beginning during the struggle of the colonies for independence—and that of the latter preceding it by some 16 years, when relief was created for the widows and children of Presbyterian ministers, although the first company doing a general life business was not organized until 1796. The history of these two gigantic systems in this country and the world is unique."

The Hon. Charles S. Thomson, United States Senator of Denver, Col., spoke briefly upon "Some Present and Post-War Problems."

Growth of New Capital.

Mr. Joseph Chapman, vice-president of the North-Western National Bank, of Minneapolis, Minn., delivered an address entitled "New Capital Through Thrift," which elaborated upon that of the chairman. Mr. Chapman quoted many statistics showing the possibilities of an improvement of this kind. "America was known, up to the year 1914," he said, "as a spendthrift nation. 'Easy come, easy go,' was the real motto on the American silver dollar. The Surrogate's courts show that only three men of every hundred who die leave an estate of $10,000 and over, and only 15 others leave an estate of $2,000 to $10,000. Eighty-two of every hundred who die leave no income-producing estate, no tangible assets, with the result that out of every 100 widows, only 18 are in good and comfortable circumstances; 47 others are obliged to go to work and often lack the ordinary comforts of life, and 35 are left in absolute want and must depend on charity to live. Yet in the year 1914 we spent $520,000,000 for tobacco and $1,720,000,000 for alcoholic beverages, besides other billions for non-essentials. The measure of what we bought was not our need but what we thought our neighbors would be envious of did we possess it—'keeping up with Lizzie,' regardless of the fact that Lizzie was an auto-riding, moving picture-going, dinner-giving, worldly-minded individual, whose husband could not pay for the luxuries and frivolities she demanded, was a national disease in this country. The old-fashioned thrifty way of paying cash to meet our needs was discouraged, and we paid next month for what we ate last month. Buying of necessities and luxuries was made easy by the extension of easy credit, entirely unwarranted and with demoralizing effect upon the people, causing them to live beyond their means. As a nation, we had developed luxury-loving habits, and thrift received but scant attention."

A similar subject was dealt with by Mr. Robert Lynn Cox, third vice-president of the Metropolitan Life Insurance Company, of New York, who spoke upon the subject of "Life Insurance Thrift as a Constructive Force." He pointed out that the whole world is now devoting its time and thought to putting new values to various economic and political assets. America and the other allies, while they have avoided bankruptcy must, he said, take a careful inventory.

"The inquiry I would make to-day is," he said, "how is the institution of life insurance likely to come out in this recasting of accounts? We have had a high rating among world values in the past. Will we now be put back into regular stock or be marked down and put upon the bargain counter? The answer, it seems to me, will be determined largely upon whether we have an understanding that the war just ended has brought to business as well as to politics several new factors of prime importance in testing hereafter the true worth of things. By this I mean that every institution and every activity of man is going to be measured from now on, though not heretofore, by what it is doing for humanity as a whole, rather than by what it is doing for a selected few or what it brings in the way of gain to those who are carrying it on. Just as it is being determined that government shall no longer be run for the benefit of the governed, so business affairs will be required to show a substantial margin of net gain to the public as a whole. This benefit will include economic profit, of course, but there must be something beyond that. It must contribute substantially toward the making of men and women of a higher order, because this, in the end, is the great purpose of all human activity. From this standpoint I hope to show that the business of life insurance will rank in the future even higher than it has in the past.

"We are quite accustomed to measure our success as a business institution by material standards. We speak nearly always in numbers and of amounts—six billions of assets, 30 billions of outstanding insurance, 50 millions of policies in force, one hundred thousand men employed in our field organizations, payments to policyholders averaging two million dollars a day for each working day of the year, etc. These figures are a tribute to our efficiency, as they are likewise some indication of our popularity. But, more important, they afford the measure of service we are rendering the community and of our opportunity to render even greater service in the future."

Policyholders' Viewpoint.

On Thursday afternoon the **Hon. John W. Wanamaker**, of Philadelphia, took up the subject of life insurance as seen by the policyholder. Mr. Wanamaker pointed out that he is not an owner of stock or in any way connected with any insurance company except as a policyholder under its usual terms.

"Life insurance," said Mr. Wanamaker, "as conducted now by the well-regulated companies which have passed beyond the years of organization and proved their integrity are banking companies which cannot be losers. Their annual

audits by properly qualified certified public accountants will show this to be a fact. Their mortality tables of losses and their interest gains on annual cash receipts and the compounding of same can be calculated to a certainty, removing all risks.

"Therefore, insurance is no longer an association of investors joined by agreement in an undertaking with possible risks, but it is distinctly an absolute contract that insures and at the same time becomes an assurance of actuality in results.

"The life insurance companies have learned much in the past 20 years, and now that banking and all kinds of business has been raised to a higher and safer plane, life insurance must likewise rise in improved systems. The life insurance companies are naturally the most practical of savings banks for the people of the United States, and a thrift stamp such as the United States government used in accommodating the people to save may be considered to advantage in preparing future enlargement of plans."

Loss from Epidemics.

Mr. Henry Moir, who is one of the best known actuaries on this continent and in fact in the world, gave a valuable address entitled "Epidemic Waste of Human Life." Mr. Moir is actuary of the Home Life Insurance Company, New York, and president of the Actuarial Society of America. He reviewed the history of epidemics from the earliest date and finally gave a description of the effects of the influenza epidemic accompanied by statistics as complete as are at present available.

The next speaker was Hon. C. W. Fairchild, president of the National Convention of Insurance Commissioners, and commissioner of insurance for Denver, Col. His subject was life insurance and its relation to the development of our nation. The growth of life insurance is, according to Mr. Fairchild, a good omen for the future internal peace and welfare of the nation. Mr. Fairchild said:—

"The greater the prosperity of the people of the nation, the less unrest. The greater its wealth, the less evidence do we find of dissatisfaction and disturbance on the part of its inhabitants. Remove as far as possible want, poverty and distress and a higher ideal in our development and in the conduct of the nation's affairs is reached. No other agency is so forceful a means to this end as life insurance.

"Life insurance is the most democratic of all democratic institutions. It touches more lives and more interests than any other industrial factor. Yet it is pertinent to inquire if this institution has actually made itself felt and appreciated as it ought to be in the lives of all our people. Is there not too widespread a feeling that this great business is something that is foreign to them and their welfare? Is there not a basis for the suspicion that far too many look upon it as a gigantic venture largely controlled to the advantage of moneyed interests? Upon what opposite presumption can we explain the prevalence of that attitude which regards the business as an available and proper subject against which to legislate, even to its detriment?"

Dr. Charles A. Prosser, director of the Federal Board for Vocational Education, Washington, D.C., addressed the gathering on the subject of vocational retraining.

Friday's Meeting.

On Friday, December 6th, the first speaker was Mr. J. G. Hibben, president of Princeton University, who spoke on "American Liberty—Its Rights and Obligations."

Mr. John B. Lunger, vice-president of the Equitable Life Assurance Society next spoke on the subject "A Great National Service—How Life Insurance has Discharged its Duty to the Nation."

Group insurance was dealt with by Mr. Eugenius H. Outerbridge, vice-president of the Pantasote Leather Company, and formerly a president of the Chamber of Commerce of the State of New York.

In the afternoon, the speakers were Major-General William C. Gorgas, whose subject was: "Thrift in Health—Applications of Lessons of Military Sanitation to Peace Times." Major General Gorgas was formerly surgeon-general of the United States Army.

An elaborate account of German compulsory insurance and its failure, was given by Mr. Frederick L. Hoffman, third vice-president and statistician of the Prudential Insurance Company of America.

Mr. Harvey J. Buckhardt also spoke on the subject: "Relation of Dentistry to Health Conservation."

LUMBER ASSOCIATIONS UNITE

Internal and Foreign Trade, Soldiers' Re-establishment, and Other Problems Discussed at Ottawa

Directors of the Canadian Lumbermen's Association met in Montreal on November 26th, and discussed the need of greater co-operation among the Canadian lumber interests, the claims of the association to government recognition and co-operation and the need of action by the lumber trade in the work of creating a soldiers' re-establishment bureau.

It was felt that the membership needed to be greatly extended in order that the association might be representative of the lumber interests of the whole Dominion, and not of Quebec and Ontario alone. To this end it was proposed that the members of the Spruce Manufacturers' Association, who were also holding a conference, be approached on the question of joining the Canadian Lumbermen's Association.

A resolution was passed providing that a committee of three be appointed to approach the provincial parliaments with a view to securing the representation in France of Canadian lumber interests. The question of tonnage was also discussed and it was stated that when this subject was brought up at Ottawa the lumber interests had not been represented. It was proposed that the government be approached.

Provide for Returning Men.

In connection with the subject of soldiers, re-establishment, the president expressed the opinion that no more important subject had ever come before the association. He read some proposals made by the Pulp and Paper Association, giving suggestions with regard to the co-ordination and co-operation of the lumber industry in the work of looking after the interests of the returned men of that industry.

Maurice E. Preischm, ex-president of the National Wholesale Lumber Dealers' Association, New York, and Mr. Hofstra, also of New York, said a few words on the condition of the lumber industry in the United States, and W. F. Golding, of McKean and Co., of St. John, N.B., spoke of conditions in New Brunswick.

In discussing the matter of Canadian consumption, the outlook, according to a number of speakers, was quite bright.

During a luncheon at which Sir William Price presided, and at which the Eastern Spruce Association joined the Canadian Lumbermen's Association, the two organizations agreed to amalgamate.

The union was cemented by the Canadian Lumbermen's Association's acceptance of the invitation of the Eastern Spruce Association to hold the next annual meeting at St. John, N.B., the headquarters of the latter body.

SUBSCRIPTIONS OF ONTARIO CITIES

The Ontario cities are entitled to much credit for the part they played in piling up the provincial Victory Loan total, the following being the returns issued through the Ontario executive, showing amounts subscribed and per capita:—

EDMONTON AND DISTRICT

Commercial Business Has Been Good—"Flu" Epidemic Has Had Serious Effect—Live Stock Industry Great Asset

(Staff Correspondence)

Amongst business circles in Edmonton your correspondent found the dominant note to be a feeling of quiet confidence and sane optimism. Discussing the situation with Mr. F. T. Fisher, the secretary of the Edmonton Board of Trade, the reasons underlying this confidence were explained.

"Sure," said Mr. Fisher, "we have had some bumps during 1918. We had a freak frost in the middle of the summer. This did a lot of damage to grain crops; but may be disregarded as a factor in estimating the potentialities of the country, as it is certain that nothing like this had happened since 1887, and evidence as to its having happened then is by no means clear. And then there was the drouth. This was not a factor in Edmonton's more immediate territory and throughout the greater part of Central and Northern Alberta crops promised well up to the average until a few hours properly belonging to September were slipped into the last week in July. In more distant and competitive territory, well to the east and southeast of Edmonton there was partial failure from lack of moisture.

"Notwithstanding these troubles, business has been good right along," said Mr. Fisher. "Up to the time the 'flu' became serious in the last half of October, all our leading retail merchants advised that business was better than ever before. Wholesalers reported their 1918 volume of business ahead of any previous year. Our manufacturers reported some cancellations from certain more distant territory; but they rather welcomed these as it enabled them to divert these goods to other territory where they were far behind with orders. Our bank clearings continued to climb and showed consistent and steady increase over previous years."

No Crop Failure.

Asked how he accounted for this steady increase in business in view of agricultural conditions admittedly below par, and in view of the fact that Edmonton's business is dependent, in the final analysis, to such a large extent on farm production, Mr. Fisher said that the explanation is comparatively simple, once certain economic factors in Edmonton's position are understood. "To start with," said Mr. Fisher, "the grain harvest in the Edmonton district turned out very much better than had been expected following the frost, or than is even yet generally realized. People are very apt to talk of crop failure because they hear of failure elsewhere, in less favoured areas—largely a matter of psychology. The term failure as applied to farming operations is largely relative. Conditions to which the Edmonton farmer applies the term failure would look quite good to farmers in some places. I have here," said Mr. Fisher, reaching for a convenient file, "a large number of reports direct from representative farmers in surrounding territory. No, not a selected list of farmers; that wouldn't get us anywhere. These reports are the result of a questionnaire recently sent out to all farmers in the district whose addresses could be obtained, without any attempt at selection. Only a portion of these have come back so far, but the information furnished by these fifty or sixty may safely be accepted as reasonably characteristic. When tabulated a day or two ago these showed that these men had thrashed grain crops yielding on the average 15 bushels of wheat to the acre, 46 bushels of oats, and 27 bushels of barley. There are many farming communities on this continent that would like to be assured of a 'failure' like that every year.

"But that is not the really important point. While most people regard crop returns as the sole criterion of business conditions in the West, returns from my questionaire indicate clearly that animal husbandry rather than wheat is the significant factor in the great territory from which Edmonton derives most of its business. These men are working small farms, as farms go in the West, having an average of about 320 acres each, of which 180 acres are under cultivation and 125 acres were under grain this year. The average acreage of wheat on each farm was less than 36 acres. On the other hand, these reports show that each of these farmers own on the average more than 11 horses, 32 head of cattle, and 31 hogs; and is milking eleven cows. Ninety-seven per cent. of these farmers report that pasture during 1918, our driest year, has been either 'good' or 'fair.' Ninety-seven per cent. report that they have plenty of winter feed; ninety-four per cent. report that their cows have milked well, and that dairying has been profitable, and ninety-seven per cent. say that the raising of beef has given satisfactory results. This is why, notwithstanding wheat crops away below our average, only three per cent. of these farmers replied 'no' to my question as to whether his total operations for 1918 had been profitable."

Turning to General Farming.

"We have not noticeably increased our elevator capacity in this territory during 1918. But what is of more importance," said Mr. Fisher, "our big meat packing enterprises have made big extensions to their plants and have been working to capacity. The capacity of our public stock yards has been about doubled; and our creameries, some of which are among the most important in Canada, report the largest output of butter in their history. These are the things that count. Elevators send out raw products; and with them, the fertility of the soil. These other things send out farm products in more concentrated form—the finished product; and help to retain and increase that fertility. Now you know why business continues good in Edmonton, notwithstanding a relatively poor harvest."

In this connection, as indicating the advantages of Edmonton territory for animal husbandry, Mr. Fisher showed your correspondent recent press clippings indicating that no less than 31,300 head of cattle and 66,535 sheep had this fall been shipped into Central and Northern Alberta for grazing and winter feeding, from the less favored southern districts; and that it is estimated that some 60,000 tons of hay will move southward through Edmonton.

Coal.

The coal industry is an important factor in Edmonton's business activities, according to Mr. Fisher, and is assuming increased importance. There are four mines operating within the city limits and a number of others in nearby territory. The output for these for 1918 will approximate a million tons. In view of the present very high cost of labor and all other items entering into the cost of production, this puts a very large amount of money into circulation. Then there is the bituminous field to the west of Edmonton, at points along the Alberta Coal Branch and on the main lines of the Grand Trunk Pacific and Canadian Northern Railway, all of which, though farther away, are directly tributary to Edmonton, which is their base of operations.

Confident of Future.

Asked as to the future, Mr. Fisher said that prophesying has proved a somewhat futile occupation during recent years; but he believed that there is in Edmonton business circles a feeling of quiet confidence that conservatively handled business has absolutely no cause for uneasiness as to future developments in Edmonton and tributary territory. "And that confidence is justified," said Mr. Fisher. "There may be difficulties in connection with the re-absorption of our soldiers. The contribution of Edmonton and Edmonton territory to war service represents one-tenth of the entire population. The majority of these men—unfortunately far from all—will come back. Not all can take up their old jobs, and there may be some difficulty and delay in absorbing them. There may be a shrinkage in wages and salaries, and a consequent shrinkage in values of commodities, occasioning some loss. There may be a period of business depression. But our basic economic conditions here in Edmonton are so eminently sound that recovery will be rapid. Our territory is engaged in the production of food—food in its most essential forms. The world-wide demand for food did not cease when the erstwhile insatiable demand for shells and other munitions was suddenly shut off. Even a possibility of a slump in the price of wheat, if such were probable, causes us no uneasiness. We are producing largely animal foods, of which there will be a world shortage for many a year. Our farmers could in a single season so adjust their operations as to eliminate wheat production, if desirable. We have this year demonstrated that under the most unfavorable climatic conditions ever experienced by the present generation of Central Alberta farmers, we can produce profitably. There is no cause to worry as to the future.

"The only source of possible trouble, as I see it," said Mr. Fisher, "is in case what I might call the irresponsible optimist might find himself in a position to influence the

A Time To Be Cautious

It is no doubt a time to be cautious. But it is possible to be over cautious. There is no reason why a man should leave his money on deposit when he could as easily and with equal safety obtain 5½% by investing it in

QUARTERLY DIVIDEND No. 125

Notice is hereby given that a Dividend of Three per cent. for the quarter ending December 31st, 1918, being at the rate of TWELVE PER CENT. PER ANNUM upon the Paid Up Capital Stock of this Corporation, has been declared, and will be payable at the Corporation's office in this City on and after January 2nd, 1919, to shareholders of record at the close of business on December 14th, 1918.

By Order of the Board,
M. AYLSWORTH,
London, Ontario, November 26th 1918. Secretary

CANADA PERMANENT MORTGAGE CORPORATION

QUARTERLY DIVIDEND

Notice is hereby given that a Dividend of TWO and ONE-HALF PER CENT. for the current quarter, being at the rate of TEN PER CENT. PER ANNUM on the paid-up Capital Stock of the Corporation, has been declared, and that the same will be payable THURSDAY, THE SECOND DAY OF JANUARY next, to Shareholders of record at the close of business on the Fourteenth day of December.

By order of the Board.
GEO. H. SMITH, Assistant General Manager
Toronto, November 27th, 1918.

The Ontario Loan and Debenture Co.

DIVIDEND No. 126

Notice is hereby given that a QUARTERLY DIVIDEND of 2¼ PER CENT. for the three months ending 31st December, 1918, (BEING AT THE RATE OF 9 PER CENT. PER ANNUM) has been declared on the paid up capital stock of this Company, and will be payable at the Company's Office, London, Ontario, on and after the 2nd January next, to Shareholders of record of the 15th December.

By order of the Board.
A. M. SMART,
Manager
London, Canada, 26th November, 1918.

THE DOMINION SAVINGS AND INVESTMENT SOCIETY

Masonic Temple Building, London, Canada

Interest at 4 per cent. payable half-yearly on Debentures

T. H. PURDOM, K.C., President NATHANIEL MILLS, Manager

London and Canadian Loan and Agency Co., Limited

ESTABLISHED 1873 **51 YONGE ST., TORONTO**

Paid-up Capital, $1,250,000 Rest, $850,000 Total Assets, $4,855,944

Debentures issued, one hundred dollars and upwards, one to five years. Best current rates. Interest payable half-yearly. These Debentures are an Authorized Trustee Investment. Mortgage Loans made in Ontario, Manitoba and Saskatchewan.

situation. The man who along in 1914, 1915 and 1916 attributed our business depression in the West to the war, and still fails to recognize that it was the war that saved us from worse things, may argue, if he follows his line of reasoning consistently, that, now the war is over, we will swing back to the good old days of 1912 and 1913. Extravagance and the spending of unlimited borrowed money is not our way to prosperity or the solution of our reconstruction problems."

Live Stock Industry Great Asset.

The live stock business has been making phenomenal strides in the province of Alberta during the past three or four years. Most of the female stock has been held and a lot of good pure-bred stock has been imported.

The live stock business has really made it possible for the province to show a good side on the profit and loss account this year. In grain and other products Alberta claims a value of $214,154,611.50 this year as against $261,081,954 last year, while in live stock the value in 1918 stands at $187,376,188 as against $134,071,088 last year. Totalling the live stock and crop values for 1918, they show the splendid balance for the year, over 1917, of $6,377,757.50.

An aggressive live stock campaign will be put on this winter throughout Alberta, said Hon. Duncan Marshall, Minister of Agriculture, to "The Monetary Times" last week.

Increased production in all agricultural lines is to be kept in view by the government authorities and, according to the minister, has already been taken up by the farmers themselves as their aim for 1919. The prospects at present are good, granted only that the weather conditions next spring are favorable.

New Land for Next Year.

Approximately 2,250,000 acres of new breaking will be available for next year's farming as a result of the past season's operations. This is about the same amount of new land as was broken last year, and but for the dry weather would have been greatly increased.

More fall work has been done this season, Mr. Marshall says, than in any year for a long time. The fall has been ideal for farming operations, and a great amount of plowing has been done. Even before the end of the war was in sight, Alberta farmers realized that there would be need of all they could produce in 1919, and therefore set themselves to a fall programme of more than usual proportions.

Prices Will Stay Up.

As to the future of the live stock industry in the province, Mr. Marshall says he does not anticipate any drop in prices for the coming year, and in the case of breeding stock not for three or four years. The shortage of meats and fats in Europe will mean an increased demand for Canadian products, and all the meat that Alberta can supply will find a ready market. It is considerably easier, the minister has found, to interest farmers in the matter than formerly, and the world situation makes for good business here in the West.

FEDERAL FARM LOAN BANKS

In accordance with the provision of the United States Farm Loan Act, requiring that the Farm Loan Board "shall from time to time require examinations and reports of condition of all land banks established under the provisions of this Act, and shall publish consolidated statements of the results thereof," the Farm Loan Board has made public the second consolidated statement of the condition of the twelve Federal Land Banks as of October 31st, 1918.

The statement of condition shows that the banks have made loans to farmers to the amount of $139,378,156. Their capital stock has increased from $9,000,000 to $15,975,220. They have issued farm loan bonds to the amount of $140,122,200. They hold among their assets United States Government bonds and treasury certificates to the amount of $14,850,000. Their excess of expenses and interest charges over earnings is $211,609.09, which is a reduction of over $200,000 since the previous semi-annual statement, and amounts to less than 1½ per cent. of their present capital. Three of the banks show an actual surplus. Before the close of the present month, two banks will begin the repayment of the stock originally subscribed by the Government. The total payments by borrowers overdue on October 31st amounted to $86,073, of which $51,117 was less than 30 days overdue, and only $10,730 was 90 days or more overdue.

AGITATION FOR CIVIC IMPROVEMENT

Montreal may not have all the vices of civic life, but, like all other Canadian cities, there is plenty of room for reform. The urgency of work of this kind was pointed out by Mr. Eugene Villeneuve before a recent meeting of the Business Men's League.

"I hope you all have read the report made and recently published by the Committee of Sixteen," Mr. Villeneuve said. "It is one that furnishes much material for serious reflection. It is one which opens up a very grave problem for discussion with the object of forming a strong public opinion to support the committee in its efforts to bring about a better condition of things in the city."

The first requisite step, Mr. Villeneuve pointed out, was to place the administration of the police department above suspicion. For a long time he said he had been directing his efforts towards this end. The primary need was a thorough investigation into this department, for he insisted that things were far from proper in many respects. In support of this contention, he repeated his former criticisms of various members of the personnel of the city administration generally and Maisonneuve affairs particularly. Mr. Villeneuve urged the meeting to initiate a movement with the object of petitioning Premier Gouin to order a full investigation into the whole administration of the city. He also pleaded for a better control of public utilities, and in this regard he said the lack of proper care on the part of the Quebec Legislature for the interests of the citizens was instanced in the powers granted to the Montreal Light, Heat & Power Company, which, he asserted, had resulted in higher charges being made, especially for electricity, than were paid by many large cities on the continent, though Montreal was ideally situated for the supply of this commodity.

After a general discussion among members of the league, it was proposed by Mr. E. Guenette, and carried, that the association petition the Administrative Commission:

1. To institute an investigation into the administration of the city of Maisonneuve, in virtue of the powers conferred upon it by the city charter, and more especially into matters concerning the purchase of lands for Maisonneuve Park.

2. To investigate the charges made against certain members of the executive of the department of public safety, and not to pay any pensions to any of the officers in question until such time as their conduct had been judged.

3. That in view of the profits made by the Montreal Light, Heat & Power Company through the use of the city streets, and in view of the financial situation of the city, a clause be inserted in the Montreal Bill to be presented at the next session of the Legislature taxing this company five per cent. of its gross earnings; and that steps be taken to compel the company to supply the consumers with a better quality of gas.

4. That a strong protest be entered against any prolongation of the term of office of mayor and aldermen.

At a meeting of the board of directors of the Guelph Junction Railway on November 22nd another dividend of 10 per cent. on the capital stock of the company held by the city of Guelph was declared. It amounted to $17,000 and is the second dividend of the same amount declared this year.

The British Secretary of State for the Colonies has telegraphed, asking the Governor of Jamaica's needs regarding shipping facilities. It is understood that the Australian Government purposes to make Kingston, Jamaica, a port of call for Australian ships using the Pan-American Canal. The governor recommends that an expert be sent to Jamaica to advise what is needed to improve the port and to fit it for Australian shipping.

Sir Thomas White has been in conference with Sir Hardman Lever, the financial representative of the British Treasury, in New York. The question of provision of Canadian credits for Great Britain to be used in the purchase of grain and food stuffs and other commodities was under discussion. It is likely that entirely satisfactory arrangements will be made with respect to both outside and domestic credits which will insure the financing of exportable agricultural production.

The Dominion Educational Association met in Ottawa on November 21st and 22nd. In addition to the usual transactions and election of officers, it was decided to send a delegation to the Government requesting that action be taken to promote technical education. It was considered that the sum of $20,000,000 would be necessary for this purpose. Owing, however, to the fact that this question was being taken up by the Government in conference with the Provincial Premiers who were also assembled at Ottawa, the association did not communicate with the Government.

Bank of Montreal

Annual General Meeting Held 2nd December, 1918

The 101st Annual General Meeting of the shareholders of the Bank of Montreal was held in the Board Room at the Bank's headquarters.

On motion of Mr. R. B. Angus, Sir Vincent Meredith was requested to take the chair.

THE PRESIDENT'S ADDRESS

Sir Vincent Meredith, in moving the adoption of the Report of the Directors to the Shareholders, said:—

At a Special Meeting of the Shareholders of this Bank, held on 10th September, your permission was obtained to purchase the assets and assume the liabilities of the Bank of British North America. At that time the nature of the transaction and the terms of purchase were explained; these, I believe, are equitable as well as advantageous to both Banks.

The amalgamation was completed on 12th October, 1918, but the combined balance sheet showing the new capital and rest and undivided profits cannot be prepared until after the expiration of four months from the date of taking over, as the agreement stipulated the shareholders of the Bank of British North America should have that period in which to elect whether they would accept cash or our shares in exchange for their holdings.

Another matter that has engaged the attention of your Directors has been the distribution of profits. It was thought the term "bonus" was out of harmony with existing conditions. After giving the matter careful consideration, and having in view the fact that the earnings of the Bank for some years past have warranted the payment of the usual 10 per cent. dividend with an additional 2 per cent., it has been decided that the stock should be placed on a 12 per cent. basis, effective at the next dividend period.

A sum of $46,000 was donated to Patriotic and Red Cross Funds, and I know the action of your Directors in this connection has your approval.

The business of the Bank has been well maintained during the year. In view of possible Government financing and the somewhat uncertain outlook at home and abroad, we have consistently set our faces against over-expansion, which is to be deprecated under existing conditions. While giving our customers all reasonable accommodation required, and taking up many new desirable accounts, we have maintained a strong liquid position, continuing a well-considered policy of the Bank; a policy which, in the past as now, has added materially to the stability as well as the credit of the Bank at home and abroad and of Canadian finance generally.

Turning to British finance, two outstanding features during the year were: First, the success of the system of continuous borrowing by means of the 5 per cent. National War Bonds, which were made available to investors at all times on application. This plan yielded the huge sum of £1,200,000,000 from daily subscriptions and avoided the unsettling of the money market which invariably attended the placing of great War Loans. Notwithstanding this remarkable response of the investing public, deposits held by the Banks in England are actually larger than a year ago.

The second feature is the amalgamation of some of the more important Banks in Great Britain, resulting in a closer co-operation between the Imperial Treasury and the Banks in meeting and solving the financial problems with which the country was faced.

The methods adopted by the United States Government in connection with war finance are so well known that it is unnecessary for me to make reference to them here, or to dwell upon the success which has attended the loans of that country.

SUCCESS OF VICTORY LOAN

The overwhelming success of Canada's Victory Loan, 1918, again evidences the loyal and patriotic spirit of our people and enables the Minister of Finance to extend material assistance, should it be required, to the Imperial or Allied Governments, in the interests of Canada's trade. The over-subscription of the Loan is an index of the sound financial condition of the country and of the ability of the people to cope with whatever situation may occur.

During the year under review the foreign trade of Canada has been on a descending scale. That trade amounted to $2,082,494,000 in the ten calendar months of last year to October 31st, while this year the value is, for the same period, $1,762,785,000. The decrease has occurred principally in the value of agricultural products and manufactures exported; in the case of the former, because of a less bountiful harvest, and of the latter, because of the completion of munition orders. The figures, however, reflect a trade immensely greater in value than in the pre-war period and indicate the source of the commercial prosperity the country has had. Taking the ten months' period, there was in 1917 an excess of exports over imports of $341,000,000, and in the corresponding period this year the excess is $242,360,000, a decline of a hundred million dollars, but the balance remained large, and while the export of munitions will shortly cease, that of agricultural products should be at least maintained and probably increased in the future. In the ten months' period, imports were $870,789,000 and exports $1,211,702,000 in 1917, as against imports of $760,212,000 and exports of $1,002,572,000 in the corresponding period this year.

Business generally has been active and profitable, as banking accounts abundantly attest, note circulation, deposits and loans being unprecedentedly large. As an adequate supply of raw materials again becomes available, it is reasonable to expect an extension of manufacturing operations, and in the necessarily small stocks in merchants' hands, there is assurance of a good demand for mill products, even though the expectation of a recession in prices may prompt caution in purchasing.

WILL ESTABLISH AGENCY IN PARIS

The question of opening branches in foreign countries to participate in the business that may arise in connection with reconstruction requirements abroad is one that has received considerable attention from your Directors. Following the policy of many English Banks, we have deemed it prudent to refrain from establishing branches at points far afield where Canadian capital would be required in local and possibly competitive industries, preferring rather to strengthen and extend our relations with foreign banking houses and to retain their good-will, thereby conserving our resources for the assistance and encouragement of home trade. In this connection, it may be well to mention that we propose presently to establish an Agency of the Bank in Paris, not for the purpose of loaning Canadian funds, but to supply necessary banking facilities to Canadians travelling abroad and to further the interests of Canada generally in France.

The harvest in Canada, while not as bountiful as we have reaped in past years, has on the whole been satisfactory. Estimates from authoritative sources place the yield of wheat from the three prairie provinces at 160,000,000 bushels, and from the whole of Canada at approximately 200,000,000 bushels, a large proportion of which is high grade. Saskatchewan, and more particularly Alberta, suffered somewhat through damage by drought and frost, but in Manitoba a full average has been reaped, with an exceptionally good barley crop.

Immigration, upon which the future prosperity of this country so largely depends, has been of a somewhat negligible quantity since the outbreak of the war, although a number of experienced farmers, with cash capital, have come into the West from the United States.

The total number of immigrants from foreign countries of necessity has not been large. The immigrants entering Canada during 1916-17 numbered 87,000, of whom 78,000 came from the United States. In 1917-18 the total immigration was 55,000, of whom 46,000 came from the United States. The reduction in 1917-18 is no doubt in a large measure due to the entry of the United States into the war and the subsequent draft regulations.

It is confidently expected that we shall receive a large influx from that country to our Western Provinces with the return of peace conditions, as the superior fertility of these lands is becoming more widely recognized; but I am not so sanguine in regard to settlers from Great Britain and foreign countries, where the difficulties of transportation will be an adverse factor, although probably less serious than anticipated. There is also the possibility that some restraint may be placed on intending emigrants by their home governments for some time to come. Notwithstanding this, however, I feel Canada will attract and receive a very considerable immigration in the not distant future.

The debt of Canada after the war is likely to reach a total of possibly $1,800,000,000 and, with other capital obligations, may exceed that amount. How the interest on this vast sum is to be met is one of the most important of the many and complex after-the-war problems we shall have to solve. Increased production will relieve us of a portion of our burden and this, with strict economy and growing population, will in time adjust our difficulties.

POLICY OF TAXATION

Taxation cannot easily be lessened and may be increased. A levy on capital, advocated in some quarters, must only result in the stifling of individual incentive and enterprise, and the penalizing of industry, self-denial and thrift. Taxing capital to the point of unemployment in industrial enterprise would involve unemployment of labor and produce serious consequences. If placed principally on consumption, the burden of taxation is distributed. In this connection, it may be pointed out that comparison, frequently made, of our taxation with that of Great Britain ignores the incidence of customs duties, restricted in Great Britain but supplying a large part of the public revenue of Canada.

The war which has convulsed the world for over four year has now happily ended in a glorious victory for Great Britain and her Allies. During that long period of conflict, we have experienced anxieties, but we are now assured of a peace such as we have so confidently anticipated and for which our gallant men have so valorously and successfully striven.

With the cessation of hostilities, the cancellation of munitions contracts has begun and the adaptation of war industries to peace conditions will doubtless bring about a check, with possible dislocation of business and displacement of labor, but these adverse factors, I believe, will prove transitory.

Manufacturers who have conserved their resources during war-time prosperity and have taken advantage of this prosperity to become efficiently equipped, should be in a position promptly to adapt their organizations to peace requirements, and to take advantage of an onrush of business during the reconstruction period.

PREPARING FOR POST-BELLUM PERIOD

Already much preparatory work of practical value to meet post-bellum requirements has been undertaken by other countries, and with wise foresight, the organization of strong central bodies, equipped with large powers, has been encouraged, to link up the great manufacturing industries, the promotion of scientific and industrial research and the employment of a competent intelligence staff to seek out new markets abroad.

We in Canada have embarked on a shipbuilding programme of considerable magnitude, a first important step in preparedness. If operated on business lines, as I feel sure it will be, the capital expenditure will be amply justified. The action taken by our Government in appointing a Trade Commission to provide employment for the increased tonnage that will soon be available, and to secure for Canada a full share of the large and urgent demands of the devastated countries for reconstruction and replacement purposes as well as for foodstuffs, is a further step in preparedness, and is to be commended.

Owing to the financial straits of these countries in consequence of war's devastation, requisite credits to meet the unusual demands, estimated for France alone at Fcs. 50,000,000,000, must be provided. If Canada is to share in the business opportunities, and in order that our present prosperity may be continued, the Banks must stand ready to arrange liberal and probably long-term lines of credit, providing the necessary funds from their own resources, or availing themselves of the privilege of rediscount with the Dominion Government.

Should these facilities prove unequal to the demands which may be made upon them, I feel sure the Minister of Finance, with the sound judgment he has displayed in financial affairs, to the advantage of the country during the war, will not hesitate to supply adequate financial assistance, in the same manner in which Imperial Government credits for purchasing in this country were established during the war. In doing so, he will be fully justified.

As the war ends, all signs point to a great demand for capital for reconstruction, refunding and replacement purposes, and interest rates, in consequence, will in all probability rule high for some time to come. A temporary shortage of all kinds of merchandise, owing to labor having been diverted from domestic to war purposes, also seems probable.

But sooner or later we in this country will, without doubt, have to meet foreign trade competition of cheap and skilled labor, together with advantageous transportation facilities, to a more pronounced extent than Canada has yet experienced. If this competition is to be effectively coped with, the increased efficiency, co-operation and co-ordination to which I have referred are essential. Our best energies must be directed to greatly increased production of our basic, agricultural and other great natural resources. In this way, and by strict economy in Government, municipal and personal expenditures, a solution can be found of our difficulties of exchanges, the maintenance of our favorable trade balance and the payment of our war debt. Otherwise, we must look for a shrinkage in business, to be followed by a readjustment of the scale of wages for labor and of the prices of all commodities.

We shall undoubtedly for some years have to pay in relatively high taxation the price of our devotion and patriotism, but I am confident this will be done uncomplainingly, in the belief that all present and prospective difficulties can and will be overcome.

THE GENERAL MANAGER'S ADDRESS

Sir Frederick Williams-Taylor, the General Manager of the Bank, then made his annual address, as follows:—

Mr. Chairman and Gentlemen:—The annual balance sheet presented to-day for your approval is the fifth issued during war conditions and the first in the second century of this Bank's history.

The increase in our resources, and also our responsibilities, through the purchase of the Bank of British North America, referred to by the President, is reflected in our statement. The number of our branches has been increased by seventy-nine. Also we have taken over excellent material in a staff that will serve us as loyally and efficiently as they did the fine old institution, whose honorable career of more than eighty years is now ended.

As we all know, bankers throughout the world have had to cope with abnormal conditions since the outbreak of war. This statement applies fully to Canada. During the year under review Canadian banks have encountered their share of problems. We have become accustomed to problems. In consequence, we have faced difficulties of unusual character with increasing equanimity. It is well to have reached this stage; otherwise the strain would have been unsettling.

CANADA'S ADEQUATE BANKING SYSTEM

The ease with which financial Canada has met the stress of war conditions has been favorably commented upon abroad. At home one hears no expression of surprise at the stable financial conditions in the Dominion.

The real basis of that stability is a banking system that has proved most efficient in peace times and, with the facilities accorded by the Minister of Finance, has withstood the severe test of war times. The system as it stands is, without doubt, adequate to meet any possible demands arising during the reconstruction period and for years thereafter.

The public, long accustomed to banking stability, now accept it as a matter of course. The strong liquid position of your own bank has been an important factor in the situation.

It is quite possible that the economic and financial problems of the next few years will be more difficult to surmount than those we have faced of late.

The anticipated disturbance in bank deposits resulting from domestic Government war loans has subsided, as was to be expected. Seeing that the proceeds of such loans remain in the country, the money, of necessity, finds its ultimate way back to the banks through one channel or another; and, therefore, the loanable capital of the banks is, in the long run, undiminished. On the other hand, the strength of a banker's position lies largely in his command of numerous small deposits. The volume of deposits has increased by many millions, but the number has not grown proportionately. Our own deposits are now $469,727,811.96, as compared with $330,795,390.72 a year ago. This sum includes $58,950,000 Bank of British North America money. As usual, we have certain large deposits of special character. The increase in our savings deposits is reasonably satisfactory.

As regards profits, an impression exists that these war years have been unusually fruitful for the banks. The reply is that when adequate provision has been made for unknown future rates of taxation in Canada and elsewhere, for the increased cost of administration, for heavy depreciation in even the most gilt-edged securities, it may be stated without reservation that the net results are none too ample for safety. I would emphasize another point, viz., that while the cost of everything else has risen, the public have paid no higher rate of interest for banking accommodation than before the war.

So far as this Bank is concerned, the dividend has been comfortably earned, and, as usual, we have made proper allowance for depreciation and for business hazards.

Now that the war is won, the foremost thought in every serious Canadian mind to-day is directed toward the future. Every business in the country, large and small, from our great railways to the small shops, is concerned and involved. As the business of our banks is with the whole community, we are specially and vitally interested. War prices have brought great prosperity to land and water transportation companies, to merchants, to manufacturers, to farmers, and to the laboring class. Only the salaried class and those whose incomes are fixed have suffered. Not only are prices of all commodities unprecedentedly high, with a liberal margin of profit, but the demand for the staples of life and many luxuries is unlimited.

PROVISION FOR PERIOD OF READJUSTMENT

Two contingencies in which we are vitally concerned are the respective rates of speed with which prices and demand will decline. It is not for me to assume the role of a prophet, but I can at least go the length of stating that the policy of this Bank has been and is to conduct its business on the probability that both may decline rapidly, that values are certain to fall away presently, and that there may at the same time be a diminution in demand. Either of these conditions would be serious. A combination of the two would be disastrous to unprepared merchants and manufacturers carrying heavy stocks. Our great industrial companies are practically all in an immensely stronger financial position than before the war. In some cases the improvement seems almost magical. In general terms, my belief is that the trading and manufacturing community of Canada is prepared for the slump as it comes. Meanwhile, public pronouncements are made by those who have given the subject special study that food prices, particularly for meat, will remain extremely high for many months to come.

After passing through the inevitable period of economic confusion which all countries must endure, that country of boundless wealth and virility, the United States, the only great power, by the way, to emerge from the war better off financially, may probably enter upon an era of unprecedented expansion and development. Canada must share in such prosperity independently of the part we hope to take in supplying Europe's reconstruction and regular demands. Meanwhile, there never was a time when our country was more in need of sound economic thinking and sane financial policy.

The Bank's current loans in Canada are now $146,028,861.28, an increase of $48,421,456.30 during the year. Bank of British North America business accounts for $30,900,000 of the increase.

Our loans to municipalities are $15,598,069.21, as compared with $11,415,383.61 a year ago. Practically the whole of this is advanced against taxes and none on capital account.

With the appropriations set aside for possible losses, we believe at present these current loans worth par. From long experience we also know that the ability to collect eventually one hundred per cent. of this great mass of commercial paper depends on the economic course of events in Canada. That is another reason why banks should make reasonable provision for undisclosed losses, losses that will accrue in the future as surely as they have in the past.

During the war this Bank has done its full share in financing the Dominion Government, also Imperial Government purchases of wheat, flour, etc., in Canada.

The banks of Canada as a whole have out on loan to the merchants, manufacturers and private individuals of this country, secured and unsecured on business paper and by way of accommodation $1,003,593,000. This great sum represents the extent to which the banks may be described as financing Canada's domestic and foreign trade. The amount is apart from $73,685,136 loaned by the banks on call to brokers.

HELPING EXPANSION OF CANADA

With the acquisition of the Bank of British North America we are now the custodians of $558,413,546.12, of which $34,468,283.72 belongs to you as shareholders and $523,945,262.40 is entrusted to our care by the public. It is worthy of note that this Bank's total assets are now as great as were the combined total assets of all the Canadian chartered banks seventeen years ago. Thirty-four banks were in operation then as compared with nineteen at this date. You may be confident that we have a proper appreciation of the responsibility involved in using this great sum of money. We keep ever before us our duty to our depositors and to the shareholders. At the same time the Bank has a further duty, national in nature, in financing established business and in fostering the young industries of the Dominion; in loaning capital for all legitimate enterprises from the small farmer and live stock breeder to the great packing and milling industries; from the small trader to the great merchant and manufacturer. Governments, cities, railways and public bodies look to us for temporary financial aid. For these various purposes our power is greater than ever before, and the Bank has never been in a stronger, more elastic position.

There have been fewer commercial failures in Canada than for many years. The number in 1918 was 905 as compared with 1,172 in 1917 and 1,669 in 1913.

Our note circulation has risen to the great height of $42,082,209.08, or $12,774,123 more than last year. Present figures naturally include Bank of British North America circulation. The total bank circulation in Canada for the same periods were $227,597,808 and $189,852,907 respectively. We look for a rapid post-bellum reduction from the abnormal heights caused by high prices and business activity largely of a war nature.

Our New York and London offices have been invaluable channels for international transactions during the war.

In London, the important banking events of the year have been a series of bank amalgamations regarded by those competent to judge as wise preparation for foreign trade competition after the war.

The final judgment favorable to your Bank in the Banbury Case given by the House of Lords in London last June, was a source of gratification to us and to banks generally, as the principle of good faith involved has been vindicated.

The price of money and rate of discount in London have both been under control during the year, the former at 3¼ per cent. and the latter at about 3⅜ per cent.

The volume of Canadian loans representing fresh money floated in either London or New York during the last twelve months has been relatively small. Certain maturing loans have, however, been refunded successfully at both centres. The excellent reception which such loans have met in London is significant. With one minor exception, all interest payments on Canadian public loans domiciled in London and New York have been met at maturity.

In New York, the value of call money in 1918 averaged 5.11 per cent. as compared with 3.24 per cent. the previous year.

We learn with pleasure that our Waterloo Place and Trafalgar Square offices in London have proved increasingly useful to Canadian soldiers, their relatives and friends.

PROBLEM OF EXCHANGE

The Dominion has been penalized during the past year by a heavy premium on New York funds. This new condition is a matter of widespread interest. All Allied countries have been at a similar disadvantage in their dealings with the United States during war conditions. Our dollar is worth at present only ninety-eight and a half cents in the United States. In other words, it costs one dollar and fifty cents to send one hundred dollars across the line. The one and a half per cent. in question is lost to us. Canada receives no counter-value. In simple language the obvious explanation is that more money is going out of than coming into the Dominion. The prime factors are our imports, our exports and our interest payments. Our exports in fact exceed our imports, but Great Britain, by arrangement, has not been paying in cash for munitions manufactured here on Imperial Government account. On the other hand, it is pertinent to mention that Canada is not paying in cash the cost of maintaining our overseas forces.

In theory, there are four ways in which this onerous penalty can be removed: by increased exports, by reduced imports, by paying in gold or by borrowing in outside markets. None of these remedies is at hand, but with the return of peace Canada should at least be able to float public loans in New York. Then also we can hope for better things so far as imports and exports are concerned. Also there is on balance a large amount owing our Government by the Imperial Government and $200,000,000 is owing the banks of Canada by the Imperial Government representing wheat and munition purchases. In due course these combined amounts will aid the exchange situation. The premium in question should, therefore, diminish sooner or later to a point that will be immaterial. Meantime it discourages the importation of non-essentials from the United States, and the investment of Canadian funds in American and foreign securities.

In conclusion, it will bear repeating that Canada possesses all the attributes of a great nation excepting population. The crying necessity of the hour is for increased production. This cannot be fully achieved without immigration. We have room and opportunity for many millions of farmers and for a good class of labor to develop our mineral wealth and our fisheries and to convert our great forests into lumber and into pulp and paper. One sure way of attracting such immigration is to make living in Canada cheap. To attain this object there must be an end to the public and private extravagance of the past.

Our Superintendents have reported on Provincial conditions as follows:—

QUEBEC

Hay and root crops were fairly good, potatoes being again damaged by rot. Cereals were about average, pasturage was good.

The cut of lumber during the past season was smaller than usual. Scarcity of tonnage has restricted shipments to the English markets and a large part of the cut will have to be wintered in Canada.

The American lumber market has been dull, but the demand for pulpwood from the United States continued steady throughout the year with very high prices and good shipments considering the transportation difficulties.

The paper mills of the Province have been working to capacity throughout the year, and the demand for newsprint and the better qualities of print papers continues strong, the chief obstacle to business being the ever increasing freight rates and the difficulty in obtaining cargo space.

With the exception of asbestos, there is little mining done in the Province. Asbestos prices are good, and sales and shipments about the same as last year's figures.

Manufacturers report another successful year in so far as output is concerned, although they have been handicapped by scarcity of skilled labor, high cost of materials and difficulties in transportation.

The fur business has been good.

Boot and shoe sales are expected to about equal last year's figures in values and quantity.

Shipbuilding has been actively engaged in, nearly 125,000 ocean and inland tonnage having been launched during the year.

Collections were never better, and failures show a reduction.

During the year the Dominion Government spent a certain amount on the drydock at Levis, on the completion of the Quebec Bridge and on the Quebec and Saguenay Railway; while the Provincial Government has expended a moderate sum on roads. Municipal expenditure has been kept within bounds.

Speculation in real estate has been practically eliminated. Values are fairly well maintained. Rentals are high.

General conditions, both in cities and rural districts, are good, although the high cost of commodities seriously affects those who are dependent on a fixed income.

ONTARIO

The farmers enjoyed a very satisfactory year, crops were abundant and prices obtained exceptionally high. Fall wheat was winter killed, but all other crops gave good results.

Owing largely to shortage of labor, lumber production was less than in the two preceding years. Stocks carried over will be small and lumbermen generally are optimistic as a strong demand for all classes of lumber is anticipated for next year. Wood operations this winter will be curtailed through lack of necessary labor. The pulp situation is generally satisfactory with much higher prices prevailing for the sulphite output. Paper production was about equal to last year.

Mining has been active; nickel production greater than ever; silver falling off in quantity, but realizing high prices; low grade gold mines produced at about last year's level.

Manufacturing activities have been limited only by scarcity of labor and of raw materials.

Both wholesalers and retailers report it easy to sell goods, but difficult to purchase.

All Government and municipal expenditures have been kept within the limit of absolute necessities.

Population still shows a tendency to drift to cities and manufacturing centres.

Real estate values have shown no marked improvement. Rentals have been increased in cities and in larger towns.

Prosperity is general throughout the Province. Business people, anticipating peace conditions, have been proceeding with caution and are materially and mentally prepared for the readjustment period.

PRAIRIE PROVINCES

The yield of wheat, while substantial, has fallen somewhat short of expectations founded on the increase in acreage under crop. Fortunately, a large proportion is high grade, making up in no small measure for the deficiency in quantity.

Manitoba has done well on the whole; the barley crop is exceptionally large. In Saskatchewan fairly good results have been obtained. In Alberta the damage from drought and frost has been relatively more severe than in the other two provinces. A conservative valuation of the grain produced places the total for the year at $500,000,000.

The live stock industry has prospered under increased demand. Sheep raisers continue to benefit through the maintained high price for wool.

Mixed farming, encouraged by the Government with the assistance of the banks, is becoming more general.

Mineral development is confined almost entirely to coal, and production has been much stimulated by the reduced import of anthracite. It is estimated there are 4,000,000 tons of anthracite, 44,500,000,000 tons of bituminous and 60,000,000,000 tons of lignite coal in Alberta alone. Western coals are now more widely used, but there is as yet little development.

Both wholesale and retail trade have been active and good. Failures show a steady downward tendency in number and the amounts involved. Manufacturers have made progress in the face of great and unusual difficulties. Flour mills and other food-producing plants have been continuously employed.

There has been practically no railroad construction during the past year, and Dominion, Provincial and municipal authorities, as well as private individuals, have wisely refrained from capital account expenditures.

Immigration, while not large, has been valuable. Experienced farmers, with capital, have come into the West from the United Stataes.

Transactions in urban realty continue unimportant, but housing accommodation is scarce and rentals continue high. Speculative buying has disappeared. Farm lands are in demand; sales have been numerous and large, at increased prices.

The rapid growth of the financial power of the central provinces is strikingly illustrated by the large per capita subscription to the Victory Loan of last year and this. The post-bellum period of adjustment will present many difficulties, but peoples of the Prairie Provinces, who depend largely on the production of foodstuffs, should be in a position to withstand the effects of possible commercial reaction.

BRITISH COLUMBIA

There is general prosperity throughout British Columbia with pronounced activity in shipbuilding, lumbering, mining and fishing.

Field crops were harvested in good condition and growers are well satisfied both as to yield and prices. The fruit crop was somewhat lighter, but well sold. Stock raisers had an exceptionally good year.

Lumber production has reached a new high record. Spruce for aeroplanes and heavy timbers for shipbuilding created an additional outlet. Prairie markets have been quiet and export trade still continues dormant owing to lack of tonnage. The pulp and paper industry still expands.

Shipbuilding is now a very important industry on the Canadian Pacific coast. Steel and wooden ships built in British Columbia are actively engaged in moving the world's commerce, new ships are being built, shipyards have contracts ahead for some time to come. A large body of men is continuously employed, and the large amount of cash put into circulation has a stimulating effect upon every class of business.

Metalliferous mining has been vigorously prosecuted with generally satisfactory results. Properties idle for years have changed hands and are now being worked on a business and paying basis. Coal mining, although hampered by labor difficulties, will show an increased output over last year.

The total fish production in British Columbia will be the largest recorded. The salmon pack will be equal to the record pack of last year. The Government commandeered practically all of the better grades and placed an embargo on shipments. Prices have not yet been finally fixed, but a reasonably profitable season is assured. The halibut fishery has been profitable to both fisherman and shipper. Notwithstanding the increased fishery, the demand for export outruns the supply.

The wholesale trade is good; retail trade active. Cash is abundant.

Municipal affairs continue to be economically administered, and Government and municipal expenditures are kept within the limit of actual necessities.

The coast cities have been attracting population from the interior, and people have been coming in from outside the Province to participate in the high wages paid in shipbuilding and allied industries.

There is an improved tone in regard to real estate, but little property changing hands.

The Chairman then moved, seconded by Sir Charles Gordon, that the Report of the Directors, now read, be adopted and printed for distribution among the Shareholders.

The Report was unanimously adopted.

Mr. C. R. Hosmer moved, seconded by Mr. Wm. McMaster, that Messrs. James Hutchison, C.A., J. Maxtone Graham, C.A., and George Creak, C.A., be appointed Auditors for the Bank for the ensuing year, and that the ballot for the Auditors be taken at the same time as the ballot for the Directors is taken. This was unanimously adopted.

The President then said: "Before the next motion is put before the Meeting, I should explain that a quinquennial submission of the By-laws to the Shareholders is called for under Section 18, Sub-section 2, of the Bank Act, and we have taken advantage of this opportunity to have our By-laws carefully revised to conform with the amended Bank Act of 1913.

"A number of minor changes were necessary to meet the requirements of the Act, but the only alteration of importance is the authorization to increase the number of the Directors from 14 to 16, with the usual corresponding increase in emolument.

"Copies of the revised By-laws are on the table and, if approved, will be mailed to each Shareholder after the meeting."

Moved by Lord Shaughnessy, seconded by Lt.-Col. Henry Cockshutt: That it is hereby resolved that By-laws as laid before the meeting, numbered 1 to 10, both inclusive, are hereby enacted by the Shareholders of the Bank of Montreal. This was unanimously adopted.

Dr. F. J. Shepherd then moved, seconded by Mr. John Patterson, that the thanks of the meeting be presented to the President, the Vice-President and Directors, for their attention to the interests of the Bank.

In presenting this resolution, Dr. Shepherd said: "I take great pleasure in presenting this vote of thanks. At the same time I wish to congratulate the President and other Directors on the absorption of the Bank of British North America on such equitable terms. We Shareholders owe a debt of gratitude to the President and Directors for the conservative and careful manner in which they have managed the affairs of the Bank during this terrible war period. I am sure with the record they have made during the past four years we can rely upon them to carry on the affairs of the Bank as satisfactorily as in the past. We are thoroughly satisfied with the report presented to us to-day, and I know that we all feel confident that with such careful, far-sighted management, in the troublous times ahead, our financial ship will be guided into a safe harbor, and will navigate safely through the dangers of the reconstruction period."

In seconding the resolution Mr. John Patterson said that the Shareholders owed a vote of thanks to the President and Directors for their devotion to duty and far-sighted policy. He remarked: "When it comes to the successful handling of such a sum as $558,000,000 of the people's money, and doing it with such conspicuous success, the work of those who have achieved this demands not merely our thanks, but our admiration."

The motion was unanimously adopted, with applause.

The President: "On behalf of the Vice-President, the Directors and myself, I thank you for your kind expression of continued confidence in our ability to carry on the business of the Bank.

Mr. H. R. Drummond moved, seconded by Mr. H. Kennedy, that the thanks of the meeting be tendered the General Manager, the Assistants General Manager, the Superintendents, the Managers and other officers of the Bank, for their services during the past year.

In presenting this motion, Mr. Drummond said: "I would like the General Manager and his assisting officers and the whole staff of this Bank to feel that this resolution is no mere perfunctory resolution by the Shareholders. The President and Directors, of course, direct the affairs of the Bank, but the actual work of the Bank is that of the General Manager and his assisting staffs. The wonderful results achieved during the past year show that they have all accomplished that work in a thoroughly efficient manner. (Hear, hear.)

"This Bank is such an enormous institution that the responsibilities of conducting its affairs are constantly increasing, and when we are drawing our dividends and bonuses the Shareholders should make their thanks reach right down to the staffs and clerks to whose devotion to duty we owe these results." (Applause.)

Mr. W. R. Miller: "May I say something about the amalgamation of the Bank of British North America. The General Manager has referred to the anxieties of the past year in conducting the affairs of a great bank. The staff of the Bank of British North America, it having gone out of existence, I take it, will receive no expression of thanks. May I suggest that it would be a graceful act to link up these officials and staffs with those of the Bank of Montreal in this resolution."

The General Manager: "I am greatly indebted to Mr. Drummond for the terms in which he referred to my services and those of the Assistants General Manager, the Superintendents, Managers, Inspectors and the General Staff during the past year, and to Mr. Kennedy for the manner in which he supported the motion.

"On behalf of Mr. Mackenzie, the former General Manager of the Bank of British North America, and his staff, I would thank Mr. Miller for his well-deserved commendation. It would be difficult to measure with any ordinary adjectives of praise the attitude of this Bank and its staff during this war period. I am not referring alone to the men with the colors. They are beyond praise. Nor do I refer to the dead. They are honored with our unchallenged admiration. I refer now to the officers, the men and women clerks at home, who, with long hours and few holidays, have done their share, inconspicuously but splendidly, toward the winning of a glorious victory for the Empire." (Applause.)

ELECTION OF DIRECTORS

The ballot for the appointment of Auditors and the election of Directors for the ensuing year was then proceeded with. The Scrutineers appointed for the purpose reported that Messrs. James Hutchison, C.A., J. Maxtone Graham, C.A., and George Creak, C.A., were duly appointed Auditors, and the following gentlemen duly elected Directors:—

D. Forbes Angus
R. B. Angus
J. H. Ashdown
H. W. Beauclerk
Colonel Henry Cockshutt
H. R. Drummond
G. B. Fraser
Sir Charles Gordon, G.B.E.
C. R. Hosmer
Harold Kennedy
Wm. McMaster
Sir Vincent Meredith, Bart.
Major Herbert Molson, M.C.
Lord Shaughnessy, K.C.V.O.

The meeting then terminated.

At a subsequent meeting of the Directors, Sir Vincent Meredith, Bart., was re-elected President, and Sir Charles Gordon, G.B.E., was re-elected Vice-President.

URGE DEVELOPMENT OF LUMBER INDUSTRY

The British Columbia Loggers' Association has sent a telegram to Sir Thomas White, acting prime minister, at Ottawa, asking him to use his influence to have orders placed immediately by the railways for lumber and timber for the many improvements and extensions which are to be made now that the war is over.

The association calls attention to the splendid response made by loggers when the call for men was sounded. These men will shortly return, and will desire to re-engage in the work to which they are accustomed. This will necessitate the operation of the camps to a greater extent than has been the case in the last two years. We have the raw material, and as it is of vital importance that these men shall be given remunerative employment, it would seem to be of intense importance that every facility be given for the marketing of the finished product.

SASKATOON MERCHANTS NOT PESSIMISTIC

Saskatoon and district has had a severe test this year, between the partial crop failure and the influenza epidemic, according to a Monetary Times' staff correspondent in the west.:—

"With the happy termination of the war and the war price of wheat maintained until August, 1919 at least," he writes, "and with the Christmas shopping season on top of them, Saskatoon merchants are offered a bright prospect for the immediate future. The impression which prevailed two months or more ago, that the mediocre western crop would be reflected in retail cash tills, seems to have been removed. It is true that certain sections of Saskatchewan suffered from drought, but by no means so badly as farmers were inclined to make out. In the Saskatoon district, for example, the crop was good. As indicating the well-based prosperity of the province, it is of interest to note that the Saskatchewan average yield of spring wheat per acre for the last ten years is much higher than the United States average, and in excess of any of the recognized wheat states. The renewal of moderate building activities is promised and as European affairs settle, there will, undoubtedly, be an influx of new people to western Canada.

"Had it not been for the influenza epidemic, business conditions in Saskatoon and district this fall might have been written, 'very satisfactory indeed.' The effect of the epidemic, however, on the retail business section was immediate and surprising. As it died down and the ban was lifted from public gatherings, the normal volume of business returned. The residents of the rural area and neighboring villages, who were more sorely distressed than the city people, partially owing to scarcity of medical men and nurses, ceased for a while to come into the city except upon errands of mercy. The drug stores were crowded, but the general merchandise counters were deserted. Firms handling clothing, millinery, boots and shoes, and the restaurants and cafes not only temporarily lost customers, but were also under the handicap of paying wages to help which was away sick."

RECENT FIRES

The Monetary Times' Weekly Register of Fire Losses and Insurance

Belleville, Ont.—November 29—Dwelling house situated on Herchimer Avenue, owned by Mr. Rogan and occupied by Mrs. Denby, was damaged.

Brantford, Ont.—November 28—Barn at the rear of Dr. Sagar's residence, 41 Sheridan Street, was damaged. Caused by children playing with matches.

Burford, Ont.—December 3—Barn and contents of Leslie Metcalfe were destroyed. Caused by the upsetting of a lighted lantern. Estimated loss $5,000, partially covered by insurance.

Coles Mills, Ont.—November 29—Home of Jos. Arno was destroyed.

Ganges, B.C.—November 25—A workshop containing all Mr. Arthur Elliott's furniture, two motor cars, a McLaughlin, belonging to Mr. Brittancourt, and an Overland, owned by Mr. Wentworth, who is at present with the troops in France, was destroyed. A considerable amount of lumber was stored in the building, also tools and other articles, which were totally destroyed. It is understood that the furniture and other things destroyed were not insured.

Kitchener, Ont.—November 28—The Bardon's Bakery was damaged. Caused by an overheated oven.

Lanark, Ont.—November 29—Home of James Savage was destroyed.

Montreal, Que.—November 29—The Charland and Bissaillon Hay Depot, 1835 Ontario Street East, was damaged. Estimated loss, $25,000.

Montreal, Que.—December 2—Shops of the Shawinigan Water and Power Company, were damaged. Estimated loss, $25,000.

New Liskeard, Ont.—December 2—Home of Mr. La Pointe was destroyed.

North Augusta, Ont.—November 29—Blacksmith shop of Geo. A. Love, adjoining shed and stable and a stone building, occupied by the Bank of Nova Scotia, were damaged.

Toronto, Ont.—November 29—Tthe forge shop at the plant of the British Forgings, Limited, Ashbridges Bay, and valuable plans and machinery, were destroyed. Estimated loss, $200,000. The Appleford Counter Checkbook building, was damaged. Estimated loss, $10,000. Home of Mrs. G. Thompson, 41 Cornwall Avenue, was damaged. Estimated loss, $400. Premises of the Consolidated Glass Company, 70 Lombard Street, were damaged. Estimated loss, $525.

December 3—The Ideal Bakery, Dovercourt Road, was damaged. Caused by flames leaping from open oven. Estimated loss, $200.

November 28—Plant of the Standard Sanitary Company, Royce and Lansdowne Avenues, was damaged. Estimated loss, $400.

ADDITIONAL INFORMATION CONCERNING FIRES ALREADY REPORTED

Vancouver, B.C.—Fire Chief Carlisle submits the following report for the month of October, to "The Monetary Times":—

The estimated total damage resulting from fire for this period was $40,642, of which amount $40,107 was covered by by insurance, leaving a property loss above insurance at $535. The total value of the property involved by fire for the month was $473,096.

The following shows the cause of fires during October:—Backfire (carburetter), 1; coal oil lamp upsetting, 2; children playing with matches, 1; defective chimney, 2; defective flue, 1; electrical origin (short circuiting, wiring), 2; gas burner setting fire to unprotected box stand, 1; overheated furnace, 1; overheated stove pipe, 2; mattress drying too near stove, 1; flying sparks (chimneys), 1; sun's rays focussing through crystal in window, 1; tarpot (tar boiling over), 1; wood drying on top of furnace, and catching fire, 1.

CREDITS ARRANGED FOR $200,000,000

To Be Spent in Canada on Munitions and Foodstuffs—Grain-Growing and Live Stock Industry—Return of Requisitioned Ships

Announcements of steps taken by the government and by private individuals to promote export trade and generally to meet the problems of the post-war period, were made on December 3rd. In the first place the government has received credits for the British government amounting to $200,000,000. This sum is to be expended in Canada and, while $50,000,000 is to be utilized in winding up the business of the Imperial Munitions Board, the balance is to be expended upon foodstuffs and will enure to the benefit of the agricultural community of the Dominion. Fifty million dollars will be applied to meeting the cost of Canadian grain of this year's crop, and the balance will be used to make purchases of meats, cheese, lard and other foodstuffs. Representatives of the industry of agriculture are shortly to go to England under the auspices of the Canadian government to assist in securing orders to be filled in the Dominion and to study conditions governing export trade in their commodities. These gentlemen are to be named by agricultural organizations.

Grain-Growing and Live Stock.

One of them will represent the grain-growing interests, and the other the live stock industry. The former will be called upon to consider a complicated situation which, it has been suggested, may require some international action for its solution. The world's supply of wheat is estimated at some 750,000,000 bushels, upon which there will be a demand from various European countries now suffering from food shortage. There are some 400,000,000 bushels, it is said, in the United States, 225,000,000 bushels in Australia, and 75,000,000 bushels in the Argentine Republic. At the same time the next Australian and Argentine crops will be coming on the market early in 1919. Furthermore various countries have fixed prices as a result of war conditions. In Canada the price is, by agreement, to prevail until August next, and thus covers grain of the crop of 1918. In the United States the government has guaranteed the price not only for the 1918 crop, but also for that of 1919.

Most recently it was announced that Australian wheat, which has not found an outlet for three years, would be placed upon the market at a fixed price of approximately $1.14 a bushel.

Engagement of Private Interests.

Private enterprise will also be engaged in the effort to secure export trade for Canada. The Sino North-American Company has been organized to do business with China, Japan, Siberia and other eastern countries, and already has representatives on their way to the Far East. The company has been appointed to represent the Ogilvie Flour Mills Company, Steel Company of Canada; the Dominion Textile Company, the Canada Carbide Company, the Empire Typewriter Company, and the Waterous Engine Works Company. The organizers of the Sino North-American Company are: Sir Herbert Holt, Sir Charles Gordon, J. E. Aldred, W. A. Black and G. M. Gest.

Vessels to be Returned.

Announcement has also been made that applications made by the Dominion government for the return of vessels requisitioned by the British government for war service to trade routes have met with success. Hon. A. K. MacLean has received a cablegram from Sir George Foster stating that two vessels taken from the Canada-British West Indies service have been released and will return to their old route this month. Another despatch gives the government the information that two steamers are being released for service between Canada and South Africa. One of these ships will sail from this country for South Africa at the end of December, and the other in the middle of January. It was previously announced that the steamships "Empress of Asia" and "Empress of Russia" would be restored to the service to China and Japan. Canadian exporters will thus be provided with tonnage to transport their products to the West Indies, South Africa and China and Japan. Sir George Foster is also impressing upon the British Government the need for vessels for the Atlantic service, and for the Australia and New Zealand service.

INVESTMENTS AND THE MARKET

News and Notes of Active Companies—Their Financing, Operations, Developments, Extensions, Dividends and Future Plans

Canada Permanent Loan Company.—The regular quarterly dividend of 2½ per cent. has been declared on Canada Permanent Loan shares, payable January 2 to stock of record December 14.

Toronto General Trusts Corporation.—The board of directors of the company declared the usual quarterly dividend of 2½ per cent. on the paid-up capital stock of the corporation for the quarter ending December 31, 1918; also a bonus of 1 per cent. on the paid-up capital, both payable on and after the 2nd day of January, 1919.

Western Power Company of Canada, Limited.—The company for the month of September reports operating revenues of $36,015, a decrease of 4.9 per cent., compared with September, 1917; net earnings, $22,599, a decrease of 15.5 per cent. For 12 months ended September 30, 1918, the company shows operating revenues $451,256, an increase of 2.7 per cent. over the same period in 1917; net earnings $307,852, a decrease of 9 per cent.

Cape Breton Electric Company, Limited.—The gross earnings of the company for the year ended September 30th, 1918, were $501,334, an increase over last year of $57,728. Operating expenses and taxes totalled $365,570, and the amount for interest charges and sinking fund requirements was $78,367. After making these deductions a balance of $57,396 was left for reserves, replacements and dividends.

The company's gross earnings for September were $46,026 and the net earnings $10,865.

Windsor Hotel Company.—The financial statement of the company for the past fiscal year shows the result of the higher costs of operation.

The gross earnings showed a good increase, but net amounted to $68,282, as compared with $105,713 for the previous year, $77,648 for the 1915-16 period, and $38,747 for the 1914-15 period. The year's net profits, $41,282, after bond interest, permitted the payment of a 2 per cent. dividend, against a 4 per cent. dividend in each of the two preceding years.

Laurentide Power Company.—The company is making marked progress in earnings, surplus for ten months of its second fiscal year increasing by $120,236 over 1917 to $281,211. The October gain was $22,169 to $37,207.

The ten months' gain in surplus is 75 per cent., and the October showing was at the rate of 4.3 per cent. on its capital stock, against a rate of 3.2 per cent. for the first ten months, and less than 2 per cent. for 1917. The October results offer the following comparisons:—

	Oct., 1918.	Oct., 1917.	Inc.
Gross earnings	$ 81,047	$ 55,990	$ 25,057
Expenses	12,589	9,701	2,888
Net earnings	$ 68,457	$ 46,288	$ 22,169
Charges	31,250	31,250	....
Net income	$ 37,207	$ 15,038	$ 22,169

Comparisons of ten months' results follow:—

	Ten months, 1918.	1917.	Inc.
Gross earnings	$720,911	$536,230	$184,681
Expenses	127,199	62,754	64,445
Net earnings	$593,711	$473,475	$120,236
Charges	312,500	312,500	....
Net income	$281,211	$160,975	$120,236

COBALT ORE SHIPMENTS

The following is a statement of the shipments of ore, in pounds, from Cobalt Station for the week ended November 29th, 1918:—

Right of Way Mines, 70,061; McKinley-Darragh-Savage, 165,624; Buffalo Mines, 242,000; total, 477,685.

The total shipments since January 1st now amount to 30,391,800 pounds, or 15,195.9 tons.

Orders for the new issue of H. M. P. Eckardt's
Manual of Canadian Banking
are now being received
Postpaid anywhere - $2.50
The Monetary Times Printing Company, Toronto, Ont.

Although few Winnipeg clothing factories have received contracts for the supply of clothing to the Canadian army, the end of the war will likely cause them to close, factory managers asserted. They may continue as jobbing concerns, handling eastern goods as agents. They say that the Provincial minimum wage law makes it impossible for them to compete with the eastern factories. Should the factories close down at that city it will put 500 girls out of work who earn $7,000 weekly.

An order issued by the Winnipeg Board of Grain Supervisors on November 22nd provides that there shall be paid upon wheat held in storage by or for the eastern mills, carrying charges, effective December 1st, as follows: In eastern Canadian public or terminal elevators, including Detroit or Port Huron, 1-15 cent per bushel per day, for wheat in store, except enough for a fortnight's grinding; in flour mill bins, 1-20 cent per bushel per day on wheat stored in winter storage boats; in eastern bay ports, 1-25 cent per bushel daily. No carrying charges shall be paid, however, on wheat as a result of this order, without the approval of the board.

Salmon canners of British Columbia are making strenuous efforts to have a fully authorized representative of the Food Board sent to Vancouver to investigate a state of affairs alleged to exist on account of the requisitioning of the salmon pack. In spite of the claims that the salmon pack of British Columbia was needed for the civilian population of the old country and was commandeered, only four per cent. of the commandeered salmon has been shipped, while the remainder, valued at nearly eight million dollars, is still at Vancouver.

Permission has been asked of the Up-State Public Service Commission by the Niagara Falls Power Company to issue $2,000,000 bonds reserved under the refunding and improvement mortgage of the Hydraulic Power Company of Niagara Falls, dated October 1st, 1916. The money is to be used to pay for property acquired and improvements in accordance with the expansion programme of the company to enlarge its output. Improvements under way are estimated to cost about $4,000,000 and the money required to pay for this in excess of the proposed bond issue will be taken from the cash assets in the treasury.

MUNICIPAL BOND MARKET

The Monetary Times' Weekly Register of Municipal Activities and Financing

Barton Township, Ont.—An issue of $49,000 debentures for School Section No. 7 has been authorized.

Regina, Sask.—An issue of $31,000 7 per cent. 10-year paving debentures has been authorized.

St. Hyacinthe, Que.—The by-law authorizing the issue of $20,000 5 per cent. bonus debentures has been repealed.

Leader, Sask.—The Local Government Board has authorized an issue of $10,000 6 per cent. 10-year fire protection debentures.

Portage la Prairie, Man.—On December 17th, an election will be held to vote on a proposition to issue $45,000 bridge bonds.

Vancouver, B.C.—An election will probably be held next January at which time an issue of $544,000 debentures will be voted upon.

New Toronto, Ont.—Messrs. C. A. Burgess and Company, of Toronto, have purchased a block of $53,000 6½ per cent. 30-instalment bonds. The proceeds will be used for sewer purposes.

Collingwood, Ont.—At a recent meeting of the town council by-laws were passed authorizing the issuance of $13,000 debentures for patriotic purposes, and $8,400 under the consolidated debenture act.

East Whitby Township, Ont.—An issue of $8,000 6 per cent. school debentures has been awarded to R. C. Matthews and Company, of Toronto, at 98.27. Dated November 14, 1918, due November 14th, 1938.

Verdun, Que.—Taxation in the city was increased from 9 to 12 mills by decision of the city council. The following estimates for the coming year were also submitted: Bond interest, $186,295; provincial government charges, $3,000; charter and war fund, $4,000; finance committee, $31,584.32; works committee, $82,437.62; police and fire, $46,700; recorder's court, $1,450; contingencies, $8,800; health department, $12,900; city hall committee, $3,265; parks committee, $4,440; waterworks, $73,850; electric light, $38,750; total, $497,471.94.

The deficit on current expenditures at the end of the ten months, as revealed in the auditor's report is approximately $60,000. It is estimated that by the end of the year this deficit will be increased to at least $80,000. On December 1 interest on debentures amounting to $45,000 falls due and there are contractors' holdbacks amounting to another $25,000 which are due to be paid before the end of this year. The Bank of Montreal has been asked to make an advance to cover this expenditure, but so far no arrangement for the accommodation has been made.

Halifax, N.S.—The tender of the Eastern Securities Company, Limited, of St. John, N.B., for the purchase of $428,000 city of Halifax bonds, was accepted by the board of control on November 29th. The price was 100.77 for $133,500 for immediate delivery, and 101.63 for the balance when legislation is obtained. The bonds bear interest at the rate of 6 per cent. and run for 34 years. The following are the bids as reported by the city treasurer:—

	Immediate delivery.	Delivery on legislation.
Eastern Securities Co., St. John, N.B.	100.77	101.63
A. M. Jack and Son	99.69	100.03
J. C. Mackintosh and Co., and H. M. Bradford, Halifax, N.S.	99.31	99.31
W. F. Mahon and Co., Halifax, N.S.	99.098	99.098
Wood, Gundy and Co., Toronto	98.82	98.82
Dominion Securities Co., Toronto	98.64	98.64
Harris, Forbes and Co., Montreal	98.57	98.57
F. B. McCurdy and Co., Halifax, N.S.	98.55	98.55
Canada Bond Corporation, Toronto	98.25	98.25

W. F. Mahon and Harris, Forbes and Company bid for the entire lot.

The acceptance of the Eastern Securities tender means really the $133,500 for immediate delivery and an option on the remainder when legislation is obtained.

LESS REVENUE FOR MONTREAL IN 1918

Chairman DeCary, of the Administrative Commission, Montreal, announced that the decrease in revenue as compared with that of a year ago would amount to $400,000, instead of $300,000 as previously announced. In other words, if the city commissioners had economized $400,000 in the administration of the city they would be no better off than before. It appears the decreased valuation in real estate for the current year, and the decrease of other revenues, including the bachelors' tax, will account for $300,000 less revenue, and the fixed charges will use up another $100,000. The commissioners have not yet announced what the realty tax will amount to for the coming year.

LOANING SITUATION IN CENTRAL ALBERTA

Evidence is now coming forward that the decided quietness which has characterized the loaning business in the West may soon be over.

"A fair demand for financial assistance throughout the central part of Alberta, by way of farm loans, has arisen during the past four months, with every prospect of continuing," said Mr. F. A. Beddard, of the Huron and Erie Mortgage Corporation, Edmonton branch, to the western representative of "The Montary Times." "The causes," he said, "to which these conditions are attributed are crop failure during the early July frost; the purchase of additional lands by farmers; thereby adding to their present holdings, and the demand for increased production made by the Dominion and Provincial governments. All of these are closely associated with each other. In order to increase production large areas of land were put under cultivation; additional lands purchased to accomplish this end, only to result in a crop failure, caused by a freak July frost; such a frost not occuring to the writer's knowledge, at this period, for the past eighteen years. However, farmers, generally speaking, have now got over this set-back and are now determined to put in as large, if not larger, acreage next spring.

"The obtaining of seed grain, however, is a problem in some cases, but from various sources of information, it would appear there will be no difficulty in obtaining same. One thing is very noticeable travelling through the country, and that is, the large acreage ready for seed next spring.

"The stock situation is also one receiving considerable attention; large herds having been moved from the south to the northern parts, on account of the feeding situation. On account of the world-wide stock shortage, credited to war conditions, the northern part of Alberta looks forward, with no small amount of confidence for the coming year. In addition thereto farmers are meeting their liabilities with very few exceptions. Why should it be otherwise when one takes into consideration the high prices of grain and farm produce?

"There will be, in my opinion, a steady demand for farm loans, not only in outlying, but in the older districts—the monies so borrowed in the latter cases will be used, principally for the erecting of up-to-date buildings."

Mr. E. P. Huntington, of Potter's county, Pa., on November 20th purchased the land, buildings and machinery of the Big Dipper Mining and Milling Company, at sheriff's auction, for $20,000. The property consists of more than 1,400 acres of land in Barrie township, Frontenac county. The mines are said to be valuable, but have not been on a paying basis for some time.

Preparing to handle the extra traffic that will come with completion of the $20,000,000 plant of the Canadian Steel Corporation that is being built at Ojibway, officials of the Canadian Pacific Railway are here seeking property for extension of their tracks and new freight sheds. The new docks at Ojibway are now in course of construction, and in the spring it is expected several hundred workmen's homes will be built.

Big shipper and little shipper alike must, after next New Year's Day, pay cash to the railways for service rendered, or furnish a bond covering the amount involved. Under the bond, however, only 96 hours' credit will be allowed. An order bringing the Canadian railroad system in line with the United States railways in this respect is about to be issued by the Canadian Railway War Board.

BOARDS OF TRADE WORK TOGETHER

Western Ontario Organization Formed to Look after Interests of Towns and Cities in that Part of Province

The United Boards of Trade of Western Ontario, comprising in its personnel many of the leading business and professional men of that section of the province, held its initial sessions in London, Ont., on Thursday, November 28th. The morning was occupied mainly with the reception of delegates at the Tecumseh House. In the afternoon a business meeting was held in the board room of the Travelers' Association in the Dominion Savings Building, when by-laws and a constitution were adopted and several resolutions passed affecting matters of public interest. At 6.30 p.m. a dinner was held at the Tecumseh House, with the London Chamber of Commerce as hosts, at which Mr. O. E. Fleming, of Windsor, and Miss Van der Flier, of Holland, gave brief addresses. Later in the evening, Mr. Thomas Adams, town planning adviser for the Dominion Conservation Committee, addressed the delegates and members of the local Chamber of Commerce on "Town Planning." As a result of Mr. Adams' address a resolution was passed calling for the formation of a department of municipal affairs in connection with the Ontario government.

By-Laws Considered.

The first business of the afternoon session was the consideration of the by-laws. It was decided that the executive committee shall consist of one member from each of the 14 counties interested, each county to elect its own representative at the annual meeting. The question of whether the counties of Welland, Lincoln, Wentworth, Halton and Peel should be included in the scope of the organization, was left over until Friday, when a larger representation of delegates was expected to be present. While the general run of resolutions had first to be submitted for the consideration of all the affiliated boards, provision was made that any matter of urgency might be taken at the annual meeting.

On motion of Mr. Christopher Cook, of Brantford, a resolution was passed: "That the Kaiser and all the leaders of his military gang who, in 1914, deliberately plunged Europe into war to secure for themselves world dominion, be tried by an international court and punished as befits their crimes against humanity and civilization."

It was decided to have copies of the resolution forwarded to Premier Borden, members of the Dominion Cabinet, to all Boards of Trade and Trades and Labor Councils of Canada, to the G.W.V.A. and to the Canadian Manufacturers' Association.

Taxing Profits.

Mr. George S. Matthews, of Brantford, introduced a resolution calling on the Dominion government to reconsider the system of taxing manufacturers' profits. The government, said Mr. Matthews, was no doubt actuated by the best of motives, but the legislation enacted had resulted in a most unequal distribution of taxation.

At the evening meeting in the Masonic Temple, the principal speaker was Mr. Thomas Adams. After outlining what had been accomplished by intelligently directed effort on the part of the government of England towards model town planning, Mr. Adams dealt with the Canadian situation. He appealed for systematic town planning as opposed to the haphazard way in which many cities had been allowed to "happen." Instancing a case in Ottawa, Mr. Adams said: "The worst housing conditions in Canada have been produced in the last 20 years."

Sanitation.

Mr. Adams said that personally he didn't care what kind of a house he lived in so long as it was sanitary. He named good pavements, sewer connection, water supplied from a good civic system, plenty of light and air and a playground for the children as essentials. These were things which the city should provide because the city should be the planner. Mr. Adams scored real estate speculators, who juggled land for big financial gains.

Mr. Adams advocated a "department of municipal affairs" in connection with provincial government. The duties of this department would be to get money for municipalities at the cheapest rates and under the best circumstances and to supervise town planning. "Why should cities and towns have to bear the expense of securing expert engineering advice?" queried the speaker

Mr. Adams claimed that such a department could handle many questions which now were dealt with by parliament. In closing, he urged that the "rights of life" be considered above the "rights of property."

During a brief address by Mr. Christopher Cook, of Brantford, the power went off for a few minutes and the meeting was left in darkness. Mr. Cook said that if his hearers could stand it he certainly could and the audience enjoyed the novelty of listening to a speech in a room shrouded in blackest night. Mr. Cook said that there was room for nothing but optimism in the outlook before Canada, and cited the oversubscription of the Victory loans as evidence of what Canada had attained to and was capable of in a financial way.

Mr. J. P. Hume, of Goderich, moved a vote of thanks to Mr. Adams and to the London Chamber of Commerce.

Municipal Affairs.

On motion of Mr. T. J. Hannigan, of Guelph, the United Boards of Trade pledged themselves to urge on the Ontario government the necessity for a department of municipal affairs as outlined by Mr. Adams. The resolution was passed and Messrs. Hannigan, Gordon Philip (of London), George De Bus (of Kitchener), and Controller John M. Moore (of London), appointed a committee to assist Mr. Adams in drafting a resolution to be forwarded to the government.

On Friday morning further resolutions were considered by the delegates, the executive was elected, and the plans for 1919 decided upon. At noon the delegates were the guests of the London Canadian Club at a luncheon at the Tecumseh House, when Sir John Willison, president of the Canadian Industrial Reconstruction Association, delivered an address. In the afternoon the meetings concluded with a session of the executive committee and the election of officers.

Officers Elected and Resolutions Passed.

At the concluding session held on Friday, November 29th, the following officers were elected: President, John Bridge, of London; vice-presidents, F. McClure Sclanders, of the Border Cities Chamber of Commerce, for Essex, Kent and Lambton; Elias Lemon, of Owen Sound, for Grey, Bruce and Huron; Geo. S. Matthews, of Brantford, for Brant, Norfolk and Elgin; T. J. Hannigan, of Guelph, for Wellington, Waterloo and Perth; secretary-treasurer, Gordon Philip, of London; executive committee, S. C. McLeod, Stratford; G. S. Matthews, Brantford; G. L. Moore, Goderich; D. B. Detweiler, Kitchener; Arthur J. Dunn, Chatham; F. McClure Sclanders, Border Cities; Elias Lemon, Owen Sound; W. H. Kenny, Sarnia; John Dowler, St. Thomas; T. J. Hannigan, Guelph; John Bridge, London; H. Sykes, Woodstock.

Whether or not the boards would endeavor to secure uniform rates for Hydro-electric power was debated, but no definite action was decided upon. A committee, comprised of Messrs. Bowden (Goderich), Hannigan (Guelph), Sclanders (Border Cities), Detweiler (Kitchener), C. H. Belton (Sarnia), will investigate the question and report upon it at a later meeting.

A resolution urging the government to proceed with the construction of the new trans-provincial highway without loss of time, and asking that the government engineers report on other routes, the communities which could be served, and the probable cost of the work, was passed. The expansion of export trade for scientific and industrial research and for the improvement of relations between capital and labor, formed another resolution for the attention of the Dominion government. Delegate Daybus, of Kitchener, introduced a resolution which was adopted, asking for steps to be taken to relieve the housing problem.

A rule that only the 14 counties now included in the body shall be entitled to membership was passed.

Delegates in Attendance.

The list of delegates to the convention is as follows: Stratford, A. C. McLeod, H. W. Studley, R. T. Orr; Brantford, W. F. Cockshutt, M.P., W. B. Collins, George C. Lawrence, George S. Matthews, H. H. Powell, L. M. Waterous, H. T. Watt, C. Cook, C. G. Ellis, J. M. Young, Geo. Hately; Goderich, J. P. Hume, B.A., C. L. Moore, Rev. Canon G. C. Hill, W. S. Bowden, R. T. Megaw; Kitchener, A. S. Capwell, George De Bus, A. J. Cundick; Preston, H. Sneyd; Ridgetown, N. A. Roszill, J. G. Little; Chatham, Arthur J. Gunn, S. B. Arnold, James Innes; Windsor, A. D. Bowlby, O. E. Fleming, K.C., F. Maclure Sclanders, F.R.G.S.; Owen Sound, Elias Lemon; Petrolea, John Fraser, G. M. Cary, R. G. R. Mackenzie; St. Thomas, C. Butler; Mount Forest, C. L. Allen,

EXPROPRIATED PROPERTY TO BE VALUED

Exchequer Court Must Fix Values of Halifax Graving Dock, Sorel Shipyards, and Ross Rifle Plant

A number of cases of more than ordinary interest, including, it is understood, several matters arising out of the termination of the war, will engage the attention of the Exchequer Court of Canada during the next few months.

One of the most important of these is expropriation proceedings, of which notice has been given by the Dominion government, in connection with taking over of the Halifax graving dock. The government in its position is asking the Exchequer Court to fix the value of the graving dock and lands at a sum not exceeding $1,100,000. The Graving Dock Company has not filed its defense, but it is understood that the claim will be advanced that the value of the graving dock is an amount greatly in excess of the value placed upon it by the government.

The government in a petition is also asking the Exchequer Court to fix the value of the use and occupation of the Sorel shipyard since December, 1915, at $30,000. The owners of the yard, who include J. S. McCarthy, Montreal; Mrs. W. C. Warner, Montreal; James M. McCarthy, Quebec, and Daniel McCarthy of Sorel, place the value of occupation by the government at $80,000. This case will be tried at Montreal on November 9th.

Sir Charles Ross' Claim.

The biggest case to come before the Exchequer Court in the near future, however, is the claim of Sir Charles Ross for an amount exceeding $18,000,000 for the taking over of the Ross rifle factory at Quebec and incidental damages in connection therewith. In this connection the interesting statement is made that it was the intention of the government to have the Exchequer Court fix the amount to which Sir Charles is entitled, but the latter forestalled the government's contemplated action by filing a petition of right with the Secretary of State, the effect of which will be that the government will be the defendant in the case. This case has not yet formally reached the Exchequer Court, the necessary fiat not having yet been issued by the Secretary of State, who acts on the advice of the Minister of Justice.

BUREAU OF STANDARDS USEFUL

An address was given by Dr. S. W. Stratton, of the Bureau of Standards, Washington, before the members of the Royal Canadian Institute of Toronto on Saturday evening, November 23. Dr. Stratton told of the work of the bureau, which was founded in 1901, and of which he is director.

"One of the greatest problems we are faced with is the conservation of fuel," Dr. Stratton said. "We think we have been conserving fuel for airplane and tractor work, but we are going to need more fuel after the war than before, because of the need of tractor engines and tractor power. That is a problem which all countries should investigate."

Dr. A. B. MacCallum, chairman of the honorary Advisory Committee for Scientific and Industrial Research for Canada, in moving a vote of thanks to Dr. Stratton, announced that the Dominion Government is at present considering the establishment of a Central Research Institute for Canada, which would parallel the work of the Bureau of Standards, and having special facilities for industrial research.

Notice has been given that the convention respecting commercial relations between Canada and France is to remain in force till September 10th, 1919. The question of continuing the convention in force after that date is under consideration.

ADVISORY COMMISSION ON GAS PROBLEMS

Organization to be Formed in Ontario to Assist Provincial Government—Natural Gas Association

Gas-producing companies, distributing companies and gas consumers of urban and rural municipalities were represented at meetings held in Chatham, Ont., on November 29th, pursuant to a call issued by the Ontario government for a meeting at which names might be suggested for membership in the new Natural Gas Commission, which will advise with the government as to future legislation concerning the production and distribution of natural gas in Ontario.

The suggestion by the government was that one representative for each of the four divisions would be chosen for membership in the commission. The plan has met with approval in the main, but it was openly expressed in all four gatherings that there should be more than four on the commission, because a man from the east would not know the condition existing in the west and consequently would not be giving the best service to all concerned. As a result of this feeling the government is being asked to change the plan and increase the membership in the commission.

Nominees for the Commission.

After considerable discussion, the producers named R. L. Pattinson of Chatham, T. A. Little of Buffalo, and W. H. Beamer of Windsor, for the western division, and R. F. Miller of Selkirk, C. E. Steele of Port Colborne, and H. R. Davis of Buffalo, for the eastern division, and the government has been asked to name at least two of these six members of the commission.

For the urban municipalities, the nominees are: Mayor Tuson of Windsor, Mayor West of Woodstock, and Engineer Gray of Hamilton, and the delegates in this division also urged that more than one be named by the government.

In the afternoon the rural municipalities held a meeting and they nominated Warden McKee of Essex, Judge Stanworth of Kent, and Warden Mahoney of Wentworth County, as the list for the government to make a selection from. They added three other names, hoping that at least two might be placed on the commission representing the rural municipalities. The last three were: Reeve Enoch Broadbent of Raleigh Township, Kent County; Reeve Scratch, Gosfield South Township, Essex County, and J. S. Fraser, K.C., of Wallaceburg.

The distributors nominated P. S. Coate of Chatham, J. L. Richie of Hamilton, W. Pinchard of Windsor, P. V. Byrnes of Hamilton, D. A. Coste of Niagara Falls, and C. E. Steele of Port Colborne. This section also urged that the government make the advisory commission larger than had been intimated.

The distributors passed a resolution expressing their appreciation of the action of Hon. G. Howard Ferguson in having the meeting held, and a similar resolution was passed by the producers at the morning session.

Natural Gas Association.

The representatives of the distributors held a meeting after the naming of the nominees for the advisory committee, and decided in favor of forming a Natural Gas Association of Canada for the mutual benefit of all persons interested in natural gas. A committee of five: P. S. Coate, F. W. James and R. L. Pattinson of Chatham; W. Pinchard, Windsor, and H. W. Braden, Hamilton, was named to proceed with plans for the organization. Such an organization now exists in the United States.

All present at the meetings felt that good could be accomplished by an advisory committee supplying information for the government, in the forming of new legislation, and also for the Ontario Railway and Municipal Board, in carrying out the provisions of the Natural Gas Act of 1918, or such amendments as may be made.

The attendance at the meetings was large, and was representative of the municipalities and organizations most concerned from as far east as Buffalo and as far west as Windsor.

It is suggested by Mr. T. A. Hollinrake, president of the A. R. Williams Machinery Company, Limited, Toronto, that munitions machinery in Canada should be preserved and stored. This would, he points out, insure a certain measure of preparedness and the value of the machinery as scrap is quite small.

A NARRATIVE

"It seemed but over-night when we reached the great Hinterland back of Lake Superior, with its innumerable rivers clothed to the edge with a tangle of forest, interspersed here and there by rocky ridges—the bright green of the underbrush and the shadowy white of the birch breaking indiscriminately the dark evergreen of the predominating pines.

"Nearing the head of the Lakes the country becomes more broken, and Nipigon Forest Reserve with its world-famed trout streams is soon traversed. At Port Arthur we saw the largest grain elevator on the Continent, and were informed that the immense shipbuilding industries here, and its rapidly increasing trade as the distributing point for the great undeveloped territories lying to the north and west, is rapidly developing a great, metropolitan city. Leaving Port Arthur, the route lies through the picturesque Rainy Lakes district and Quebec National Park, reaching Winnipeg by a fertile and gradually rolling prairie.

"West of Winnipeg the prairie continued with its teeming activities, and innumerable clusters of grain elevators standing silent sentinel will long be remembered as we rolled along over the flat country. A choice of routes is available west of Winnipeg, taking one either through Brandon, Regina and Saskatoon, the southern route; through the Central Districts; or by Northern Manitoba and Saskatchewan to Calgary and Edmonton. We chose the second because of its through train service. At Calgary and at Edmonton our short stay was well spent in studying the great commercial and agricultural opportunities of this Last Great West with its infinite possibilities as the outpost of a mighty nation. Here, work, enterprise and prosperity go hand in hand.

"From Edmonton west the prairie is soon replaced by the haze-clothed mountains in the distance, and following the banks of the Athabaska River the Canadian Northern passes through Jasper National Park, a second Yellowstone, to Yellowhead Pass—the Great Divide. Yellowhead, as tradition has it, is named after a mighty Iroquois-Scotch trapper known as Tete Jaune, or Yellowhead, who hid or cached his furs at this spot and stood a tower of strength and a goodly beacon to the luckless wayfarer in the tempestuous days of old.

"The scenery at this point is grand—a rocky gorge covered with dark pines and light green shrub above surmount the seething currents of the Fraser, while towering on either side and lost in the clouds are the snow-capped peaks of the giant Mount Robson, the highest known in Canada. Such is the surrounding chosen by a grateful country in its selection of a fitting tribute to the memory of the famous British nurse martyred by Germans in Belgium, October, 1915—'Mount Edith Cavell.'

"Journeying south from the Yellowhead we followed the Canoe and Albreda rivers, which are in turn succeeded by the North and Main Thompson rivers, reaching at Lytton the lower waters of the main Fraser. From here west we crossed and re-crossed, hugging its mighty and picturesque banks through to Vancouver.

"Nowhere in this mountainous and river-valley route of over 700 miles from the gateway to the Rockies clear through to the Pacific did it grow monotonous or time hang heavily, so insistent were the attractions which flashed past the windows of the comfortable Observation Car."

DEMURRAGE CHARGES MAY BE OMITTED

Railway Commissioners Permit This Where Shippers are Handicapped by Influenza

An order has been passed by the Board of Railway Commissioners, whereby demurrage will not be charged to shippers who have been unable to prevent delay through shortage of help on account of the influenza epidemic. The order, as issued by the chairman, Sir Henry Drayton, with Commissioners McLean and Boyce, is as follows:—

"On October 25th, a judgment was issued providing that demurrage should not be charged where shippers were unable to accept cars owing to the ravages worked by the epidemic among their employees. This judgment was followed up by a memorandum dated November 14th, which was communicated to the different parties in interest by a letter from the secretary of the board.

"The Car Service Bureau and those applying for relief under the judgment of October 25th do not seem as yet to have arrived at any proper procedure in carrying out the board's directions, as a number of specific complaints have been received.

Prompt Settlement.

"On receipt of this material, the matter ought to be promptly dealt with by the Car Service Bureau or by the railway company interested, as the case may be, and under the circumstances the preliminary payment of the demurrage claim ought not to be insisted upon. It is, of course, open to the bureau or to the railway company interested to challenge the statements made and to ask in doubtful cases for further proof; but I confidently expect that the bureau and the railways will adjust, without the necessity of any board hearings, the great majority of cases which will arise.

"The Car Service Bureau submits that when it is found that delays are in fact chargeable to the inability of employees of consignors or consignees owing to the influenza to load or unload, the higher tariff now in force ought to be reduced to the lower tariff of $1 a day. There is no room for the distinction that the Car Service Bureau desires to make. When delays are unavoidable owing to the ravages of the epidemic, it is not a question of the scale of charges; it it is a question as to whether or not demurrage should or should not be charged, and the board has ruled that it ought not to be charged. No charge, therefore, of any character is to be made for unavoidable defaults attributable to the foregoing reasons.

"There ought to be no difficulty in giving effect to the board's directions. The situation is perfectly plain. In the first instance, consignors and consignees who make delay, either in loading or unloading cars, are subject to the penalties provided under the existing rules; but consignors and consignees who have been unable to load or unload as a result of the influenza among their employees are to be excused from the operation of the rules. Prima facie, a defaulting consignee or consignor is liable and the onus of proof is on any consignee or consignor to show such a state of affairs existing as the result of the epidemic and under which, with due diligence, it was impossible for the delay to have been prevented.

"Applications for relief under the board's order, so that the question can properly be disposed of, not only as between the railways and the merchants, but as between merchants themselves, and so that all may be treated on a like basis and without discrimination, should file with the Car Service Bureau or with the immediate railway company interested, evidence in writing, either by affidavit or declaration, giving the following particulars:—

Must Supply Details.

"1. The number of men employed immediately previous to the epidemic.

"2. The number of men employed during the continuance of the epidemic and at the time the default in question took place.

"3. Any special or auxiliary efforts made to release the cars during such period, such as taking men when possible from other branches of the firm's activities, or securing them from outside sources, such as the service of outside carters when available, or showing that no men were available in other branches of the applicant's business.

"4. What action, if any, was taken to stop further shipments to the plant until the epidemic had ceased.

"5. If no action was so taken to show whether, in the course of trade and having regard to the dates of shipments, any such action was possible.

"Some of the complaints that have been received show that at least in part the applications are based upon the so-called bunching of cars. The rules already provide for this, and, apart from any specific direction, merchants are entitled to relief when cars are bunched, or, in other words, when cars are being forwarded at the one time in greater numbers than as ordered and unloading facilities permit."

RECONSTRUCTION WILL BE GRADUAL

Minister Expresses Hope That Change Will Be Accomplished Without Serious Hardship

Information received by the Reconstruction and Development Committee of the Cabinet, and the Trade and Commerce Department points to a gradual transition from war conditions of abnormal activity in some lines of production to the normal peace conditions of general industry, said Hon. A. K. Maclean recently. There would not be, he believed, the sudden transition and the sharp dislocation of industry with consequent unemployment and unsettlement that many people seemed to fear.

The Reconstruction and Development Committee of the Cabinet, of which Mr. Maclean is chairman, has conferred with transportation interests, iron and steel companies, shippers and exporters. Trade prospects and requirements have been discussed; labor supply and demand have been considered, and the problems of demobilization and reabsorption of the soldiers have been taken up vigorously. Reviewing recent events, Mr. Maclean concluded that Canada is in a fortunate position to meet the demands for products of the farm, fisheries, forests and mines from devastated European countries and other markets. There are opportunities both in the home and the foreign markets for increased production in Canada which will provide a medium for the absorption in civil life of the returned soldiers and work for those temporarily thrown out of employment by the cessation of the manufacture of munitions and other war materials.

All Must Co-Operate.

"It is not true," he added, "that we shall have the closing up of some munitions industries and other lines of labor employing business which owed existence solely to war conditions. We shall have our soldiers coming home and the men looking for re-employment. The problems ahead though not insuperable are complex and serious and cannot be solved by government agency alone. There must be co-operation on the part of all—by provinces, municipalities, associations and individuals—all continuing to work patriotically and hopefully together to secure for Canada the victories of peace. In an economic sense, the war is still on and there is still need for practical patriotism and for sacrifice for the common good. Employers of labor who, generally speaking, are in sounder financial position now than ever before, owe it to the men in their employ, to their country and to the returning soldiers that labor should be kept in employment to the fullest possible extent. The question of profit and immediate opportunity for profitably changing plants and outputs to meet new conditions should not be the sole factor with them. If all employers will grasp the real needs of the national situation, and the good trade prospects ahead, they will hesitate in suddenly disbanding staffs and cutting down pay lists. Such action would make the solution of our problems increasingly difficult and militate against Canadian industry taking full advantage of the business openings both in the home and the foreign markets.

"The government is prepared, if necessary, to finance in a large way purchases in Canada for consumption abroad under governmental supervision in devastated and commercially disorganized Europe. Every individual can help the government plan for establishing, on broad and permanent lines, Canada's prosperity of peace. A hopeful outlook in business, a common interest in giving employment and in increasing production will be good individual patriotism at the present time, and will bring material profit in the days to come."

NEW HURON AND ERIE BRANCH

The opening, on November 30th, of the new market branch of the Huron and Erie Mortgage Corporation and the Canada Trust Company, London, Ont., which has cost $25,000, makes the passing of another milestone in the progress of that company. The Huron and Erie is older than the Dominion of Canada, having received its charter in 1864. At present it has seven branches, two of which, including the main branch, are in London. The other branches are located at St. Thomas, Windsor, Winnipeg, Regina and Edmonton. Mr. Walter T. Westby will still remain in charge of the market branch. He has been in charge of this branch of the company for many years and is well known by farmers throughout the district.

CANADIAN INVESTORS AND THE FRENCH LOAN

Canadians Invited to Subscribe for Bonds—French Finances in Good Condition

Mr. Henri Ponsot, consul-general of France in Canada, has addressed the following to the consular agents of the French Republic and to all French residents in Canada:—

Dear Fellow Countrymen,—The Fourth National Defence Loan of the French Republic, was offered for subscription while the victorious armies of the allies were sweeping the enemy from the sacred soil of France, and for this reason is called the "Loan of Liberation." Subscriptions have been received in France, and although the complete returns are not yet available, all indications point to a success without precedent.

Financial Achievements of France.

The wonderful achievements of France during the war are better understood when we realize that from August 1st, 1914, to August 31st, 1918, 104 billion francs were secured by the French treasury, of which amount 78.7 billion francs came from France's accumulated savings, and 25.6 billion francs from foreign countries. Of this 78 billion francs, 32 billion francs are represented by perpetual rentes, 27 billion francs by treasury bills and bonds of National Defence and 19 billion francs by loans from the Bank of France and the Bank of Algeria.

The steadily rising rates for French exchange, with the improved market quotations for French securities, indicate that these large credit operations rest on a sound and solid basis, which is, firstly, the industrial development of France, where highly skilled labor is plentiful; secondly, the thrift of its population from laborer to millionaire; and thirdly, the intelligent patriotism of all its citizens, who have unbounded confidence in the future of their country. Mr. Louis Marin, analyzing this new issue before the French Chamber of Deputies, pointed out that the 1917 issue of 4 per cent. French rentes had risen three points above the issue price.

Before the war, France had generously contributed to the development of other countries by investing on a large scale in foreign securities. Since the war it has in turn found unlimited support from its wealthy friends, Great Britain and the United States, who gave credit to the French treasury, the former to the amount of 12 billion francs, and the latter to the amount of 11 billion francs.

Taxation Also Higher.

These figures do not, however, represent the full measure of French financial effort. France has not been satisfied to pledge its future, but the present generation is taking its full share of the financial burden. Although its most flourishing industries and its largest manufacturing centres were in the provinces occupied by the enemy from the early days of the war, when Germany, ignoring its sacred treaty obligations, violated the neutral territory of Belgium to invade France, the normal revenue of the French treasury was raised from four billion 173 million francs in 1914 to more than nine billion francs. The French taxpayer accepted his share of the burden with the same cheerful spirit that animated the French "Poilu." No Frenchman could refuse to contribute his last penny to avenge his dead and to secure a victory which alone could help bear the loss of those he loved. France has armed and equipped 7,700,000 of its citizens, one-fifth of its total population, and from the first day of the war, without faltering, has maintained at the front an army of 3,000,000 soldiers. No mere words can express the depth of my gratitude or the measure of my admiration for the British navy and the British army and for all they have accomplished during this war. Nor shall we Frenchmen forget the timely, generous and effective participation of the Canadian army, whose battalions I have seen myself on the fields of battle, where they have won imperishable glory. I wish to unite the armies of our allies in the homage which I, as a Frenchman, wish to render to our French army, which has been the pivot of the strategical combinations on the western front, which have brought victory and liberty. One million seven hundred thousand Frenchmen gave their lives to their country on the field of battle. No other country can claim the sorrowful honour of having contributed as many martyrs to a sacred cause.

The French nation will find in its deep-rooted love of the land of its ancestors renewed vigor to restore its ancient prosperity. The inexhaustible reserves of our national energy, unknown to many and purposely undervalued by others, will promptly enable us to make good our losses.

The government of the French Republic invites the French residents of Canada to subscribe to the "Loan of Liberation." I fully realize how depleted are our ranks; I know how many left in August, 1914, obeying the irresistible call of patriotism; many others have answered the call to arms since then; nevertheless, let us close our ranks around our flag, answering in the measure of our resources the call of our country.

The Canadian government, through its minister of finance, Sir Thomas White, has been pleased to authorize the sale of these securities in Canada, as soon as subscriptions to the Canadian Victory Loan were completed. I wish to acknowledge, on behalf of France, our appreciation of this generous action. Subscriptions to the French "Loan of Liberation" will be received in Canada until December 14th, and all the Canadian chartered banks were kind enough to place all their branches at the disposal of the French treasury for the reception of subscriptions. At these offices will be found subscription forms with full particulars as to the yield of this 4 per cent. "Perpetual Rente," issued at a price of 70.80 francs per hundred francs of nominal capital, with information as to prospective increment.

You will, I hope, find, that many Canadians are subscribers with you in this loan, following the lead of Sir Thomas White, minister of finance, who has graciously intimated his desire to subscribe to the first bond of this issue offered in Canada. I wish to add that the French treasury has signified its intention of expending the proceeds of all Canadian subscriptions in Canada. It is our earnest desire to maintain and increase the volume of business which war conditions developed between France and the Dominion of Canada. This operation, for the success of which I ask your cordial support, will serve the interests of France, your native land, and those of Canada whose generous hospitality you enjoy and where we are surrounded by the same atmosphere of sympathy, liberty and progress.

ESTIMATE OF QUEBEC PRODUCTION

The Quebec Bureau of Statistics have submitted a report on the cultivated areas, the average yield per acre, the average price per bushel and total value of potatoes, root-plants, hay, silo corn and alfalfa. The notable difference between the seeded areas in 1917 and 1918, is chiefly due to two causes: (1) The greater production campaign undertaken last spring by the department of agriculture; (2) a census of farmers taken in 1917, showing that there were 12,000 more farmers in 1917 than in 1911. These 12,000 farmers did not appear in the estimate of the seeded areas reported in the agricultural statistics for 1917, which were based on the federal census of 1911.

The following gives the 1918 production, compared with that of 1917, the figures for 1917 being entered between parentheses:—

Potatoes.—Seeded area in 1918, 264,871 acres (226,917 acres); yield per acre, 147 bushels (80 bushels); total yield, 38,936,000 bushels (18,158,000 bushels); average price, $0.98 a bushel ($1.38 a bushel); value of crop, $38,157,300 ($25,058,000).

Turnips.—Seeded area in 1918, 95,526 acres (70,192 acres); yield per acre, 295.50 bushels (224.50 bushels); total yield, 28,227,900 bushels (15,759,000 bushels); average price, $0.58 a bushel ($0.59 a bushel); total value of the crop, $14,860,000 ($9,298,000).

Hay and clover—Cultivated area in 1918, 4,533,266 acres (2,961,983 acres); average yield per acre, 1.50 tons (1.75 tons); total yield, 6,799,900 tons (5,065,000 tons); average price, $15.75 a ton ($9.58 a ton); total value of the crop, $107,098,400 ($48,523,000).

Silo Corn.—Cultivated area in 1918, 86,358 acres (69,030 acres); yield per acre, 7.25 tons (8.50 tons); total yield, 626,000 tons (586,800 tons); average price, $7.42 a ton ($5 a ton); total value of the crop, $4,645,700 ($2,934,000).

Alfalfa.—Cultivated area in 1918, 4,144 acres (3,818 acres); yield per acre, 2.25 tons (2.25 tons); total yield, 9,300 tons (8,650 tons); average price, $11.70 a ton ($8.37 a ton); total value of the crop, $109,100 ($72,000).

NEW WORKS BY ALL GOVERNMENTS

Good Roads Association Recommends Building of Highways, to Help Business and Labor Conditions

At a meeting of the board of directors of the Canadian Good Roads Association, held at the headquarters in Montreal, on November 29th, the subject of what might be accomplished in the building of good highways to assist in the reconstruction period was under discussion. The meeting was attended by the president, S. L. Squire, who is also manager of the fisheries branch of the Ontario government; Capt. J. Duchastel de Montrouge, city manager of Outremont; W. Findlay, of Ottawa, president of the Eastern Ontario Good Roads Association; Andrew F. Macallum, city engineer of Ottawa, first vice-president of the association; P. Michaud, deputy minister of roads, Quebec; J. W. Levesque, M.L.A., for Laval; Dr. Desaulniers, M.L.A., for Chambly; A. L. Caron, president of the Automobile Club of Canada, and George A. McNamee, secretary-treasurer of the association.

The association's principal object is educational. In line with their purposes the members recently offered their co-operation to the government in connection with reconstruction, and in furtherance of this offer, after some discussion, the following resolution was adopted at the meeting:—

Resolution Adopted.

"The directors of the Canadian Good Roads' Association have observed with satisfaction the announcement that the building of modern highways will form an important part of the reconstruction programme of the Dominion government, believing as they do that no other public works are more urgently required in connection with the improvement of conditions in agriculture, industry, and of the people generally, or will afford so much labor in proportion to the money cost.

"This association is aware that various provinces already have well organized highways departments, equipped as to personnel with men of engineering and executive ability, and possessing a vast amount of information about the conditions and requirements in their respective provinces.

"Appreciating the efforts of the Dominion government in reconstruction work, and the call which has gone from Ottawa for assistance in such work on the part of all bodies, governmental or otherwise, in the manner in which each is best fitted to assist, and realizing the advantages of avoiding duplication of effort, this board unanimously resolves, as follows:—

"1—To communicate with the governments of the various provinces, respectfully suggesting that they offer to carry out such highway building plans as may be arranged on a basis as to cost between the Dominion and provincial governments to be agreed upon.

"2—To communicate with the government of Canada, pointing out the facts cited above, and respectfully suggesting that the government of Canada favorably consider the advisability of using the best building knowledge and facilities of the provinces by making grants for highways which may be built by the provinces, in consideration of certain expenditures by the provinces themselves; and that the government of Canada call into counsel representatives of the various provinces at the earliest possible date to give effect to so much of this resolution as may be agreeable to it."

The annual convention of the Canadian Good Roads' Association will be held at the end of May, 1919, at Quebec City.

LICENSE FOR NATIONAL BENEFIT COMPANY

A license has been granted to the National Benefit Assurance Company, Limited, under the Insurance Act of 1917, for the transaction of fire insurance business in Canada, with head office in Vancouver. The chief agent and attorney for the company in Canada is Mr. J. T. Summerfield, Vancouver. The company's operations are to be at present confined to British Columbia.

The National Benefit Company was established in 1890. Its head office is National House, Newgate Street, London, England. The company's assets amount to about $8,000,000. There is an authorized capital of $500,000 and the paid-up capital amounts to $54,350.

FORT McMURRAY ASPHALT RESOURCES

A correspondent of The Monetary Times calls attention to the undeveloped asphalt deposits around Fort McMurray, in Northern Alberta. He quotes the following statement regarding their value:—

"The tar sands, which, in California, first attracted the attention of oil men there to their possibilities, never were anything like as big as those outcropping at McMurray. The McMurray tar sands and asphalt beds, which are evidences of oil and the proofs of paving material, have been only casually considered by the majority of Albertans. Few people in Alberta have read the report of the Senate investigation into the resources of the hinterland of Canada, and have gathered from there that there are 50 billion tons of asphalt in the McMurray country; that the exposure of tar sands, more than 100 miles long, is the greatest in the world; the outcrop of tar sands along the Peace and Smoky, and the oil springs in the Wabiscow, indicate a great basin formed by the old Archean floor, which, in scope and potential richness, outrivals anything in Wyoming or Oklahoma.

FRENCH LOAN OF LIBERATION

Subscriptions are being invited in Canada for the new French Loan of Liberation. These are 4 per cent. perpetual "Rentes," and as the principal matures the par value is only nominal. They may, however, be redeemed or converted on or after the first of January, 1944. This issue is authorized by a law of September, 1918, and is free of all present and future French taxes. Coupons are payable quarterly, the first being due on the 16th of January, 1919. Full particulars of the issue are given in the official prospectus.

The purchase of these rentes is really the purchase of a perpetual annuity. The nominal par value is considered twenty-five times the amount of the annual payment so that the interest rate is therefore 4 per cent.; thus a rente of the amount of ten francs per annum represents two hundred and fifty francs of nominal capital. The franc is equivalent to 19.3 cents; so that two hundred and fifty francs would correspond to $48.25.

The subscription price is 70.80 francs per 100 francs of par value, the yield is therefore about 5.65 per cent.

The par of exchange between France and Canada is 5.18 francs to the dollar. Subscriptions for this loan are being received at the rate of 5.35 francs to the dollar, so that the exchange situation works to the advantage of the Canadian subscriber.

CASUALTY INSURANCE MANAGERS

The Casualty Insurance Managers' Association held its annual meeting in Montreal on November 28th. Mr. Charles F. Dale, retiring president, was in the chair.

The following is a list of the names of representatives who were present: Canada Accident Assurance Company, Mr. H. F. Roden; Canadian Surety Company, Mr. W. H. Burgess and Mr. E. J. Walsh; Dominion of Canada Guarantee and Accident Company, Mr. H. W. Falconer; Employers' Liability Assurance Company, Mr. S. G. Reid and Mr. James Allan; Globe Indemnity Company of Canada, Mr. John Emo; Guardian Insurance Company of Canada, Mr. John Good; Imperial Guarantee and Accident Company, Mr. E. Willans; London Guarantee and Accident Company, Mr. Geo. Weir; Law Union and Rock Insurance Company, Mr. W. D. Aiken; Merchants and Employers Guarantee and Accident Company, Mr. A. G. Des Rosiers; Maryland Casualty Company, Mr. F. J. Lightbourne; North American Accident Insurance Company, Mr. C. S. Dale; Norwich Union Insurance Society, F. M. Macdonald; Ocean Accident and Guarantee Corporation, Mr. J. A. Mingay; Railway Passengers Assurance Company, Mr. F. H. Russell; Royal Exchange Assurance Company, Mr. J. A. Jessop; United States Fidelity and Guaranty Company, Mr. A. E. Kirkpatrick; Yorkshire Insurance Company, Mr. W. A. Gray.

Nominations of officers for the coming year were voted on and confirmed as follows: President, Mr. C. W. I. Woodland, of Toronto; Mr. J. C. Gagne, Montreal vice-president and Mr. A. E. Kirkpatrick, Toronto vice-president; Mr. E. Willans, treasurer; Mr. H. G. Humphries, senior secretary, and Mr. T. D. Hutchins, Montreal secretary.

MERCHANTS BANK STATEMENT

A statement of assets and liabilities of the Merchants Bank of Canada, as at 31st October, 1918, is given in full elsewhere in this issue. The Merchants Bank has apparently secured its full share of the increase in savings deposits which took place during the previous year. Savings deposits increased from $70,000,000 to $105,000,000, or by just about 50 per cent. By far the most of this increase took place during the summer of 1918, as the figure at the end of April last was just about $76,000,000. Demand deposits are practically the same as last year, although in April they were higher by about 30 per cent. Circulation has continually increased during the past few months, while balances due to other banks in Canada were substantially larger than a year ago. Balances due to banks in the United Kingdom, etc., have been reduced from a total of over $3,000,000 to a sum which is comparatively insignificant.

In the assets statement it will be noticed that both the deposits in the central gold reserves and the holdings of Dominion notes have increased. The biggest change, however, is in the holdings of public securities, which have almost doubled during the year. Call loans have declined while current loans are substantially in advance of the figure for one year ago.

ONTARIO LOAN ACT REVISION

Various changes, which had been proposed in the Ontario Loan and Trust Companies Act, came up for discussion at a conference between the provincial government and representatives of loan and trust companies on December 5th.

The companies were represented by Mr. Hume Cronyn, president of the Dominion Mortgage and Investment Association, Messrs. I. F. Hellmuth and Beverly Jones, representing the Ontario Land Mortgage Association, John Appleton, secretary of the Dominion Mortgage and Investments Association, and Mr. G. A. Smith, secretary of the Ontario Land Mortgage Association.

Mr. Hume Cronyn, M.P., of London, representing the Dominion Mortgage and Investment Association, said the province was particularly interested in the corporations for whom he was the spokesman, because at the end of last year they showed in deposits $27,000,000, in currency debentures $26,500,000, and in sterling debentures $67,000,000. The trust companies have in guaranteed funds something over $40,000,000. Added to those amounts the smaller items of liability to the public and it was shown that the companies have funds of the public to the extent of $165,000,000.

"We will support every measure which strengthens the position of the companies," said Mr. Cronyn, "but we do question the wisdom of measures which will restrict the progress of the companies. Insofar as this bill will protect the public without retarding our progress we are in sympathy with it."

Mr. I. F. Hellmuth, K.C., representing the Lands Mortgage Companies Corporation, objected to the amendment to the act making it necessary that auditors of loan companies' books should be "chartered accountants." He pointed out that in many places where loan companies have their head offices there are no "chartered accountants." As an alternative he suggested that the various loan companies should give the names of their auditors, many of whom, while not members of the Institute of Chartered Accountants, were qualified for the particular work, and that the government should pass on them. The prime minister, Sir William Hearst, suggested instead that the different companies should nominate their auditors, and that the loan and trust company associations should either approve or reject them. This suggestion was readily assented to by the representatives of the loan companies. Mr. Hellmuth pointed out that the work of chartered accountants did not save the Dominion Permanent Loan Company from going into liquidation.

Both Mr. Hellmuth and Mr. H. M. McDonald, the latter representing the Colonial Investment Company and the Imperial Trust Company, intimated that they believed the section proposed to limit the securities of the companies would be ultra vires, in view of the scope given under the Dominion statutes. The proposed clause to which objection was taken, was one providing that after January 1, 1920, no corporation should "invest money in any one security, or make a total investment in any one corporation including the purchase of its stock or other securities, the lending to it on the security of its debentures, mortgages or other assets or any part thereof, of more than 15 per cent. of its own paid-in capital stock and reserve funds."

DEBENTURES FOR SALE

CITY OF SASKATOON, SASKATCHEWAN

TENDERS FOR DEBENTURES

Tenders are invited on $30,000.00 fifteen-year six per cent. debentures, dated January 1st, 1919, interest payable July 1st and January 1st.

Sealed tenders to be forwarded to the undersigned on or before five p.m. on Monday, the 16th day of December, 1918. Further particulars may be had on application to the City Commissioner.

C. J. YORATH,
City Commissioner.

Saskatoon, November 20th, 1918.

CONDENSED ADVERTISEMENTS

"Positions Wanted," 2c. per word; all other condensed advertisements, 4 c. per word. Minimum charge for any condensed advertisement, 50c. per insertion. All condensed advertisements must conform to usual style. Condensed advertisements, on account of the very low rates charged for them, are payable in advance: 50 per cent extra if charged.

MEAT WORKS AGENCY.—Company Secretary, many years' experience financing, marketing Meatworks products, seeks representation in the United Kingdom of Meat Works Company or Pastoral Financial House. Replies in confidence to Box 823, c/o T. B. Browne's Advertising Offices, 163 Queen Victoria Street, London, E.C., England.

WANTED.—General Agency for Montreal for Fire, Automobile and Casualty insurance by experienced organizer and underwriter. Reply Box 207, *Monetary Times*, Toronto.

NEW BANK HEAD OFFICE

At a dinner of the King Street Association, Toronto, held on Thursday evening, December 6th, Sir Edmund Walker, president of the Canadian Bank of Commerce, intimated that a new head office building for that bank would probably be erected shortly.

TOWN PLANNING CONFERENCE AT HAMILTON

At the third annual Town Planning Conference of South-Western Ontario on December 2 and 3, held at the Royal Connaught Hotel, Hamilton, many important matters were discussed.

On the first day addresses were given as follows: "Municipal Finance," by Dr. Horace L. Brittain, managing director of Bureau of Municipal Research, Toronto; "Rural Housing," by Prof. C. B. Sissons, Toronto. Speakers on the subject "Municipal Government, Reconstruction and Housing," were: S. Baker, city clerk, London; Sir John Willison, Toronto, chairman Ontario Housing Committee; Noulon Cauchon, railway engineer, Ottawa. Open discussion by registered delegates followed. Speakers limited to five minutes.

At 6.15 p.m. a "Reconstruction Dinner" was given. Addresses by: Thomas Adams, town planning adviser, Ottawa; Hon. W. D. McPherson, M.P.P., provincial secretary, Toronto.

The second day of the conference opened at 9.30 a.m. Speakers on the subject "Housing: Urban and Rural," were: Thomas Adams, Ottawa; Louie Blake Duff, industrial commissioner, Welland; representative Windsor Board of Trade; Mrs. Dr. S. Lyle, president Women's Council of Hamilton. Open discussion by delegates followed.

Luncheon arranged through the Hamilton Board of Trade was given at 12.15. Addresses upon "Town Planning in Relation to Housing and Land Taxation" were given by Lawrence Veiller, secretary and director of National Housing Association, New York City, and Noulon Cauchon, Ottawa.

GOVERNMENT TO PRIVATE OWNERSHIP

A transportation problem of great difficulty is awaiting solution in the United States, according to the Bache Review, of New York. The nation is hovering between government and private operation. Discussing the possible effects of handing the roads back to the shareholders, the review says:—

"It would not be so much the physical operation which would be endangered (although that would be subject to considerable shock and confusion) as the financial status of railroad securities, both during the uncertain times of transition as well as afterward in operation, with wages high, rates again depending upon the Interstate Commerce Commission, and materials purchased at war prices loaded upon the separated lines.

"This might mean bankruptcy for many of the smaller lines, especially as railroad credit is so much now a matter of most careful discrimination, on the part of investors, and has been practically destroyed for a large number of the roads.

"It is probably true that the roads which had good credit before the government took them over have not lost this during the period since. But the trend of other lines before they were rescued by fixed interest and dividends guaranteed by the government, was decidedly toward bankruptcy.

"To lift them back bodily into the pool of distress into which the Interstate Commerce Commission had plunged them and kept them immersed for years would be most disturbing—not only to the holders of their securities, but to the whole business world, because the financial disasters of railroads create an unfavorable and widespread influence upon all industry.

"It becomes extremely important, then, to evolve some plan, if possible, which shall combine the benefits of the present method of control with the advantages which private control has in tending to curb political interference with its liability to encourage inefficient service."

Montreal, 2nd December, 1918

BUILDERS FORM PERMANENT ORGANIZATION

Representatives of the building industry throughout Canada assembled at Ottawa for a three-day conference on November 26th, 27th and 28th.

To ensure co-operation in stabilizing the building industries throughout the country, a permanent association was formed, known as the Canadian Association of Building Industries, with J. P. Anglin, of Montreal, as president. It was decided to divide the association into three parts, one to be comprised of general contractors and builders, one of sub-contractors and trade contractors, and one of building material contractors. Committees were appointed on the first day to deal with roads, housing, public works and every other phase of construction. "It is not generally known," said Mr. Anglin, "that the building industries form the second largest employer of labor in this country. Agriculture comes first. In the allied building trades, therefore, is vested a great responsibility for the welfare of a large portion of our population. That is the reason for this three-day conference."

RAILROAD EARNINGS

The following are the earnings of Canada's transcontinental railways for the month of November:—

Canadian Pacific Railway.

	1917.	1918.	Inc. or dec.
Nov. 7	$3,204,000	$3,437,000	+ $233,000

"THE DAWN OF A TO-MORROW"

The war having ended so happily it is believed that a better world will rise out of the ruin—More of beneficence, equality, fraternity and sympathy with "The Other Fellow" will prevail in the great "To-morrow" that is dawning. Life insurance embodies these great conceptions and will be one of the big movements that "Will Come Into Its Own." Now is the time to make Life Insurance your life work. The war has given the institution of Life Insurance a great impulse and it is appreciated to-day as never before. It is a calling for men of the highest abilities and the finest character. Sell Life Insurance, and sell Mutual Life Insurance for the Mutual system is popular because it is based upon strictly democratic principles. If not as an agent then as a member you will be welcomed into our organization.

DAIRYING INDUSTRY NATIONALLY ORGANIZED

Four-Day Conference of Representatives From All Parts of Dominion Results in Permanent Body Being Formed

The four-day session of dairying representatives, held in Ottawa, concluded on Thursday, November 28th, with the formation of a National Council. The delegates comprised the dairy representatives of Provincial Agricultural Departments, the nominees of the dairy and creamery associations throughout the country, of the associations of breeders of dairy cattle, of the milk distributors, condensaries and other commercial organizations, together with the agricultural press. Mr. J. A. Ruddick, Dominion Dairy and Cold Storage Commissioner, occupied the chair.

In welcoming the delegates on Monday, November 25th, on behalf of the Minister of Agriculture, Dr. J. H. Grisdale, the acting deputy, pointed out the economic importance of placing dairying, which represented the largest single agricultural interest, on such a footing as would insure its status being maintained and advanced during the period of reconstruction upon which the country was now entering. He regarded it as vital to the country's well-being that the dairy interests should be safeguarded and promoted in every possible way, and said that the conference had been called to consider means to that end.

Legal Standards Discussed.

Dr. A. McGill, Dominion Analyst, and Chairman of the Standards Board under the Adulteration Act, dealt with the legal standards of quality for dairy products, followed by Dr. F. T. Schutt, Dominion Chemist of the Central Experimental Farm. The Dominion standards for milk, cream, homogenized milk and cream, ice cream, condensed milk, butter and cheese, were explained and discussed, and a committee was appointed to formulate resolutions on the subject for adoption at a future session of the conference.

On Tuesday the delegates took up the question of the grading of Canadian dairy products in relation to the requirements of domestic and foreign markets. The systems of grading and marketing adopted in various provinces were discussed. The Dairy Commissioner for Alberta, Mr. C. Marker, outlined the procedure followed by the grading and marketing service in that province. Mr. E. Borbeau, general cheese inspector, spoke for the province of Quebec. The ensuing discussion on the relationship of grading to successful marketing was taken part in by S. A. Trudell, manager of the Agricultural Co-operative Society of Montreal; P. W. McLagan, manager of Messrs. Lovell and Christmas, produce merchants, Montreal; J. H. Scott, official butter-grader for Ontario, and others. Several of the speakers emphasized the necessity for a uniform Canadian system of grading, naming and weighing in promoting export trade.

The question of the formation of a Dominion-wide organization, which should represent and unite the interests of Canadian dairying, was introduced by L. A. Zufelt, superintendent of dairying in Eastern Ontario. It was the opinion of the delegates that the personnel of such an organization should represent all phases of the dairy business, inclusive of representatives of departments of agriculture.

Revised Federal standards for dairy products were adopted on Wednesday, and the recommendation was made that the same be recognized and adopted by all municipalities engaged in food inspection work.

A resolution was presented by Mr. H. H. Dean, Professor of Dairy Husbandry at the Ontario Agricultural College, recommending the introduction of the process of pasteurization in all Canadian creameries. Pasteurization, he said, was the first requisite in the manufacture of butter of uniform grade, free from objectionable flavors and of long-keeping quality. It was the secret of Danish success and universally employed in New Zealand. Before Canada could hope to attain first rank as a butter producer, the general adoption of pasteurization was essential.

Dr. F. Torrance, Veterinary Director-General, dealt with the necessity for the pasteurization of dairy products, pointing out that the milk from tuberculous cows constituted the main source of infection of tuberculosis in hogs. He estimated that the loss to Canada was more than a million dollars annually, and was gradually increasing.

A resolution was adopted calling for legislation necessary to make compulsory the sterilization of skim milk and whey.

Dairy Research Division.

The chairman, Mr. J. A. Ruddick, Canadian Dairy Commissioner, announced the intention of the Federal Department of Agriculture to organize a Dairy Research Division, which should investigate the scientific problems constantly arising in the manufacture of dairy products.

The basis of organization of the National Dairy Council was decided upon. It was agreed that the council should be composed of two representatives from each province, and that they add to their number as follows: Four cheese manufacturers, three butter manufacturers, three milk distributors, three milk and cream producers, two ice cream manufacturers and one condensary representative. From the above, numbering thirty-four in all, eastern and western executives should be selected.

At the final meeting of the Dominion Dairy Conference resolutions were adopted dealing with the following subjects: The improvement of dairy herds, oleomargarine, payment for milk on butter fat content, investigation of British market requirements; procedure in taking milk samples; scale of points and grading certificates for cheese and butter.

National Dairy Council.

The following were named by the delegates to the conference as representatives of the respective provinces on the National Council:—

British Columbia—E. W. Clark, S. H. Shannon.
Alberta—E. T. Love, P. Palleson.
Saskatchewan—O. W. Anderson, H. Salmon.
Manitoba—W. J. Cummings, Alex. McKay.
Ontario—E. H. Stonehouse, MacRobertson.
Quebec—Jas. Winter, J. B. Vincent.
New Brunswick—P. Simmonds, W. H. Huggard.
Nova Scotia—H. Faulconer, D. W. Murray.
Prince Edward Island—J. W. Jones, J. T. Profitt.

Representatives of the various branches of the dairy industry were appointed as follows:—

Cheese—J. P. Cox, Quebec; F. Boyes, Ontario; W. Olmstead, Ontario; W. W. Brevey, Alberta.

Butter—J. Pare, Quebec; W. G. Wedd, Ontario; W. A. Wilson, Saskatchewan.

Milk distributors—J. J. Joubert, Quebec; J. Bingham, Ontario; J. M. Carruthers, Manitoba.

Milk and cream producers—A. P. Hillhouse, Quebec; R. G. Leggett, Ontario; J. W. Berry, British Columbia.

Ice cream—J. W. Carlyle, Alberta; W. J. Foaster, Ontario.

Condensaries—Representative to be named.

Officers of Council.

The council elected the following officers:—President, E. H. Stonehouse, Weston; vice-president, A. M. MacKay, Winnipeg. Eastern executive: E. H. Stonehouse, F. Boyes, Dorchester, Ont.; J. Pare, Coaticook, P.Q.; J. Bingham, Ottawa; J. Walter Jones, Prince Edward Island. Western executive: A. M. MacKay, Manitoba; P. Palleson, Calgary; J. W. Berry, British Columbia; O. W. Anderson, Saskatchewan. Secretary, pro tem, G. A. Putman.

The conference passed a resolution thanking the Minister of Agriculture for calling the dairymen of Canada together at the present opportune time.

WAR SAVINGS STAMP CAMPAIGN

The personnel of the National War Savings Committee has been announced by the minister of finance. Sir Herbert Ames has been appointed chairman of the committee. With him will be associated 15 members, representing every province in the Dominion. The following are the names of the members of the committee as officially given out:—

Sir Herbert Ames, chairman; Campbell Sweeny, Vancouver; H. W. Wood, Calgary; Hon. Geo. A. Bell, Regina; John Galt, Winnipeg; Geo. M. Reid, London; Sir Geo. Burn, Ottawa; Rene T. Leclerc, Montreal; W. M. Birks, Montreal; Hon. Cyrille Delage, Quebec; Sir Douglas Hazen, St. John, N.B.; W. A. Black, Halifax; Hon. Murdock WcKinnon, Charlottetown, P.E.I.; Thomas Moore, president Trades and Labor Congress of Canada, Ottawa; and Dr. J. H. Putnam, secretary-treasurer Dominion Educational Association, Ottawa. The sixteenth, representing Central Ontario, has not yet been appointed.

It is understood that the minister of finance will invite the members of the committee to meet in Ottawa shortly, when the war savings stamp campaign recently announced will be fully discussed and plans formulated.

Canadian Industry and Western Agriculture

Joint Growth of Agriculture and Manufactures is Quite Feasible—Our Need for More Population, and the Possibility of Getting it—Relative War Burdens—Soldier Settlements in the West—Treatment of Uncultivated Agricultural Lands

By W. W. SWANSON

WHATEVER one's predilections may be in politics, all who are informed with respect to the facts must have the conviction that in the Hon. James Calder Canada has found an able, aggressive and brilliant director of the Department of Colonization and Immigration. Some may believe that there is room for a difference of opinion as to whether Canada may expect, after the signing of peace, the pre-war volume of immigration again to develop. To Mr. Calder the problem may present difficulties, but no doubts whatsoever. Those who have recently heard him in the West, have caught something of his enthusiasm and have been steeled by his resolution, to work together with the rest of the country in making Canada a land of opportunity after the war. In discussing the problems of reconstruction a week or two since in Regina, Saskatoon and other Western cities, Mr. Calder, among other things, said:

"The biggest job which Canada must accomplish within the next ten years is to get people into the country to develop the wonderful natural resources which are ours. Taxes are bound to be heavier after this war; and unless we develop our natural resources and secure new settlers to carry part of the burden, people will be moving out, instead of coming in. Do not think we are facing bankruptcy—for we are not. Do not imagine that the burdens of the future will be so staggering that we will be unable to bear them. At the same time we are confronted with the vital necessity of developing our natural resources if the country is to achieve permanent prosperity."

We are well aware that some clear-headed observers are inclined to believe that the war burden will deflect prospective settlers from Canada to the Argentine and other South American countries. Let it not be forgotten, however, that national debts, however large in sum total they may appear, are really light or heavy according to ability to pay—according to the capacity of the average citizen to carry his share of the burden. The Dominion in proportion to population has a magnificent economic equipment as well as marvellous natural resources. In large measure the securing of population after the war depends upon the degree to which this equipment and the nation's resources are put to productive use, and the level of living thereby achieved by the people. Notwithstanding heavy taxes and the burden of the war debt, we venture to say that the average Canadian family never, in the course of the country's history, has enjoyed greater prosperity nor a higher level of well-being than right here and now. The forebodings of pessimists, therefore, need not and should not obscure the main issue. If Canada is made a prosperous country, if its democratic ideals are safeguarded, the tide of immigration will once more sweep toward our shores. This does not lose sight of the fact, moreover, that European nations will make strenuous efforts to keep their nationals at home, in view of the heavy disabilities imposed upon them by this destructive war.

Mr. Calder further stated that it was his conviction that the Dominion can sustain in comfort, and with a high standard of living, at least 50,000,000 persons, instead of the present population of somewhat less than eight million. To be sure, there are whole brigades of doubters in the country who pose the question as to where this increase of population is to be secured. The losses in Europe occasioned by the war are indeed sufficient "to stagger humanity." Nevertheless, even accepting the estimates of dead and wounded as running between twenty or twenty-five millions, they are comparatively insignificant in contrast with the huge natural increase of population in Eastern, South-eastern and Southern Europe, from year to year. The population of European Russia alone, before the war, increased at the rate of 3,000,000 per annum; while swarms of men and women left Italy, Galacia, Poland and the Balkans owing to overcrowded conditions in these countries. Since the Napoleonic period the population of Europe has more than doubled, standing at 450,000,000 at the outbreak of hostilities. Add to that the pressure of population upon the available land supply in the United States, and one may not need to become unduly pessimistic concerning the immigration outlook, in the immediate future, for Canada. All this despite the fact that for two or three years labor will probably find full employment in reconstruction in Europe.

When all is said and done, natural resources as well as population considered, the taxation problem should not be nearly as difficult in Canada as in the Old World. Few appear to realize that up to the beginning of August, 1918, the United Kingdom's war credits stood at the amazing total of over $40,000,000,000, with proportionate debts in every belligerent country on the Continent. True, Great Britain can face its responsibilities with courage and with the assurance that the nation, in view of its enormous financial strength and world-wide trade and possessions, can measure up to every test imposed upon it. Aside from France, the same can hardly be said of the other countries of Europe. Sooner or later their peoples will seek new opportunities and the chance to secure land and other property in their own right, in the New World. And as has been said, the land-hungry in the United States, precluded from ownership by prevailing high prices, will turn their steps toward Canada—the last Great West.

Considering the problem in its national aspects, it is a matter of congratulation that Eastern manufacturers and Western farmers are beginning to find common ground. Mr. Parsons' suggestion that a conference between manufacturers and farmers should take the place of mutual recriminations, is thoroughly sound. Western agricultural leaders have met him more than half-way. Recently Mr. H. W. Wood announced in the Calgary "Albertan" that there was absolutely no reason as to why manufacturing, trade and commerce, on the one hand, and agriculture on the other, should not flourish side by side. The West will be one of the biggest and most profitable markets for Eastern manufacturers in the future; and it therefore behoves them to make that market worth while by making farming worth while. We are inclined to believe with Mr. Wood that nothing is to be gained by shelving our problems for post-war discussion. The tariff and other problems are there; and must be solved by conference, negotiation, fair-dealing and goodwill.

Railway Expansion Not Wholly Bad

It is imperatively essential that Western Canada in particular augment its population after the war. As Mr. Calder has stated, the railway and other equipment in the West is sufficient to serve the needs of a much greater population than at present exists. Contrary to general opinion—at least such opinion as was most in evidence in the days immediately preceding the war—Canada has made no fatal mistake in building railroads beyond immediate requirements. There was no other choice than that between economic stagnation and industrial expansion. Mistakes were made, perhaps, in the duplication of certain lines; but on the whole the war has demonstrated that, in a war crisis at least, the country's railroad equipment was not over extensive. More than that, the railroads were built as colonizing instruments: in a very real sense they were designed both to create, and profit from their own markets. The depression that set in in the year or two immediately prior to the war was occasioned rather by real estate speculation and plunging in financial promotions than by railway building. But for this unfortunate circumstance both the Canadian Northern and the Grand Trunk Pacific might well have been a financial success. However, the past is not our concern, but the future.

All are agreed that the West must receive a great increase in its population if the economic equipment of the country is to be rendered profitable. Good resolutions, however, amount to nothing: the wish-bone cannot take the place of the back-bone. Mr. Calder is determined not to let the matter rest with good resolutions alone, but to back them up with decisive action. His conviction that it is essential to do as much for the country as was done, before the war, for the cities and towns, is sane and sound. To attract population to the land, farming must be made profitable. As Eastern centres will be confronted with the difficulty of providing work for present munition-makers in the post-bellum period, so the West will be faced with the problem of maintaining the present high level of social and economic well-being for agricultural workers. This raises questions both of production and distribution which will be dealt with in a later article. The immediate problem is to place more settlers upon the land. And a vital aspect of that undertaking is to find the promised land for returning and returned soldiers

Much Land Still Remains

The Land Settlement Board appears to be confronted with insurmountable obstacles in its search for homestead land, within a reasonable distance from railways, in the West. At the same time enormous tracts of fertile and arable lands are being held idle, in desirable districts, by speculators, the Hudson's Bay Company, and the railroads. All this land is available, in millions of acres,—at a price. It is the price difficulty that raises the problem. It will not do to say that the problem is simple and that the remedy lies at hand in confiscation. That may do in Russia where Bolshevist ideals, and economic justice, appear to coincide. Practically nothing in the way of confiscation is heard of in the West. It is a far cry from feudalistic, reactionary landlordism in Russia to the commercialism that characterizes land-holding in Western Canada. For the most part, the contracts with the railroads and the big corporations in the Canadian West where the outcome of negotiations between the Government and the companies are concerned—negotiations which the average citizen thought, at the time they were carried on, gave the big end of the deal to the people. It was a trite enough saying in the early eighties that the C.P.R. "would not earn enought to cover axle grease." The railroads made a big gamble—and won. Confiscation, therefore, is not to be thought of. Canada is not Russia; neither have Canadians sunk to the level of Helots.

Taxation is not Complete Remedy

Much is heard of what some regard as the only alternative: the taxing of idle lands, now held out of cultivation for speculative purposes, into productive use. But already, the Western provinces levy a surtax upon speculative lands and it has not driven them into cultivation; neither can it do so unless the tax is made heavy enough to confiscate for the use of the State the entire surplus of value. If the entire product of land, in the value sense, whether that land is productively employed or not, is appropriated by the State, the right of private ownership —although not of possession—becomes worthless. It is evident, however, that taxation driven to such extreme limits is virtually equivalent to confiscation.

If, instead of taking the entire economic rent of land, a relatively heavier tax is laid upon land than upon other property, in the attempt to drive it into productive use, great social transformations will be effected. What happened to the New England States, in that event, may well be repeated in the Canadian West. The general property tax in the New England States virtually became a land tax; since land could not be concealed, while intangible wealth in the shape of stocks and bonds could be hidden away. The result was that the burden proved too great for the farming community. The bankrupt who set fire to his property and thus sold out to a fire insurance company, taught the farmer the only method to follow. He "skinned" the land, denuded it of its fertility, neglected its upkeep, and withdrew his capital to where it secured more profitable returns. There being less land in cultivation, the prices of farm products rose in the Eastern States. This merely meant, in the long run, that the heavy tax upon land was finally shifted to the consumer. Land can carry its fair share of taxation, but not the entire burden. To be sure, the conditions of the problem are changed for the farmer if the tariff and all other forms of taxation are abolished. But under present conditions a heavy tax upon land in the attempt to break up large holdings, may not bring the exact results expected.

Soldiers' Settlement

It strikes us that the only solution of the land problem, and thus of the soldiers' problem, and the problem of immigration in the West, is to be found not in the confiscation of land, or in the placing of a permanent tax upon the economic rent of land, by the State, but in the gradual purchase at a fair market value of all lands held out of use for actual settlers. Even if this land is bought at as high a price as $30 per acre, the payment if the interest and principal according to some amortization plan will lay a much lighter burden upon the settler than is carried at present by tenant farmers in Iowa, Kansas and other States in the Union. A rental payment that would bring with it ownership, in twenty or thirty years, should prove most attractive to newcomers from both the United States and Europe.

As far as our soldiers are concerned, it would appear that, instead of giving them homesteads in the back districts far removed from railroads and markets, with a loan of $2,500, it would be more equitable to put them in possession of land in good districts and in areas already fairly well settled. Instead if presenting them with land, some part of the $2,500 might be given in lieu thereof, leaving the balance to be paid on an amortization basis. The land would thus be brought into productive use; the men who have earned the right given an opportunity in life; and the national burden be eased by real wealth creation. As is well known, both Victoria and New South Wales have carried through similar projects with conspicuous success, and the problem should not be too difficult for Canadian statesmen to solve. Conditions, of course, are different in new Ontario where the question is one to be attacked by the provincial government itself.

It may be said, in conclusion, that we are convinced that half the cost of bringing the land under cultivation can be cut away under a community settlement scheme, whereby co-operation will take the place of individual effort. Here again the several Australian States have afforded proof of the wonderful results that may be achieved by united effort. Under competent supervision and management, houses, barns and outbuildings may be constructed, wells sunk and equipment secured at from 20 to 50 per cent. less than the cost to the individual undertaking this work alone. Here the provincial universities would prove of supreme value. Their engineering, animal, and field husbandry departments could render conspicuous service in securing worth-while results. It may be said that already Dean Rutherford of the University of Saskatchewan has done much in this direction, by making expert direction count in the agricultural life of the province. Under a comprehensive land settlement scheme the agricultural departments of the provincial universities would acquire new significance and value.

LETTER TO THE EDITOR

Editor, The Monetary Times.

Sir,—It has been said, "We cannot hate the man we know," but I think this truth has a different meaning in some respects now that we have been through a great war against people we did not know, but now do know, for barbarous ruffians who have no spiritual life or thought; who regard women and sacred things as mere chattel; who look upon life in the most selfish of manners; who looked upon material success and national aggrandizement at the expense of others, as the highest ideal in personal and national life. However, the allies have taught them that the idea that "Might is Right" was all wrong, and in its place have raised all over the world the banner we have always followed and will now be followed in very increasing numbers that "Justice is Right."

Lethbridge, a remote part of Canada, that wonderful and loyal part of the Great British Commonwealth (I like that term better than Empire, because it sounds truer and represents what we really are, a "government of the people," etc., etc.), has much reason to be proud of the great part it played in the Great War. We sent over 10 per cent. of our population—our best, strongest, and manly boys—to help prove that justice is right. Now some lie for ever "where poppies grow in Flanders Fields," revered, respected and glorified in the hearts of the people of Lethbridge. Some will return, battered and worn as never men were battered and worn before, weary with, and of, war. Others will return whole and hearty after having faced the enemy with undaunted courage, held the gap that tried the souls of men and made them great.

To all of these the city, the province and the Dominion are under a full measure of obligation. What is that measure? Simply a chance to have a decent living untainted by charity. They expect this—nothing more and nothing less.

This city is prepared to do its best; its powers for direct action are very limited, but its government and citizens can do a lot towards stimulating and helping the other governments in all the schemes that can be devised, that bear the possibility of success. This they will do whole-heartedly.

From all over the country plans and schemes will be provided and perhaps pushed with vigor as a solution of the return of the soldiers to civil life. But we must lay ourselves out to discover real means and not chimerical schemes.

The best plan to accomplish this, in my judgment, is to follow faithfully the lead that is set by the men whom the government at Ottawa have charged with this responsibility, until we find they are falling down, if such is possible, in the labor they undertook. Good advice will surely always be acceptable to them, and the proper presentation of every local scheme of merit would be good and helpful advice. This city, through its board of trade and other public bodies, is giving some of this good advice which it is hoped will be grasped in its true meaning and worth. These embrace irrigation schemes, water finding schemes, transportation and grain storage. What better plan can be devised to take care of the returned soldiers and replace them in civil life than these that make the country prosperous?

However, it may not be amiss to say that too rapid demobilization might be a very wrong course that may lead to Bolshevikism to an undesirable extent. The soldiers deserve proper treatment, and if they do not get it they will simply do things. The government should keep the men in the army and in uniform, not necessarily cooped up in barracks or under rigid discipline, with all his present emoluments until he can be placed in a position to earn a living. The government could soon accomplish this by spending enough money, which it can have from the over-subscribed Victory Loan, on all kinds of works that would make for prosperity in the country. Two years would see every soldier in his little nook well satisfied and happy.

Yours, etc.,
F. D. L. Hardie, Mayor.

Lethbridge, Alta.

PAYMENT OF SASKATOON COUPONS

The city of Saskatoon has arranged that its interest coupons due 1st January, 1919, will be met at the Bank of Montreal in Toronto or Montreal instead of at the Union Bank in these cities.

PROBLEM OF THE TAX RATE

Dr. Horace L. Brittain Tells Toronto Board of Trade How it Can be Kept Down

"The Tax Rate and its Cousins," was the subject of an address delivered on December 12th, to members of the Toronto Board of Trade by Dr. Horace L. Brittain, director of the Bureau of Municipal Research.

Dr. Brittain stated that the prosperity of Toronto as a commercial, industrial and residential city depends upon its ability to compete with other centres. Its ability to compete depends, among other factors, on the tax-rate, the fire burden, the cost-of-sickness rate, the labor-turnover rate and the philanthropy-charity rate.

First of all he pointed out "how to increase the tax rate by reducing it." He instanced these methods as follows:—

By pretending that some of this year's expenditures belong to other years; by pretending that we have more revenue other than taxation than we really have; by pretending that we are going to spend less than we know we really must spend.

To reduce the tax-rate by increasing it, he instanced as follows: By leaning backwards in classifying expenditures as capital or current, even at the risk of paying this year for some things which might properly be charged against next year; by making promptly all expenditures necessary to prevent deterioration of plant; by substituting the surplus habit for the deficit habit; by including a contingent fund in the budget to be drawn upon only with the consent of the commissioner of finance.

The Only Sure Road.

From 1907 to 1914 the city rate varied from 17½ mills to 18½ mills and invariably it was the case that the rate did not meet the requirements of the city. From 1914 onward the result was different. Dr. Brittain asked: "The deficits ceased in 1914. At the same time the tax rate went up If the tax rate had not gone up and, as a result, deficits had continued and accumulated, how long would it have been possible to postpone settlement, and what would have been the resulting tax rate? Increasesd assessment was not a sure remedy for a high tax rate, and no remedy at all for abnormally high expenditures," he said.

"There is no royal road to a reduced tax rate," he continued. "The only sure roads are: Decreased per capita expenditures, increased revenues from sources other than taxation, increased production and commerce."

He gave the following methods of decreasing the per capita expenditures: By paying your own bills only, and not those of the Dominion government or others; by doing all necessary or revenue-producing work when it should be done; by not doing unnecessary work at all; by establishing centralized purchasing, centralized accounting, centralized budget-making, centralized civil service control under an administrative board made up of department heads; by planning for the year's expenditure before and not after the year begins; by charging the cost of improvements to those directly benefited by them; by eliminating deficits of so-called revenue-producing units; by starting or maintaining only such publicly-owned utilities as can be made to pay their way in dollars and cents for services rendered to citizens.

Increased Revenue.

Revenues could be increased by having publicly-owned utilities charge cost price for services, and by taxing all taxable incomes. He noted that the council had increased the water rates this year, but did not increase the fares on the civic car lines.

The fire loss had been estimated at 2.3 mills on the assessment in 1917, and the cost of sickness and death in a year at $5,648,900 or 9.1 mills. One-third of all illness was preventable. The labor-turnover rate was equivalent to a high tax on manufacturing and business. A federation for community service was also a necessity.

Dr. Brittain concluded by advising that all voters should vote, but that he cannot protect his interests or discharge his duties by being a citizen for half an hour on January 1st. Other cities had formed a Voters' League, a good means of getting out candidates.

Milestone, Sask., and vicinity produced two large subscriptions to the Victory Loan. These were by Mr E. P. Kalns and James Glenn for $10,000 and $11,000 respectively.

WAR SAVINGS CONFERENCE

The conference of the members of the National War Savings Committee, who are conferring with Sir Thomas White on the War Savings Stamp campaign, opened in the Chateau Laurier, Ottawa, on December 10th, Sir Herbert Ames, chairman of the committee, presided. Representatives were present from every province but Prince Edward Island. Addresses by Sir Thomas White and Pierre Jay, representative of the United States Treasury, were the chief features of the session.

The following were in attendance: Hon. Cyrille Delage, Quebec; Campbell Sweeney, Vancouver; H. A. Allison, Calgary; John Blue, Edmonton; Hon. G. A. Bell, Regina; R. K. Scarlett, Regina; John Galt, Winnipeg; Bruce Campbell, Winnipeg; G. M. Reid, London; Major Ingram, London; Wm. Birks, Montreal; D. McGowan, Montreal; P. De Martigny, Montreal; W. A. Black, Halifax; Capt. Bell, Halifax; J. E. McPherson, Ottawa; Dr. Putnam, Ottawa; Sir George Burn, Ottawa; Capt. J. H. Code, Ottawa. G. W. Jones was acting as recording secretary.

INTERCOLONIAL RAILWAY IN GOOD CONDITION

Mr. D. B. Hanna, president of the Canadian Government Railway Board, returned to the Windsor Hotel on December 8th, accompanied by his fellow-directors and the high officials who had been over the system in the Lower Provinces and Prince Edward Island. Mr. Hanna, who has been connected with the Canadian Northern Railway since the first train started from Portage la Prairie for Gladstone, some twenty-two years ago, while speaking of the Lower Province trip said that a good number of the directors had not been over the Intercolonial Railway, and the trip of inspection was considered necessary to some of the party before being in a position to discuss in a practical manner the many questions coming before them. They found the road-bed in splendid condition, the trains running on good time, and considered the earning powers of the road, and the outlook generally, exceedingly promising. In Prince Edward Island he said the gauge was being changed from 3 feet 6 inches to the standard, this being accomplished by the laying of an additional rail. The party also visited the new terminals at Halifax and expressed the opinion that they will meet the requirements of the system for many years to come.

YIELDS ON INVESTMENTS IN STOCKS AND BONDS

The following table of investment yields of stocks and bonds has been compiled for *The Monetary Times* by Messrs. Morrow & Jellett, Members Toronto Stock Exchange, 103 Bay Street Toronto —

December 11th, 1918.

	Div. Rate	Price about	Yield about
Preferred			
Canadian Locomotive	7	90	7.77

GOLD AND THE NATIONAL DEBT

That all unsound ideas regarding the function of gold have not been dispelled may seem a platitude but according to statements frequently made there are some so obviously uncorrect that the popular conception of the subject is badly in need of revision. A well informed mining man has said recently "if conditions under which operations are carried on are improved, I look for the inauguration in Northern Ontario of the greatest period of gold-mining that has ever been experienced in that part of the country. The fact that the Dominion has issued bonds to the extent of considerably over one billion dollars makes it imperative that something should be done to increase the output of the yellow metal in this province."

By improved conditions he referred, of course, to a bonus to the gold-mining industry. The agitation for support of this kind from the public purse has not yet ceased. The argument drawn from the national debt, however, is quite a new one; it is, however, one of the most ineffective arguments which have been made use of in support of the agitation. The immense borrowings of the Dominion have been made with very little transfer of gold, but rather of credit, and the reversed process will be carried out in a similar way.

The former arguments for a bonus for gold-mining were stated in a somewhat broader fashion. It was pointed out that gold-mining is an essential industry and that it had been recognized as such by the War Industries Board of the United States. Owing to the fixity of the value of this product. the recent increasing production costs had made it practically impossible to produce in most cases, and, therefore, the government should come to the support of the industry. Gold, it was pointed out, is essential in the liquidation of foreign obligations and in maintaining the basis for credit both domestic and foreign.

Obligations, however, both foreign and domestic, are not ordinarily met by payment of gold, but rather by transfer of credit. This is the way in which our war loans have been raised and they will be repaid in a similar fashion. All that is necessary is that there should be a certain quantity of gold as a basis for credit transactions. Gold is not a commodity which must be produced each year and it is conceivable that production might cease entirely without seriously affecting the financial situation. The restriction in credit, however, which would result, and the consequence in prices, would very soon make gold-mining again a profitable undertaking and the supply would automatically adjust itself. To artificially support gold-mining at the present time by means of a public bonus, would be aggravated still further by the rise in prices which is the principal difficulty against which gold-mining companies are contending.

DISTRIBUTION OF BANK FUNDS

An intelligent criticism of the banking system of Canada was recently voiced by Mr. N. S. Cornell, of Port Stanley, Ontario. This was at the opening session of the Elgin County Council of which Mr. Cornell is warden. After referring to the concentration of wealth in Canada in the hands of large corporations, Mr. Cornell referred more especially to the banks, as follows:—

"These banks have branches in almost every village and hamlet throughout the country, and, like an octopus, whose tentacles reach out sucking the strength from whatever living object they come in contact with, these branches withdraw the money from the smaller town, where it has been deposited, taking it to their offices in the cities for the use of large industrial concerns, which they help to build up. There is a marked difference in the charters issued by the United States Government, which permit the loaning of money by the banks only in the communities where it was deposited.

"Instead of increasing the surplus of those who are already rich, we should look to providing for the less fortunate, and, above all, be sure that we are generous and just when the soldiers return battered and scarred from the battlefields of Europe."

If the view taken by Mr. Cornell were carried out, it would mean the least possible distribution of funds. This is just what the United States sought to avoid when it inaugurated the Federal Reserve System. The United States banks had been, in contrast to those of Canada, local institutions, and the difficulty had always been to bring about a proper transfer of funds from one part of the country to another to meet seasonal and other changes. In Canada this has been comparatively easy because of the fact that our banks are large institutions doing business in all parts of the country. In the United States money rates would be exceedingly low in the wealthy New England States, while in the states of the growing west, they would be exorbitantly high. The growth of the Canadian west has been relatively almost as rapid and yet we have not experienced as great a difference between money-rates in east and west as took place in the United States. The result has been that eastern funds have found a profitable use in the west, whereas, in the United States they were forced to seek investment in the older sections where opportunities were not as good. The effect was, therefore, to bring about a forced development of resources in wealthy communities, while those in new sections of the country went begging. This feature of the Canadian banking system is one of its most valuable points, and when a thoroughly national point of view is taken, the most desirable aim seems to be that the country as a whole should be viewed as one investment field.

GERMANY—NEW AND OLD

Something has happened in Europe which is rare in the history of organized states,—the capitulation of a great nation before its military forces were vanquished. For almost four years Germany was successful in the field; it was not until midsummer of 1918 that the allies made distinct progress; and then, suddenly, the great military machine collapsed, not in its main body, but in its vital centre at Berlin.

That is, in fact, the way in which great organizations come to grief; not through the harassing of external foes, but by reason of those internal diseases which accompany greatness and which destroy the seat of its vitality. But let us see if this is really the case with Germany. As a nation she is in her infancy and has throughout her brief course of half a century exhibited every indication of health and vigor. The fall of a great empire is always preceded by signs of weakness. There is no parallel between this event and the breaking up of Rome, the decay of Spain, or the fall of Napoleon, any more than with the defeat of the confederate states in America. Moreover, the overthrow of the seat of power in Germany has not been accompanied by such disorder as followed the French revolution in 1789, of the Russian revolution in 1917; the peacefulness of the German revolution cannot be explained merely by the fact that Germany is an orderly nation.

We have, therefore, to deal not with a decadent nation, but with one in the youth of its power, the military strength of which is for the time being destroyed. From the ruins of old Germany there may arise, like a colossus, a new and greater Germany conscious of the fact that its armies have never suffered defeat. The character of that new nation is still in the making, and great issues depend upon the national ideals and aims therein developed. The view that "Germany must be destroyed" has never found favor in allied circles, for all must suffer and none gain by the breaking up of a great nation. Similarly we must not, by imposing upon the fallen enemy such political and economic restrictions as would prohibit any real national development, revert its great energies back into the field of war and preparation for war. While allowing such scope as any healthy nation would require, however, we must, on the other hand, by setting up international judicial and police bodies, assure for all time that such a conflagration as is now coming to a close will never again occur.

Many have doubted, and not without reason, the genuineness of the German revolution. We have already witnessed undoubted evidence that Germany recognized no restrictions as to ways and means to gain her ends. Success was the one object, and all morals and recognized laws of diplomacy and war were cast aside. To say that, perceiving the hopelessness of attaining success against the superior military powers of the allies, Germany abandoned the military weapon, and staked her fortune on the more uncertain hazards of the diplomatic field, would be too far fetched a theory. So great a conspiracy, involving the ruled as well as the rulers, would be almost unbelievable. But voluntary or involuntary, the result may be the same, that Germany, powerful and united, and unless a new national character has already been infused, crafty and unscrupulous in diplomacy, may achieve as great a "victorious peace" in the diplomatic field as she hoped for in the glory of her victorious armies.

ARGENTINE VISITOR SUGGESTS CLOSER RELATIONS

Mr. Jorge Mitre, of Buenos Aires, Argentina, has been a visitor in Canada during the past week, and suggests that trade connections between that country and ours might be increased. A commission of Canadian bankers and manufacturers, he says, might very well organize a personal visit to the republic to examine for themselves the possibilities of that country.

WANT HYDRO TO PAY TAXES ON PLANT

The Niagara Falls Board of Trade has passed a resolution calling on the Ontario Hydro Commission to pay taxes to the city of Niagara Falls on its Ontario Power Company plant, and has asked Dr. Musgrave, M.P.P., to use his good offices. The taxes amount to $74,000. Stamford township is also after the Hydro Commission to pay taxes to the township.

The Hydro Commission has made a compromise with Stamford Township Council with regard to payment for township roads taken over in the construction of the Chippawa-Queenston hydro power canal. The township council last spring demanded $50,000, but at the regular meeting of the council just held $20,000 was accepted as full settlement. The agreement was accordingly signed.

LOANS TO FARMERS MAY CEASE

While no definite decision has been reached, it is not considered likely that the Ontario government will continue next year the policy of the last two years of making loans to farmers to assist them in the purchase of seed grain and other supplies. The policy will have to be decided after a conference with the agricultural branch of the Organization of Resources Committee, but the provincial treasurer, Hon. T. W. McGarry, said that now that the war is over, there was not the same need for encouraging increased production. "As a matter of fact, I doubt if there would be much demand for them," he said.

More than $300,000 has been loaned by the banks during the two years. While complete reports of the losses sustained by them have not been received by the department, Mr. McGarry has not yet made them any payment to cover the shortages. However, it is not expected that when complete reports are received that the loss will be great. An investigation is now being made in some instances to see that the banks exercised proper care before making the loans.

According to a report received by the Department of Trade and Commerce from L. D. Wilgress, Canadian Trade Commissioner in Siberia, Japan is active in its efforts to secure trade with Siberia.

FEDERAL AID TO GOOD ROADS

Delegates Suggest Thirty Per Cent. Expense Be Borne by Dominion

Federal assistance to the construction of good roads was advocated by a widely representative deputation which waited on the government on December 9th. The delegation was received by Sir Thomas White, acting prime minister, Hon. J. D. Reid, N. W. Rowell, Senator Robertson, F. B. Carvell and J. A. Calder. Assistance by the Dominion, through the provinces, was urged, in preference to the creation of a Federal Department of Highways, in view of the necessity of early action, and the following resolution passed by the directors of the Canadian Good Roads Association was submitted to the government:—

"(1) To communicate with the governments of the various provinces respectfully suggesting that they offer to carry out such highway building plans as may be arranged, on a basis as to cost between the Dominion and the provinces to be agreed upon.

"(2) To communicate with the government of Canada pointing out the facts and respectfully suggesting that the government of Canada favorably consider the advisability of using the road-building knowledge and facilities of the provinces by making grants to highways built by the various provinces in consideration of certain expenditures by the provinces themselves, and that the government of Canada call into council representatives of the various provinces to give effect to so much of this resolution as is agreeable to it."

While no specific recommendation was made as to the amount of Federal assistance, there was a suggestion of 30 per cent. by the Dominion, the remaining 70 to be borne by the province.

Suggestions of Deputation.

Sir Thomas White made a reply which put the deputation in good humor. While he did not make a definite promise, his remarks were so sympathetic that the delegates believe it is only a question of time before the government will announce a policy of highway construction. While agreeing with the proposal of the delegation that assistance should be given through the provinces, he was inclined to the view that road building is a matter in which the Federal government is also deeply interested.

The deputation was introduced by Gustave Boyer, M.P. for Vaudreuil. S. L. Squire, president of the Canadian Good Roads Association, said that the success of the Victory Loan showed that Canada was able to attack big problems in a big way. He suggested, in regard to highway construction that the Dominion should set aside a fund to be expended through existing provincial organizations. This should be spent on trunk highways, in proportion to the amount expended by the provinces themselves.

"The time has come to act, and act promptly," Mr. Squire declared. "We believe that future provincial legislation depends upon the action of the Dominion government."

T. P. Regan, representing the New Brunswick Good Roads Association, pointed out the expenditure made on good roads by states in the American Union. He emphasized the fact that automobilists brought money into a country. They were not a pest, as some seemed to think.

Capt. Duchatel, of the Quebec Good Roads Association, and L. B. Howland, president of the Canadian Automobile Association, both spoke of the necessity of good roads and the need for assistance by the Dominion government.

Connection With United States Roads.

Wm. Findlay, president of the Eastern Ontario Good Roads' Association, read the resolution adopted by the association's board of directors, and spoke of the delegation's widely representative character. "The delegation had come to the conclusion," he said, "that the establishment of a Federal department of highways would take considerable time, and would probably result in much duplication of effort."

Hon. Frank Carroll, president of the Quebec Automobile Club, dealt with the importance of the Quebec highways being connected with the state roads across the border. "Quebec province," he said, "had two trunk highways leading to the border, and the State of Maine had agreed to spend a large sum of money to connect the state system with one of these roads."

Sir Thomas White, in view of the emphasis laid by the delegation upon the necessity for immediate action, asked as to the possibility of highway construction being carried on during the winter months.

Mr. McCallum, commissioner of works, Ottawa, replied that a great deal of preliminary work could be done during the winter months, including surveys and the securing of supplies.

National Highway Soon.

Hon. F. B. Carvell, minister of public works, asked for an expression of opinion as to the proposed national highway. "Is it the intention to abandon that idea?" he queried.

Mr. Squire explained that while the delegates were agreed as to the importance of a national highway, they did not believe that they should advocate the immediate construction of a road from coast to coast. It was possible that in some of the provinces roads could be built at once which would ultimately be a link in a national highway. But other provinces might consider it better to build different roads, and that should be a matter between the Dominion and the provincial governments.

Dominion's Interest.

Sir Thomas White, in replying, said that the Dominion government had recently demonstrated its attitude toward the question of good roads by naming Mr. C. A. Campbell to study the matter and give his advice. Mr. Campbell was so well informed on the subject that he would probably be able to reach conclusions at an early date. There had been, Sir Thomas said, some question as to the jurisdiction of the Dominion government, but he had never had any doubts personally as to the interest of the Dominion government in the matter. Good roads would affect transportation, and it was manifest the part they will play in direct and indirect benefits to the farmer. Good roads would play a great part in attracting tourists to all parts of the Dominion.

Dealing with the financial aspects of the matter, Sir Thomas said that as the Victory Loan represents the working capital of the people, it was important that it should be devoted to enterprises that are productive. The construction of highways throughout the country could, undoubtedly, be characterized as a productive enterprise.

Delegates Present.

The following were among the delegates present: S. L. Squire, president of the Canadian Good Roads Association; L. B. Howland, president Canadian Automobile Association; Wm. Findlay, president, Eastern Ontario Good Roads Association; Hon. Frank Carroll, president, Quebec Automobile Club; J. F. M. Stewart, Toronto Board of Trade; F. Jarman, vice-president, Ottawa Motor Club; C. J. Foy, Perth, vice-president Eastern Ontario Good Roads Association; F. Roden, president, Ontario Motor League; Russell T. Kelley and C. M. Doolittle, Hamilton Board of Trade; G. H. McNamee, secretary, Canadian Automobile Association; Dr. Desaulniers, M.L.A. director, Canadian Good Roads Association; A. L. Caron, president, Automobile Club of Canada; A. Rankin, M.P.P., Kingston; W. Y. Dennison, Ottawa, secretary, Good Roads Association.

Other organizations represented were Manitoba Good Roads Association, Nova Scotia Highways Association, New Brunswick Highways Association, Ontario Motor League, New Brunswick Automobile Association.

PETERSON LAKE WINS JUDGMENT

The appeal by the Dominion Reduction Company against the judgment secured last year by the Peterson Lake Mining Company on December 6th failed, the former judgment being sustained in the Divisional Court. By the confirmation of the former judgment Peterson Lake secures slimes estimated to contain well over a million ounces of silver, which were dumped into Peterson Lake by the old Nova Scotia Company, and its successor, the Dominion Reduction Company up to July, 1915. These slimes have become valuable since the oil flotation system came into use. F. G. Forst, managing director of the Peterson Lake Company, states that the company will build a second mill to treat these slimes. The Peterson Lake Company originally got judgment on November 29th, 1917. This was appealed the following December, and the decision announced on December 6th.

PHONE RATES MAY BE INCREASED

Will be Only Temporary Till Costs Become Normal

Rate increases granted to the Bell Telephone Company will be temporary. "In my opinion," says Sir Henry Drayton, chairman of the railway commission, in a judgment rendered on December 10th, "should it be found necessary to increase the company's rates, they should be increased subject to the board's further order and to the further provision, in the meantime, that such data be collected and valuations made as will enable a proper telephone rate to be determined when conditions are ascertained to be constant.

"I would therefore give effect to the spirit of Montreal's application and provide merely for temporary increases if necessary. In my view, however, their duration ought also not to be fixed. They should remain in effect until operating costs and plant values become normal, when the permanent rates ought to be considered.

"I would treat the application as current, so that the onus of showing what the proper rate was would rest upon the company, and in order to bring about this result would grant temporary increases if found necessary, as already stated, until further order"

Entitled to Full Information.

Sir Henry also holds that the municipalities are entitled to the fullest amount of information, that the company's books, as kept, will afford without recourse to special valuations and exhaustive cost studies. "There is no reason," he adds, "why the fullest information should not be given by the company, and no reason why the public should not be taken into its fullest confidence."

Particulars are ordered to be furnished by the company as follows: Analysis of plant values from and including 1913 to September of the present year; analysis of company's gross revenue for the same period; analysis of expenditure; analysis of depreciation charges with sub-division showing basis on which depreciation is charged; number of stations connected and disconnected; total of long distance messages; interest expenses and dividends paid; surpluses commencing with the balance on hand January 1, 1913; reserve for special objects, such as fire insurance, pole depreciation, etc., special accounts, such as suspense account, contingent and reserve account, and employees' benefit fund.

Railway Board's Order.

In regard to the application by the city of Montreal that the Railway Commission should bear the cost of the audit, Sir Henry holds that the board has no fund for such a purpose, and the matter is one in which the Canadian taxpayer as such is not in any event interested. The Bell Telephone Company has no operations in many of the Canadian provinces. Its operations in fact are practically confined to Ontario and Quebec, and do not cover the whole territory of these provinces. If Montreal desires to proceed with the inspection of the company's records by its auditors after it has received the particulars ordered, it has the right to do so. Any contribution to Montreal's expenses would seem to be a matter to be considered by the municipalities that are interested, rather than by the country at large.

Those Interested.

Montreal's application for particulars, and that any increase granted in tolls should be temporary, was endorsed by the cities of Toronto, Hamilton, Ottawa, Quebec, Brockville, Brantford, Guelph, Kitchener, Sarnia, Sault Ste. Marie, Three Rivers, Westmount, Sherbrooke, St. Hyacinthe, Outremont, Verdun, and by the Brantford Trades and Labor Council, and the Union of Canadian Municipalities.

The Ontario government will proceed with the building of a highway from the Quebec boundary to Windsor. The route through Southern Ontario has not as yet, however, been determined

At a meeting of the board of directors of the Southern Loan Company on December 3rd, Mr. George K. Crocker was elected president in place of William Mickleborough, deceased. Dr. Robert Kain, was named first vice-president, and James Abell, C.E., second vice-president. J. H. Hopkins was elected a director to act for the balance of the year

CANADIAN TRADE COMMISSION CREATED

To Co-operate With London Mission to Secure More Export Trade

A further important step towards securing for Canada a substantial expansion of its export trade is the creation of a Canadian trade commission.

The board will have its headquarters at Ottawa, and will co-operate closely with the Canadian mission in London with a view to securing for Canadian producers a share of the business arising out of the reconstruction work in France and Belgium and other war-devastated parts of Europe.

The commission will consist of three members, Sir Charles Gordon, of Montreal, who will be chairman, Mr. Charles B. McNaught, of Toronto, and Mr. H. B. Thomson, of Victoria.

Chiefly Post-War Export Trade.

In submitting the matter to council, Hon. A. K. MacLean, chairman of the reconstruction and development committee of the Cabinet, reports that the commission has under consideration the question of post-war trade, with particular reference to exports, and states that for a considerable period after the war, it is probable that the purchase and distribution of a considerable proportion of the Dominion's exportable productions will be carried out through governmental agencies established by the United Kingdom and other allied nations.

He further states that many inter-allied boards and commissions have been set up during the past four years for such purposes, and through them extensive control and supervision are being exercised by agreement over important financial affairs, the distribution of shipping, freight rates, and prices of many important commodities, and, generally, the distribution of the industrial, agricultural and mineral production of the world. In the opinion of the minister it is not improbable that many of these commissions will be continued for the like purposes in the years immediately following the conclusion of peace.

Canadian Trade Mission.

In view of the unusual position thus created, a special economic commission, known as the Canadian Trade Mission, has been established in London through which the government may be kept directly in touch with the activities and deliberations of the agencies concerned, with a view to securing orders for Canadian products for reconstruction purposes in the devastated areas of Europe and generally for the promotion of Canadian export trade.

It is desirable, therefore, that there be established in Canada a special organization to aid and co-operate with the Canadian Trade Mission in London, and the creation of the new commission is designed to meet this need. The commission will attend to the purchase of Canadian productions on behalf of any other government or governmental agency, and act in the distribution among Canadian producers of any contract or orders for products of Canadian industries secured through such channels. It will confer with inter-allied boards, or other accredited agencies, whenever necessary or deemed expedient.

The special feature of the order in council is that authority is given to the commission to select and appoint advisory or associate members with a view to associating with itself any industry or class of industry considered advisable.

SOUTH VANCOUVER TO SPEND $40,000 ON ROADS

South Vancouver has expended in the past some $3,500,000 on roads and sidewalks. This money was used to purchase and make roads and to build sidewalks. On account of the difficulty of raising funds the councils of the last four years have spent only about $10,000 a year to maintain this asset, which cost the municipality such a large sum of money. As a result many of the roads are in a deplorable condition and the expenditure of considerable money will have to be made in order to save a tremendous loss to the municipality. During the coming year about $40,000 will be spent on roads and sidewalks, and in order to meet this and other necessary expenditures it is imperative that the ratepayers pay their taxes.

EXPRESS COMPANIES DECLARE EARNINGS

Statements Presented in Support of Claim that Express Companies of Canada Require Higher Rates

The Express Traffic Association, acting on behalf of the express companies of Canada, have entered an application with the Dominion Railway Commission for an increase in express rates sufficient to enable the companies to earn a reasonable profit.

The counsel for the association is Hon. F. H. Phippen, K.C. He has recently filed statements showing the earnings and operating expenses of the Dominion and Canadian express companies, from 1913 to the present time. The board is, moreover, invited to make an examination of the companies' books in order to verify the statements. Boards of trade throughout the Dominion have been taking up the question and vigorous opposition to the application has been organized.

"After a most careful study of the situation the companies find they require an average increase of at least 25 per cent. over the present rates per 100 pounds west of Sudbury, and 37 per cent. over the present rates per hundred pounds east of Sudbury," says Mr. Phippen. "Unfortunately, notwithstanding the most rigid economies on the part of the companies, the reduction in rates, as ordered by the Railway Commissioners five years ago, together with the ever-increasing cost of operation, has compelled the companies to conduct their business at an actual loss, without realizing any return on invested capital."

Hon. Mr. Phippen points out that the express companies in the United States have been taken care of by substantial rate increases from time to time authorized by the Interstate Commerce Commission, and adds: "The Dominion Railway Board, the Canadian government and the Interstate Commerce Commission have granted similar relief to Canadian and American railways. No such relief has been afforded the express companies of Canada, which are still operating under the reduced tariff of 1913."

The statement filed by the Canadian Express Company shows the following profits and losses for the past five years:—

For year 1913, profit, $25,871; 1914, loss, $57,442; 1915, profit, $88,659; 1916, profit, $174,930; 1917, loss, $38,650; 1918 (eight months), loss, $68,979.

The table submitted by the Dominion Express Company, which is confined to transportation operations within Canada only, shows the net loss and net profits for four years as follows:—

For year 1914, loss, $136,571; 1915, loss, $386,340; 1916, profit, $161,854; 1917, profit, $267,163; 1918 (eight months), loss, $253,614.

In both cases it is specified that the expenses do not include any payments on account of bond interest, interest or dividends on capital.

ALLIED GOVERNMENTS IN MARKET FOR 600,000 TONS OF OUR FLOUR

An understanding has been reached between the Board of Grain Supervisors for Canada and the government in connection with the work of the board until August 31st next.

The fixed prices on wheat will be maintained and also arrangements in regard to the carrying charges.

The division of the wheat between Canada and the allies will also be maintained. The Dominion needs 80,000,000 bushels of wheat for home consumption. Further, the allied governments have offered to buy 600,000 tons of flour in Canada, and the offer has been accepted by order-in-council, not as a maximum, but as a minimum.

Sufficient wheat must be retained in the Dominion for this purpose also. The arrangements in accordance with which the Wheat Export Company buys or receives western grain at the seaboard will also be maintained until August 31st, 1919.

Licenses for importing or exporting wheat and oats must be secured, but the licensing of peas, beans, buckwheat, flax, barley and rye will either be removed altogether or placed in the hands of the customs department. All orders and regulations of the board on other matters are or will be cancelled.

STEEL RESTRICTIONS MODIFIED

In view of the recent developments which have made the steel situation somewhat easier, and especially in view of the fact that certain United States restrictions have been lifted and others modified, permitting shipments of plates, boiler tubes, etc., being made to Canada more easily than in the past, it will be unnecessary in future to apply to the War Trade Board for releases from stocks on forms which were provided for this purpose, neither will it be necessary to supply monthly reports as in the past.

Dealers and others are now at liberty to dispose of their stocks wherever they can. but the War Trade Board reserves the right to fix the price of same in the event of receiving complaints to the effect that prices which are being charged are excessive.

ANNUAL MEETING OF TRANSPORTATION CLUB

The part that the railways of Canada have played in moving troops and supplies and munitions was the subject of several speeches delivered on December 5th, at the sixth annual dinner of the Transportation Club of Toronto. Representatives of the different railways and shipping interests and of Military District No. 2 were present. Vice-president Wm. Fulton, A.D.P.A., of the Canadian Pacific Railway, presided in the absence of the president, Mr. W. J. Langton, who recently was appointed general manager of the Dominion Transport Company, with headquarters at Montreal. Letters of regret were read from Mr. W. J. Langton and C. E. Horning, D.P.A., of the Grand Trunk Railway, and several others.

Short addresses were delivered by Messrs. William J. Moffatt, C.P.A., Grand Trunk Railway, Toronto; M. H. Brown, D.F.A., Canadian Pacific Railway, Toronto; A. M. Adams, F.A., Canadian Pacific Railway, Toronto; Bush Anderson, Chief Landing Waiter, His Majesty's Customs; George G. Davis, Mellville-Davis Steamship Agents; John Thomson, superintendent Canadian Transfer Company; Frank Nancekivell, traffic manager of the Henry Ford Company, Windsor; Wm. Hood, G. F. & P. A., Canadian Northern Railway, Sudbury; Murdo Macdonald, A. I. of W., Grand Trunk Railway, and W. A. Grey, Dominion Transport Company, Toronto.

WEEKLY BANK CLEARINGS

The following are the bank clearings for the weeks ended December 5th, 1918, and December 8th, 1917, respectively, with changes:—

	Week ending Dec. 5, '18.	Week ending Dec. 8, '17.		Changes.
Montreal	$134,154,650	$ 82,531,811	+	$51,622,839
Toronto	81,756,732	66,511,312	+	15,245,420
Winnipeg	79,870,137	77,445,540	+	2,424,597
Vancouver	16,403,873	9,281,004	+	7,122,869
Ottawa	10,375,608	7,479,260	+	2,896,348
Calgary	8,800,804	10,805,953	—	2,005,149
Hamilton	6,515,759	6,080,101	+	435,658
Quebec	7,858,529	6,373,650	+	1,484,879
Edmonton	4,087,813	4,131,680	—	43,867
Halifax	4,591,208	3,304,392	+	1,286,816
London	3,462,852	2,765,207	+	697,645
Regina	5,603,039	5,156,727	+	446,312
St. John	2,439,847	2,178,897	+	260,950
Victoria	2,265,332	2,292,804	—	27,472
Saskatoon	2,396,946	2,409,042	—	12,096
Moose Jaw	2,698,325	2,010,085	+	688,240
Brandon	914,596	1,058,127	—	143,531
Brantford	1,059,660	1,120,817	—	61,157
Fort William ...	1,285,016	1,034,785	+	250,231
Lethbridge	941,618	1,265,595	—	323,977
Medicine Hat ...	563,983	718,528	—	154,545
New Westminster	575,280	450,579	+	124,701
Peterboro	685,915	717,584	—	31,669
Sherbrooke	849,153	804,858	+	44,295
Kitchener	630,368	671,360	—	40,992
Total	$380,787,043	$298,599,698	+	$82,187,345
Windsor	1,169,107	....		....

The Toronto bank clearings for the current week are $75,477,598, compared with $53,681,685 for the same week in 1917, and $61,822,827 in 1916.

THE LAW OF BULK SALES

Decisions in United States Courts on Points Likely to Come in Question in Ontario and Other Canadian Provinces

By M. L. HAYWARD, B.C.L.

The passage of a Bulk Sales Act in Ontario has brought the subject to the attention of the Canadian business community, and the time is probably not far distant when such laws will be in force in all the Canadian Provinces.

As these Acts originated in the United States, and have been in force there for several years, there are a number of cases decided by the United States courts in connection with the matter which are worthy of attention, as they furnish an indication of what the Canadian courts might decide when the same points come up here.

Evidence as to Whether Sale is Fraudulent.

One question which arises is where a Bulk Sales Act states that certain sales specified therein "shall be presumed" to be fraudulent, and the question then arises as to the exact meaning of this expression.

For instance, a merchant makes a sale "in bulk" contrary to the provisions of the Act, and by the law which we have quoted the sale is "presumed" to be fraudulent. Suit is then started to set aside the sale, and the merchant or the buyer sets up the defence that while by the law the sale is "presumed" to be fraudulent, it is still open to him to produce evidence to robut that presumption and show that the sale was not fraudulent, but was actually made in good faith.

Will the court permit them to give this evidence, or is the presumption a conclusive one which cannot be met by evidence in court?

This point has been before the Illinois Supreme Court, which has held that rebutting evidence is permissible for the following reasons:

"We are of the opinion that the meaning of this statute is that proof that a stock of goods has been sold in violation of the provisions of the Act establishes a prima facie case that the sale is fraudulent and void as to the creditors injured thereby, or, in other words, that a presumption that the sale was fraudulent and void arises from such proof, and that thereby the burden passes to the purchaser to prove the good faith of the transaction; but that the presumption arising from the proof of the state of facts named in the statute is not a conclusive presumption, but may be overcome by proof offered by the purchaser."

The courts of Florida, Maryland and New York have laid down the same rule, but, on the other hand, a number of other State courts have held that the presumption of fraud is conclusive and cannot be rebutted by evidence. This rule holds in Georgia, Michigan, Tennessee and Oklahoma.

Sale of Stock-in-Trade.

As a general rule the American Bulk Sales Acts refer to sales of "goods, wares and merchandise," and some important questions have arisen in reference to the meaning of these words.

For instance, a merchant may sell goods in bulk which were intended for permanent use, and were not part of his ordinary stock-in trade kept for sale in the ordinary way, or a livery stable keeper might sell his horses and wagons, or a manufacturer might sell the machinery in his plant.

Do the Bulk Sales Acts apply to such cases? Or in other words, is such a sale a sale of "goods, wares and merchandise" within the meaning of the Act.

As a general rule the United States courts have held that such property is not goods, wares and merchandise, and that the Act does not apply.

"The construction of this statute has been before this court," says the Washington Supreme Court in referring to the case of a livery stable keeper who sold his horses and wagons, "and it is insisted that this case falls within the decision of this court in the case of Plass vs. Morgan. In the Morgan case it was held that the buying of all goods, wares and merchandise in a restaurant was a purchase within the contemplation of the statute. It may be a little difficult to distinguish that case from the present case, and yet we think that there is in reality a distinction, and that the goods, wares and merchandise necessarily used by a restaurant keeper may be more appropriately termed a 'stock of merchandise' than the horses and carriages of a livery stable. It is true that a restaurant keeper, when he buys a ton of flour, does not buy it with the purpose of selling the article again in the same condition that it was in when he bought it, as does the ordinary merchant; but he does dispose of the same goods in a changed condition, and it is a business which from the necessity calls for constant and continued purchases from the wholesale dealers. While, on the other hand, there is no sale of horses and carriages contemplated at all in the conducting of a livery business, and the stock, when once obtained, outside of the feed required for feeding the horses, is less mutable."

The same rule has been laid down by the Massachusetts Supreme Court.

Transfer of Goods to a New Partner.

Another interesting point arises where a merchant is carrying on business alone, and has a stock of goods for sale. Then he takes another party into partnership with him, who pays over to the original merchant a certain amount of money for a half interest in the goods.

Is this a sale of "goods, wares and merchandise" within the meaning of the Bulk Sales Act?

The Supreme Court of Tennessee says "yes."

"We are of the opinion," said that court, "that the case before us falls within the terms of the Act. The language of the Act is: 'the sale of any portion of a stock of merchandise otherwise than in the ordinary course of trade in the regular and usual prosecution of the seller's business, or a sale of an entire stock of merchandise in bulk, shall be presumed to be fraudulent and void, as against the creditors of the seller, unless, etc.' We do not think the Act means that it must be a distinct portion or part severed from the whole stock. The sale of a half interest by a merchant for the purpose of taking a buyer into partnership is within the purpose and reason of the Act. Before the sale a creditor could levy upon the whole stock. After the sale, if valid, the creditor of such seller could not levy upon any of the stock, but only upon the seller's interest in the whole, and in order to obtain this he would have to file a bill in equity for an accounting with the new partner. And the former owner of the stock might admit three new persons into the business, and so reduce his own holdings to a one-fourth interest, and so on as to smaller fractions—at the same time putting the proceeds into his own pocket and holding them beyond the reach of his creditors."

Protection of Creditors.

The United States Acts generally provide that sales made "contrary" to the provisions of the Bulk Sales Act shall be void as against the creditors of the seller, so that if a merchant sells his goods in bulk contrary to the provisions of the Act, the sale is void as against his creditors, and the question then arises as to what action the creditors can take to protect themselves.

In a case decided along this line the Texas Supreme Court has held that the buyer, even if he has bought in good faith and for value, holds the goods in trust for the creditors, and that if the buyer sells the stock again, and has received the proceeds thereof, the creditors can garnishee the proceeds of the stock in his hands, and compel him to hand it over for the benefit of the creditors of the original owner.

MONTREAL SCHOOLS WANT TAX INCREASE

The Protestant Board of School Commissioners of Montreal are applying to the legislature, through their attorneys, to increase the school tax, such increase to be effective from May 1st next. The increases asked are as follows:—

1. With respect to the Protestant panel, or panel number 2, to increase the rate from five to six-tenths of a cent in the dollar of assessed valuation. The rate, however, of the special tax of one-tenth of a cent for interest of sinking fund charges, to remain unchanged, thus making the total rate of the city school tax to be levied upon the Protestant panel, seven-tenths, instead of five-tenths of a cent in the dollar of assessed valution.

2. With respect to the neutral panel, or panel number 3, to increase the rate from seven-tenths to eight-tenths of a cent in the dollar, per hundred dollars of assessed valuation.

At a dinner at the University Club in Ottawa on the 26th instant Hon N. W. Rowell expressed the hope that with the united effort of the country at large Canada would pass safely through the upheaval which is now facing it.

A Newspaper Devoted to Municipal Bonds

THERE is published in New York City a daily and weekly newspaper which has for over twenty-five years been devoted to municipal bonds. Bankers, bond dealers, investors and public officials consider it an authority in its field. Municipalities consider it the logical medium in which to announce bond offerings

SASKATOON'S ASSESSMENT HALVED

Cut of Fifty Per Cent. in Five Years—Expenditures Also Reduced—City Finances Now on Conservative Basis

Interesting facts, illustrating what drastic changes have had to be effected in western city finances during the past few years, are given in the report of Mr. C. J. Yorath, city commissioner of Saskatoon, on the finances of that city for the first ten months of 1918.

The first part of the report deals with the capital debt. It shows the necessity for still continuing the policy of confining capital expenditures to those works which are absolutely necessary; as the debt is still larger than it should be and no doubt Dominion taxation will be greatly increased as a result of the enormous war expenditures. The gross debt is $8,549,876.09 and the net debt $3,075,292.83.

The sinking fund is up-to-date and the whole—i.e., $1,388,818 is invested in gilt-edged securities which have earned a surplus of $64,364.35 over and above the four per cent. compounded annually, the basis upon which the sinking fund is levied.

The city has no outstanding treasury bills or short-term debentures, and only $103,862, or 1.18 per cent. of the city's debt matures during the next five years; $4,392,780, or 51.42 per cent. matures in 1941, but the city has the option at that time of extending the repayment for another 20 years.

Current Revenues and Expenditures.

The current account shows a surplus for the ten months' operation of $22,335.31. The tax collections for the ten months amounted to $716,702.89, compared with the current tax levy of $1,042,726. The arrears of taxes as at the 31st day of October, 1918, amount to $509,189.61. The bank loan on current account amounts to $316,000, which represents borrowings on this year's account. There are no loans for previous years outstanding. This loan compares with a loan of $269,377 on 31st of October, 1917, and $925,000 on the 31st of October, 1913, showing that the city's financial position has greatly improved since the year immediately following the financial boom in western Canada.

The assessed value of land has been reduced to $27,344,050 from $54,463,930 in 1913 and the tax levy during the same period has been reduced by approximately $250,000.

Administrative Public Utilities Upon a Paying Basis.

The three public utilities—i.e., electric light and power, street railway and waterworks, show for the ten months a net profit of $4,699.74. This result has been obtained after allowing for all fixed charges and without increasing rates. The electric light and power department shows a profit of $3,196.01, although its revenue was affected by the Daylight Saving Act and the cost of fuel and rate of wages were increased considerably.

The waterworks department shows a profit of $10,234.10, and the street railway showed a deficit of $8,730.37, making a net surplus of $4,699.74, made up as follows:—

Electric light and power	+	$ 3,196.01
Waterworks department	+	10,234.10
Street railway	—	8,730.37
Net surplus	+	$ 4,699.74

Future Development.

This part of the report deals with the future development of the city, but having regard to the excessive debt, it is urged that while it may be necessary to keep pace with the development of the country, only those capital expenditures should be incurred which will give a maximum of service to the community and that the works carried out should be so planned that they will not only be of immediate benefit to the citizens, but will also form, eventually, part of the complete development of the city.

The completion of a scheme for the unification of the railway facilities is also dealt with, the first stage—i.e., that of bringing the Grand Trunk Pacific Railway into the centre of the city having already been successfully consummated during the present year. This part of the report also deals with the question of good roads and the housing problem.

The John R. Booth Paper Mills may remain closed unless the employees who are at present on strike return under the old labor conditions.

INCREASE IN MANUFACTURED FOOD

A memorandum issued by the Dominion Bureau of Statistics relative to the increase in the manufacture of food products in Canada during the war period says:—

"How marked has been the expansion of Canadian farm production under the stimulus of the war is well known. That the same or relatively even greater expansion has taken place in the output of manufactured food products has not until recently been appreciated, in the absence of the necessary statistics.

"The Dominion Bureau of Statistics, however, has just completed its compilation of a complete census of industry taken for 1917, and the figures are available for comparison with those of 1915, the last year for which similar data are available.

"In 1915, the value of manufactured food products in Canada was $388,815,362; in 1917 this had risen to $755,245,185."

An attached list giving the value of the more important manufactured food products shows that flour and grist mill products lead to the value of $226,062,410, while slaughtering and meat packing are in second place, with products valued at $153,563,318. Other important manufactured food products include: Bread, biscuits and confectionery, $77,103,656; butter and cheese, $75,395,751; refined sugar, $73,329,260; dairy products, $10,327,268; coffee and spices, $9,840,150; and condensed milk, $8,097,217.

LABOR IN MONTREAL PORT

Labor conditions have been fairly good in the port of Montreal this year, according to Mr. C. J. Smith, general manager of the Montreal Warehousing Company. "Our permanent men," said Mr. Smith, "have worked well and faithfully during the past season.

"Owing to the short stocks of grain in the Canadian north-west after the first movement in May, we did little business in June and July until the American grain began to move via Montreal. As a result our labor gang—which has to be more or less organized every spring—had to seek employment elsewhere, which caused us some difficulty. For the last two months, however, we have been able to obtain a better class of men, and altogether we feel that this class of employees has responded to the national call, and while it is true that the wages demanded were higher than usual, and economically more arbitrary, all things considered, they were not far out of line with the cost of living and general conditions.

"We should also take into consideration in connection with the wages question, the number of hours that these men worked owing to the great strain put upon the port during the past few months and especially during the epidemic. Now with the changed conditions we do not anticipate any trouble in obtaining what labor we need next spring, for with a lot of the old port men returning, we feel that the situation will be easier, and we only hope we will have the usual volume of business, as the port of Montreal, with its modern equipment and general facilities, is in a position to handle anything that may come along. In this respect Montreal is fortunate, as after the close of navigation, a very large number of labor gangs find employment in the bush and come back to the port from year to year on the reopening of navigation."

Mr. Smith pointed out that the harbor commissioners had this year handled a considerable volume of the Grand Trunk business—something between four and five thousand carloads of grain that the railway could not handle through their elevators. He also referred to the fact that although direct operations come to a stop with the closing of navigation, yet indirectly Montreal still operates through the maritime ports of Halifax, St. John, N.B., and Portland, the last-named being to all intents and purposes, a Canadian port.

On November 16th the Union Insurance Society of Canton, Limited, and the British Traders Insurance Company, Limited, received a Dominion license to transact hail insurance in Canada in addition to the classes for which they were already licensed. Mr. C. R. Drayton, Toronto, is the manager for Canada of both companies.

As A Business Man ---Which Would You Prefer?

Would you rather have as Executor of your Estate a friend who is busy with his own affairs and whose experience is more in his own line than yours, or this Corporation, established for 36 years, having a Capital and Reserve of $3,400,000.00? We make a regular business of Administering Estates, with an experienced specialist at the head of every department. The fees are the same as for an individual executor.—which would you prefer?

CREDIT AND RECONSTRUCTION PROBLEMS

Relation of Wholesaler With Retailer in Connection With New Industrial Conditions

Reconstruction in its relation to credit was discussed from many points of view at a meeting of the Canadian Credit Men's Association, Limited, held in the Board of Trade club rooms, Toronto, on Friday, the 6th instant. The principal guest of the evening was Sir John Willison, chairman of the Toronto section of the Canadian Industrial Reconstruction Association. The president, Mr. Thomas McMillan, was in the chair.

In opening his subject, Sir John Willison first suggested the question,—What are the problems with which we are faced? Sir John said that between 1,200,000 and 1,500,000 people out of a population of eight millions will be vitally affected by the cessation of hostilities. Instead of $336,000,000, the public debt of the country is now between $1,200,000,000 and $1,500,000,000. The greatest yearly revenue before the war was $173,000,000, whereas for the future there will have to be raised between $300,000,000 and $350,000,000. If the railways are taken over within the next eight or ten years, between $300,000,000 and $400,000,000 will have to be raised, instead of the former $173,000,000. In 1914 the total value of exports of Canadian manufactures was $57,000,000. Whereas the increase during the war was over 1,000 per cent.

While it had been said Canada would be able to absorb the returning soldiers, because the country had absorbed thousands of immigrants annually in previous years, Sir John said that the Dominion had never been able to absorb immigrants in Canada except in periods of prosperity. That was so much the national policy that in periods of adversity legislative measures were adopted to restrict immigration.

More Houses Needed.

"As organization, co-operation and production have proved important factors during the war so they will maintain prosperity in Canada during the period of reconstruction, and carry the country steadily and triumphantly to greater achievements It is vital that confidence shall prevail, and that employers and employed co-operate, that between farmer and factory there are sympathy and understanding, and that from the government at Ottawa there shall be decision, energy and action.

"There should be immediate co-operation between governments and municipalities to determine what public works are necessary," continued Sir John, "and to proceed with these works as the needs of labor require. In determining what public works are necessary we should not think solely of employment. There is enough to be done in this country without going into unwise investments. There should be alike co-operation to relieve the scarcity of houses and to assure that housing accommodation will be adequate when the soldiers return."

Build Only Needful Houses.

Even with the $25,000,000 appropriated by the Federal government, and the $2,000,000 appropriated by the Ontario government for housing purposes, he doubted if that would be very much more than would be needed. He hoped, however, that no municipality would go into housing merely to take advantage of the cheap money offered. Nothing would be more unwise than that any community should build houses beyond the demand.

There should be a resumption of work on the Welland Canal and other necessary undertakings. There should be immediate steps taken to reclaim waste land and to build necessary highways. There should be the energetic development of water powers. All of these undertakings should be permanent national investments.

"If the country can be carried through the next six months it is my conviction that we will enter on a long period of prosperity," continued the speaker. Precedents may have to be discarded for the moment. The time demands initiative courage and energy, and the co-operation of all interests to insure satisfactory peace conditions."

While a great responsibility rested on the government at Ottawa, he believed it would prove equal to it. If the exports of Canada can be maintained at between $400,000,000 and $500,000,000 a natural development can be established between the industries and agriculture There have been satisfactory conditions in Canada during the war because the industries have been active and prosperous. If that had not been the condition there would have been industrial stagnation and unsatisfactory agricultural conditions.

"You cannot have depression in the industrial centres and prosperity in the agricultural districts," Sir John said. "You cannot have depression in Ontario and Quebec—the industrial provinces—and any high average of prosperity in Alberta, Manitoba and Saskatchewan, which are the agricultural provinces."

Profiteering Exaggerated.

The speaker did not think there had been as much profiteering in Canada as commonly believed. The war had developed new systems of taxation. He believed the tax on excess war profits and the income tax would continue, and he believed they were proper.

"Taxation of capital is the worst form of taxation that can be devised in any country," he said. "In proportion as you reduce the earning power of capital you check the springs of enterprise and reduce your activities, but if you give capital free play and take from the proceeds of capital a legitimate return in taxes you accomplish the same result but in a much more satisfactory manner."

"Efficiency and production under wise regulation guarantee good wages, low cost of production and fair prices to the public, and it is doubtful if there can be efficiency with cheap labor or low prices without high production." It was legitimate, he said, that Canada should import factories rather than export raw materials, and that Canada should have immigrants into the country rather than emigrants out of the country. Skilled workmen and farmers are the best men that can be brought into the country.

Finish Products Here.

"The supreme thing for us is to so legislate and so develop our national policy that the raw materials of Canada will be carried to the last process in Canada, building up Canada instead of other countries, to which the raw materials of Canada will go if they are not manufactured here."

Had Germany devoted herself for a generation to establishing control of the necessary raw materials all over the world, Sir John said, instead of starting the war when she did, she would have had a practical commercial sovereignty of the world without striking a blow. The certain result of the policy of preference to which the British government is committed will be to bring many factories to Canada. The restoration of the devastated countries of Europe will mean tremendous business for Canada.

"The war has humanized capital and exalted labor," said the speaker. "One of the great dangers in every country to-day is in the relation between capital and labor." He was convinced that most good would result from labor and capital getting closer together in a spirit of mutual sympathy and understanding.

Fire Prevention and Insurance.

The interest of the credit men in the subject of fire prevention was introduced by Mr. J. B. Ratcliff, member of the fire insurance committee. Mr. Ratcliff referred to the fire losses which were extraordinarily heavy this year. This loss is distributed throughout the whole population. It is not finally borne by the insurance company, nor even by the body of premium payers as a whole, but by the entire population, who must pay for it as an element of the cost of production. Mr. Ratcliff suggested that a good way to emphasize to retailers the necessity for insurance against fire loss would be by means of an insert in correspondence. Another member suggested special printing on all invoices, etc.

One of the guests of the evening was Mr. I. Cohen, vice-president of the Garment Makers' Association of Chicago. Mr. Cohen compared the credit problems of Canada and the United States, and said that similar difficulties had to be faced there.

The possibilities of increased membership was then taken up, and it was pointed out that the membership of the association had grown from sixty members to over three hundred. A new membership campaign may be inaugurated after the beginning of the year.

Mr. C. F. Richardson, chairman of the Adjustment Bureau Committee led a discussion on the subject of investigations, extensions and trusteeships. He read two resolutions which had been passed at a recent meeting of that committee. The one recommended fuller discussion of bad accounts by the association's adjustment bureau. The other resolution referred to the bulk sales act, and advised that members should use pressure to secure the appointment of the association as trustee, as it was in a position to act as effectively and promptly as any other trustee.

Your Money Can Earn 5½% With Absolute Safety

$100 invested at 5½% doubles itself in less than 13 years.

$100 saved at 3% takes 23½ years to do the same thing.

It would be foolish to invest your money at only 3% when you can secure 5½% with equal safety and convenience. It would also be equally foolish to endanger your savings in order to secure a slightly higher rate of interest. But your money CAN earn 5½% without risk of loss, by investing it in

STANDARD RELIANCE 5½% MORTGAGE CORPORATION DEBENTURES

Thousands of people have invested their savings in these debentures without the loss of a dollar invested.

The debentures are issued in sums of $100 and upwards, and the interest is paid in cash on the day it is due.

Write for our booklet entitled "Profits from Savings." It explains what these Debentures are and why they are so good a security.

SOUTHERN ALBERTA HAS STOOD STRAIN WELL

Progress Made in Spite of Agricultural Conditions—New Lands Broken

Mr. G. R. Marnoch, president of the Lethbridge Board of Trade, and vice-chairman of the Southern Alberta Victory Loan executive 1917 and 1918, expresses his satisfaction with the good showing made by southern Alberta for the year.

"It would not have been surprising," said Mr. Marnoch, "if the general business conditions in the Lethbridge district had shown a rather serious set-back in 1918 as compared with the three previous years, as the crop conditions were just as unfavorable here as they were in other parts of Alberta and southern Saskatchewan. As a matter of fact, however, there are indications on every hand that the people of this district are thoroughly well established on a proper economic basis, and are well able to carry over an unfavorable season. Thrift and prosperity have gone hand in hand, as was amply evidenced by the results of the Victory Loan campaign this year. While giving all due credit to the willing workers, with whom A. G. Baalim, the chairman for Lethbridge, surrounded himself, the excellent results that were recorded could not have been achieved without the actual presence of the money. Nearly a million and a quarter dollars was the amount of the subscription in the city, and this came from one in every 2.94 of the citizens. The country which Lethbridge serves as a distributing centre subscribed nearly four millions.

"The record made by the Lethbridge Land Office in collections for the money that was lent by the Dominion government in 1915 for seed grain and other relief to the new settlers in the district is another evidence of the thrift of the farming communities; this money has now practically all been repaid, and the officers of the Crown, faced as they are with considerably different conditions elsewhere, point to this with satisfaction.

"General business is now almost entirely on a cash basis; and it is noticeable that the weekly bank clearings keep up all the time within measurable distance of last year's figures.

"It was against their own better agricultural judgment that our farmers so greatly extended their operations this spring; and they are not likely again to be misled, under any circumstances, into stretching the now well recognized rules for successful grain farming.

Farm Operations Extending.

"It is satisfactory to record that large areas of hitherto uncultivated land have been put under the plough, and the land sales that have been made have all been to well equipped and thoroughly experienced farmers. The Dominion government has at last made arrangements for the opening up of a part of the great Blood Indian Reserve, just west of Lethbridge, where there are 350,000 acres of splendid land that have never been opened up. If the suggestion that the Lethbridge Board of Trade has made is adopted, these lands will be sold with conditions attached requiring actual residence and cultivation by the buyers; and this policy will ensure a steady accession of business to Lethbridge. A mere change of ownership, on the other hand, from an Indian to a land speculator, would avail nothing.

"It has not been until this year that the irrigation farmers around Lethbridge, Coaldale, Magrath and Raymond have benefited by high prices for their alfalfa and hay; but they are certainly 'in clover' now. This, and the special arrangements that have had to be made by the government and the railways for the movement of hay to livestock and livestock to hay, have again brought up for pointed discussion all of the plans for getting irrigation water up from the streams that flow past our doors and on to the land; and large developments in this direction will soon be effected. That which is nearest to practical accomplishment is the Taber plan for irrigating 17,000 acres from the spill waters of the present irrigation system. Following soon upon that, there is 100,000 acres just north of Lethbridge that have been shown to be capable of being irrigated at a very reasonable cost. Then there are no less than 350,000 acres additional, south and east of Lethbridge that have irrigation possibilities. The public understanding is now fully possessed of the fact that it is poor policy to be shipping in hay upon an emergency, when large quantities of splendid alfalfa can be grown right here, and the whole of our agriculture assured and stabilized thereby.

"Lethbridge is surrounded by well developed mines producing excellent domestic coal. The demand has been steady, and it has been impossible to meet all the orders that were offered from points as far east as Winnipeg, owing to shortage of labor. The demand has come this year from a very much enlarged territory. Although in ordinary times it may prove difficult to hold this market against the economic conditions of transport and geography, the nearer markets continue to absorb this excellent coal."

FARMERS TO BE REPRESENTED IN LONDON

Plans to obtain full representation on the Dominion Trade Commission to England were discussed at the opening session of the Canadian Council of Agriculture in Winnipeg, on November 26th. Council members from all parts of the west joined in the conference in an effort to arrange a political and economic platform suitable for organized farmers of the prairie provinces.

Among attending representatives were: H. W. Wood, president of the council; Hon. T. A. Crerar, of Ottawa, minister of agriculture; C. Rice-Jones, J. J. McLellan, J. W. Leidy, F. Baker, Rice Sheppard, of Alberta; Hon. Geo. Langley, F. W. Riddell, Thomas Sales, J. Robinson, J. E. Paynter, J. B. Busselan, R. N. Johnson, A. G. Hawkes, John L. Rooke, John F. Reid, M.P., of Saskatchewan, J. L. Brown, John Kennedy, J. Murray, G. F. Chipman, W. J. Healy, W. R. Wood, M.L.A., Peter Wright, Roderick McKenzie, of Manitoba, J. J. Morrison, R. W. E. Burnaby, Manning Doherty, of the United Farmers of Ontario.

MONOPOLIES, AND HOW TO DESTROY THEM

"The entire population of the world," says James R. Brown, president of the Manhattan Single Tax Club of New York, "could be settled in Ontario, and then not be crowded with more than five to the acre." Mr. Brown addressed the open forum meeting held in Toronto on November 23rd. The speaker then enlarged upon the advantages of heavier land taxes, especially as new settlements were wanted at the present time.

Monopoly, declared the speaker, was getting something for nothing, and he said that the more you get and the less you give, the more people thought of you. It was a disease that had many manifestations. Canada now and before the war was bled white by just about fifty men, said Mr. Brown, while the rest of the population was hard at work with noses to the grindstone. It was not the cleverness of these men that made them what they were, but the stupidity of the other fellows, claimed the speaker. The people have been very patient in Canada, and Mr. Brown thought that if Job had lived here he would have felt that he was an "impatient piker" beside the people here with their economic troubles. The economic troubles, he said, were reflected in the people, physically, mentally and spiritually. Referring to spirituality, he said that was where Canadians were strong, especially when they went to New York. Monopoly flourishes because of ignorance, he said.

One of the most important and biggest things in life to-day, said Mr. Brown, was taxation. It is because the people fail to understand what the taxation is that economic troubles have grown. He went into the question of taxation at some length, claiming present day methods were wrong. People were paying twice over. They were paying a big price for idle land held by the speculator, and then were highly assessed for improvements made on it. For 5,000 years practically no improvement has been made in the art of raising public revenue. The legislators, he said, have failed to give a sane system, because of their ignorance of economic conditions. Their legislation is tinkering and the results nil.

A man ought to be treated the same in taxation, claimed Mr. Brown, as he is in a store, where he is charged for what he gets. Instead, in Canada men are charged at the rate of their ability to pay. A number of men do not want to see women vote, said the speaker, but he could not see where they would make a worse mess of taxation than men have.

Figures given by Mr. Brown went to show that there was no necessity of settling the returned men in such far-off districts as the Peace River. His figures showed the tremendous amount of uncultivated land in the different Provinces of the Dominion, and he blamed taxation for the large amount of uncultivated land here. In Ontario there are 260,000,000 acres, and only 8,422,000 under cultivation.

ALBERTA STARTS THRIFT CAMPAIGN

The province of Alberta is issuing Savings Certificates in denominations of $5 and upwards. These bear interest at the rate of 5 per cent., compounded on January 1st and July 1st. They permit almost instantaneous withdrawal, as the money invested in the certificate, plus accrued interest, will be given any time upon surrender of the certificates. The province is carrying on a thrift campaign in connection with the Savings Certificates and expects to secure a considerable amount of money through this source.

A cable received from London states that a general license has been issued to the trade permitting the importation of any quantity of apples, provided the importer can find space to bring them in. It is understood that sales of apples in Great Britain are subject to some regulations as to price.

EDMONTON DEBENTURES TO BE REDEEMED

Certain city of Edmonton debentures have been drawn for redemption on January 1st, 1919. The debentures drawn are in series A and B and the numbers to be redeemed were given on page 44 of The Monetary Times of November 29th. All of the debentures in these series are not being redeemed, as might be inferred in the news item on page 26 of that issue, but only the numbers drawn.

A conference of fraternal associations of Canada was held in Ottawa on Thursday, November 28th. Among the societies represented were the Independent Order of Foresters, Canadian Order of Foresters, Ancient Order of United Workmen, Sons of Scotland and Catholic Order of Foresters. A similar conference was held last year at Belleville, Ontario, and the Canadian Fraternal Association has been formed.

MUNICIPAL BOND MARKET

The Monetary Times' Weekly Register of Municipal Activities and Financing

London, Ont.—At the January elections a proposition to issue $100,000 medical school debentures will probably be voted upon.

Montreal East, Que.—Messrs. Credit-Canadien, Inc., of Montreal, have been awarded $125,000 6 per cent. 5-year bonds at 96.56 and interest.

Osgoode Township, Ont.—A block of $13,000 6 per cent. 20-year school debentures, dated November 4th, 1918, have been awarded to G. A. Stimson and Company, of Toronto.

Sault Ste. Marie, Ont.—A by-law will be submitted on January 7th by the city council to raise $40,000 by debentures for the erection of a soldiers' home for the benefit of returning men.

Brantford, Ont.—An election will be held on January 6 to vote on the question of issuing $75,000 school debentures recently authorized. The rate of interest will be 5 or 5½ per cent., and the principal will be payable in 20 instalments.

Hamilton, Ont.—A by-law has been proposed to issue debentures for the sum of $50,000, payable by annual instalments extending over a period of 20 years, with interest at the rate of 6 per cent. per annum, payable half-yearly, for the purpose of erecting shelters for farmers on the Central Market.

Toronto, Ont.—A million dollar bond issue is about to be made by the Toronto Harbor Commission. Tenders have been called and bids were received until noon to-day, December 13th. The bonds carry 4½ per cent. interest and mature in 35 years. As we go to press no information regarding the award has been received.

Niagara Falls, Ont.—Messrs. W. A. Mackenzie and Company, of Toronto, have been awarded $28,000 5 per cent. 20-instalment bonds. The proceeds will be used for school purposes. W. A. Mackenzie and Company bid 90.53, and there were seven other offers, ranging from 88.03 to 89.86. This means that Niagara Falls borrows at a cost of 6.20 to the city.

New Westminster, B.C.—Arrangements have now been fully completed for the purchase by the Lumbermen's Trust Corporation of $230,000 6 per cent. 5-year bonds, the balance of the $500,000 issue of the city's debentures. The corporation now holds $400,000 of the total half million, and the balance has been taken by Messrs. Wood, Gundy and Company, of Toronto.

Windsor, Ont.—The city has disposed of an issue of $174,610 of local improvement debentures, bearing interest at the rate of 5½ to 6 per cent., and repayable over a period of 10 years. The award was made to Messrs. Wood, Gundy and Company, of Toronto, at a price of 97.88, this firm being the highest bidder. Competition was very keen, two other firms bidding 97.82. The price is considered a good one from the standpoint of the city of Windsor. The following is a list of tenderers and the prices bid:—

Wood, Gundy and Company	97.88
Brent, Noxon and Company, in joint account with Geo. Carruthers and Son	97.82
C. H. Burgess and Company	97.82
W. A. Mackenzie and Company	97.701
Dominion Securities	97.68
A. E. Ames and Company	97.58
McKinnon and Company	97.27
Stimson and Company	96.03

At the price realized the Windsor bonds will pay 6.17 per cent., compared with 6.20 in the case of the Niagara Falls bonds.

At a meeting of the Port Hope Board of Trade the following officers were elected: President, Major A. H. C. Long; vice-president, L. Garnell; secretary, W. H. Roper; treasurer, E. Brown; executive committee, H. Fulford, W. J. B. Davison, H. Reynolds, L. B. Chalk, J. A. Hume, Geo. Garnell, F. H. Brown, W. D. Stephens, F. L. Curtis, A. E. Andrews, H. Swallow, E. M Thurber, A. E. Pipper, Senator Mulholland.

TWO NEW TORONTO BOND FIRMS

Mr. D. J. McDougall, formerly manager of the Bankers' Bond Company, has left that firm to go into business on his own account.

Another bond firm organized in Toronto during the last few days is McDonagh, Somers and Company, who have an office in the Dominion Bank Building. This firm will deal in government and municipal bonds.

INVESTMENT BANKERS' CONVENTION

The 7th annual convention of the Investment Bankers' Association of America, was held in St. Louis, December 9th, 10th and 11th. The headquarters were in the new Hotel Statler. It was originally intended that the convention should be held in November, but postponement was necessary as a result of the influenza epidemic. Among those present were: Gordon T. Finch and A. W. Scripture of Wood, Gundy and Company; R. W. Steele and T. H. Andison, of the Dominion Securities Corporation; F. J. Coombs and W. E. Young, of A. E. Ames and Company; and A. W. McLennan, of the Canada Bond Corporation.

ALL MUNITIONS WORK CEASES

On December 7th all manufacturing operations for the Imperial Munitions Board on United States contracts ceased. On December 14th work will stop as well on British contracts, and as far as Canadians are concerned practically all returns from war industries will then cease.

Various companies belonging to the Imperial Munitions Board will be liquidated at once. The capital cost of these properties and all liabilities have been wiped off by the profits of operations, and the board is also seeking to sell the properties to be used for industrial purposes in peace times. Some difficulty is being met with in this respect, although some tentative offers have been made. The properties owned by the Imperial Munitions Board consist of the British Chemical Company, Trenton; another at Nobel, near Parry Sound; a fuse company at Verdun; and two at Toronto, consisting of the British Forgings and Canadian Aeroplanes, Limited. These are all subsidiary companies of the board, although incorporated separately as companies.

It is calculated at Ottawa that this order to stop works will cut off about one hundred million dollars of work actually given out, and about two hundred millions which had been in contemplation before the armistice was signed.

SEYMOUR CREEK AGAIN OFFERED VANCOUVER

Formal offer of a tract comprising 4,000 acres of timber lands and some waterfront on the north shore of Burrard Inlet at the mouth of Seymour Creek was made to the city council of Vancouver recently by Mr. Wismer, of Wismer, McGeer and Johnston, acting for the owners, a firm of Seattle bankers. The tract in question which, it was stated by Mr. Wismer, would give the city complete control of the Seymour Creek watershed, was offered to the city some time ago for $700,000 by Mr. Robinson, the former owner. Since then the property has been taken over by a firm of Seattle bankers who intend to realize on the property and now offer it to the city for $300,000, with the alternative that if the city does not purchase it within a reasonable time, the owners will have to start logging operations in the Seymour watershed and remove some of the valuable standing timber there.

After Mr. Wismer had explained that there were about 121,000,000 feet of merchantable timber there, worth about $390,000, which would keep logging operations going for some years if commenced, he urged that the question of purchasing this tract should be submitted to the ratepayers of the city by by-law at the coming civic elections.

Alderman Rogers was opposed to the city spending so much money for the purchase, and he believed the government would never allow this timber to be cut and the purity as well as the supply of the city's water imperilled. He thought $300,000 was too much for the tract in any event.

ONTARIO CROP REPORT

Livestock in Fair Condition—Fall Wheat Moderately Good—Milk Flow Below Average

The following is a summary of reports made by agricultural representatives to the Ontario Department of Agriculture:—

Fall wheat, even that sown comparatively late, has made plenty of top for entering the winter, and is also of good color. Welland reports that the area sown in that county is hardly equal to the average.

Oxford states that the better apples are almost all shipped, but that some of lower grades are still going to the evaporators and cider mills. Prices in Halton are quoted at $5 a barrel for Spies, and $4 to $4.25 for Greenings, Wageners, Russets, etc. Some of the larger growers in that county have shipments in Montreal waiting for ocean space.

Considerable grain is being marketed, but those owning hay are inclined to hold on to it, with prices ranging from $18 to $28 a ton. At an auction sale in the Port Arthur district $27 a ton was paid for mixed clover and timothy in the mow.

Farmers generally will be well stocked up with the coarse grains and the rougher fodders. Some farmers' clubs in Halton are getting in a supply of corn and corn bran.

Livestock have gone into winter quarters in fair condition. Twenty-three carloads of cattle were shipped from one station in Frontenac in one day recently, chiefly stockers and canners, with a few good butchers, at prices ranging from 5½ cents to 9 cents per lb. Sudbury reports several carloads of steers being shipped to Toronto during the last two weeks, some of them feeders but mostly canners. Halton states that a few carloads of feeders, but not the usual number, have been brought into that county.

The milk flow is hardly up to its average. Dairy cows are in strong demand, prices in Oxford ranging from $80 to $245 for grades newly freshened. Milk is now selling in Peel at $3 an 8-gallon can, delivered. Butter fat commands 50 cents a pound, in Peterborough, and 56 cents a lb. York creameries.

The marketing of hogs has slowed up during the past week or two. The open weather of the greater part of November permitted most of the needed fall plowing to be done.

CANADA'S TRADE RESUMING NORMAL COURSE

In spite of a falling off in the importation of goods used in the manufacture of war munitions, the decrease in the customs receipts for the month of November is about the same as in the previous month. This would seem to indicate that the trade of Canada is beginning to resume its normal course. The decrease in customs receipts for the month of November as compared with the same month a year ago, is $459,445, the figures being $12,949,612 in 1917 and $12,490,167 in 1918.

For the eight months of the fiscal year now finished the decrease is $7,902,200. The total receipts for this period in 1917 were $115,324,907, while this year they are $107,422,707.

SIX RAILROAD MEN APPOINTED

Ontario's winter railway problems were the subject of a special session of the Canadian Railway War Board on November 26th. A special committee of six railroad men was appointed by the board to supervise the movement of traffic through the "necks of the bottle" in Ontario.

The new body will be known as the Ontario operating committee of the Canadian Railway War Board, and will consist of the following members: C. G. Bowker, general superintendent, Grand Trunk Railway, Toronto; H. T. Malcolmson, superintendent, Toronto, Hamilton and Buffalo Railway; J. Balkwill, superintendent, Michigan Central Railroad, St. Thomas; W. R. Davidson, general superintendent, Grand Trunk Railway; G. Crombie, general superintendent, Canadian Northern Railway, Toronto; and Allan Purvis, general superintendent, Canadian Pacific Railway, Toronto. The first meeting of this board was on December 4th, 1918, in the Union Station, Toronto.

CANADA'S PENSION BURDEN LARGE

The Minister of Finance has forwarded to Sir Robert Borden full particulars as to the war expenditure of Canada, and as to the annual pension burden which will result from the war. The total expenditure of Canada is estimated at one billion and sixty-eight million dollars to November 30th. To the 31st March next it is estimated at one billion two hundred and ninety millions.

To this estimate should be added the amount of war outlay which will be incurred after March 31st, 1919, which may exceed three hundred million dollars. The pension load is estimated at thirty million dollars per year, and probably more. Canada's net debt at March 31st, 1914, was three hundred and thirty-six millions. The net debt to March 31st, 1919, is estimated at one billion and a half.

In addition to the above, Canada will have a large claim for indirect or consequential damages, as well as those arising out of the raids of German submarines upon Canadian fishing vessels. The final advertising for claims of this latter character is now being done by the Secretary of State.

OBJECT OF WAR SAVINGS

Sir Thomas White, minister of finance, made the following statement on Saturday, December 7th: The war savings stamp campaign has three very important objects in view: to raise money to assist in meeting the continuing heavy obligations of the war during the period of demobilization, to stimulate individual habits of thrift and benefit a large body of small investors. With some years of prosperity Canada has become largely a nation of spenders and has lost sight of the old-fashioned virtue of saving. In order to reduce the debt of nearly two billion dollars, which we shall have at the end of demobilization, we shall have to greatly increase both our national production and our national savings.

After the Franco-Prussian war Germany exacted an indemnity of $1,000,000,000 from France, which was paid in a a few years mainly out of the savings of the French peasantry. After the war, France had a marvellous recovery, due largely to the thrift of her people. It cannot be made too plain that the liquidation of our war debt will depend upon the ability of our people to produce and save.

Another object of war savings stamps is to benefit the person who saves. The purchaser pays four dollars now and he gets five dollars in four years. It is a very simple and a very profitable investment. The government hopes to raise at least $50,000,000 during 1919 from the sale of war savings stamps. This is only six dollars per head of population.

ALCOHOL'S USE IN INDUSTRY

The research council, under Dr. A. B. Macallum, has been carrying on investigations for some months past in the present and prospective uses of alcohol in Canada for industrial purposes. Now that it has gone out of fashion for beverage purposes, there is a large field open for its use in the wealth producing lines of industry, and Canada has an opportunity for developing various chemical industries and turning the abnormal war demands for alcohol in connection with the manufacture of explosives, etc., to a permanent peace time demand for the produces hitherto for the most part imported from Germany or other countries, and with a view to encouraging greater production of pure alcohol for the needs of laboratories, etc., and of the industrial alcohol business, 95 per cent. pure, for manufacturing purposes.

A committee of the research council, consisting of Prof. Goodwin, of Queen's University, T. M. Wardleworth, of the Imperial Munitions Board, Dr. R. F. Ruttan, of McGill University, and Dr. A. B. Macallum has, after studying the whole problem, recommended to the government that the present excise duty on alcohol for industrial purposes be abolished. The committee further recommends that the government buy from all distillers all the alcohol to be used in industry, and sell the same at a small advance to each firm requiring it for industrial purposes. The research council is also arranging with several pulp and paper mills to install plants for the recovery of the waste sulphite liquor. It is estimated that from the waste products of two of the pulp mills of the St. Maurice Valley, two million pounds of industrial alcohol could be produced at a net cost of less than 40 cents per gallon.

PRODUCTION OF BREAD IN CANADA

Increase in Price of Flour—Dominion Average of Producing Bread in September Shows Increase

The Cost of Living Branch, Department of Labor, in their monthly bread report for September remark:—

"Owing to the nature of their business, both in manufacturing and delivery, the bakers have had a most difficult time owing to the influenza, consequently their reports for September's business made out in October are not as complete as usual, fewer in number and less representative.

"A careful examination of the flour used (which is the real index to the production of bread) shows decreased consumption in Ottawa, Toronto, Winnipeg, Vancouver and Montreal being stationary. The decrease is 9 per cent., compared with August of representative groups of the same individual bakers.

"An increase in the selling price of flour late in September only slightly influenced the general average of the month. August costs showing an average of $10.99 per barrel and September $11.03 for the Dominion at large.

"Referring to the yield of bread per barrel—namely, 262 pounds, it has impressed on the bakers the importance of getting very close figures on this as it is the very crux of their business, and it is here that modern methods will win out. There is no reason why the man who bakes 100 barrels per month should not have equally good results as the manufacturer of 1,000 barrels.

"In the reconstruction period that has commenced for all our industries making imperative scientific and economic methods, the baking industry of the Dominion must not be overlooked.

"A Canadian model bakery, with bread laboratory, should be established where sanitary, scientific and economic instructions should be available for the training of the professional baker, thus giving the trade an efficiency and standing in the community that its importance warrants."

Cost of Production.

The following table, compiled by the Cost of Living Branch, shows the cost of producing one pound of bread and cost of flour per barrel in the principal cities of Canada:—

Locality.	Average cost of flour per barrel.	Average total cost of one pound of bread.
Halifax, Amherst and New Glasgow	11.27	6.889
St. John and Woodstock	11.70	6.836
Montreal, Group No. 1	11.54	7.621
Montreal, Group No. 2	11.10	6.801
Sherbrooke & St. Hyacinthe	11.62	6.331
Ottawa	11.21	6.567
Kingston, Belleville & Peterboro	11.30	6.303
Toronto, Group No. 1	10.98	6.873
Toronto, Group No. 2	11.10	6.444
Hamilton	11.23	6.459
Brantford	10.99	6.436
St. Catharines & Niagara Falls	11.18	6.638
London	10.81	6.580
St. Thomas, Chathm & Sandwich	11.00	6.534
Winnipeg	10.60	7.046
Moose Jaw & Saskatoon	10.97	7.230
Lethbridge	10.77	6.780
Edmonton	10.36	6.629
Calgary	9.89	6.888
New Westminster, Victoria & Vancouver	10.78	7.689

The Dominion average of the cost of flour per barrel for September was 11.03, and the average of the cost of one pound of bread was 6.948.

A favorable aspect of the labor situation is expressed in an effort of the Canadian Lumbermen's Association to give employment to 10,000 men. The Dominion government has called upon the association to assist in a demobilization scheme, and the proposition is to find employment for ten thousand men, which is the number estimated can be absorbed in lumber camps throughout Canada east of Fort William.

CHANGE MONEY FOR RETURNING SOLDIERS

For the convenience of soldiers who are now returning in large numbers from Great Britain, the Minister of Finance has arranged with the Bank of Montreal that a representative of that bank will meet returning ships and afford every facility for exchanging British money into Canadian at the recognized rate of $4.86 2-3 per pound. Any loss in exchange will be borne by the government. The soldiers will thus be enabled to convert either British notes or coins into Canadian money immediately upon arrival.

CANADIANS AT LIFE PRESIDENTS' CONVENTION

The following is a list of Canadians present at the convention of the Association of Life Insurance Presidents, held in New York on December 5th and 6th:—

L. Goldman, president and managing director, North American Life Assurance Company, Toronto, Ont., Canada; T. G. McConkey, general superintendent, Canada Life Assurance Company, Toronto, Canada; T. H. Purdom, president, Northern Life of Canada, London, Ontario, Canada; Charles Ruby, general manager, the Mutual Life Assurance Company of Canada, Waterloo, Ont., Canada; E. M. Saunders, treasurer, Canada Life Assurance Company, Toronto, Ont., Canada; M. Pawlinson, director, Continental Life Insurance Company, Toronto, Ont., Canada; George B. Woods, president and general manager, Continental Life Insurance Company, Toronto, Ont., Canada; Geo. P. Graham, president, Travelers Life of Canada, Montreal, Canada; H. C. Cox, president, Canada Life Assurance Company, Toronto, Ont., Canada; S. J. Mackie, superintendent, Imperial Life of Canada, Toronto, Ont., Canada.

A summary of the principal addresses was given in *The Monetary Times* last week.

Eleven companies were elected to membership in the Association of Life Insurance Presidents by unanimous vote of the executive committee, the Manufacturers Life Insurance Company, of Toronto, being among them. The membership of the association is now increased to 39 companies.

FRANCE DENOUNCES TREATIES WITH CANADA

France has denounced her trade treaties with Canada. Provision is made, however, that the preferential tariff rates established by the treaties shall remain in force subject to three months' notice.

The French Government has taken this course to secure liberty of action in view of negotiations at the end of the war. The step has not been taken, it is pointed out in official correspondence, from any sense of distrust or desire for exclusiveness. The Dominion Government has agreed with the proposals of the French Government. Preferential rates will, therefore, remain in force subject to three months' notice.

Two treaties are affected—the Trade Convention of 1907 and the supplemental Convention of 1909. It was in connection with the former that considerable discussion arose. Negotiations for its conclusion were carried on directly with the French Government by Sir Wilfrid Laurier, who was then Prime Minister; Hon. W. S. Fielding, then Minister of Finance, and Hon. L. P. Brodeur, at the time Minister of Marine and Fisheries. Under the treaty's terms, any reduction in customs duties granted by either country to any other foreign country would also apply to the products of France or Canada, as the case might be. Care was taken to preserve freedom in regard to the French minimum tariff for its colonies and the Canadian preferential tariff for the British Empire. Excise and internal duties were made the same. Most-favored-nation treatment for the protection of trademarks, patents, commercial names and industrial patterns was reciprocally extended. France gave to Canada the benefit of her minimum tariff; Canada gave to France the benefit of her intermediate tariff.

The Marconi Wireless Telegraph Company of America will oppose the policy of government ownership of telegraphs, according to an announcement made by Mr. Edward J. Nally, vice-president and general manager.

At the November meeting of the Canadian Railway Board of Adjustment No. 1, Mr. U. E. Gillen, vice-president of the Grand Trunk Railway, through ill-health, found it necessary to resign his position as chairman. Mr. S. R. Berry, vice-president of the Order of Railway Conductors, was elected to the chairmanship, Mr. George Hodge, assistant to the vice-president of Eastern Lines, Canadian Pacific Railway.

Notwithstanding the month of September in many sections being dry, practically all later crops show improved conditions over June and July, when unusual drought prevailed. Good showers during the latter part of July and during August did much toward reviving crops which in some instances were near failure. All crops in September show a higher quality than in the corresponding month of 1917.

COBALT ORE SHIPMENTS

The following is a statement of the shipments of ore, in pounds, from Cobalt Station for the week ended December 6th, 1918:—

Dominion Reduction, 58,600; Hudson Bay, 64,604; La Rose, 65,912; O'Brien Mine, 64,070; Tretheway Mine, 86,863; Buffalo Mine, 154,000; total, 494,049.

The total shipments since January 1st now amount to 30,885,849 pounds, or 15,442.9 tons.

From Porquis Junction:

Alexo Mines, 255,000 pounds.

Omitted from statement for week ended November 29th:—

Alexo Mines, 295,000 pounds.

WORK OF CIVIL RE-ESTABLISHMENT

Satisfactory conclusions were reached at the conference between the secretaries of the provincial returned soldiers' commissions which was held in Ottawa last week. Certain plans for the co-ordination of the provincial organization work with that of the Department of Soldiers' Civil Re-establishment and other government departments working under the direction of the Repatriation and Employment Committee were approved by the conference. The nature of these plans will be announced as soon as the secretaries have reported to the bodies which they represent, and immediate action will be taken. In the course of the afternoon, Major L. L. Anthes, director of the demobilization branch of the re-establishment department, gave a detailed statement on the system of demobilization, which is already being worked out, which was supplemented by T. T. Stevenson, his colleague. Major Anthes will be called in by the department to represent the interests of the manufacturer, Mr. Stevenson those of labor.

A visit was paid to the conference in the course of the afternoon by Col. Purney, president of the Great War Veterans' Association, and members of the executive. They were given an outline of the results of the conference, two or three members of which are members of the association. The conference, which is the third of the kind that has taken place, was called for the purpose of reviewing the work already in progress, and of co-ordinating to best effect the efforts of the provincial commissions.

DOMINION GOVERNMENT WANT SACRIFICE

"That the Dominion government, even if it has decided to return to the western provinces their natural resources, attached so many strings that it seems scarcely worth while bothering with the problem at present," was the statement made by Hon. W. R. Motherwell, minister of agriculture for Saskatchewan, on his return to Regina.

"The government," he said, "while admitting a willingness to favor the return of the natural resources, made certain very important reservations which were stated by Hon. Arthur Meighen. They numbered five, and were: The administration of the school endowment, the retention by the Dominion government of all public parks, the retention of all forest reserves, the retention of all water powers, and the right to supply the railways from the coal resources of the province, coal areas to be reserved for this purpose." Mr. Motherwell pointed out that after these reservations had been made, there was little or nothing left, except the agricultural lands, timber areas and some coal mines, of which the best had already been alienated from the province.

The reservations stipulated by Mr. Meighen, said Mr. Motherwell, were of such a substantial nature, that it would be leaving the question of natural resources unsolved.

A similar view, put in a different form, is expressed by Hon. T. H. Johnson, attorney-general of Manitoba. The people of eastern Canada, he says, appear to think they are solely responsible for all the development and progress in the west. In fact, "they have bought and paid for us." All our industries have been built upon eastern Canadian capital, and in general an unsympathetic attitude exists toward western aims and aspirations.

DOMINION REVENUES AND EXPENDITURE

Dominion revenues and expenditure for November both show increases over November of last year. Revenue on consolidated fund account last month was $29,518,692, as compared with $24,322,946 in November, 1917. For the eight months period, revenue was $193,932,828, as compared with $170,042,006 for the same period last year. Expenditure on the same account was $26,884,011 last month; in November last year it was $12,922,635.

War expenditure for the month was $21,768,261 in comparison with $18,714,472 for November of last year. Net debt during the month increased by over twenty million dollars. On November 30, the net debt stood at $1,307,429,661.

CREAMERIES MAKING PROGRESS

In spite of the shortage of labor on the farms and the high cost of grain for feeding livestock, F. M. Logan, of the Saskatchewan Co-operative Creameries, Limited, reports that practically all of the 20 creameries operated by the company shows an increase in business over the previous year. Among the creameries showing the most outstanding increase the following are mentioned:—

The creamery at Regina last year manufactured 442,000 pounds and this year 750,000 pounds of butter. In addition, this plant supplied over 80 per cent. of the milk consumed in the city as well as manufacturing practically all of the ice cream for Regina and most of the towns within a radius of 75 miles.

The creamery at Melville last year manufactured 167,000 pounds of butter and this year 306,000 pounds, an increase of over 100 per cent.

Canora creamery showed a very substantial increase, last year making 98,000 pounds and this year 184,000 pounds, almost 100 per cent. increase.

The total for the 20 creameries operated by the company amounts to over one million pounds for the year ending November 1. This is an increase of over 500,000 pounds over last year.

RECOMMENDATIONS BY LABOR AND CAPITAL

Representatives of organized labor, of the great manufacturing interests of the country, and of technical organizations have agreed upon a policy to be recommended to the government. These recommendations deal with matters to be carried out in connection with the reconstruction period. The memorial, which was considered by the cabinet on December 4th, is the result of the conference held in Ottawa last week. The government assured the delegation of full consideration of the recommendations made.

It suggests in a general way the appointment of a Bureau of Public Welfare, the establishment of a bureau to take a survey of imports; the refining and manufacturing in Canada of raw materials; scientific and industrial research; establishment of a central empire authority on immigration; the immediate commencement of public works; co-operation with the provinces in the matter of technical education; an aggressive land settlement policy; establishment of employment bureaus; greater utilization and development of Canadian water powers; co-operation between the Militia Department and the government employment bureaus in the problems of demobilization; and the commencement of an "optimism campaign" in which the newspapers of the country will be asked to assist.

The memorial was presented by Tom Moore, president of the Trades and Labor Congress; G. M. Murray, general secretary of the Canadian Manufacturers' Association, and S. Wills MacLachlan, representing the joint committee of technical organizations.

Mr. H. J. Daly, whose appointment as director of the Repatriation and Employment Committee of the Dominion Government was announced on November 26th, has already undertaken his duties and has gathered together the heads of all departments concerned in the work of reabsorption for the purpose of co-ordinating and defining their activities. He is to make a report immediately on the condition of the government departments for the work.

PERSONAL NOTES

Mr. J. S. Bache, a prominent New York financier, has been elected president of the Dome Mines, in succession to the late J. R. DeLamar.

Mr. J. F. McGillivray, K.C., of Kenora, who has been Crown Attorney there for a number of years, has been appointed Chief Taxing Officer for Ontario.

Mr. W. R. Reek, formerly Deputy Minister of Agriculture for New Brunswick, has joined the Livestock Branch of the Federal Department of Agriculture at Ottawa, as assistant to H. S. Arkell, Livestock Commissioner.

Mr. Mark Bredin, at a meeting of directors of the Canada Bread Company, was elected to the presidency to succeed the late Cawthra Mulock. E. H. Laschinger becomes vice-president in succession to Mr. Bredin.

Mr. H. W. Wood, president of the United Farmers of Alberta, and W. A. Dryden, of Brooklin, Ont., have been nominated by the Canadian Council of Agriculture to represent respectively the Canadian grain producers and the Canadian live stock interests on the Canadian Trade Mission to the Peace Conference.

Mr. C. H. Cahan, K.C., who has been Director of Public Safety, will resign by January 1st. He was appointed at the request of Sir Robert Borden to make investigation into the operations of Bolsheviki, I.W.W., and similar organizations, and to make recommendations. He has completed his report and has made his recommendations.

Mr. J. E. Houseman has been appointed vice-president of the North American Pulp & Paper Co., and general manager of its chief subsidiaries, the Chicoutimi Pulp Co., the St. Lawrence Pulp and Lumber Co., and the Roberval and Saguenay Railway. He will make his headquarters at Chicoutimi. Mr. Houseman was for many years on the staff of the Molsons Bank.

Mr. Stanley E. Elkin, president and general manager of the Maritime Nail Company, Ltd., of St. John, N.B., which city he represents in the Dominion Parliament, has been appointed to the directorate of the Union Bank of Canada. This bank is endeavoring to make its directorate as representative as possible of the whole of Canada. Mr. W. H. Malkin, of British Columbia, was recently added to the board.

OBITUARIES.

Mr. J. B. Brown, city clerk of Prince Albert, died recently from pneumonia.

Mr. T. Beresford Phepoe, who was in earlier years the manager at Winnipeg for the Molsons Bank, died last week in Vancouver and was buried in Mountain View cemetery there.

Mr. Richard Yates Ellis, director of P. W. Ellis & Co., manufacturing jewelers, Toronto, died at the residence, 410 Sherbourne Street on Dec. 10th, following a brief illness of pneumonia.

Mr. W. F. Heal, of Moose Jaw, honorary secretary-treasurer of the Union of Saskatchewan Municipalities for the past eight years, died recently from pneumonia, following Spanish influenza.

MONTREAL EXCHANGE DELEGATION VISIT NEW YORK

A delegation from the Montreal Stock Exchange, made up of P. P. Cowans, C. Simpson Garland, and Alfred Bowser, returned from New York on December 9th, after discussing matters of mutual interest with officials of the New York Stock Exchange.

The delegation had no announcement to make on its return, because discussion was concerned chiefly with certain hypothetical questions. If the New York Stock Exchange desires to increase its commission charges, international investment business will be complicated here in a number of wasy. But New York has so far taken no definite steps to increase commissions, and there is still much difference of opinion as to whether they will.

THE UNITED FARMERS OF ONTARIO

The fifth annual convention of the United Farmers of Ontario will be held in Toronto on December 17th, 1918. This organization was formed in March, 1914, and now comprises 615 separate clubs, with a total membership of 25,000. There are between 175,000 and 200,000 farmers in Ontario, so that the membership has extended to one in seven or eight of the eligible population. The United Farmers have taken some part in politics but do not anticipate an extensive programme of this kind until their membership is increased still further.

Regarding the daily paper which it is planned to publish, Mr. J. J. Morrison, the secretary-treasurer of the association, states that this will be discussed at the convention. The organization of the paper was postponed until the Victory Loan campaign was completed.

INVESTMENTS AND THE MARKET

News and Notes of Active Companies—Their Financing, Operations, Developments, Extensions, Dividends and Future Plans

INVESTMENTS AND THE MARKET

News and Notes of Active Companies—Their Financing, Operations, Developments, Extensions, Dividends and Future Plans

Goodyear Tire Company.—The report of the company for the year ended October 31, 1918, shows a net profit of $15,388,190, compared with $14,044,216 for the preceding year.

Imperial Tobacco Company of Canada.—The annual statement of the company for the year ended September 30th, shows net profits of $3,624,487.51. After deducting preferred and ordinary dividends, the surplus is $1,522,537.51. The total surplus now stands at $2,581,216.57. The balance sheet shows cash in bank $378,195.75, and the total assets $43,029,659.60.

A. MacDonald Company.—The proposal for the funding of dividend arrears on A. MacDonald Company, preferred shares, have met with such a substantial measure of support that the plan is pretty well assured to go through. The success of this, combined with assurance of good times ahead for the west, where the company operates, is expected to find reflection in the common shares which have been quiet for some time past.

Hollinger Consolidated Gold Mines.—The output of gold from the company's mines for the year 1918 will exceed $6,250,000. This utterly eclipses any previous record in the history of the company, and is the greatest yield of any precious metal mine for any one year in the history of the Dominion. Net earnings may be in the vicinity of $3,000,000 for the year, or about 11 per cent. on the company's issued capital.

Nipissing Mining Company.—The company has declared the regular quarterly dividend of 5 per cent., together with a 5 per cent. bonus, both payable January 20th to shareholders of record December 31st. The financial standing of the company as at December 7th, is as follows: Cash in bank, including Canadian war bonds, $2,240,807; value of ore and bullion in transit, $351,602; value of ore on hand and ready for shipment, $977,270; total, $3,789,759.

Toronto Railway Company.—A sale of $1,000,000 2-year 6 per cent. notes to Wm. A. Read and Company, New York, by the company has just been announced. For the eight months ended August 31, 1918, the company reported gross earnings of $4,365,546, and net earnings before taxes and payments to the city of $1,623,770, as against gross earnings of $4,042,174 and net earnings of $1,628,580 for the same period in 1917. Undivided surplus as at August 31, 1918, was nearly $6,000,000.

South Canada Power Company.—Gross earnings of the company increased $9,777 in October, while net earnings increased $5,886, the latter being equal to a 40 per cent. gain. Comparisons with October last year are as follow:—

	1918.	1917.	Increase.
Gross	$45,047	$35,269	$9,777
Expenses	24,459	20,567	3,891
Net	$20,588	$14,701	$5,886

Shawinigan Water and Power Company.—After the dividend meeting of the company on December 4th, J. E. Aldred, president, stated that the company was closing the biggest year in its history, so far as volume of business was concerned, and, without giving possible figures of the earnings, he stated that he believed they would be entirely satisfactory to the shareholders. The acetone plant built for war work during the war period, would fit into the plans of the future and that the second plant had been built with funds provided by the American government, and therefore would be no loss to the company. What the plans for the future were, Mr. Aldred did not say, but he was very optimistic; although he believed there would be a period of hesitancy owing to the fact that new enterprises would be inclined to wait until the cost of construction would come down.

Brompton Pulp and Paper Company.—The company has further extended its producing business across the border by the acquisition of the O'Dell Manufacturing Company, of Groveton, New Hampshire, which has been reorganized entirely under Brompton control as the Groveton Paper Company, Inc. The O'Dell Company owns 31,000 acres of timber limits and has an output of 200 tons a day, 100 of sulphite pulp, 60 of fibre paper and the balance of bond papers. This will make the Brompton output one of the most diversified of any Canadian mill. The O'Dell mills are situated between the Brompton and the Claremont limits purchased last winter. Groveton is on the Grand Trunk Railway, about 100 miles from Brompton's groundwood mill.

Standard Trusts Company.—This company has declared its half-yearly dividend at the rate of 9 per cent. per annum. The Standard Trusts Company is one of the oldest financial institutions in the Canadian West, and its management has been continuously conservative and successful. At the end of December, 1917, the capital stock was $750,000,000, but since that date an additional $250,000,000 has been issued. The reserve is $500,000, in addition to which there is a balance of $27,158 in the profit and loss account. Total assets are $14,780,149, and the company is also trustee for bond issues amounting to over $10,000,000. At the end of 1908, when the company's paid-up capital was $213,033, the reserve fund stood at $60,000 and the profit and loss at an insignificant figure. The progress made in the intervening period is evident, therefore, and ample dividends have been maintained during that time.

CANADIAN NORTHERN AUDIT DEPARTMENT

The following appointments are announced in connection with the Audit Department of the Canadian Northern Railway System, the offices in each case to be at Toronto: Mr. C. E. Friend, has been appointed comptroller; Mr. J. D. Morton, has been appointed general auditor; Mr. R. S. Gosset, auditor of disbursements; Mr. T. W. Ralph, assistant auditor of disbursements; Mr. H. G. Foreman, chief accountant; Mr. W. F. Anderson, auditor of freight receipts; Mr. E. A. Kendree, assistant auditor of freight receipts; Mr. H. G. Hanna, auditor of passenger receipts; Mr, F. J. Gascoigne, assistant auditor of passenger receipts; Mr. A. C. Egan, auditor of agencies; Mr. W. L. Brown, assistant auditor of agencies; Mr. H. G. Parker, auditor of freight overcharges.

BRITISH CATTLE SUPPLY COMPANY

The company known as the British Cattle Supply Company, which was incorporated in the spring of 1917, and is now in liquidation, is being sued by some of the shareholders for deceit and for damages for misrepresentations contained in the prospectus. Two shareholders who purchased substantial blocks of stock are bringing action through Johnston, McKay, Dods and Grant, of Toronto. This firm also states that while these two writs are the only ones that have been so far issued, there are about 25 more being prepared.

The defendants are: T. E. Good, of New York; R. H. McIlroy, of Carp, Ont.; Geo. C. Beale, of Montreal; William G. Beamish, of Toronto; S. M. Boren, of Montreal; A. N. Lambert, of Hamilton; J. C. Doane, of Winnipeg; Harry Talbot, of Toronto; Hon. Rufus Pope, of Ottawa; Hon. Senator Ratz, of Ottawa; Hon. S. G. McHugh, of Ottawa; Senator Talbot, of Ottawa; T. A. Neely, of Toronto; and Hon. Nelson Monteith, of Stratford.

A NARRATIVE

"It seemed but over-night when we reached the great Hinterland back of Lake Superior, with its innumerable rivers clothed to the edge with a tangle of forest, interspersed here and there by rocky ridges—the bright green of the underbrush and the shadowy white of the birch breaking indiscriminately the dark evergreen of the predominating pines.

"Nearing the head of the Lakes the country becomes more broken and Nipigon Forest Reserve with its world-famed trout streams is soon traversed. At Port Arthur we saw the largest grain elevator on the Continent, and were informed that the immense shipbuilding industries here, and its rapidly increasing trade as the distributing point for the great undeveloped territories lying to the north and west, is rapidly developing a great, metropolitan city. Leaving Port Arthur, the route lies through the picturesque Rainy Lakes district and Quebec National Park, reaching Winnipeg by a fertile and gradually rolling prairie.

"West of Winnipeg the prairie continued with its teeming activities, and innumerable clusters of grain elevators standing silent sentinel will long be remembered as we rolled along over the flat country. A choice of routes is available west of Winnipeg, taking one either through Brandon, Regina and Saskatoon, the southern route: through the Central Districts; or by Northern Manitoba and Saskatchewan to Calgary and Edmonton. We chose the second because of its through train service. At Calgary and at Edmonton our short stay was well spent in studying the great commercial and agricultural opportunities of this Last Great West with its infinite possibilities as the outpost of a mighty nation. Here, work, enterprise and prosperity go hand in hand.

"From Edmonton west the prairie is soon replaced by the haze-clothed mountains in the distance, and following the banks of the Athabaska River the Canadian Northern passes through Jasper National Park, a second Yellowstone, to Yellowhead Pass—the Great Divide. Yellowhead, as tradition has it, is named after a mighty Iroquois-Scotch trapper known as Tete Jaune, or Yellowhead, who bid or cached his furs at this spot and stood a tower of strength and a goodly beacon to the luckless wayfarer in the tempestuous days of old.

"The scenery at this point is grand—a rocky gorge covered with dark pines and light green shrub above surmount the seething currents of the Fraser, while towering on either side and lost in the clouds are the snow-capped peaks of the giant Mount Robson, the highest known in Canada. Such is the surrounding chosen by a grateful country in its selection of a fitting tribute to the memory of the famous British nurse martyred by Germans in Belgium, October, 1915 'Mount Edith Cavell.'

"Journeying south from the Yellowhead we followed the Canoe and Albreda rivers, which are in turn succeeded by the North and Main Thompson rivers, reaching at Lytton the lower waters of the main Fraser. From here west we crossed and re-crossed, hugging its mighty and picturesque banks through to Vancouver.

"Nowhere in this mountainous and river-valley route of over 700 miles from the gateway to the Rockies clear through to the Pacific did it grow monotonous or time hang heavily, so insistent were the attractions which flashed past the windows of the comfortable Observation Car."

In addressing the Great War Veterans' Association and the People's Forum in Ottawa on November 24th, Senator Robertson, Minister of Labor, stated that since it has been possible to secure victory in the war by co-operation then it should be possible to put the forces of co-operation into practice in dealing with post war problems.

Sir Thomas Beck was the principal speaker at the two-day convention of the Ontario Municipal Electric and Hydro-Electric Associations held in Toronto recently. Other speakers included Controller C. A. Maguire, Toronto; George Wright, Toronto; John A. Derbyshire, Brockville; and Mayor Church of Toronto.

BANK SHARES GOOD INVESTMENTS

Graham, Sanson and Company, of Toronto, are calling the attention of investors to the merits of Canadian bank shares. It is pointed out that an increase in banking capital in Canada will be necessary soon.

"Conservative investors," says a circular issued by that firm, are turning their attention again to the bank shares, which are attractive at present prices. We are sending this circular to our clients, as we feel that possibly they have overlooked the rapid strides the Canadian banks have made during the last five years and the possibility of higher prices prevailing for the shares.

"Present market prices are on an average $50 below the book value of most bank shares, based upon capital, reserve funds, and undivided profits. The average yield on bank shares at this time is well over 6 per cent., with reasonable assurance that present interest return will work higher through increased dividends. Four very prosperous years have enabled banks to provide for doubtful assets and to put the numerous new branches opened prior to 1913 on a paying basis. Few branches have been established since 1914 and unprofitable branches have been closed.

"Banking profits come from the employment of the shareholders' capital (which includes reserves and undivided profits) and from the employment of the deposits of the public. The large increase in assets of all the banks reflects a corresponding increase in the deposits. In some cases this increase has been as high as 100 per cent., without any increase in capital stock in the meantime. Any great increase in deposits is reasonably certain to be followed by a corresponding increase in earnings and divided payments."

November was another record month for the North American Life, of Toronto. Received business was over $1,500,000, making the largest November in the history of the company. This is an increase of more than $660,000 over November, 1917. The three leading North American Life producers for the month of November were: H. W. Slipchenko, Saskatoon; J. A. Collins, Edmonton; and A. H. Westhaver, Saskatoon.

"THE DAWN OF A TO-MORROW"

The war having ended so happily it is believed that a better world will rise out of the ruin—More of beneficence, equality, fraternity and sympathy with "The Other Fellow" will prevail in the great "To-morrow" that is dawning. Life insurance embodies these great conceptions and will be one of the big movements that "Will Come Into Its Own." Now is the time to make Life Insurance your life work. The war has given the institution of Life Insurance a great impulse and it is appreciated to-day as never before It is a calling for men of the highest abilities and the finest character. Sell Life Insurance, and sell Mutual Life Insurance for the Mutual system is popular because it is based upon strictly democratic principles. If not as an agent then as a member you will be welcomed into our organization

The Mutual Life Assurance Co. of Canada

Waterloo Ontario

SECURITY

The benefits of Life Insurance are many sided Security for dependents; provision for old age; savings that are protected; and, not least, the SAFE feeling that sufficient Insurance affords.

Such security encourages enterprise. A great Insurance authority says:

> "By the safe provision of Life Insurance, the individual, freed from the dread of disaster, finds broader opportunities and DARES ACCEPT THEM."

This security is not a costly purchase. A very small saving provides for Life Insurance.

In The Great-West Policies the cost is remarkably low. More than that, the profit returns are exceptional. There are the soundest reasons for this—and these reasons, with all other particulars—will be fully explained to those who will write, stating their age and requirements to

PUBLICATIONS RECEIVED

Dominion Geological Survey Museum.—Bulletin No. 28. This is entitled "The Hawks of the Canadian Prairie Provinces in Their Relation to Agriculture."

The Indispensable Middleman.—Published by the Alexander-Hamilton Institute of New York as modern business talk No. 37. Explains the real function of the middleman in handling merchandise.

Financial Statistics of States.—Published by the Bureau of the Census, Department of Commerce, Washington, D.C. This volume gives complete financial statistics for the year 1917 for all of the states of the American Union. A very full account is also given regarding the method of collection and classification.

Sir George Arthur and His Administration of Upper Canada.—This is Bulletin Number 28 of Queen's University, Kingston, Ontario, and is written by Mr. Walter Sage. Sir George Arthur was the last Lieutenant-Governor of Canada before the Act of Union of 1841, and he was in office, therefore, during a critical period in the history of the Canadian provinces.

Surgical Instrument Industry in the United States.—Bulletin No. 7 of the Tariff Information Series, published by the United States Tariff Commission. This booklet of 54 pages gives general information regarding surgical instruments, their manufacture and the progress which had been made in the United States before the war. The new conditions which now exist are also described.

Contributions to Canadian Biology.—Issued as a supplement of the Seventh Annual Report of the Department of Naval Service Fisheries Branch. The results of the sixteen separate studies are contained in this volume accompanied by a preface by Professor E. E. Prince, chairman of the Biological Board. The studies were all in the marine biology.

Retail Store Management.—By Herbert S. Collins. Published as modern business lecture No. 18 by the Alexander-Hamilton Institute, New York. Mr. Collins is sales manager of the United Cigar Stores, one of the most successful systems of retail chain stores, and has been with that organization since it commenced in 1900. His writing, therefore, is of great interest to all who are engaged in retail selling.

Canada and the Future.—This is a booklet prepared by Drake-Ballard Company of Minneapolis, Minn., bond dealers. A very optimistic view is taken of the future of Canada, and effective arguments for this view are deduced from Canada's recent history. Two main reasons are given for Canada's economic superiority. These are, in the first place, the great wealth in natural resources, and in the second place, the character of the population.

Dominion Geological Survey.—Summary Report 1917, Part B. This volume contains an account of explorations in the Yukon Territory; Economic Geology of the Hazelton District, B.C.; Reconnaissance along the Pacific Great Eastern Railway Between Squamish and Lillooet; Indian River Copper Deposits, Vancouver Mining Division; Note on the Occurrences of Diatomaceous Earth, Clay, and Magnesite along the Route of the Pacific Great Eastern Railway; Investigation in the Slocan District, B.C.

Trading with Latin America. Published by the Irving National Bank of New York.

It is obviously quite impossible that a single book could give all the information required for different classes of exporters or possible exporters to Latin-America. This publication, however, does the most practicable thing; it indicates where such information can be obtained. Complete descriptions are, however, included regarding the procedure to be gone through in arranging transportation and financing all exporters to Mexico, Central and South America. It is pointed out especially that all countries in South America are not alike, but vary according to latitude, altitude, and degree of civilization. The possibilities of business, moreover, are not to be estimated by size because the population is much less in proportion to area than is that of North America. Before engaging in business transactions, therefore, it is necessary for the exporting firm to become thoroughly acquainted with all the details regarding markets, competitors, transportation facilities, customs regulations, methods of quoting prices and transmission of payment. Specimen forms are included showing what documents have to be used in connection with trade of this kind.

Suicide of Monarchy.—By Eugene de Schelking. Published by Macmillan and Company, Toronto, at $2.00.

The author of this book is not only a native-born Russian, but also served for many years in diplomatic work for the Imperial Russian government. A large part of his time was spent in Berlin, and he was also at Paris and Munich. There have been quite a number of books written on Russia, in the English language, by native-born Russians who are competent to describe that nation with its geography, population, industries, religion and social customs. Mr. de Schelking, however, is also able to speak with authority upon the subject of international relations and diplomacy, one which is practically sealed to the ordinary citizen. The book describes the personalities of ex-Czar Nicholas the Second of Russia and his predecessor, Alexander the Third, ex-Kaiser William the Second of Germany, and ex-Kaiser Ferdinand of Bulgaria. New light is also thrown upon the reigns of these monarchs and upon such international complications as the Morocco incident of 1907.

Citizens of the British Empire are always lenient towards British diplomacy, and sometimes over-critical of that of foreign nations. For this reason a book such as this which is obviously not written with a view to please the British public, but rather to instruct it, is especially valuable. The central subject is, however, the monarchies of central Europe, the British Empire being introduced only casually.

The author's belief is that the policy pursued by such monarchs as the Kaiser of Bulgaria and the Emperor of Germany could lead to no other result than self-destruction. Nicholas the Second of Russia, he says, was forced to abdicate through the lack of that strength which characterized his predecessor on the throne. The book, which was written before the reported abdication of the German Emperor, was held up for some time by the Canadian censor; but the author's predictions as regards Germany have already come true.

Wrigley's British Columbia Directory. Published by Wrigley Directories, Limited, Metropolitan Building, Vancouver, B.C. Price, $10.

This is a new publication, in the form of a combined year book, gazetteer and business directory. The work, which has occupied a staff of over twenty persons for the last ten months, is a compendium of classified information in regard to the province.

The first sixty out of the 1,000 pages in the book give a list of the officials of the various government departments, both at Victoria and throughout the province, with an historical review and short articles by the various provincial ministers outlining the jurisdiction of their departments, and indicating the great resources of the province.

In the gazetteer portion of the work a total of 2,010 cities, towns, villages and settlements are listed, in addition to 4,193 geographical points, enabling the reader to at once obtain the location and description of any town, village, mountain or lake, etc. In all places where local directories are not published, the inhabitants are listed in the provincial directory. In each instance the business or employment is given. In the case of farmers and ranchers, the branch of agriculture followed is given, making the directory of very special value to business firms, or to parties seeking to identify others by their occupation. Towns as large as Nelson, with populations over 6,000, are thus described, and its inhabitants directoried, equally with the smaller settlements on the banks of the Upper Skeena, with only half a dozen inhabitants.

A classified business directory, with all the business men of the province classified under 1,035 different classifications, is given, forming a valuable business mailing list of the province. At the end of the directory a novel section comprises a directory of trade names, brands and trademarks, so that the merchant or householder who knows only the trade name can immediately find on reference the manufacturer or agent in British Columbia who makes or handles the required line of goods.

As part of the programme to make the work useful to the business interests of the province at a time when it is attracting attention abroad, the publishers are planning to distribute copies in the leading hotels and reading rooms in the United States.

NEW INCORPORATIONS

Some Large Concerns Formed Recently in Montreal and Quebec

The following is a list of companies incorporated during the week ended November 30th, with the capital and the names of directors:—

Hawkesbury, Ont.—Manson's, Limited, $300,000; J. L. Ross, A. W. Holmested, N. Sinclair.

Quebec, Que.—Compagnie Forestiere Bourmont, $190,000; A. Beaulieu, M. L. Beaulieu, A. Morency.

Windsor, Ont.—Flexible Metallic Packing Company, Limited, $25,000; W. H. Burnham, F. W. Prentice, F. E. Payne.

Hamilton, Ont.—MacPherson Manufacturing Company, Limited, $50,000; J. A. MacPherson, L. T. Hibbert, P. L. Philips. Manufacturers and Distributors, Limited, $50,000; J. C. Fennell, R. J. Kennedy, H. W. Dickin. Antoinette Hat Shops, Limited, $50,000; J. C. Fennell, R. J. Kennedy, H. W. Dickin. The Ford-Smith Machine Company, Limited, $500,000; A. H. Gibson, G. H. Levy, C. H. Higgins.

Montreal, Que.—Edgewood Shipping Company, Limited, $40,000; W. F. Chipman, F. G. Bush, G. R. Drennan. Genest and Genest, Limited, $24,000; J. B. R. Genest, J. E. M. Genest, M. Eugenie. New Brassware Company of Canada, Limited, $10,000; C. Levesque, J. L. Labrosse, S. Labrosse. Dominion Rubber System, Limited, $4,750,000; Em. M. McDougall, J. J. Creelman, P. F. Casgrain. The Vogue Waist and Dress Company, Limited, $20,000; M. Jacobson, J. Levy, M. Maron.

RECENT FIRES

The Monetary Times' Weekly Register of Fire Losses and Insurance

Chatham, Ont.—December 3—Old shack of F. A. Robert, on Llewelyn St., was damaged. Caused by carelessness with lighted cigar.

Goderich, Ont.—December 4—Barn of S. Reynolds was damaged.

Halifax, N.S.—December 7—Premises of the Globe Laundry Company were damaged. Estimated loss, $50,000.

Hamilton, Ont.—December 7—Store of J. Dale, 225 Barton St. E., was damaged. Estimated loss, $200.

Kitchener, Ont.—December 5—House of W. H. Rosenbusch was damaged. Estimated loss, $1,000.

Mohawk, Ont.—December 5—Building containing five planes at the aviation camp was destroyed.

Montreal, Que.—December 2—Bar mill of the Dominion Steel Corporation was damaged. Estimated loss, $2,000.

Ottawa, Ont.—December 5—Home of Mr. W. C. Percival, 229 Lisgar Street, was damaged. Caused by defective stove. Estimated loss, $300, covered by insurance.

Quebec, Que.—December 7—Brick dwelling at 76 De Salaberry St., was damaged. Caused by defective wiring. Estimated loss, $1,000.

Toronto, Ont.—December 12—Building of Redman and Jinks, and valuable motor car, were destroyed. Estimated loss, $2,000.

Welland, Ont.—December 6—The Maple Leaf Milling Company's mill was destroyed. Estimated loss, $100,000.

RAILROAD EARNINGS

The following are the earnings of Canada's transcontinental railways for the first week in December:—

Canadian Pacific Railway.

	1917.	1918.	Inc. or dec.
Dec. 7	$3,289,000	$3,480,000	+ $191,000

Grand Trunk Railway.

Dec. 7	$ 861,442	$1,379,502	+ $518,060

Canadian Northern Railway.

Dec. 7	$ 916,000	$1,133,100	+ $217,100

All condensed advertisements must conform to usual style. Condensed advertisements, on account of the very low rates charged for them, are payable in advance. 50 per cent extra if charged

WANTED

The Quebec Board of Trade is looking for an energetic and thorough business man as Trade Commissioner for the City of Quebec. Will be required to have the following qualifications: Well educated, able to speak in public, of good address, sound business judgment. Prefer one capable of speaking English and French. Good salary will be paid to right man. Contract for four years. Reply to undersigned giving age (state if married or single), references, salary expected and any further information as to experience and capacity to fill this position. Also mention date would be able to commence duty.

O. W. BEDARD, *President*,
Quebec Board of Trade,
Quebec.

ADDITIONAL INFORMATION CONCERNING FIRES ALREADY REPORTED

Quebec, Que.—The total loss in property and stock during the month of November amounted to $64,836. The insurance on the damaged property amounted to $78,100, while the insurance on the damaged stock and furniture amounted to $168,200. The loss on non-insured property amounted to $15.

Montreal, Que.—November 29—Premises of the Bannockburn Clothing Manufacturer, 319 St. James St., were damaged. The following companies are interested: Yorkshire, $5,000; Rochester, $2,500; London and Lancashire, $2,500; Great American, $5,000; Caledonian, $1,500; Northern, $4,500; General Fire, $1,500; British Empire Underwriters, $1,500; Hartford, $3,000; London Assurance, $3,000; Strathcona $2,500; London Guarantee, $2,500; total, $35,000; Loss, about $25,000.

Toronto, Ont.—November 29—The plant of the British Forgings, Limited, was damaged. The following is a list of companies interested: Occidental, $25,000; Minnesota Underwriters, $20,000; British Colonial, $20,000; Imperial Underwriters, $15,000; Alliance of England, $30,000; Providence Washington, $30,000; Protector Underwriters, $5,000; Hand in Hand, $10,000; Queen City, $10,000; Springfield, $25,000; New York Underwriters, $50,000; Niagara, $40,000; Great American, $25,000; General of Perth, $15,000; Globe and Rutgers, $25,000; Phœnix of Hartford, $5,000; London Underwriters, $10,000; Hartford, $40,000; Lloyds, $100,000; Hamilton New York, $20,000; Pacific New York, $15,000; North River, $25,000; United States, $25,000; Richmond, $25,000; Peoples National, $15,000; Atlantic City, $10,000; North Branch and Sundbury, $10,000; New York National, $10,000; Georgina Home, $15,000; Rhode Island, $15,000; Connecticut, $5,000; Strathcona, $7,500; London Mutual, $5,000; London and Lancashire, $310,000; Home, $75,000; Norwich Union, $50,000; Sun, $35,000; Ocean, $30,000; British Crown, $25,000; Hartford, $85,000; Montreal Underwriters, $20,000; Western, $50,000; Rochester Underwriters, $15,000; Pacific Coast, $5,000; Northern, $30,000; Pennsylvania, $15,000; Century, $5,000; Westchester, $10,000; Continental, $25,000; Alliance of Philadelphia, $20,000; Commercial Union, $60,000; British Dominions, $10,000; Canada National, $10,000; British-America, $50,000; Canadian, $7,500; Caledonian, $10,000; Equitable, $5,000; Fireman's Fund, $10,000; General of Paris, $7,500; London Assurance, $20,000; North Empire, $10,000; North British and Mercantile, $50,000; Minnesota Underwriters, $5,000; Royal, $45,000; Queen, $20,000; Hudson Bay, $15,000; Lloyds, $155,000; Scottish Union, $250,000; St. Lawrence Underwriters, $5,000; Stuyvesant, $10,000; National of Paris, $20,000; Mount Royal, $40,000; London Mutual, $10,000; Gore Mutual, $5,000; Fidelity Underwriters, $15,000; Dominion, $7,500; Palatine, $30,000; North America, $50,000; British Empire, $10,000; Canada Accident, $15,000; Empire Liability, $30,000; Aetna, $30,000; Fidelity-Phenix, $30,000; London Guarantee and Accident, $25,000; Fire Insurance of Canada, $10,000; total, $2,365,000. Loss about $200,000.

Toronto, Ont.—November 29—Building and machinery of the R. Allender Company were damaged. Estimated loss, $3,030. Insurance carried to the extent of $2,000 in the Continental Fire Insurance Company.

SUPPORT GIVEN FRENCH LOAN

Among the larger subscriptions so far received for the Canadian offering of France's Loan of Liberation is one of 525,000 francs from the Royal Bank of Canada.

In confirming the statement that the bank had entered an application for the loan, C. E. Neill, general manager of the Royal, stated that French Rentes, selling at a price to yield 5.70 per cent., naturally appealed to the bank as a good investment, while there was the further important consideration that every dollar subscribed would help to maintain Canada's foreign trade.

The Council of the Winnipeg Grain Exchange has nominated Robert Magill, secretary of the Exchange, as a representative of that body to go overseas to attend the Peace Conference. If accepted, he will be the only representative of the Exchange. The Exchange also nominated George Fisher, of the Scottish Co-operative Society, as unofficial delegate to act in an advisory capacity. Magill's nomination has been submitted to Ottawa, it is understood.

Canadian Federal Finance

Our Expenditure is Relatively Greater than that of the United States or Great Britain—Summary of Revenues and Expenditures During War Period—Queen's University Professor Reviews Dominion Finances in Bulletin Published by Queen's University.

By O. D. SKELTON

IN the current fiscal year the Dominion government is faced with the task of raising for our civil budget, for our direct war expenditure and for loans to our ally, Great Britain, over $980,000,000. In a world that talks in billions, this may not seem a great amount. Compared with the $24,000,000,000 to be voted by the United States or the $14,000,000,000 of the British budget, it seems little. Compared with the greatness and the urgency of the cause for which we fight, it is as dust in the balance. But compared with peace-time budgets and with peace-time resources, as we judged them, it is colossal. It means that in a single year we must raise a sum greater than the total expenditure of the Dominion, on current or consolidated fund account, during the whole generation from 1867 to 1900. It means that we must raise in a year practically the amount that the federal government of that populous, wealthy and certainly not over-economical country, the United States, was spending before the war. It means that this task is to be faced by a country which, even before the war, had been spending lavishly and taxing heavily. With one-fourteenth the population of the United States, we were spending on federal purposes one-sixth as much, while the total tax-bill of the average Canadian was, contrary to current opinion, clearly heavier than that of the average British taxpayer.

The task before us, then, is so great as to warrant the close and constant attention not merely of the responsible authorities, the powers that be at Ottawa, but of every citizen in the Dominion. In a previous article, published two years ago,* an attempt was made to contribute to the discussion of the question by a summary of the facts as to federal revenue and expenditure, and a review of the possible sources of revenue, leading to an advocacy of a federal income tax. That essential reform, then scouted in official quarters, has now become an important and doubtless a permanent feature of our fiscal system. Other issues have risen, and some of the old issues are still before us. In the present article the purpose is to summarize the facts as to our war finance, to comment briefly on the methods followed, and to consider, still more briefly, how the burdens of the future may be met.

The total expenditure of the Dominion for war purposes, including outlays in France and England, as well as in Canada, but not including advances to Allies, up to March 31st, 1918—the end of the fiscal year 1917-18—was $879,000,000. The total up to August 1st, 1918, that is, for four complete years of war, will be practically a billion dollars. The exact official figures follow:—

Canadian War Expenditure, 1914-18.

Fiscal year, 1914-15 (eight months of war)	$ 60,750,476
" " 1915-16	166,197,755
" " 1916-17	306,488,874
" " 1917-18 (returns not yet complete)	343,834,688
	$877,271,794
" " 1918-19, to August 1st, 1918 (returns not yet complete)	113,720,046
Total for four years of war	$990,991,841

In the four fiscal years 1914-15 to 1917-18, the total expenditure of the Dominion for civil purposes was approximately three-quarters of a billion. This covers both the expenditure on current or consolidated fund account and the capital expenditure, including construction of railways and other public works, along with railway subsidies, loan discount and minor charges. A detailed table follows:—

Fiscal year.	Consolidated fund.	Capital and other.	Total.
1914-15	$135.523,206	$ 51,824,843	$187,348,050
1915-16	130.350,726	43,154,020	173.504,747
1916-17	148.599,343	43,114,960	191,714,303
1917-18	176,923,645 (Approx.)	57,799,611	234,723,257
	$591,396,922	$195,893,436	$787,290,358

The total expenditure in the four fiscal years 1914 to 1918 is, therefore, as follows:—

Fiscal Years 1914-18.

War expenditure	$ 877,271,794
Consolidated fund	591.396,922
Capital and other	195.893,436
	$1,664.562,153

During the same period the consolidated fund revenue, that is, receipts from other sources than loans, and including taxes and income from lands and public utilities, was about $800,000,000, or slightly less than half the total expenditure. In the tables below the excess of expenditures over receipts is shown for each year:—

---

*"Federal Finance," I, in Queen's Quarterly, July, 1915, and printed as Bulletin No. 16 of the departments of History and of Political and Economic Science, Queen's University.

SUMMARY OF REVENUE AND EXPENDITURES, 1914-18.

Fiscal Year 1914-15.

Consolidated fund receipts	$133,073,481
Sinking fund	1,645,811
Net addition to debt	113,379,233
	$248,098,520
Consolidated fund expenditure	$135,523,206
Capital and other expense (including subsidies and loan discounts)	51,824,843
War expenditure	60,750,476
	$248,098,526

Fiscal Year 1915-16.

Consolidated fund receipts	$172,147,838
Other receipts	1,555
Sinking fund	1,773,021
Net addition to debt	165,780,087
	$339,702,502
Consolidated fund expenditure	$130,350,726
Capital and other expense	43,154,020
War expenditure	166,197,755
	$339,702,502

Fiscal Year 1916-17.

Consolidated fund receipts	$232,701,294
Sinking fund	1,471,697
Net addition to debt	264,030,126
	$498,203,118
Consolidated fund expenditure	$148,599,343
Capital and other expense	43,114,960
War expenditure	306,488,814
	$498,203,118

Fiscal Year 1917-18 (approx).

Consolidated fund receipts	$260,566,379
Sinking fund	3,183,492
Net addition to debt	314,808,073
	$578,557,946
Consolidated fund expenditure	$176,923,645
Capital and other expense	57,799,611
War expenditure	343,834,688
	$578,557,946

Total Increase of Debt.

Net public debt, March 31st, 1914		$ 335,996,850
Fiscal year 1914-15	$113,379,233	
" " 1915-16	165,780,087	
" " 1916-17	264,030,126	
" " 1917-18	314,808,073	
		$ 857,997,521
Net debt, March 31st, 1918 (approximate)		$1,193,994,371

It will be noted that in the first year, 1914-15, the revenue, so far from providing a surplus to be applied on war expenditure, did not even cover the civil budget, and that a sum nearly double the amount spent on the war was added to the national debt. In the second year, civil receipts and expenditures balanced, leaving the whole war outlay to be met by borrowing. In the third and fourth years there were substantial surpluses over all civil expenditure, making it possible to apply $41,000,000 in one year and $20,000,000 in the other to the principal of the war outlay. Taking the four years together, there was a surplus of revenue over all civil expenditure of only $12,000,000. In other words, of the total principal of the war outlay to April 1st, 1918, $877,000,000, only $12,000,000, or less than 2 per cent., has been met out of current revenues. In the past year a better showing was made, the surplus available for application on war outlay being $26,000,000, or 8 per cent. In 1918-19 it is estimated that the surplus will be $40,000,000, or 9 per cent. of the war outlay. It must be borne in mind that a heavy and rapidly increasing burden of war interest and pensions, about $70,000,000 in all, was met out of current revenue in this period. On the other hand, the civil budget has been relieved of the greater part of ordinary military and naval expenditure, running about $15,000,000 a year in peace-time.

It may be suggested that all revenues in excess of consolidated fund expenditure should be considered as a surplus applicable on the principal of the war outlay, and that we should consider that a portion of our increased debt has really been incurred for capital and other expenditure not ordinarily to be met out of current income. There is, of course, a case for the contention that capital, non-recurring expenditure should be met by loans, not from current revenue. When the capital outlays recur year after year, however, this contention loses force. In any case, the practical point is that in normal pre-war years only a part, or none at all, of the capital expenditure required to be met by loans. Ordinary revenue of late years had covered both current and capital outlays, including the cost of railway construction and subsidies. The debt in 1914 was less than in 1910 and only $100,000,000 more than it was a quarter century before, or an average shortage of only $4,000,000 a year. This fact indicates the basis to be taken in comparison of war with pre-war finance.

War-Time Loans.

The funds to meet these larger outlays have come from loans and from taxes—the revenues from public works merely offsetting at best the current expenditure in these services.

The loans have taken the following forms:—

1. Temporary advances from Canadian banks, usually through the sale of Treasury Bills, repaid out of public loans.

2. Debenture Stock, issued in sums of $500 and multiples thereof bearing 5 per cent. interest, and maturing in October, 1919, holders having the privilege of surrendering at par in payment on war loan issue.

3. Public loans in Great Britain, the United States and Canada. A brief summary follows:—

(a) Loans floated in United Kingdom	
March, 1915, 4½ per cent. at 99½, 5-10 years	$ 23,332,500
(b) Loans floated in the United States:	
August, 1915, 5 per cent., one-year notes at 100, two-year notes at 99½, less commission	45,000,000
March, 1916, 5 per cent., 5-10-15 years at 99.56, 99.12 and 94.94	75,000,000
August, 1917, 5 per cent. two-year notes at 98	100,000,000
Summer, 1918, loan made in New York	65,000,000
(c) Loans floated in Canada:	
November, 1915, 5 per cent., 10 years, at 97½ (24,862 subscribers)	100,000,000
September, 1916, 5 per cent., 15 years, at 97½ (34,526 subscribers)	100,000,000
March, 1917, 5 per cent., 20 years, at 96 (41,263 subscribers)	150,000,000
November, 1917, 5½ per cent., 5-10-20 years, at 100 (802,000 subscribers)	400,000,000

4. Advances from British Government. Canada is bearing the full cost of maintaining her forces in the field.

To cover the expenditures made directly by the Canadian government in Great Britain and France, Canada has borrowed on open account from the British government. Further, to meet the cost of supplies and munitions served to our troops in the field from British sources, Canada has agreed to pay to the British government the sum of 6s. 3d. (now raised to 9s. 4d.) per man per day. On the other hand, the Canadian government advances to the British government a large part of the funds required for its purchases of munitions and other supplies in Canada—the balance coming from loans from the Canadian banks on Treasury Bills and from the United States government. In addition, Canada in 1916 paid some $107,000,000 on account by delivering to British government dollar bonds for that sum, to be used as collateral for a loan in New York. For the first two years the balance in this open account was against Canada; since then it has been in our favor. On March 31st, 1918, the Canadian government had lent Great Britain $100,000,000 more than it had borrowed; by August 1st, 1918, the net indebtedness of Britain to Canada was $140,000,000.

5. War Savings Certificates. Since January, 1917, certificates of $20, $50 and $100, repayable in three years from date of issue, and sold at $21.50, $43 and $86, respectively, have been offered for sale in Canada. Later, $10 certificates were placed on sale. By March 31st, 1918, some $12,500,000 had been sold.

6. Note Issue. In the early months of the war the government secured a forced loan without interest by the issue of inconvertible paper. The Finance Act, 1914, increased the limit of Dominion note issue, below which only a 25 per cent. gold backing is required, from $30,000,000 to $50,000,000, thus giving $15,000,000 free. By order-in-council, in these same first months of the war, confirmed later by legislation, an issue of $16,000,000 in Dominion notes was made to the Canadian Northern and Grand Trunk Pacific against pledged securities. No recourse has since been made to this facile but dangerous method of financing.

War-Time Taxes.

Turning next to taxes, we find customs and excise still holding their predominant place in Canadian finance. A heavy decrease in customs duties in 1914-15—which had set in before the war, and was due as much to business depression as to war disturbance—was offset later by reviving trade and increased duties. Excise duties, mainly on liquors and tobacco, kept up well, in spite of the advance of prohibition, until the close of the year 1917-18. A relatively small sum has been obtained from the war taxes introduced in April, 1915, one-third of it from direct taxes on banks, fire insurance and trust and loan companies, and the remainder from indirect stamp or consumption taxes on railway tickets, telegraph messages, cheques, money orders, patent medicines, etc. The Business Profits Tax has yielded a revenue for only two years. The Income Tax has not yet been levied. A summary in round numbers follows:—

	Customs.	Excise.	Business profits.	Other war taxes.
1914-15	$ 76,000,000	$21,000,000	....	$ 100,000
1915-16 .. .	98,000,000	23,000,000	....	3,600,000
1916-17	134,000,000	24,000,000	12,500,000	3,800,000
1917-18	146,000,000	27,000,000	21,000,000	4,000,000
Total	$454,000,000	$95,000,000	$33,500,000	$11,500,000

The direct taxes thus amounted to $33,500,000 + $4,000,000, or not quite 6 per cent., and the indirect or consumption to $500,000,000, or 94 per cent. of the whole.

TO DIRECT GOVERNMENT HOUSING

Government Committee Will Attend to Details of Financing Scheme

In furtherance of the Dominion government's housing scheme, there has been appointed a committee of the cabinet, to be known as the Housing Committee. It will consist of Hon. N. W. Rowell, Senator Robertson, Hon. A. K. Maclean and Hon. T. A. Crerar. Mr. Rowell will be chairman of the committee.

The committee is authorized to take up without delay, with the several provinces, the question of their need for additional housing accommodation and the housing programme they have in view.

The committee will further:—

(1) Formulate the general principles which should be followed in any housing schemes in order to secure the results aimed at.

(2) Communicate with the governments of the several provinces with a view to agreeing with them upon any general scheme of housing, that the fund of $25,000,000 authorized to be set aside by the Dominion government for housing may be applied for the purposes contemplated.

The committee is authorized and empowered "to do and perform all such further acts as may be necessary in order to carry out and give full effect to the order-in-council of December 3, 1918." Authorization is also given to the committee to secure the assistance and co-operation of Thomas Adams, town planning expert of the Conservation Committee, and "of any other person or persons specifically qualified to advise or assist the committee in carrying on its work."

The order-in-council of December 3, 1918, to which reference is made, authorized the minister of finance, upon request of any of the provincial governments to make loans to a provincial government "for the purpose of promoting the erection of dwelling houses of modern character to relieve congestion of population in the towns of their respective provinces, the aggregate of such advances to all the provinces not to exceed $25,000,000."

VICTORY BOND PRICES ADVANCE

Victory Loan bonds are in such demand that the price of the five outstanding maturities was on December 17th raised from half a point to a point over the previons fixed prices. The news came as a surprise to brokers, who, while positive that the price would advance, did not think it would do so before the New Year. The existing demand is such, that some financial men are of the opinion that this is the first step to the regular listing of the bonds on Canadian exchanges and the withdrawal of fixed prices. In this event even higher prices are predicted if the demand from across the border continues.

The following is a comparison of old and new prices:—

	New price.		Old price.
Bonds due.	To sell.	To buy.	To buy.
1922	99½	100½	100
1923	99½	100½	100
1927	99¾	100¾	100¼
1933	100	101	100¼
1937	101	102	101

The advance on the five different maturities in Victory bonds had a most stimulating effect on the listed Canadian war loans, all of which were not only active on the Toronto Stock Exchange, but showed improvements over recent levels.

Approximately 10,000,000 acres of undeveloped land in Manitoba may be bought by the province for sale to returned soldiers if the legislation proposed by the conference of government leaders at Ottawa is adopted.

ONTARIO ASSESSMENTS OPEN TO CHANGE

Special Committee of Legislature Hears Views on Exemptions, Business Assessment and Other Points

Several proposed amendments to the assessment law of Ontario were outlined by deputations to the Special Assessment Committee of the Legislature, which was appointed at the last session to revise the act, and which met for the first time on the 17th December. The provincial secretary, Hon. W. D. McPherson, presided.

Sir William Hearst told the members that officials of the government had studied the acts of the other provinces since the last session. "The conclusion reached by those conducting the investigation is that in the main not many important changes are required at the present time; that on the whole our Assessment Act is as good as any, and that its weaknesses are rather in the carrying out of its provisions," said the prime minister. The entrance of the Federal government into the field of direct taxation, he said, had to be taken into consideration. A conference had been suggested by the Dominion government to consider the general question of direct taxation, to see if overlapping could be eliminated.

Assessment Commissioner Forman, of Toronto, representing, besides the city, the Ontario Municipal Association, presented a number of suggestions, asking for amendments to permit of tax notices being sent by mail instead of being delivered in person, to make it compulsory for every person assessed to make a return under oath, and to provide that lands may be sold to pay tax arrears after the non-payment for two years, instead of three, as at present.

Taxes on Private Schools.

A proposal of Mr. Forman's that the exemption at present granted to private schools, hospitals and colleges be canceled, caused much discussion. Much of the work in the private schools, he said, was undertaken as a business proposition. In 1918 in Toronto the assessment of such institutions which were exempt was $2,500,000. The Toronto Conservatory of Music was assessed at $180,796, and at the rate of 30 mills the tax would have been $5,424. He suggested that if this amount of taxes were divided among the 3,400 pupils it would only mean an increase of $1.60 in tuition fees. The assessment of the Academy of Music was $43,500, of Havergal College $258,976, of Moulton College $90,750, of St. Margaret's College $72,938, and of Branksome Hall $69,000. While he was against exempting such institutions, he suggested that if the government thought such colleges should be free from taxation that the government could grant them a nominal amount. If the municipality felt such institutions should be exempt, it, too, could grant them a nominal amount.

Dr. A. S. Vogt, of the Conservatory of Music, said that if the exemption of that institution were cancelled they would have to discontinue musical education. While two per cent. was paid, this was as interest on money invested and not as dividends.

Mr. J. A. Pinard (Ottawa) thought that Toronto must be hard up to want to tax such institutions. Ottawa would be glad to make grants to them if they were located there.

Various Suggestions

Representations were made on behalf of both Woodstock and Brantford to have the act amended so as to enable municipalities to make the assessment on income tax collectable the same year. Now, it was said, the municipalities lose much money because income tax is not collectable until the year after the assessment is made. Representatives of the railway men in Ontario also asked that the exemption of personal income be raised to $2,000 for householders and to $1,500 for non-householders.

Mr. J. C. Elliott (West Middlesex) wanted an amendment to permit local municipalities in a county to hold their own tax sales instead of leaving it to the County Treasurer.

Mr. Forman also asked for an amendment to permit the assessing of dividends of shareholders in incorporated companies derived from mercantile and manufacturing establishments.

Mr. Doherty, city solicitor of St. Thomas, and Mr. J. S. Robertson, representing the village of Port Stanley, appeared in support of an amendment providing that the clause in the statute exempting from taxation property owned by a public commission should not apply to an electric railway. Sir Adam Beck, Chairman of the Hydro-Electric Power Commission of Ontario, and Mr. T. G. Meredith, city solicitor for London, opposed the amendment.

Mr. Robertson said that Port Stanley lost 10 per cent. of its rightful taxes by the exemption which the London and Port Stanley Railway enjoyed in that village.

The prime minister pointed out that an amendment passed at the last session made the land owned by the railway assessable.

Sir Adam Beck declared that the land in Port Stanley had doubled in value since the railway had been electrified and taken over by the city. "I have always been opposed to non-assessable properties," said Sir Adam. "I think all land should be assessed." Eighty thousand dollars had been spent by the railway at Port Stanley.

The Business Assessment

After both lengthy morning and afternoon sessions on the 18th, the committee adjourned to some future date, probably after the legislature meets. At the morning session representatives of the wholesale trade complained of the present business assessment, which they claimed was unjust. Wholesalers at the present time pay business taxes upon an assessment equal to 75 per cent. of their property assessment, whereas they pointed out manufacturers only pay 60 per cent., departmental stores 50 per cent. and retailers 25 per cent. in places like Toronto. This tax was much higher than that imposed by the governments in Montreal and Winnipeg, and it placed a handicap on the Toronto dealers in competing with wholesalers of the two other cities.

Mr. Hugh Blain, of Eby-Blain, Ltd., and Mr. John Macdonald, of John Macdonald & Co., of Toronto, and Mr. Beckett, representing the Hamilton wholesalers, expressed the views of the firms interested. They wanted the Ontario business tax changed to a rental basis, as in Montreal, but when the prime minister remarked that the committee would not consider any such radical change in the form of the assessment, it was urged that the existing assessment percentage be materially reduced. Mr. Macdonald thought that an assessment of 25 to 33 per cent. of the property assessment would be large enough.

Assessment Commissioner Forman, of Toronto, representing the Ontario Municipal Association, opposed the request. He pointed out that the higher rate for wholesale businesses, as compared with retail establishments, was that the latter did business in locations that loaded upon them very much higher assessments for land occupied, and that despite the higher rate the wholesalers were probably not paying any more in business taxes than retailers. In the case of the manufacturers, it had been apparently intended to give them special consideration to encourage industry.

Mail Order Houses

It was evident from the trend of discussion in committee that when the next meeting takes place there will be an effort made to protect the mercantile interests of the small centres against the large departmental stores. The Opposition Leader, Mr. Wm. Proudfoot, K.C., raised the question in asking the wholesalers for their opinion. Without exception they agreed that the mail order businesses of the big departmental stores were driving the small merchants in the country towns out of business. The wholesalers based their objection on the fact that the postal service by operating the parcels post at a loss, and paying for it out of the carrying of letters, was giving the departmental stores with mail order branches an unfair advantage.

EFFICIENT ECONOMIC DEMOCRACY

The majority of persons, perhaps, imagine that the end of war will solve the great outstanding problems of our day; but in that opinion they are mistaken. True, it is fervently hoped that international questions relating to political freedom will be settled as an outcome of the struggle; but domestic problems and difficulties will remain as before, if not in more sharply accentuated form. Before the outbreak of the war the United Kingdom was engaged in carrying forward an immense social programme making for the betterment of the industrial classes. The outbreak of hostilities, for the moment, held up this epoch-making work; but even before hostilities ceased the London "Times" and other great British journals were urging Lloyd George to place before the people a better formulated and even wider economic programme. In the United Kingdom the effete idea has long since been thrown on the scrap heap that pressing domestic problems can wait until the war has been won, for their solution. In Canada and the United States a wave of industrial unrest has swept the country, notwithstanding unparalleled prosperity and high wages. It is of imperative importance that employers take time, and give their best energies, to the investigation of the causes of such unrest.

The ferment working among the Russian masses also makes itself felt in labor circles on this side of the water. We want no Bolshevism here. Undoubtedly there are labor agitators who will not hesitate to stab their country in the back if only they can feed a grudge. To such ultra-radicals and irreconcilables decent people need show no mercy. Let it be frankly admitted, however, that the great body of laborers are just as anxious to destroy Kaiserism as any other element in the community. It is to the wishes of this same group of laborers that we will do well to give heed.

It strikes us that there are two outstanding problems in the economic sphere that will require adequate solution. The first of these is to see that the standard of living which Canadian industry has given Canadian labor shall be maintained. And the second is that the health and cultural well-being of the working classes shall be promoted. In the latter respect we need not be above learning from the enemy. In 1883 Germany promulgated a programme of social insurance against various types of disabilities to which workers are subject. In a systematic and thorough-going fashion Bismarck and his colleagues attacked the fundamental need of safeguarding the health of the nation. The astonishing efficiency of the German people, a people largely given over to industry, during the course of this struggle, indicates that the German bureaucracy has achieved its purposes. That its ends were bad, namely, to keep a contented people in sound health so that soldiers might be furnished for the army, and to prevent loss of any part of the population through emigration, has nothing to do with the question at issue. It is safe to say that Canadian manufacturers will meet the intensest kind of competition after the war, and will require the backing of a sound, efficient and progressive labor force.

How shall these desirable results be achieved? First of all, by establishing a Department of Public Health in the federal and provincial administrations. Second, by realizing that real efficiency cannot be secured through high wages and steady work alone. The late Professor Hoxie, of the University of Chicago, made that abundantly clear in his study of scientific management in the factories of the United States. The Taylor System, or rather adaptations of it, has yielded in many industrial concerns only the most meagre results. Those of us who believe most in scientific management as applied to factory work—or any other type of work—and piece work, have been often disappointed that high wages did not bring contentment. After investigation we have discovered that the difficulty lies in the fact, as Professor Vevlen has shown, that the instinct of workmanship has been violated. True, a workman may make high wages in putting a single bolt in material that passes him on a moving platform to be finally made into the finished product; or he may put a few pegs in a shoe; or he may do any one single thing with the utmost efficiency; but it is clear as daylight that the process defrauds him of the greatest joy in life—the satisfaction of the instinct of creation. It is this satisfaction which leads the artist to live on a crust rather than, through self-abnegation, to enjoy the fleshpots of Egypt.

Many employers are now making a careful investigation of this fundamental question, whereby instincts of loyalty to the business, of co-operation, of art in life, of pleasure in sound workmanship and so forth, are deepened and vitalized. Solidarity of interests between employer and employee is the true solution of the so-called labor problem.

SQUEEZING OUT PRIVATE ENTERPRISE

Municipally-owned public utility enterprises which operate "at cost" are usually in reality operated at less than cost. An example of this method is found in the London and Port Stanley Railway. The London and Port Stanley Railway was incorporated in 1853, and until only a few years ago operated a steam road over its own right of way from London, Ontario, to Port Stanley and Lake Erie. It was not, however, a paying road, the bonded indebtedness being very high. The city of London held a large amount of first mortgage bonds and the city of St. Thomas, which was the other large city served by the road, held a smaller amount. The latter sold its holdings to London. In 1916 it was decided that the London Hydro-Electric Commission should assume the road and electrify it. This was done and the passage of an act by the Ontario Legislature was also secured exempting the property from any taxation whatsoever. As a consequence, the London and Port Stanley did not pay one dollar of taxes in 1917.

Steam railways in Canada are taxed on the value of their lands and buildings only, the rails, ties and superstructure not being included. Electric railways, on the other hand, which operate upon the public highway and have, therefore, no right of way to be taxed, are subject to taxes on all their property. The electrified London and Port Stanley, however, owned its own right of way just as did a steam road. It escaped the taxation of both steam and electric railways. In the meantime, rates were fixed to cover the cost, which cost did not include the proportion of municipal expenses which such an enterprise should properly meet in proportion to its holdings in each municipality. It was, therefore, operated at less than cost.

In the meantime, however, at the instance of the municipalities concerned, an amendment was passed in the Ontario Legislature in 1917 making the lands subject to taxation just as if the company were a steam road While it would seem to be better to deal with the company as an electric road, which it now is, the municipalities concerned seemed satisfied with that amendment. There was a difficulty in Port Stanley, however, where the commission operated several amusement enterprises, including an inclined railway, bathing houses and a cafeteria which had formerly been operated by private parties and which had paid both property and business taxes; much revenue was lost to Port Stanley in this way. This point was brought up before the recent meeting of the private bills committee of the Ontario Legislature. The upholders of the commission maintained that these enterprises were run at cost for the public advantage, and should, therefore, be classed in the same way as a municipal enterprise such as a water-work system. They would be operated at cost only when the usual taxes were paid. As one gentleman remarked, what would be the situation if the commission chose to operate a hotel instead of a cafeteria?

Sir Adam Beck took the attitude that it was a matter of indifference to the commission whether they paid taxes or not as in that case the rates would be raised accordingly. "The United States roads," he said, "are all going into insolvency; so would the London and Port Stanley if it were taxed." If this is the case then the London and Port Stanley cannot pay its own expenses and survive, and the farmers along the route who enjoy a convenient service provided by stations at every mile along the road, are not bearing the expense of this service entirely in proportion to the use they make of it, but rather in proportion to their property assessment. It is also evident that private enterprise at Port Stanley cannot compete on such terms. There is an important principle in this case which supporters of public ownership must recognize. Municipal enterprises, when competing with private enterprise, must compete fairly; and the power of the government to tax or to exempt must not be used for purposes of discrimination.

A DOMESTIC WAR LOAN?

United States investors are to be congratulated upon their thorough knowledge of the investment field; it has not taken them long to show their appreciation of the merits of Canadian Victory bonds, as compared with Liberty bonds, or with any other bonds available at present prices. The Victory bonds, at the issue price of the present loan, offered a fairly long term investment, yielding five and one-half per cent., and free from Canadian taxation. As Canadian funds were at a substantial discount, they could moreover purchase at less than par. Even before the armistice announcement on November 11th, some subscriptions had been received. During the remainder of the campaign, which ended on November 16th, many large subscriptions arrived.

The same circumstances have applied in the market since the loan books closed, with the single exception that the long term bonds of both Victory loans could be purchased, through ordinary channels, only at a small premium. Large buying orders have been received, which, coupled with a firm home market, have resulted in a market of unusual strength, especially for the long term bonds. Considerable quantities of bonds, which it became necessary for industrial companies and individuals to unload, were eagerly purchased. The consequence is that the price has advanced, and the scale fixed by the bond dealers of Canada was raised early this week.

It is with some hesitation, therefore, that we should boast of our recent financial achievement. True, only a small proportion of the subscriptions came from without; Canadians easily oversubscribed the $500,000,000 required. But the subsequent market strength is to a large extent due to the American demand. It is different with the Liberty loans of the United States because they offered the lowest rate of any of the national bonds of the belligerent nations, and attracted scarcely a dollar of foreign money. The same is practically true of Great Britain and Australia. But Canada's offer was the most attractive among the allied nations, and citizens of the United States, who could more appropriately satisfy their patriotic motives by purchasing Liberty bonds, displayed their business acumen by subscribing freely.

This tendency towards a levelling of yields on national war bonds will, by all appearances, continue. Liberty bonds are weak on the market, while Victory bonds are strong; but greater price charges must take place before the yields even approximate. Canada has in the past stood high in the eyes of American investors, and her status has appreciated since 1914.

COMPULSORY SERVICE COST FOUR MILLIONS

Compulsory military service cost Canada in the neighborhood of four million dollars. This estimate is at about $32 per man drafted into the army, or about $20 per man of reinforcements actually made available under the Military Service Act. The latter figure is computed on the basis of registration. It comprises, in addition to men actually drafted, men who had been granted exemption for a period of time and would have been eventually available for service.

COBALT ORE SHIPMENTS

The following is a statement of the shipments of ore, in pounds, from Cobalt Station, for the week ended December 13th, 1918:—

McKinley-Darragh, 63,541; Kerr Lake, 57,434; Nipissing Mining Company, 52,985; Buffalo Mines, 253,187; total, 427,147.

The total shipments since January 1st now amount to 31,312,996 pounds, or 15,656.4 tons.

ROYAL BANK GROWS RAPIDLY

During the year 1918 the deposits of the Royal Bank of Canada have grown from $252,000,000 to $332,000,000, and corresponding increases have taken place in most of the other branches of the bank's business. A statement for the financial year ended 30th November, 1918, appears in this issue of *The Monetary Times*. The total assets of the bank are now $427,512,982, an increase of over $90,000,000. Of this total about $225,000,000 are liquid assets. Holdings of current coin and Dominion notes are over $42,000,000; the deposit in the Central Gold Reserve is $26,000,000 as compared with $16,000,000 last year; and holdings of Dominion and Provincial Government securities are $36,599,976, as compared with $22,322,197. The bank's current loans are now $183,748,392, showing an increase of approximately $27,000,000.

The profits for the year were larger than for last year by about $500,000. The paid up capital has been increased from $12,911,700 to $14,000,000, and the reserve fund has been increased by $1,000,000. The latter two changes are on account of the acquisition of the Northern Crown Bank.

The statement as a whole reflects in a strong degree the tendency which has been experienced by Canadian banks, including rapid growth of deposits, increase in circulation and stability of business. The substantial increase in the Royal Bank's profits is an especially favorable sign as most banks, in spite of the increased business, did not find their profits growing greatly on account of the higher expense of management.

INSURANCE INSTITUTE OF TORONTO

The December meeting of the Insurance Institute of Toronto was held on Thursday evening, December 19th. The speaker of the evening was Mr. G. D. Finlayson, superintendent of insurance for the Dominion of Canada. Mr. Finlayson spoke on "Present-Day Tendencies in Insurance."

After referring briefly to such apparent effects as the heavy life losses from military service and influenza, heavy fire and casualty losses, and industrial disasters, Mr. Finlayson pointed out some deeper tendencies in insurance. In the case of life insurance, he said, one of the leading features is the changing nature of their investments. This tendency, he said, is not wholly due to the government financing, but was beginning to show itself before the outbreak of the war as a result of the decreasing demands for mortgage loans. On July 1st, 1914, Canadian life companies' funds were invested to the extent of 37.6 per cent. in mortgages; on July 1st, 1918, the percentage was 27 per cent. The percentage invested in government bonds increased from three-quarters of one per cent. to 17.8 per cent.; in municipal bonds from 11,7 per cent. to 13.5 per cent., while the investments in railway and corporation bonds declined from 18.6 per cent. to 12.3 per cent. "Speaking generally," said Mr. Finlayson, "the tendency has been towards the more conservative and liquid form of investments, and while it is unsafe to predict the future the indications are that this tendency will be continued beyond the war."

The speaker also referred to the need for great care in the mortgage loan field, to offset the tendency towards speculation and optimism. If the insurance act imposed greater restrictions the result would be that interest return would be less and the cost of insurance greater. For if investments were limited, for instance, to government and municipal bonds, an artificial demand would be created for securities of this kind which would raise the price. The municipalities would, of course, benefit, but it would be at the expense of the policyholder; that is, of the class of people who provide for their dependents so that they will not become a burden on the public. He also pointed to the increasing liberality of insurance policies and to the improvement in the actuarial standing of fraternal societies. Coming to fire insurance he referred to fire prevention as the biggest problem of the present time and to the possibilities of criminal legislation to reduce the heavy losses.

INVESTMENT BANKERS' CONVENTION

The seventh annual convention of the Investment Bankers' Association of America was held on the 9th, 10th, and 11th of December in Atlantic City, N.J., not in St. Louis, as was stated in *The Monetary Times* of the 13th instant. The headquarters were at the Hotel Traymore.

After the president's address on the 9th instant, reports were received from several committees. An address was then delivered by Hon. W. H. Taft on "Clinching Purposes of the War." In the evening the report of the Fraudulent Advertising committee was presented, after which an address was delivered by Prof. J. Paul Good, of the University of Chicago, entitled "The Prussian Dream of World Conquest."

On Tuesday addresses were given by Mr. George E. Roberts, assistant to the president of the National City Bank, on "Reconstruction"; by Mr. T. H. Whitney, of the New York Public Service Commission, on "Relations of Public and Investors in Utility Enterprises." On Wednesday addresses were given by Hon. R. C. Leffingwell, Captain H. G. Gilliland, and Rev. C. A. Eaton.

Several bond dealers were present from Toronto representing the Canada Bond Corporation, Wood, Gundy & Company, A. E. Ames & Company, and the Dominion Securities Corporation. The names of these delegates were given in *The Monetary Times* last week. The topics related almost entirely to questions of interest to United States dealers only. On account of the intimate relations between the two countries, however, the Canadian delegates hoped to obtain the viewpoint of the American dealers who have been frequent customers in the past and will in all probability be regular in the future.

WEEKLY BANK CLEARINGS

The following are the bank clearings for the weeks ended December 12th, 1918 and December 15th, 1917, respectively, with changes:—

	Week ended Dec. 12, '18.	Week ended Dec. 15, '17.		Changes.

Saskatchewan Prepares Financial Legislation

Measures Introduced for Higher Taxes on Banks, Insurance and Trust Companies—Province Requires Greater Revenue—New Fees for Distress and Judicial Seizure.

THE legislature of the province of Saskatchewan, which recently opened its new session, has introduced legislation which greatly effects banks, insurance, trust companies and other companies doing business in the province.

After transacting merely routine work during the morning of the 12th inst., in the afternoon the legislature approved a recommendation revising the rules of the assembly. The aim of the revision is to introduce a simpler process for dealing with financial bills and bills containing financial clauses.

Heavier Tax on Branch Banks

For the purposes of supplementing the revenues of the province considerable increases in the taxes payable by corporations are provided for in a bill which was given its first reading. Banks, insurance companies, express and trust companies are more particularly affected by the proposed new legislation.

The tax for branch banks in towns is to be increased from $100 to $150 and other branches from $25 to $50. The original tax of $300 for city branches is retained, but a head office in Saskatchewan will be required to contribute $1,200 annually, a new fee. There is no change in the additional tax of $200 for private banks, but it is proposed to make the banker rather than the bank responsible.

Insurance Companies

Existing legislation provides for a tax of 1 per cent. on the gross premiums of insurance companies doing business in Saskatchewan under the Saskatchewan Insurance Act, or registered and licensed under the Companies' Act. The new bill provides for a graded scale of taxation for these institutions as follows: One per cent. on gross premiums up to $50,000; 1¼ per cent. where the total business is less than $100,000; 1½ per cent. where the business is between $100,000 and $150,000; 1¾ per cent. between $150,000 and $200,000; and 2 per cent. where the gross premiums exceed $200,000.

The bill makes provision for a reduction on the minimum value of investments of insurance companies in the province on which a tax of 50 cents per thousand is payable from $50,000 to $25,000.

Express Companies

The bill makes no change in the rate of taxation to be paid by land, loan and telegraph companies, but in the case of express companies a new basis is provided. Instead of paying $10 in each city with an aggregate maximum of $500 in addition to $100 in each city where they have been operating from three to five years, or $150 where they have been in business over five years, they will be required to pay $150 in each city irrespective of the length of time in business. In towns under the existing legislation, they are required to pay $25 where they have been in business from three to five years and $35 for a period of over five years. They will in future be called upon to pay $50 for each town and $10 for every office in any other place with a population of more than 200

Trust Companies

A new basis is also provided for the taxation of trust companies. Hitherto, these companies have been required to pay 40 cents on every thousand dollars worth of business transacted in the province. The new bill proposes to exact a tax of 1½ per cent. on the gross revenue received by the company from funds used by the company in investments in Saskatchewan

Other Changes

The minimum tax of $50 on unpaid purchase money on lands up to a total of $500,000 and $75 for over $500,000, is changed in the bill to a minimum of $100 where the authorized capital of the company is $100,000 or less and a minimum of $175 where the authorized capital exceeds $100,000.

The bill to amend an act respecting drainage is a consolidation of the old act and contains no new principles. It makes provision, however, for handling larger drainage schemes than was possible under the old Ditches Act.

The bill to amend the Highways Act makes some minor changes in the dates of reports to be submitted to the government by municipalities to secure the automobile grants and also provides a change in the dates when these grants will be payable. The bill makes provision for the minister to notify the municipal councils of the amount of grants to be paid between January 1 and April 1 and for the municipal council to notify the department by June 1 how and where the moneys will be expended. Where the plans are wholly or partially disapproved the local council is given the right to amend its resolution, but any municipality failing to report by June 1 will lose the grant for that year.

The bills respecting masters and servants and to amend the Chattel Mortgage Act are consolidations and do not contain any new principles.

The bill respecting the law of landlord and tenant codifies the law and puts on the statute books the common law with respect to the relations between landlord and tenant.

Fees of Judicial Seizure

New schedules of fees payable for distress and extra-judicial seizure are provided in another bill which has also received its first reading. Under the existing law a uniform scale of fees is provided, but the bill now under consideration provides for a different scale of costs on distress than on seizure under chattel mortgage. The costs on distress in the bill are sub-divided where the amount demanded does not exceed $100 and where the amount be levied exceeds this sum.

The new schedule of fees is as follows:—

Costs on distress where sum demanded and due does not exceed $100: Levying distress, $1; one man keeping possession, per day, $3; printed advertising not exceeding $3; catalogues, sale and commission and delivery of goods, five cents on the dollar; where amount due is satisfied before sale, three cents on the dollar.

Costs of distress where sum demanded and due exceed $100; levying distress, $1.50; one man keeping possession, per day, $3; costs of advertising, expenses incurred in keeping and removing goods, catalogues, sale and commission and delivery, three cents on the dollar; where amounts satisfied before sale, three cents on the dollar; mileage in going to seize, 15 cents per mile, one way.

Costs on seizure under chattel mortgage: Receiving, entering and return, 50 cents; perusal of chattel mortgage, 50 cents; warrant to bailiff, 50 cents; seizure, $1; bond from creditor, each 50 cents; bond from debtor, each $1; possession fee, $2.50; actual expenses for keeping possession, appraisement, advertising and sale of goods; mileage, 10 cents per mile; poundage, 2½ per cent. up to $400, over $400 1¼ per cent. for excess over $400.

A bill amending the grant to the Saskatchewan Anti-Tuberculosis League from $150,000 to $300,000 for the construction of the sanatorium at Fort Qu'Appelle was given its first reading.

A bill to amend the Legislative Assembly Act read a first time provides that nothing contained in the act shall be held to vacate the seat in the legislature of a member who, having served overseas during the present war in the military forces of the empire, becomes a member of the executive council.

AUDITORS' CERTIFICATE

We report to the Shareholders of The Royal Bank of Canada:

That in our opinion the transactions of the Bank which have come under our notice have been within the powers of the Bank.

That we have checked the cash and verified the securities of the Bank at the Chief Office at 30th November, 1918, as well as at another time, as required by Section 56 of the Bank Act, and that we found they agreed with the entries in the books in regard thereto. We also during the year checked the cash and verified the securities at the principal branches.

That the above Balance Sheet has been compared by us with the books at the Chief Office and with the certified returns from the branches, and in our opinion is properly drawn up so as to exhibit a true and correct view of the state of the Bank's affairs according to the best of our information and the explanations given to us and as shown by the books of the Bank.

That we have obtained all the information and explanations required by us.

FARMING IN EDMONTON DISTRICT

How Northern Alberta Has Come Out in 1918 Season—Mixed Farming Grows

It is now apparent that there has been a good deal of misconception as to the results of the unusually dry season which prevailed in Alberta and Saskatchewan, in common with adjoining territory south of the international boundary, during the summer just passed. While undoubtedly there was a total failure of crops and pasture in some districts and a partial failure in others, these conditions do not by any means obtain throughout the whole territory, as is generally supposed. Throughout the Edmonton district, for instance, though rainfall was less than normal, there was almost the usual heavy growth of crops and pasture. It is now announced that up to November 15th, when the special cheap rates arranged by the government and the railways for the transportation of livestock, as a measure of relief for the dried-out sections expired, ther had been shipped into the country of good grazing and abundance of winter feed, of which Edmonton may be considered the centre, from the less favored districts in the south, no less than 31,350 head of cattle and 66,535 sheep.

Information as to Crops

Throughout the Edmonton district and the north country damage was sustained, not from drought, which is unknown there, but as a result of a freak frost which arrived six weeks ahead of time, in July. It was supposed, at the time, that this had destroyed the crop; but it is now evident that so far as Edmonton's more immediate territory is concerned, the damage has been greatly over-estimated. In order to obtain authoritative and first-hand information as to actual conditions, the Edmonton Board of Trade sent out a series of questions to a large number of farmers in the district. These were not sent to a selected list, as results in such case might be misleading. On the contrary, they went to every farmer appearing in the Edmonton rural telephone directory. So far only 36 of these questionaires have been returned, but as these are widely scattered and cover all directions, they may safely be accepted as thoroughly representative, and it is believed that if all were in the average results would not be materially different.

Each farmer was asked to supply answers to 15 questions. The answers to these were distinctly interesting, instructive and encouraging.

The questions as to grain crops resulted in the following information:—

These 36 farmers have thrashed 1,282 acres wheat, yielding 21,585 bushels, or 16.84 bushels per acre; 2,151, acres oats, yielding 100,160 bushels, or 45.56 bushels per acre; 1,067 acres barley, yielding 29,310 bushels, or 27.47 bushels per acre.

Grain of Good Quality

An interesting point is that nearly all report their wheat of high grade, generally 1, 2 or 3 Northern. Only two report having feed wheat. Similarly, the oats are almost all reported as being No. 1 or No. 2 Canada White or No. 1 feed. Barley, on the other hand, shows a considerable amount as of feed grade. It will be noticed that the total acreage under grain crop is 4,500 acres, which is exactly 125 acres for each farmer. In addition it was shown that there were on each farm 24 acres of green feed. With an average of something like 15 acres of timothy and two or three acres of potatoes, roots and garden, and allowing 12 or 13 acres for 1918 breaking, it would appear that the average Edmonton district farmer has about 180 acres under cultivation.

Livestock

Under the head of animal husbandry, the following questions were asked:—

Has pasture been good in 1918? Twenty-six replied "Yes"; 10 "Fair"; while none said "No."

Have you sufficient winter feed? "Yes," 35; "No," 1.

Have cows milked well? "Yes," 28; "Fair," 6; "No," 1.

Have dairying operations been profitable? "Yes," 27; "No," 2; others not dairying.

Has raising of beef been profitable? "Yes," 24; "No," 1; others not reporting or not raising beef.

These 36 farmers are carrying the following livestock: 398 horses; 377 milking cows; 777 other cattle; 1,103 hogs. Each farmer has, therefore, on the average 11 horses, 32 cattle and 31 hogs.

Under the heading general the following information was elicited:—

Thirty-four of these 36 farmers state that their total operations for 1918 have been profitable; one was not sure; and one said "No."

In reply to the question, "Have your operations for the past five years been profitable?" they made it unanimous; 36 said "Yes."

Another question brings the information that those 36 men have been farming in the Edmonton district, on the average just over 18 years. Asked as to whether during that time they have ever known a failure of crops and pasture from lack of moisture, 35 answer "No," and one says "Yes, in 1888."

Mixed Farming District

The last question was "Taking one season with another, do you know of any better country than the Edmonton district for mixed farming?" Thirty-three farmers answer "No" to this. One says: "Not on this side of the water." One says "Yes, in North Lancashire," and another answers, "not in Canada."

It will therefore be seen that though climatic conditions in 1918 were the most unfavorable that have been experienced in the Edmonton country for at least 30 years, farming operations have, on the whole, proved profitable even this year, and not one of these 36 Edmonton district farmers shows the slightest trace of discouragement. The explanation lies in the sound economic basis of farm operations in Edmonton territory: Small farms, averaging 320 acres, with a clear realization that it is beef, milk and pork, rather than wheat, that creates permanent prosperity and stable conditions; combined, of course, with the peculiarly favorable conditions of soil and climate found in the Edmonton country for the cheap production of those staples.

From the figures given above, regarding the operations of these 36 farmers, the limited extent to which they are dependent on production of wheat, is apparent, notwithstanding the good yields generally obtained. These men are evidently doing "real farming," and are taking no chances.

NEW ENGLAND FISH COMMISSION IN CANADA

A fish commission from Massachusetts is touring Canada in the interests of the fish industry of Massachusetts. It is composed of the following members of the state legislature:—Senator G. F. Hart, Senator C. D. Brown, J. Weston Allan, J. D. Bentley, F. A. Manning, A. L. Whitman, C. Boothman, J. Beatty, G. A. Hoyt.

When the delegation was in Montreal on the 12th instant, a luncheon was given to them by the city. Among the speakers was Mr. A. H. Brittain, president of the Canadian Fisheries Association. He said that if Montreal would spend enough money in improving market conditions, a marked reduction in the price of fish would result.

NO PURCHASING OF GERMAN-MADE PRODUCTS

The Executive Council of the Canadian Pulp and Paper Association has passed the following resolution:—

"Whereas the state of war existing between the British Empire and the Central Powers of Germany and Austria has demonstrated to the world the utter impossibility of reconciliation until such time as a change of mental attitude is shown towards the accepted standards of moral and commercial decency.

"Be it resolved that every pulp and paper manufacturer of Canada shall be asked to refuse to purchase any goods of German or Austrian manufacture and that the strictest scrutiny shall be given to all goods stated to be of Swedish, Dutch or Swiss origin, and

"Further that every purchasing agent shall be notified of this resolution.

"Be it also resolved that a copy of this resolution be forwarded to all Allied Trade Associations with the request that it receive similar attention."

CONFERENCE OF MARITIME MANUFACTURERS

Fire Waste, Technical Education, Export Trade, and Other Industrial Topics Discussed in Amherst

More than one hundred representative business men from all parts of the maritime provinces gathered in Amherst on December 11th, to attend the maritime conference, held under the auspices of the Canadian Manufacturers' Association. Delegates were present from the Boards of Trade, Canadian Clubs, municipalities, industries, business houses, and other important associations.

Shortly after 2 o'clock, Mr, W. S. Fisher, of St. John, President, took the chair, and Mayor T. L. Milner delivered an address of welcome to the assemblage. He referred to the objects of the meeting, and the important results that will occur from the conference. Mr. Fisher, President of the Maritime branch of the Canadian Manufacturers' Association, replied to the address of welcome and then briefly outlined the programme of the meeting and its objective in the immediate future. Mr. Fisher spoke of the men present, who spelt "big business" in plain letters and he characterized the meeting as the best held in the history of the Association. The advantages and opportunities of the Maritime provinces for export trade were quoted by Mr. Fisher and he concluded with a few words upon the resources of the three provinces of Eastern Canada.

Water Power

A paper, "Water Power of the Maritime Provinces," prepared by K. H. Smith, district engineer Dominion water power branch, and read by H. R. Thompson, of Amherst, attracted great attention and was the cause of much discussion.

One hundred thousand horse-power for ordinary commercial purposes, is available through the resources of Nova Scotia and this water power is in close proximity to the various commercial centres. The Governments of Nova Scotia and New Brunswick have evinced an active interest in water power matters and legislation is before the local legislatures of both provinces. Hydro-electric power lies at the very doors of St. John and Halifax and with no cost for transmission and distribution, the consumers would find water power a cheap industrial boon.

Technical Education

Canada requires adequate technical education, was the plea put forth by Prof. F. H. Sexton, and in order to secure this manufacturers must co-operate with the educational authorities with resultant benefits to the workingmen and the manufacturers themselves. Children of fourteen years of age are leaving school and entering the factories, and it is these boys and girls that the system of part-time education must apply to.

A technical course paralleling the High School would be advantageous, and would be the means of keeping many boys and girls in school with increased wage enhancement for themselves. But the part-time system of technical education fills the bill for those who left the schools at an earlier age—eight hours a week taken in the course of their daily labor for forty weeks of the year, would certainly add to the efficiency and productiveness of the laborer, at the same time giving that boy or girl a knowledge of a skilled trade, with a marked increase in wage. The question is one of vital interest at the present time, as skilled labor is the call of the hour. The subject must be laid before the Federal Government and increased subsidies or special grants be given the different provinces to take up this question.

Much discussion was elicited by Prof. Sexton's address, and D. W. Robb, of Amherst; L .W. Simms, of St. John; Fred McGee, M.P.P., of Port Elgin, and Hon. C. W. Robinson, of Moncton, endorsed the stand taken by Prof. Sexton

J. Grover Smith, of the Commission of Conservation, Ottawa, dealt on the huge fire waste that has been piled up by Canada within the past few years, and millions with which it increases every year. He urged the adoption of the Fire Marshals Act in every province of the Dominion, and asked that the manufacturers and merchants take steps toward the prevention of fire in their establishments. The different standards of building in the Canadian provinces was largely responsible for the losses—likewise the lack of town planning with subsequent fire exposures, added to the tremendous national tax of insurance. Proper and standard building legislation must immediately be submitted before the legislatures of the provinces, and also before the Federal Government.

Dr. W. B. Macallum, Chairman of the Committee of Research, briefly addressed the meeting on the importance of of education and reconstruction, with a strong plea for further study and research into the available resources of the Dominion.

Industrial Development

Watson Griffin, Chief of the Commercial Intelligence Department at Ottawa, dealt with the possibility of the industrial development of the maritime provinces. He declared these provinces to be the natural trade basis of the Dominion with shorter runs to the markets of the world than could be offered by any ports on the Atlantic seaboard. He advocated that Sydney, Halifax and St. John get together and form a trade agreement, then meet with Montreal and organize a trade shipping line with Montreal and Sydney as the sailing points in the summer months and St. John and Halifax as the basis in the winter months. In this way a huge and gigantic trade could be worked up between the maritime provinces and the world markets.

Ships were the important factor in securing such trade, and Mr. Griffin proposed that a huge joint committee be formed embracing the citizens of the maritime provinces to subscribe the purchase of such vessels. In concluding he referred to the suitability of Nova Scotia for the textile industry, and also stated that a tremendous amount of "At-mouth-of-the-mine power" should be developed in this province cutting down heavy expenses and supplying cheaper electrical power.

Sir John Willison's Address

"Organization, co-operation and production are the three vital problems of Canada," said Sir John Willison, in an address delivered in the evening before conference. Speaking entirely upon matters pertaining to reconstruction in Canada, Sir John presented his views in an effective manner.

"Important public works, that are of essential value to the nation, should be pushed along," said Sir John.

"Co-operation to relieve the scarcity of houses is necessary. There should be resumption of work on the Welland Canal and other national undertakings. The fabric of Canada has rested upon her industries during the past four years, and if these industries had not stood the test of rushed activity, a period of gloom and depression would now be resting on the Dominion. If our country can be carried safely through the next six months, Canada will enter upon a long era of expansion and prosperity. Industries have contributed greatly to the war revenue."

A new system of taxation has been developed, but the continuation of heavy taxation must be handled carefully or mischief will result. Taxation of capital is the worst form, for capital is never idle. An extreme check on its activity affects production at the source and chokes the springs of enterprise. There is now a scarcity of raw materials. The nation, therefore, which best guards its raw material will make the greatest advances in prosperity in the years ahead. He emphasized the necessity for immediate and adequate organization to secure for the Dominion a partnership in the rebuilding of Europe.

Several resolutions pertaining to technical education, fire waste and water power were passed by the conference.

Messrs. Durance Brothers, insurance brokers, Toronto, have been incorporated as from January 1st, 1919, under the firm name of Durance, Limited. The capital is $80,000, fully paid up.

Experienced Administrators

An experienced Executor is absolutely necessary. Individual Executors are obliged to incur the expense of outside advice in deciding many things, while this Corporation, with its executive staff and board of directors, composed of men of mark in practical life, is able to manage any feature in the Administration of an Estate. We gladly furnish full particulars of our Service. Write for our free Booklet—"Making Your Will."

NOVA SCOTIA MAY HAVE FORESTRY DEPARTMENT

Advantages of Provincial Department Urged at Conference in Halifax

A Forestry Convention was held in Halifax, N.S., on December 11th. One of the main points of discussion was the securing of a provincial forester. Hon. O. T. Daniels was present, and, although not opposed to the scheme of forming a forestry service in Nova Scotia, frankly pointed out the difficulty of raising funds to establish a new office. He said the government had a hard enough time as it was to keep up the present offices, many of which ought to be supported in a better way. He said he was in sympathy with the scheme and repeated the statement made in his morning address, that he felt sure the appointment of a forester would be a good one, and if the men in favor of the scheme could suggest a way of meeting the financial end, he was sure the government would approve.

Favored Forestry Service

Mr. Whitman, the chairman of the meeting, suggested that a committee be appointed from the conference to meet and discuss the matter and come to some decision which could be presented to the provincial government. Mr. McColl suggested as the meeting was not well attended, some other proposition would be better. Mr. Whitman said he would take the matter up personally, if the delegates would consent and would put the proposal before the leading lumber merchants, mining concerns, railroads, etc., of the province. It was moved by Mr McColl and seconded by Mr. W. McL. Robertson, that Mr. Whitman be authorized to choose a committee from the producers, retailers and ultimate consumers, to consult with the government in the interests of forming a provincial forestry service. Mr. Robertson, who represented the Davidson Lumber Co., of Bridgewater, in seconding the motion, stated that the last year had shown that the forest lands of Nova Scotia were not inexhaustible. Their firm was now operating some of the virgin forests of Annapolis County. He spoke highly in favor of a forestry service.

Mr. A. M. Seely, purchasing agent for the Nova Scotia Steel and Coal Company for pit lumber, endorsed strongly the scheme. He said they required in Nova Scotia coal mines 15 to 18 million feet of lumber each year, and the lumber for props was rapidly decreasing. He said the company now had great difficulty in securing a satisfactory supply. A good part of the provincial revenue is derived from the coal royalties, therefore the government ought to spend part of that in the support of forest lands. His remarks were endorsed by J. W. Revere, buyer for the Dominion Coal Company.

Mr. Black moved a vote of thanks to Mr. Daniels for attending the convention. Mr. F. C. Whitman, of Annapolis, was chairman of the meeting, which was well attended, the delegates including prominent lumber merchants and others interested in the forests of the province.

Prominent Speakers

Mr. G. Prince, provincial forester for New Brunswick, spoke on "The Forestry Development of New Brunswick." In his remarks Mr. Prince mentioned the probable use of aeroplanes in forest protection by patrol work, in the future.

Mr. Clyde Leavitt, chief forester for the Commission of Conservation, and chief fire inspector for the railways, also gave an interesting address.

Mr. Robson Black, secretary of the Canadian Forestry Association, and Mr. Ellwood Wilson, forester of the Laurentide Pulp Company, were among the delegates.

Mr. Robson Black opened the meeting with a splendid address in which he reviewed the forestry situation throughout Canada and pointed out how Nova Scotia was affected. Mr. S. M. Brookfield spoke briefly, pointed out the importance of having a forest service for this province. Mr. McKeen referred to the difficulty of getting timber of any size in Nova Scotia and thought the situation might be improved by a forest service.

Hon. O. T. Daniels, the attorney-general, outlined the situation in Nova Scotia. He showed that the lands owned by the province are not exclusive like other provinces which have highly developed forestry services, yet the government is alive to the necessity of progressive action in the interests of our timber industries. The Forest Act is recognized as one of the best in the country, and much pioneer forest work has been done in fire protection. The point of the situation is an increased provincial income that will make justifiable the provision of an up-to-date forest department in Nova Scotia. Mr. Daniels gave interesting statistics of the damage by fire in Nova Scotia for 1918, the total of which was $92,995, the fires numbering 80 in all, a big percentage of which were caused by the Canadian Government Railways and Southwestern Railways.

Mr. Leavitt spoke in favor of starting a forest service in the province, pointing out the great loss by fire in Nova Scotia.

Mr. McColl referred to the damage caused by the railways and Mr. Wilson also gave a short address. The latter strongly emphasized the need of forest protection in this country. He explained how the farmers could not carry on without the forest lands and how the constant cutting without planting would put the country in a critical condition. He spoke of the good record Nova Scotia had shown in the past, but pointing out the necessity of broadening the outlook and of pushing ahead.

Maritime Conditions

Mr. Robson Black, secretary of the Canadian Forestry Association, spoke before the Canadian Club in the evening in St. Paul's Hall. His theme was "Forestry," and he dealt particularly with conditions in Nova Scotia. "The pioneer's fight against the blockading tree trunks," Mr. Black said, "has been amply won. He has swept and furrowed the valleys from coast to coast. He has done more. His original 'enemy,' the tree, has been pursued far over the border line of genuine agricultural soil. Redeeming the land of Canada from the forest, now becomes the national task of redeeming the land for the forest."

He then emphasized the dependence of mankind upon the forests. Timber and pulp were merely the beginnings of forest utilization. The two Halifax morning papers alone required 100 spruce and balsam trees for a single issue, while one New York daily chewed up 15 acres of forest every week. Moreover, a chunk of wood was capable of giving the world many essential commodities. "Take away timber from a modern military power," he said, "and defence crumbles in an hour."

Upon the forest all other industries depend. Agriculture is the sum of land plus forest. Without timber, the fisherman, the coal miner, and the apple-grower would be greatly inconvenienced, if not entirely helpless.

He said that every wooded province of Canada, except Nova Scotia, had a modern forest service, as had also most of the States of the American Union. This was because the governments realized that the state must be the custodian and trustee of what so manifestly affected the welfare of the present and the future. Four-fifths of Nova Scotia had been made by nature for growing tree crops, and for no other job; yet on 11,000 square miles of timber-growing land, she had only 166 square miles of virgin forest.

Great Britain was planning to give herself forests by planting 2,000 million seedlings at a cost of $10 or $12 and acre. There was no need for Nova Scotia to go to similar trouble and expense. She could provide a splendid forest possession for herself by installing adequate methods of fire protection for a fraction of a cent per acre. France had been felling 40,000 trees a day for four years for trench and road building, yet there was no danger of exhaustion, so successful had been the French system of forestry.

In all progressive and vigilant nations, the forest resources must be perpetuated and preserved by state supervision and care. The long period of time necessary to grow timber made private effort negligible and necessitated community action.

INTEREST PAID ON THE DATE

No bother, no waiting for your interest. No tales of woe from the mortgagor who can't pay. No foreclosure proceedings and loss of time; and no lawyers' fees to eat up your earnings. Just call for your interest; it is cheerfully paid every six months.

PERSONAL COVENANT IN WESTERN MORTGAGES

Effect of Foreclosure Upon Claim on Life Policy—Important Decision of Alberta Supreme Court

Changes made in the Land Titles' Act of Alberta in 1916 created some doubts in the minds of mortgage investors as to how it would be construed by the Courts. The atmosphere has been cleared very considerably by a decision of the Supreme Court in October last, in which it was found that the taking and registering of an order for foreclosure in proceedings taken under Section 62 A of the Land Titles' Act, does not constitute an extinguishment of the mortgage debt.

The clause in question was much criticized at the time and its importance warrants its quotation in full as follows:—

"(a) Provided, however, that where proceedings in respect of any mortgage or encumbrance have already been or hereafter shall have been commenced under the provisions of the next following section, no proceedings under this section for the enforcement of the covenant for payment shall be commenced or if commenced shall be continued until the remedies provided by the next following section are exhausted.

"(b) By adding thereto the following subsection as subsection 2 thereof:—

"(2) Where any action or proceeding has before the date of the passing of the subsection been taken or shall thereafter be taken in any court either under the provisions of this section or to enforce the observance of the covenants, agreements, stipulations or conditions contained in any agreement for the sale of any land, and personal judgment has been or shall be obtained therein, *no execution shall issue thereon until sale of the land mortgaged or encumbered or agreed to be sold has been had or foreclosure ordered and* levy shall then be made only for the amount of the judgment or mortgage debt remaining unsatisfied with costs."

Held Insurance Money Might be Applied

The case was stated and argued before Mr. Justice Simmons on the following facts:—

Plaintiff took action to recover the amount of a policy of life insurance on the life of her deceased husband payable to her. Defence was that the defendant had applied the insurance money upon a mortgage debt created by the plaintiff with respect to which the mortgage was assigned to the defendant as collateral security. The mortgage given in 1911 became in default. No sale being effected, an order for foreclosure was obtained December 20, 1916, which was registered two days later when a certificate of title to the mortgaged lands was granted to the defendant. On February 1st following, the insured died and the policy became payable, and on proofs of death being given, the defendant applied the insurance moneys on the mortgage debt.

Judgment Reversed

Mr. Justice Simmons found that the defendant was entitled to apply the insurance moneys upon the mortgage and on March 7th, 1918, this decision was reversed by Chief Justice Harvey, who, in the course of his judgment, said:—

"The foreclosure order granted under the original act and under our present act is only granted after a failure to sell the land for the purpose of realizing the mortgage debt and unquestionably seems therefore to be for the purpose of realizing the debt. Certainly the mortgagee becomes the owner of the land, not by the order of any Court of equity for the purpose of putting an end to the mortgagor's right to redeem, but in pursuance of the powers given to the mortgagee for the purpose of enabling him to realize on his security. In other words *since he cannot get the money to pay his debt he is given the land for that purpose.*

"He need not take it, of course. It is entirely in his discretion and certainly if he does not take it and cannot get the money by a sale of the land the mortgage debt is not satisfied, but I find it difficult to see in what other way he can be deemed to acquire the land than in payment of the debt."

Chief Justice Harvey's decision was appealed and came before the Supreme Court on October 8th, 1918, where it was reversed and the finding of Justice Simmons restored.

Chief Justice Fitzpatrick said:—

"I decline to accept the suggestion that, if the lender of the money endeavors to realize on his security, he is assumed to have released the debtor from his obligation to pay under the covenant. It may be that the foreclosure order is granted under the act for the purpose of realizing the debt; but, the fact is that the principal obligation to pay the debt is not satisfied even if the security is realized upon unless the amount realized is sufficient to liquidate the obligation.

"There is no evidence here of any intention on the part of the mortgagee to take the property in satisfaction of his debt."

The decision of Chief Justice Harvey, of Alberta, was based upon the well-known Australian case (Fink vs. Robertson) and as to this Chief Justice Fitzpatrick agreed with a dissenting Judge in that case to the effect that foreclosure under the Australian Act does not involve the release of the debt and that the right to recover, under the personal covenant, still continues to exist.

It is assumed that this decision will apply also to Saskatchewan where the taking of a foreclosure and the certificate of title by a mortgagee for proceedings under the Land Titles Act does not operate in satisfaction of the debt.

BRITISH COLUMBIA'S SALMON BILL

In taking all the canned sockeye salmon prepared in British Columbia, the British government will pay $19,200,000 to fishermen on the Pacific Coast. The British government is taking 75 per cent. of the output at $16, the price asked by the vendors, and this practically accounts for all the sockeye salmon.

The arrangement to take the commandeered salmon at $16 was come to recently by the War Purchasing Commission and the representatives of the British government with the packers. In the total pack are included 7,500 cases of what are known to the trade as pinks, and the price on these is fixed at 50 cents a case lower than for the sockeye.

MISREPRESENTATION IN FIRE APPLICATION

A case of particular interest to fire insurance companies throughout the Dominion was concluded in the county court at Cornwall, Ont., recently before Judge O'Reilly, wherein Edward A. Rupert, of Northfield, in that county, brought action against the London and Lancashire Fire Insurance Company to recover $600, the amount of a policy of insurance on a house and barn on a lot south of the village of Northfield, which were destroyed by fire on September 1st, 1916. The company defended the action on the ground of misrepresentation as to the value of the buildings at the time the policy was taken out.

It was brought out in the evidence that Rupert first purchased the buildings and lot for about $120 and borrowed $250 with which to pay the first sum, representing to his loaner that he had paid $500 for the property. The latter afterwards learned the true facts and refused to advance a further sum asked for by Rupert. The mortgagee then sold the property to a Mr. Wereley, a cousin of Rupert, for $160 in Rupert's presence, and Wereley in turn sold it back to Rupert for $500. Rupert then went to the local agent of the London and Lancashire and represented the buildings to be worth $900, and on the strength of this representation he secured a policy for $600. Within a few months the buildings were destroyed by fire, and the insurance company refused to pay the claim.

After hearing much evidence the jury returned a verdict in favor of the company and Judge O'Reilly dismissed the action with costs.

PACKERS WANT RESTRICTIONS REMOVED

Canadian meat packers are seeking to be relieved of the wartime limit placed on their profits. A delegation from the larger firms waited on the government on the 13th inst. to this effect. It was represented that the limit placed on Canadian packers' profits was preventing the establishment within Canada of further cold storage enterprises, and would tend to drive existing establishments out of the Dominion and restrain their further expansion.

The limit on packers' profits was imposed after considerable public discussion. Large profits in bacon made by the principal cold storage companies had been pointed out in the O'Connor report, and were later emphasized by the Henderson Commission, appointed by the government to investigate. The latter commission devoted its attention particularly to the William Davies Company, Limited, and Matthews-Blackwell, Limited. As a consequence of the commission's report, the government passed an order-in-council limiting packers' profits to 11 per cent. on actually invested capital. A d dend of 7 per cent. was to go free of taxation. Between 7 per cent. and 15 per cent., the tax was to be 50 per cent. of the profits over 7 per cent. All profits over 15 per cent. were to go to the treasury. Thus the highest profit a company was allowed to make was 11 per cent., or 7 per cent., plus one-half of the difference between 7 and 15.

The order-in-council imposing the limit was pas March and made retroactive to January 1 last. It was to continue in force "during the present war and until furth order."

A branch of the Dominion Bank has been opened at St. Boniface, Man., to be known as "Union Stock Yards Branch, St. Boniface, Man."

MUNICIPAL BOND MARKET

The Monetary Times' Weekly Register of Municipal Activities and Financing

Dover Township, Ont.—Messrs. Brent, Noxon and Company, of Toronto, have purchased $49,000 6 per cent. 15-instalment bonds.

Edmonton, Alta.—Messrs. McNeill and Young, of Toronto, have purchased $26,500 7 per cent. 10-instalment Alberta School District bonds.

Whitby, Ont.—Messrs. Brent, Noxon and Company, of Toronto, have purchased $10,900 6 per cent. 30-instalment bonds. The proceeds will be used for water purposes.

Beeton, Ont.—Messrs. C. H. Burgess and Company, of Toronto, have purchased an issue of $15,000 5 per cent. 30-instalment bonds. These bonds are guaranteed by the county of Simcoe, and the proceeds will be used for Hydro purposes.

Smith's Falls, Ont.—Messrs. W. A. Mackenzie and Company, of Toronto, have been awarded two blocks of 6 per cent. 20-instalment debentures. One is for $12,900 for waterworks, and the other $11,000 for electric light purposes. The price paid was 99.17.

Ottawa, Ont.—Two debenture by-laws have been proposed as follows:—

1. To issue $150,000 6 per cent. 20-instalment debentures for the purpose of constructing a new bridge over the Rideau Canal.

2. To issue $150,000 6 per cent. 5-year debentures for the purpose of establishing, conducting and maintaining a municipal coal yard and for the purchase of coal.

London, Ont.—The board of control received a communication from D. O. Cameron, of Toronto, with reference to placing city of London bonds of small denominations on the market. The board gave the matter scant consideration, feeling that the present was not an opportune time to deal with the question. City Clerk Baker stated that the scheme had given great satisfaction in many United States cities, where bonds have been sold over the counters in department stores, etc.

Saskatoon, Sask.—The city has sold an issue of $30,000 [illegible] per cent. 15-year debentures to the Bond and Debenture Corporation, of Winnipeg, at 98.50. The following is a list of bids:—

Bond and Debenture Corporation, Winnipeg, Man..	98.50
Wood, Gundy and Company, Toronto, Ont.	97.18
A. Jarvis and Company, Toronto, Ont.	96.58
Dominion Securities Corporation, Toronto, Ont.....	96.089
W. A. Mackenzie and Company, Toronto, Ont.......	95.53
Canada Bond Corporation, Toronto, Ont.	95.52
C. H. Burgess and Company, Toronto, Ont.	95.37

The money is required to purchase additional fire equipment.

Saskatchewan.—The following is a list of authorizations granted by the local government board from November 15th to December 7th, 1918.—

Rockside, $600 10-years not ex. 8 per cent. instalment; Jackfish, $2,500 10-years not ex. 8 per cent. annuity; Odel, $1,200 10-years not ex. 8 per cent. annuity; Warmley, $750 5-years not ex. 8 per cent. instalment; South Side, $2,850 [illegible]-years not ex. 8 per cent. annuity.

Rural Telephone Companies.—Roseville, $9,550 15-years not ex. 8 per cent. annuity; Maymont, $4,800 15-years not ex. 8 per cent. annuity; Cutknife, $3,250 15-years not ex. 8 per cent. annuity; Ernscliffe, $300 15-years not ex. 8 per cent. annuity; Banbury, $500 12-years not ex. 8 per cent. annuity; Luseland East, $2,925 15-years not ex. 8 per cent. annuity; Hope Lodge, $1,800 15-years not ex. 7 per cent. annuity.

Town of Kerrobert.—$5,128.21, 10-years not ex. 8 per cent. annuity. Union Hospital. A. W. Ford, Kerrobert.

Rural Municipality of Hearts Hill.—$5,769.21 15-years not ex. 8 per cent. instalment. Union Hospital; F. P. Saunders, Major.

Village of Fielding.—$750 10-years not ex. 6½ per cent. instalment, drilling well; J. P. Brownridge, Fielding.

The following is a list of debentures reported sold from November 15th to December 7th, 1918.—

School Districts.—McPherson, $450; Roderick Christie, Grenfell. Thornfield, $700; V. F. Lambert, Venn. Prairie Land, $2,500, Foch, $2,500; Waterman-Waterbury Manufacturing Company, Regina. Margo, $700, Light, $800, Canada Landed and National Investment Company, Winnipeg. Sasman, $1,200; J. G. McKenchnie, Regina.

Sold through local government board sale:—

Rural Telephone Companies.—Cudworth, $25,000, Doyton, $3,800, Aneroid South, $6,051.50, Marquis, $2,400, Drake-Ballard and Company, Moose Jaw. Bestville, $3,400, Ernfold, $350; W. L. McKinnon and Company, Regina. Manitou Lake, $1,000, Elkhead, $850, Mawer, $3,500; T. P. Taylor, Regina. North Kisbey, $3,000; C. O. Daragh, Noleville, $1,650; Wood, Gundy and Company. Kerrobert Northern, $9,000; Kerr, Fleming and Company. Cudworth, $2,000; sold locally to various purchasers.

Rural Municipality of Browning.—$8,100; Kerr, Fleming and Company, Regina.

Village of Kisbey.—$1,000; Chas. A. Darough.

Toronto, Ont.—The Dominion Securities Company, of Toronto, acting with W. A. Read and Company, of New York, have bought a million dollars worth of 4½ per cent. 35-year Toronto harbor bonds for $833,900, payable in New York. Theirs was the highest of thirteen tenders opened by Mayor Church on December 13th the next highest bidder being the Sterling Bank at $825,416, payable at Toronto.

The city treasurer announced, before the bonds were opened that, in considering the tenders' exchange at the current rate of one and thirty-seven sixty-fourths would be added to tenders specified as payable in New York, where there was no alternative tender for payment in Canada.

The marked cheques submitted with the tenders totalled $260,000. The following is a list of tenders:—

	Payable.	Price.
Merchants Bank	New York	$773,000
W. A. Mackenzie and Company and Brent, Noxon and Company	Toronto	816,159
Housser, Osler and Hammond	Toronto	804,730
Canada Bond Corporation, Greenshields and Company, and Morrow and Jellett	Toronto	815,470
R. A. Daly and Company and Kean, Taylor and Company	Toronto	816,250
Æmilius Jarvis and Company	Toronto	811,299
G. A. Stimson and Company	Toronto	796,600
C. Meredith and Company,. R. C. Matthews and Company, and Hanson Brothers	Toronto	775,500
C. H. Burgess and Company, W. L. McKinnon and Company, Campbell, Thompson and Company, and Mulholland, Bird and Graham	Toronto	801,660
Sterling Bank	Toronto	825,416
Sterling Bank	New York	813,766
Ames and Company and Kissell, Kinnicut and Company	Toronto	799,580
Ames and Company and Kissell, Kinnicut and Company	New York	791,900
Dominion Securities and W. A. Read and Company	New York	833,900
Wood, Gundy and Company	Toronto	797,999

Finance Commissioner Bradshaw stated that the harbor board would realize a price of 84.71 from the bonds because of the fact that the bonds were payable, according to tender, in New York funds, as there is a premium on New York funds, and this, added to 83.39, makes the total shown above, so that the board will realize $847,100. The money thus costs the harbor board 5.485, which is less than the rate on the Victory Bonds, and there is no expense to the sale.

The official list of tenders, transposed into terms of Canadian funds, follows:—

Merchants Bank of Canada	78.52
Wood, Gundy and Company, Toronto, and National City Company, New York	79.7999
A. E. Ames and Company, Toronto, and Kissell, Kinnicut and Company, New York	80.449
Sterling Bank of Canada	82.6608
C. H. Burgess and Company, Campbell, Thompson and Company, W. L. McKinnon and Company, and Mulholland, Bird and Graham, Toronto....	80.166
C. Meredith and Company, Montreal, Hanson Brothers, Montreal, R. C. Matthews and Company, Toronto	77.55
Messrs. G. A. Stimson and Company, Toronto....	79.66

The connection of a United States firm, together with the fact that the highest tender was two points above the second tender, suggested the inference that a large percentage of the bonds would be disposed of in the United States, where conditions favor a long-term security of this kind.

PLANS FOR SOLDIERS SETTLEMENT

Bill Providing Powers of Expropriation to be Introduced at Next Session of Dominion Legislature

The Dominion government is planning to provide land for returned soldiers by means of expropriation, either directly or through provincial bodies. These plans are outlined in a cable which Hon Arthur Meighen sent to the prime minister on the 15th instant. This reads as follows:—

"My proposal to provincial conference included introduction to parliament of new Soldier Settlement Act, embodying power for the board to acquire, by expropriation or otherwise, lands in any province, either directly or through provincially constituted boards. If acquired provincially our board to have first privilege for limited time to take over same at cost price, thus giving soldiers preference on all land acquired in general system. Our board is also to be empowered to purchase stock and equipment for soldiers, and will provide soldiers with house and building plans.

"Lands acquired as above will be sold to soldiers on amortization plan, twenty years or longer at 5 per cent. interest. Each soldier's allotment of land to be limited by value, not acreage, and suggested limit $5,000. Each soldier to pay one-tenth down, with discretion to board in very special cases to relieve of this obligation. Board then provides soldier with stock and equipment up to $1,500, no interest for two years, and thereafter 5 per cent., short term. Aa soldier improves land, board may advance up to $1,000 additional, repayment on amortization plan. Indian lands adequately surrendered and specially available government lands will be also made available for sale to soldiers, who will then be entitled to assistance under above plan. Soldiers securing land privately, where terms approved by board, shall also be entitled to assistance for equipment and to additional assistance for improvement as above. A scheme of practical agricultural education has been matured and is now in operation. Major Ashton and Mr. Bailey are overseas now to inaugurate work there. Most careful provision will be made for testing qualifications of all applicants, and only probably successful men will be accepted. After settlement every possible supervision and encouragement will be given. All homesteadable lands or provincial Crown lands made available by provinces may be homesteaded, and the soldier given assistance thereon under the plan of the present act."

ADVERTISING CANADA'S INDUSTRY

The Department of Trade and Commerce has prepared a series of moving picture films describing various Canadian industries, and also Canadian scenery. These are being exhibited at the present time in Canada, and later on will be shown abroad through the agency of Canadian trade commissioners and British consuls.

LOANS UNDER SOLDIER SETTLEMENT ACT

Over $1,000,000 Was Borrowed by 975 Soldiers Up to End of October

A statement of the results of the Soldier Settlement Act of 1917 has been issued by the Dominion government, as follows:—

The Soldier Settlement Act, 1917, was passed as an aid to returned soldiers in settling upon land and to increase agricultural production of Canada. The act applies to members of our expeditionary force who have left with an honorable record or have been honorably discharged, also discharged members of the expeditionary forces of the United Kingdom and other British dominions, who saw active service at a seat of war, and to such members discharged from active service in the forces of our allies who were British subjects resident in Canada before the war. It also applies to the widows of any such persons who died in active service.

Terms of Loans

The act provides for loaning to those entitled to its benefits, on the security of a first charge or first mortgage against their lands amounts up to a maximum of $2,500. The uses to which such loaned money are to be put are the acquiring of land for agricultural purposes, the payment of encumbrances against such land, the erection of farm buildings and the purchase of stock, machinery and equipment. The amount of the loan in each case must be justified by the value of the security offered.

In February, 1918, a board of commissioners was appointed under the act for the purpose of administering it.

In the case of returned soldiers on vacant Dominion homestead lands, the loan provisions apply on the same terms as if the lands were privately owned, and in addition to his ordinary civilian right of homestead entry a further quarter section of 160 acres may be granted an eligible settler under entry on suitable settlement conditions.

The regulations respecting the granting of Dominion lands under this act became effective on July 2nd last, from which date up to October 15th last 620 returned soldiers have secured soldier entry. Of these, 483 also hold homestead entries, totalling 1,103 quarter sections, 176,480 acres.

In each province in Canada there now is a representative of the board, and loan applications may be made by returned soldier settlers in respect of agricultural land wherever situate. The work of the board has steadily progressed; and up to October 31st, loans had been approved of to 975 soldiers for a total of $1,239,685.

ASK EXTENSION OF COMPENSATION ACT

A deputation from the Building Trades League waited upon Sir Wm. Heart and Hon. W. D. McPherson on December 10th, and asked the government to make a number of changes in the Workmen's Compensation Act. All the branches of the building trades were represented by the deputation, which consisted of John Doggitt, John Vick, W. J. Storey, H. McKay, J. Hopkin, J. Gilander, F. Watkinson, and Wm. Varley. They made the following representation to the government:—

1. That the present rate of 55 per cent. of the workmen's former wages was inadequate to meet the liabilities.
2. That the entire cost of all accidents should be borne by the various industries covered by the act, and that injured workmen should receive compensation to the full extent of their former wages.
3. As a lot of time is lost owing to weather conditions, the men should be compensated on the basis of union or the prevailing rate of wages paid in the cities or towns.
4. That the medical provision of the act, which at present only covers the first month of disability, should cover the whole period.
5. That the scope of the act should be broadened to include private companies not engaged in the building trade.
6. That widows should receive at least $30 a month for themselves and $10 for each child under 16, instead of $20 a month and $5 for each child up to a maximum of $40, as at present.

NOVA SCOTIA CROP GAINS

Provincial Report Shows Increases in Many Branches of Agriculture

The crop report of Nova Scotia for 1918 has been issued by M. Cumming, the secretary for agriculture, and W. B. McCoy, the secretary of industries and immigration. Their report is based upon returns from 355 crop correspondents, and is the most comprehensive in the history of the province.

Hay, the most important crop of the province, was short, averaging only 80 per cent. of the previous year. At the same time the crop proved larger than indications promised in the early spring and fortunately it will be supplemented by a crop of straw considerably larger than usual. The quality of the hay crop is fully up to the average. It should be understood that, while there is an undoubted shortage of hay there does not seem to be any danger of famine except in a few districts. Correspondents throughout the greater part of Cape Breton Counties and in scattered sections of the mainland report more hay than last year. Farmers are carefully husbanding their supplies, mainly through a widespread fear of scarcity next spring, and accordingly, town buyers are having difficulty in securing sufficient supplies and prices have reached record levels. Apart from seasonable conditions the flooding of the Cumberland County marshes is responsible for a substantial shortage of hay. The total yield was 978,696 tons.

Roots and Vegetables

Potatoes, turnips and other root crops yielded very heavily, but the prolonged wet weather toward the latter part of the season has caused an unusually large amount of rot in potatoes, resulting in considerable loss. There was increase of 10 per cent. in the acreage under potatoes. Farmers who sprayed their potato fields thoroughly were, for the most part, successful in avoiding this loss, but in unsprayed fields the damage sometimes exceeded 50 per cent. of the crop. The acreage under turnips is gradually increasing. The yields on well drained lands for the current year were large. Nearly ten million bushels of potatoes were harvested and over ten million bushels of turnips.

Wet Harvest Weather

Only for the unusually wet weather at harvest time the oat crop would have been the largest in the history of the province. The farmers who managed to harvest early, report nearly double the yield of last year. Those whose crops were late lost anywhere between 20 and 80 per cent. of the possible yield. Although the grains are as a rule discolored, the quality is reported above the average. There was an increase of 15 per cent. in the acreage of this crop and five and one-quarter million bushels were harvested.

Wheat Acreage Increased

The war is responsible for a big increase in the wheat acreage in Nova Scotia, the area having practically doubled since hostilities began in 1914. Eleven new roller process wheat mills of the best construction have been erected under a policy adopted by the provincial department of agriculture for the encouragement of wheat raising. There was an increase of 20 per cent. in wheat acreage, and the yield was over 700,000 bushels.

Owing to the shortage of mill feeds last year a considerable number of farmers who had not hitherto sown barley put in a small acreage. The acreage under rye and buckwheat remain unchanged. There was a 20 per cent. increase in the acreage under beans, but the weather was unfavorable and the crop is 20 per cent. under average.

Livestock.

Sixty-eight per cent. of the correspondents reported pastures above the average in quality. Twenty-two per cent. reported pasturage to be fair and 10 per cent. reported pastures as poor.

Increase was reported in the numbers of sheep, hogs and poultry. Cattle and horses were reported as remaining stationary. Since these returns were made, however, farmers have been endeavoring to reduce their stocks of cattle in order to husband their short crops of hay.

The output of creameries totals 1,800,000 pounds in comparison with 1,760,871 last year. There are now 4,300 patrons of creameries in the province.

Apple Yield is 500,000 Barrels

The yield of apples is placed at 500,000 barrels. The season was a poor one for fruit, the set being unusually low. The aggregate result is being helped out by the larger size and the generally improved quality of fruit over last year. Plums were an off crop. Pears and cherries were a little better. Strawberries, raspberries, gooseberries and cranberries were from 20 to 25 per cent. below the previous year. Had it not been for the favorable prices prevailing for all these fruits the fruit growers would have had a disastrous year.

Correspondents were asked about the available supply of seed oats, wheat and potatoes. The average of their reports indicate a decidedly more favorable outlook than last year for these seeds, with the possible exception of potatoes which have been heavily reduced by rot. Reports indicate that home grown seeds in general give better results than imported seeds. It is understood that it will not be necessary to import as much seed during 1919 as was necessary in 1918.

During 1918 the total acreage under crops, exclusive of apples, was 2,119,862.

CANADA'S TRADE WITH UNITED STATES SHOWS INCREASE

An analysis of United States trade in October, issued from Washington, shows American imports of Canadian products at the highest level of the year, but the balance against Canada considerably larger than in October, 1917, owing to heavier Canadian imports of American products.

The ten months' figures to October 31st are somewhat disappointing in that, while Canadian exports to the United States have increased substantially, there has been an increase of almost the same size in Canadian imports.

At the end of July the balance against Canada stood about $60,000,000 less than in the corresponding period of 1917. The reduction in the adverse balance for the ten months to October 31st is only a little more than $6,000,000.

WIND UP SARNIA REALTY COMPANY

On the petition of the company itself, secretary Eva Jane Pashley, and president Norman Frederick Watson, Mr. Justice Masten, at Osgoode Hall, has granted an order to wind up the Sarnia Realty Company, Limited, of Sarnia, capitalized at $100,000 in 1908, but with the amount increased to $1,000,000 in 1913.

The company's objects were to act as insurance agents, carry on a general brokerage business, sell, lease, mortgage land, etc.

The late president was Frederick Charles Watson, private broker, who died on November 24th, 1918.

According to the petitioners, the company assigned on December 7th, 1918. They say that 1,780 shares have been fully paid up, but that on the remaining shares only 5 per cent has been paid. The business was continued until November 23rd last.

Osler Wade has been appointed provisional liquidator, and J. A. C. Cameron, Master-in-Chambers, is the official referee.

The Imperial Bank of Canada has opened three new branches in the Canadian west. They are located at Grand Prairie, Alta., Waldheim, Sask., and Riverton, Man.

In order to help the staff secure employment, the Imperial Munitions Board has appointed an employment registrar, who is getting into touch with business men of the capital and other cities. The staff about to be discharged includes mechanics of all grades, accountants, mechanical, civil and electrical engineers and chemists, as well as a number of experienced railway men.

The statement that the government had purchased eight million dollars' worth of canned salmon in British Columbia, which is still on hand and unsold, is wholly incorrect, says the Canada Food Board. The purchase was made on behalf of the British Ministry of Food on terms determined by the War Purchasing Commission. The salmon has all been shipped, and the terms of payment have been complied with.

RESULTS OF UNION GOVERNMENT

Military Service, National Railway and Shipping Policy, and Other Items in Government Programme

Sir Thomas White, acting premier, has handed to the press the following statement of what the Union government has done:—

"The government has vigorously and impartially enforced the Military Service Act. As a result there were obtained over eighty thousand men as reinforcements for our forces overseas. There were also called up but released on compassionate grounds or for other adequate reasons, twenty-five thousand men. The Military Police, under the Department of Militia, have vigorously pressed the apprehension and prosecution of deserters. Since the armistice, men are no longer required for military service, but the government is continuing proceedings against those in default under the Military Service Act with a view to their being brought to justice and punished for their offences. Serious difficulties in the enforcement of the law have been encountered in certain sections by reason of trafficking in exemptions and leave certificates. These cases are being fully investigated in order that all who have been found guilty of wrong-doing may be brought to trial without delay.

Shipbuilding Programme

"An outstanding feature of the Government's policy during the year has been the establishment of a great shipbuilding industry. Over forty steel vessels for government account are now under order, the total estimated programme for this and the coming year aggregating over sixty million dollars. The activities of all Canadian shipyards are being maintained at their highest capacity, furnishing employment for an army of workmen and sustaining many subsidiary enterprises of an important national character.

"Pensions for our soldiers and their dependents have been substantially increased and extended. Separation allowance to the wives and dependents of those serving overseas has been increased. A Department of Soldiers' Civil Re-establishment has been created, and plans and policies have been elaborated for re-establishing the soldier in civil life. A soldiers' Land Settlement Board has been appointed, and great progress made in developing a policy under which suitable land will be acquired for settlement by soldiers and under which they will be aided in establishing themselves upon the land

Labor and Capital

"In the early part of the present year, co-operative relations were established between labor and the government in working out war problems.

"A special committee on which both employers and employees are represented has been appointed to consider and recommend measures to improve the relations of labor and capital, and labor has been given representation on the labor sub-committee of the cabinet and on other boards and committees since appointed by the Government.

"Legislation has been passed providing for the development of a system of labor exchanges throughout the provinces and of labor clearing houses under Federal jurisdiction. A war labor policy has been formulated and a labor appeal board constituted, on which employers and employees are represented

"In its war work and reconstruction activity the Government has sought the co-operation of the women of Canada, whose patriotic, unselfish and devoted services played so notable a part in Canada's conduct of the war. On the various boards and committees to which they have been appointed, Canadian women have served with ability and distinction. The extension of the Federal franchise to women was one of the most noteworthy features of the last session of Parliament.

"A comprehensive immigration and land settlement policy has been worked out by the minister of immigration and colonization, and the co-operation of the governments of the provinces has been secured The necessary legislation will be introduced at the approaching session of Parliament to carry into effect this policy.

"The government has completed the purchase of the Canadian Northern Railway and consolidated all the government-owned railways, including the Intercolonial and the Transcontinental Railway, under a board of directors of business men who will operate the roads in the national interest. For the better co-ordination and direction of the immense railway traffic arising out of the war, the Canadian Railway War Board, composed of the chief executives of the principal Canadian railways, was formed and has rendered most excellent service, avoiding serious difficulties which would otherwise have arisen in the field of transportation.

"The minister of railways has, during the year, contracted for 185 locomotives, 8,500 freight cars and one hundred thousand tons of rails. Orders are now being placed for two hundred thousand additional tons of rails, and one hundred colonist cars. To provide employment during the period of demobilization, the department is proceeding with the construction of the Welland Ship Canal, work on which has been shut down because of the war. In the same way work will be resumed on the final section of the Trent Canal.

Other Accomplishments

"To promote national efficiency and economy, the government has prohibited the importation or manufacture and inter-provincial sale of intoxicating liquors for the period of the war and for one year thereafter.

"The government has passed legislation putting the whole civil service under the Civil Service Commission, and entirely eliminating political patronage in connection with appointments to the public service.

"The government has placed the purchasing of all supplies for all the departments of the government in the hands of the War Purchasing Commission, a body of business men, thus eliminating all political preference in the purchase of goods for the government."

TRADE IN CREOSOTED TIES WITH THE ORIENT

There is every probability of a substantial trade in creosoted piles and railroad ties growing up between the British Columbia coast and the Orient, more particularly India and Southern China, in the opinion of George E. Herrmann, manager of the North Vancouver Creosoting Company. His company sent a shipment to Southern China last year, and has a representative in India. Large quantities have been shipped to eastern countries in the past.

When shipping conditions have improved, perhaps in about six months' time, there would be sufficient demand for this product from the Orient to keep both the British Columbia plants going continuously. The other plant is situated on the Fraser River. There are a few small experimental plants in China, but the industry does not thrive there, as the timber available is limited, and what there is does not take the creosote well. Moreover, the cost of transporting the creosote to China is great. Douglas fir has been proved the best timber for railroad ties in China, and has been used there for the past six or seven years.

The object of creosoting piles and ties is to keep insect life from eating into and destroying them. For piles it is necessary only when they are in salt water. In India the white ant is very destructive of railroad ties, and will spoil them for use in a few months unless they have been treated to prevent it.

Although the North Vancouver company has been in operation only two years, the process of treating lumber with creosote has been in use for at least half a century. Records have been kept of some creosoted piles that lasted for 33 years in salt water, and are still doing service.

Niagara Falls electors will, at the January municipal elections, vote on the question of buying the street railway, which is owned by the Canadian Northern.

"Positions Wanted," 2c. per word; all other condensed advertisements, 4 c. per word. Minimum charge for any condensed advertisement, 50c. per insertion. All condensed advertisements must conform to usual style. Condensed advertisements, on account of the very low rates charged for them, are payable in advance: 50 per cent extra if charged.

WANTED.—By General Broker's Office, a young man to take charge of Casualty Business and Casualty Claims Department. Apply, stating experience, to Box 209, *Monetary Times*, Toronto.

Large capital available for Investment in undertakings of merit and stability that will bear searching investigation.

$100,000.00 UPWARDS

Proposals must be accompanied by fullest particulars. Address in first instance—Box No. 211, Monetary Times, Toronto, or Box 200, Monetary Times Office, Winnipeg.

WANTED

The Quebec Board of Trade is looking for an energetic and thorough business man as Trade Commissioner for the City of Quebec. Will be required to have the following qualifications: Well educated, able to speak in public, of good address, sound business judgment. Prefer one capable of speaking English and French. Good salary will be paid to right man. Contract for four years. Reply to undersigned giving age (state if married or single), references, salary expected and any further information as to experience and capacity to fill this position. Also mention date would be able to commence duty.

O. W. BEDARD, *President*,
Quebec Board of Trade,
Quebec.

BANK OF HOCHELAGA'S REPORT

Banque d'Hochelaga, in the first of the annual statements from banking institutions whose year closed on November 30th, reports satisfactory increases, total assets rising to nearly $57,000,000, against about $51,000,000 a year ago, while profits earned for shareholders were about $30,000 higher at $595,187. That represented earnings at the rate of 14.9 per cent. on paid-up capital, before providing for war tax on circulation, against profits at the rate of 14.1 per cent. a year ago, and 13.6 per cent. two years ago.

Deductions for the year included chiefly $360,000 for the dividend, $100,000 set aside for reserve fund, and $50,000 written off bank premises. After all deductions, a balance of $62,959 was carried forward to profit and loss, against $45,021 a year ago. Leading features of the balance sheet include an increase of $5,878,815 in total deposits, with the increase under the head of savings deposits about $2,300,000. The larger gain under the head of demand deposits could be taken to reflect the recent transfer of funds to government account, as a result of investors' subscriptions to the Victory Loan. Cash on hand, balance due, etc., increased $2,125,068, bringing these various cash items up to a total of $12,516,071, or over 25 per cent. of the bank's liabilities to the public.

Liquid assets show an increase of $5,601,133 over last year, amounting to $28,185,562, or in excess of 57 per cent. of public liabilities, against about 51 per cent. a year ago. Current loans and discounts in Canada at $23,991,398 are about $300,000 higher.

The Bank of Montreal has opened branches at Calder, Sask., Ethelbert, Man., and Verigin, Sask.

FIRE PREVENTION THROUGHOUT DOMINION

Delegates Discuss Methods at Representative Conference at Ottawa

A meeting of the Dominion Fire Prevention Committee representative of practically all interests concerned in the reduction of fire waste, called together by the superintendent of insurance, met in Ottawa on Friday, the 13th instant, and was addressed at the opening of the proceedings by Sir Thomas White, who extended a welcome to the representatives and assured them of the desire of the government to assist in the solution of this great problem.

At luncheon, Hon. Mr. Rowell, president of the council, addressed the committee on the work of reconstruction with which Canada, and particularly the reconstruction committee of the Cabinet, is now very much concerned. Mr. Rowell stated that it was most appropriate that this committee should have met at this particular time when the many questions of reconstruction and conservation and thrift were engaging the attention of the government.

Mr. G. M. Murray, Secretary of the Canadian Manufacturers' Association, and Mr. James White, of the commission of conservation, briefly addressed the committee at luncheon, both urging the enforcement of personal responsibility for fires.

During the noon hour, through the courtesy of the Department of Public Works, and of the architects, an inspection was made of the interior of the new Parliament Buildings.

Results Reached

Three business sessions of the committee were held; in the morning, afternoon and evening, and many important resolutions were adopted. Among these resolutions was one recommending that a campaign of education be undertaken through the press and by public meetings with a view to arousing the public to the necessity of reducing fire waste; a resolution favoring the introduction of systematic education in the schools by means of moving pictures, lectures and pamphlets; a resolution in favor of the government inspection of buildings, insured and uninsured, for the purpose of detecting conditions likely to cause fires, such inspection to include not only physical construction, but other matters such as cleanliness, methods of disposal of waste and regulations for conduct of employees; a resolution in favor of insurance companies reporting to the government all risks in which objectionable conditions exist and which the owner or tenant, whichever is responsible therefor, fails to remedy; a resolution favoring legislation requiring every person effecting insurance to fill out and sign a written application within a prescribed period after the insurance becomes effective. Specimen questions to be included in such an application were also considered.

A resolution was also adopted urging the desirability of better municipal by-laws; and the enforcement of existing by-laws, and a resolution that there should be legislation fixing personal responsibility for fires occurring after failure of the owners to comply with the requirements of inspectors appointed or authorized by the government. Recommendations were made for the wider adoption of sprinkler equipment and for uniform hose couplings.

A full discussion took place on many other aspects of fire prevention.

At the evening session brief addresses were given by Mr. Grove Smith, of the commission of conservation; Mr. J. B. Laidlaw, who outlined the work of the advisory committee of the Fire Prevention League in Ontario, and by Chief Graham, of Ottawa, who described the methods of inspection which have been adopted by his department.

The committee has been constituted as a permanent Dominion advisory committee of fire prevention with whom the government may consult from time to time as necessity therefor may arise in the carrying into effect of the resolutions adopted.

The representatives present were as follows:—

1. Canadian Fire Underwriters' Association: J .B. Laidlaw, manager Norwich Union Fire Insurance Society, Toronto; E. F. Garrow, secretary British American Assurance Co., Toronto; J. A. Robertson, secretary C.F.U.A., Toronto; A. W. Hadrill, permanent chairman of the executive committee, C.F.U.A., Montreal.

2. Non-tariff insurance companies: J. N. Mackendrick, Galt, Ont.

3. Canadian Manufacturers' Association: W. H. Shapley and G. M. Murray, Toronto.

4. Canadian Credit Men's Trust Association: A. S. Crighton, Toronto; T. W. Learie, W. R. Johnston & Co., Ltd., Toronto.

5. Retail Merchants' Association of Canada: E. M. Trowern, secretary R.M.A. of Canada, Ottawa.

6. United Farmers of Alberta: A. Van R. Schermerhorn, Calgary, Alta.

7. United Farmers of Ontario: James McEwing, Grayton, Ont.

8. Wholesale Grocers' Association: H. W. Chamberlain, Ottawa.

9. Canadian Bankers' Association: H. T. Ross, secretary C.B.A., Montreal.

10. Dominion Mortgage and Investments' Association: A. E. Holt, vice-president, Montreal; J. Appleton, secretary, Toronto.

11. Fire Chiefs' Association: J. W. Graham, Ottawa.

12. Commission of Conservation: James White, assistant to the chairman, Ottawa; J. Grove Smith, fire prevention engineer, Ottawa.

13. Department of Insurance.

Several other representatives of insurance companies from Montreal, who expected to be present, were prevented by reason of the civic strike. A letter of regret was also received from Mr. Tom Moore, President of the Trades and Labor Congress of Canada, stating that owing to his absence from Ottawa he was unable to be present.

Mr. W. H. Shapley, of the Canadian Manufacturers' Association, acted as chairman of the committee and Mr. Finlayson, the superintendent of insurance, as secretary.

The committee adopted a resolution of thanks to the minister of finance and the Department of Insurance for calling the committee together.

LIVE STOCK MEN DISCUSS PROSPECTS

Representatives of the principal live stock associations, with headquarters in Ontario, met at the Carls-Rite Hotel in Toronto, on December 14th, under the chairmanship of Mr. William Smith, M.P., to discuss with Mr. H. S. Arkell, Dominion live stock commissioner, plans for taking advantage of the immense market for live stock products resulting from the shortage of cattle, hogs, sheep and all food animals and their products in Europe.

The associations represented were: Dominion Shorthorn Breeders' Association, Dominion Ayrshire Breeders' Association, Canadian Jersey Society, Canadian Thoroughbred Horse Society, Canadian Swine Breeders' Association, Canadian Holstein Association, Western Canada Live Stock Union, Canadian Clydesdale Association, Canadian Pony Society, Percheron Horse Association, Hackney Horse Association, Canadian Kennel Club, and the Canadian Shire Horse Association.

Canadian opportunity in the export market for live stock and live stock products, particularly bacon, beef, butter, cheese and eggs, was unanimously admitted, and discussion resolved to questions of ways and means of securing the trade to best advantage. It was finally decided to leave the matter of choosing a representative, or representatives, who should go to Europe and see that Canadian live stock interests were kept to the fore, to the Dominion Live Stock Commissioner, subject to the approval of the minister of agriculture.

A committee comprising Dr. Tolmie, M.P., Professor Day and Mr. D. O. Bull, was authorized to draw up recommendations for submission to the Live Stock Council, on the questions of live stock credits and improved transportation facilities.

A NARRATIVE

"It seemed but over-night when we reached the great Hinterland back of Lake Superior, with its innumerable rivers clothed to the edge with a tangle of forest, interspersed here and there by rocky ridges—the bright green of the underbrush and the shadowy white of the birch breaking indiscriminately the dark evergreen of the predominating pines.

"Nearing the head of the Lakes the country becomes more broken and Nipigon Forest Reserve with its world-famed trout streams is soon traversed. At Port Arthur we saw the largest grain elevator on the Continent, and were informed that the immense shipbuilding industries here, and its rapidly increasing trade as the distributing point for the great undeveloped territories lying to the north and west, is rapidly developing a great, metropolitan city. Leaving Port Arthur, the route lies through the picturesque Rainy Lakes district and Quebec National Park, reaching Winnipeg by a fertile and gradually rolling prairie.

"West of Winnipeg the prairie continued with its teeming activities, and innumerable clusters of grain elevators standing silent sentinel will long be remembered as we rolled along over the flat country. A choice of routes is available west of Winnipeg, taking one either through Brandon, Regina and Saskatoon, the southern route; through the Central Districts; or by Northern Manitoba and Saskatchewan to Calgary and Edmonton. We chose the second because of its through train service. At Calgary and at Edmonton our short stay was well spent in studying the great commercial and agricultural opportunities of this Last Great West with its infinite possibilities as the outpost of a mighty nation. Here, work, enterprise and prosperity go hand in hand.

"From Edmonton west the prairie is soon replaced by the haze-clothed mountains in the distance, and following the banks of the Athabaska River the Canadian Northern passes through Jasper National Park, a second Yellowstone, to Yellowhead Pass—the Great Divide. Yellowhead, as tradition has it, is named after a mighty Iroquois-Scotch trapper known as Tete Jaune, or Yellowhead, who hid or cached his furs at this spot and stood a tower of strength and a goodly beacon to the luckless wayfarer in the tempestuous days of old.

"The scenery at this point is grand—a rocky gorge covered with dark pines and light green shrub above surmount the seething currents of the Fraser, while towering on either side and lost in the clouds are the snow-capped peaks of the giant Mount Robson, the highest known in Canada. Such is the surrounding chosen by a grateful country in its selection of a fitting tribute to the memory of the famous British nurse martyred by Germans in Belgium, October, 1915—'Mount Edith Cavell.'

"Journeying south from the Yellowhead we followed the Canoe and Albreda rivers, which are in turn succeeded by the North and Main Thompson rivers, reaching at Lytton the lower waters of the main Fraser. From here west we crossed and re-crossed, hugging its mighty and picturesque banks through to Vancouver.

"Nowhere in this mountainous and river-valley route of over 700 miles from the gateway to the Rockies clear through to the Pacific did it grow monotonous or time hang heavily, so insistent were the attractions which flashed past the windows of the comfortable Observation Car."

MONTREAL FINANCES IN BAD SHAPE

Only a Small Margin Remains Between Debt and City's Borrowing Powers

The city of Montreal has now current liabilities to the amount of about $800,000. This is, according to a recent statement, made up as follows:—

Current deficit partly estimated	$150,000
Handed over from 1917	100,000
Contractors' holdbacks	65,000
Street railway deficit prior to 1914	114,000
Capital account expended where revenue should have been provided	100,000
Sum to make titles on tax sale property	85,000
Dr. to unexpended by-laws	190,600
Total	$804,600

The first item is a deficit on account of the present year's expenditure, and is being met by an arrangement with the city's bankers. The second item is a similar deficit from 1917 which has not yet been met. The sum of $65,000, which is owed to contractors, and which should have been held from revenue, has been applied for other purposes. The fifth item is explained by the auditors, Messrs. McIntosh & Hyde, in their report for 1914, as having been expended on capital undertakings when revenue moneys should have been used. The item of $85,000 is the sum which, it is expected, it will cost to secure a title in the name of the city to unredeemed properties purchased at the 1914 tax sale, the money being required to discharge arrears of school and other taxes against these properties.

According to the Cities and Towns Act of the province of Quebec, a city can borrow an amount up to 20% of the value of the taxable immovable property. When sums in excess of this are required, the by-law must be approved by three-quarters of the proprietors and also by the lieutenant governor in council When interest and sinking fund absorbs half of the municipality's revenue, the approval of the lieutenant-governor-in-council is required as well as the approval of the proprietors.

At the present time Montreal's debt is within $2,800,000 of this allowance based on present assessment. The assessment has been reduced considerably since 1914, the following table showing the assessment for the past ten years:—

1907	$272,761,032
1908	299,157,416
1909	329,933,089
1910	428,585,356
1911	501,291,812
1912	638,021,625
1913	791,820,595
1914	850,440,637
1915	836,193,549
1916	822,718,557
1917	824,630,229

The reductions shown since 1914 were due to quieter realty conditions, and also to the fact that the assessors in many instances realized that reductions in values must be made in order to save proprietors from heavy losses.

The total revenue obtained from citizens in 1910 was $6,615,701, compared with $17,600,000 for the present year.

If the assessment for 1919 be reduced by a further amount of $2,000,000, as is possible, this would mean that the borrowing powers would be reduced by $400,000. When the present overdrafts of $800,000 are met by borrowing, there would be left, it will be seen, just about $1,500,000 of margin between the city's borrowing powers and its actual debt.

The city's expenses have been increased greatly during the last few years. The following table gives a summary of expenditure for salaries alone for six years:

1912	$2,616,630
1913	3,071,081
1914	3,607,986
1915	3,973,962
1916	4,507,107
1917	4,033,050
1918	4,103,794

It will be noted that in 1917 the pay list was lowered by $500,000. This was due to the cutting off from the rolls of many employees whose services it was found were not at all necessary.

Mr. W. M. Hughes, Australian premier, has received a cablegram, stating that in view of the fact that another wheat harvest is due and will require payments aggregating at least £10,000,000, the Australian Wheat Board considers it desirable to sell one million tons of wheat at a minimum price of 57 pence (approximately $1.18) per bushel, provided that Australia is permitted to compete in the world markets and is able to reserve the rest of the wheat supply on hand.

"THE DAWN OF A TO-MORROW"

The war having ended so happily it is believed that a better world will rise out of the ruin—More of beneficence, equality, fraternity and sympathy with "The Other Fellow" will prevail in the great "To-morrow" that is dawning. Life insurance embodies these great conceptions and will be one of the big movements that "Will Come Into Its Own." Now is the time to make Life Insurance your life work. The war has given the institution of Life Insurance a great impulse and it is appreciated to-day as never before. It is a calling for men of the highest abilities and the finest character. Sell Life Insurance, and sell Mutual Life Insurance for the Mutual system is popular because it is based upon strictly democratic principles. If not as an agent then as a member you will be welcomed into our organization.

INVESTMENTS AND THE MARKET

News and Notes of Active Companies—Their Financing, Operations, Developments, Extensions, Dividénds and Future Plans

Wright-Hargraves Company.—Directors of the company will soon issue notice of intention to sell another block of treasury stock to finance the construction of the proposed 150-ton mill. The company has a capital of $2,000,000, divided into 2,000,000 shares of the par value of $1 each. The property adjoins on the east the rich Lake Shore mine.

Canadian Car and Foundry Company.—The directors of the company have announced that a dividend of 1¾ per cent. has been declared on the preference stock of the company for the quarter ending December 31. It will be paid January 10 to shareholders of record January 1. The three months ending December 31 cover the first quarter of the company's current fiscal year.

The directors hope to be able to maintain the continuity of regular payments from now on, while discharging arrears from time to time as conditions permit. Only one payment has been made to shareholders since the summer of 1914—namely, 3½ per cent. on arrears account in July last. That left a balance of 24½ per cent. owing.

The present declaration of 1¾ will reduce the net amount of arrears to 26¼ per cent. as the present calendar year closes.

Sherwin-Williams Company of Canada.—The annual report of the company was presented at the annual meeting on December 17th.

The results of the business in sales and in net profits are above all previous years. Earnings for the year before providing for depreciation and bond interest amount to $1,162,951, as against $945,272 last year, showing a gain of $217,678, or about 23 per cent. After providing for depreciation of $121,023, bond interest $128,580 and preferred dividends $232,505, and after deductions for donations to patriotic funds and allowances to employees on active service, British and Canadian war taxes $94,257, there still remains $586,584 as net earnings for the year, which are equal to almost 15 per cent. on the common stock, compared with 10 per cent. a year ago. Sinking fund started four years ago at $40,000, now amounts to $169,200 for the four years, and there is also in the hands of trustees cash and bonds of $68,852. Amount carried to surplus is $586,584, making a total aurplus of $2,333,282, to which should be added the special reserve fund of $100,000, making $2,433,282 available for dividends.

BRANTFORD CITIZENS WANT COMMUTATION

Argument was heard by the Railway Board on the 17th December in a case involving the right of the board to order railways to establish commutation services. The matter is one which concerns a considerable number of Canadian communities, more particularly in Western Ontario. The application heard is that of F. W. Wegenast, of Brantford, who asked for a stated case to the Supreme Court, involving an interpretation of a number of clauses of the Railway Act.

Tho case was heard some months ago, but it was agreed to let the matter stand over, pending the efforts of the Dominion Parliament to consolidate the act. It was thought that the consolidation might make the powers of the board clear, but Parliament having failed to produce a new Railway Act, the people of Brantford are again pressing for the right to take a stated case to the Supreme Court.

The railways maintain that the establishment of commutation rates is a matter which rests entirely with the railways, and the Railway Board in the past has been disposed to support this view, with the proviso that there shall be no discrimination involved. After hearing evidence to-day the board reserved judgment.

NEW INCORPORATIONS

Three Rivers Shipyards and Allied Gold Mines are Largest Companies of Week

The following is a list of companies incorporated during the week ended December 7th, with the capital and the names of directors:—

Bassi, P. Pasquale, W. A. Henderson. Frank Wood, Limited, $40,000; F. Wood, H. T. Jamieson, W. J. Elliott. Allan Gardens Apartments, Limited, $150,000; D. I. Grant, G. Grant, A. Dods. Camden Paper Mills, Limited, $250,000; J. W. Payne. W. H. C. Brien, E. Funk. Turnbull Elevator Company, Limited, $500,000; J. H. Turnbull, L. Duggan, G. Fingerbutt. English Electric Company, Limited, $5,000; J. S. Lovell, E. H. Stewart, W. Bain. Sales Improvement, Limited, $45,000; J. O. Carss, F. A. Boyer, C. A. Patton.

SUGAR RESTRICTIONS REMOVED

The ban on the use of sugar for making pastry, iced cakes or biscuits, for candy for private consumption, as well as in the manufacture of icing sugar, has been removed. The war time restrictions on the method of serving sugar in public eating places are also withdrawn. On and after January 1st white or granulated sugar may be used in making bread, etc., so too the restrictions on the use of sugar in the manufacture of canned goods, biscuits, cake, dough products, candies, chocolate, table syrups and the like, pharmaceutical and medicinal preparations, beers and soft drinks, dessert and jelly powders, ice-cream, and even on chewing gum, will not be in force. For the manufacturer, sugar may be purchased without the regular permit, but it must be noted that the restrictions in public eating places on the use of beef, butter and fats, and for the use of all animal fats by manufacturers still remain in force.

LIMIT TO DOMINION RAILWAY BOARD'S POWER

Cannot Force Company to Operate at a Loss, Admits Chairman

Contrary to the request of the Dominion Railway Board that an electric railway service, from Hamilton to Burlington and Oakville, be maintained as prescribed by the by-laws of the interested municipalities, the Hamilton Radial Company stopped running cars on December 13th.

Recently the Radial Company, a subsidiary company of the Dominion Power and Transmission Company, applied to the Railway Board for authority for a heavy increase in rates. It was proven that the company operated the road at a heavy loss for many years. But the interested municipalities insisted on the by-laws under which the franchise was granted being obeyed, and the board was powerless.

The company asked that a new schedule of increased rates be accepted for one year, and that after that the question of increase or reduction be left with the Railway Board. This the municipalities refused.

The Dominion Railway Board, in a judgment rendered on the 17th, declares that there is nothing it can do to compel the Hamilton Radial Electric Railway Company to resume its discontinued service to Hamilton Beach. The board asked the company to give a service of six trains per day, but advised the various municipalities concerned to negotiate with the company, which is losing money, for a new schedule of rates or take over the railway and operate it. This advice is renewed by Sir Henry Drayton, chairman of the board, who, however, points out that if the company neglects to run electric cars for the accommodation of passengers for three successive months, it forfeits all its privileges and rights.

ALL RESTAURANTS NOW UNDER THE LAW

An investigation has been made under the Cost of Living Branch of the Labor Department into the profits of wholesale dealers in meat and produce of the city of Fort William, by an accountant nominated by the local authorities and employed by the Cost of Living Branch. The inquiry shows that there have been, since the middle of the summer, forty cases of overcharging as defined by the Canada Food Board order limiting the profits of wholesalers on these commodities to a 10 per cent. gross margin on all sales to retailers and to any other than wholesalers. Profits on sales to wholesalers are limited to 4 per cent.

This evidence, if substantiated by the courts, subjects the wholesalers to a penalty of $1,000 for each offense. The law places the duty to conduct any prosecution which may arise out of the inquiry upon the municipal authorities, and gives to them any fines which may be imposed. In view of this provision, the Cost of Living Commissioner has remitted the evidence against the wholesalers in question to the municipal authorities, with the suggestion that they should make the necessary prosecutions.

The Cost of Living Commissioner points out that while these cases may involve, if substantiated, fines to the amount of $40,000, yet it is noteworthy that they cover the dealings for several months of four large wholesale houses, and that the bulk of the sales of these houses was well within the law.

* * *

Messrs. Chester Daniel Massey and Thomas Findlay, manufacturers; Charles Vincent Massey, University lecturer; Raymond Hart Massey, army officer, and William Lawson Grant, all of Toronto, have been incorporated under the name of the Massey Foundation to apply money left by the will of the late Hart Almerrin Massey to such religious, charitable and educational institutions or objects as the trustees and executors of the will should deem proper and transfer it to them; the operations of the corporation are to be carried on without share capital.

CROWN LIFE

Here is a sound progressive all-Canadian Company whose net income in 1917 was nearly double 1916, whose expense ratio is decreasing steadily and surplus constantly growing. All this means good dividends and real service to Policyholders.

COBALT PROMISES TO BREAK RECORDS

During the month of November upwards of fifty cars of ore were shipped from the Cobalt mines, containing not far under four million pounds. During the corresponding period slightly over eight hundred thousand ounces of silver was sent out in a refined state.

Men from the southern parts of Ontario are gradually filtering into the north and are seeking employment at the mines, where wages continue high, there having as yet been no reduction following the cessation of fighting in Europe.

It is now evident the production from the silver mines of Cobalt will reach at least 18,000,000 for the twelve months ending December 31st. The value of the output will approximate not far under $17,500,000. The price of silver has averaged only a fraction under 97 cents an ounce for the whole year. This is the greatest value ever produced in any previous twelve-month period in the camp's history. The record as near as can be figured out without waiting for complete and detailed returns, will exceed the 1917 output by about $1,000,000. Since the first production of silver in Cobalt in 1904, a total of upwards of 292,000,000 fine ounces of silver has been produced, with a value of approximately $169,000,000.

RECENT FIRES

The Monetary Times' Weekly Register of Fire Losses and Insurance

Claremont, Ont.—December 12—The Graham Brothers' stables, a mile west of Claremont, were damaged. Twelve valuable horses were burned. Estimated loss, $25,000.

Dartmouth, N.S.—December 5—Hardware store of James Simmons, Limited, was destroyed. Estimated loss, $50,000.

East Toronto, Ont.—December 19—The W. H. Snell's bakery at 154 Main St., near Gerrard Street, was destroyed. Estimated loss, $30,000.

Edson, Alta.—Business block was damaged. Five stores are complete loss.

Kirkland Lake, Ont.—Store of Messrs. Kaplan Brothers was destroyed. Loss will be heavy with no insurance.

Parrsboro, N.S.—December 9—The Royal Bank Building was damaged. The ground floor was used by the bank, while the upper floor was occupied by Dr. J. A. Johnson, dentist, the Newville Lumber Company's office and Miss Bessie Brown's dressmaking rooms.

Port Stanley, Ont.—December 10—The Franklin House was destroyed by lightning. Estimated loss, $10,000.

Quebec, Que.—December 11—The Canadian Pacific Railway roundhouse on Dorchester and Crown Streets was damaged. Estimated loss, $400.

Toronto, Ont.—December 12—Building at the rear of 93 King Street W., occupied by the Reliance Machinery Company, was damaged. Estimated loss, $700.

December 13—Building occupied by R. Larmick, 221 Richmond Street W., was damaged. Estimated loss, $2,000. Tailoring store of Max Thaler, 116 Bloor Street W., was damaged. Estimated loss to building, $700; to contents, $700.

Vancouver, B.C.—December 11—Plant of the Morrison Steel and Wire Company, Powell Street was destroyed. Estimated loss, $100,000.

December 12—The Molsons Bank Building, Seymour and Hastings Street, was damaged. Estimated loss, $800.

Winnipeg, Man.—December 17—Premises occupied by Louis McLain Company, Limited, on McDermott Street, were damaged. Estimated loss, $40,000.

Wymark, Sask.—December 10—The Wymark restaurant was destroyed. Estimated loss, $3,000, with no insurance. H. Seack, general merchant, lost $9,000, with $5,000 insurance; H. S. Nickel, implement warehouse, loss $3,000, insurance $500.

ROYAL BANK EXPANSION

The Royal Bank of Canada is arranging for the opening of an agency in the city of Paris, and that formal announcement of the date will be made later.

Last spring the bank opened a branch at Barcelona, Spain, as a connection between the large West Indian interests of the bank and the chief Spanish trade centre which has a large trade with the former colonies of that country.

The officials who attended to the inauguration at Barcelona, then proceeded to Paris to arrange for an opening of a branch there. These officials have been in Paris for some months, but found great difficulty in securing satisfactory premises for the new office.

A reader of *The Monetary Times* desires a copy of the issue of November 29, 1918. Any subscriber who can furnish this copy will have his own subscription extended one month

The Admiralty Court recently reduced the bill of the Canadian Vickers, Limited, against the owners of the steamship "Susquehanna" from $53,983 to $35,000. The firm had contracted to convert the vessel for ocean traffic. No contract price was fixed, however, and the owners appealed against the amount for which they were billed.

NEW BANK OF HAMILTON BRANCHES

The Bank of Hamilton has opened a branch at Ethel, Ontario, in charge of Mr. D. J. Falconer, who will sign as acting manager. The bank's business in this village was formerly handled by the Atwood branch. A branch was also recently opened at Whitechurch, Ontario, in charge of Mr. W. P. Pugh, and another branch at Tisdale, Saskatchewan.

CAR AND GENERAL INSURANCE CORPORATION

A Dominion license has been obtained by the Car and General Insurance Corporation, Limited, of London, England. This company is closely associated with the Royal Exchange Assurance, and the head office in Canada will be in the Royal Exchange Building, Montreal, and will be under the management of Mr. Arthur Barry, who is also manager here for the Royal Exchange.

The license authorizes the company to transact the business of fire, accident, including employers' liability, sickness, automobile and hail insurance. Application is now being made for registration in the different provinces of the Dominion. It is expected that business will be commenced about the first of January, when organization work will be well advanced. The policies of the Car and General are to be guaranteed by the Royal Exchange Assurance; the latter company will celebrate its 200th anniversary in 1920.

BANK OF OTTAWA REPORT

Satisfactory growth is shown in the annual statement of the Bank of Ottawa for the year ended November 30 last, total assets at $72,394,205 being about $8,000,000 higher than a year ago, while profits at $645,437 were up $29,199. Of the $645,437 earned in the past year, equal to 16.1 per cent. on the stock, $480,000 went to the usual 12 per cent. dividend, $40,000 to war tax, $10,000 to the Patriotic Fund, $10,000 to Officers' Pension Fund, and $105,437 was added to the profit and loss account The reserve fund at $4,750,000 is $750,000 in excess of capital and remains unchanged.

The principal features of the balance sheet are increases of about $7,000,000 in deposits, nearly $6,000,000 in holdings of government bonds and upwards of $2,000,000 in current loans. The expansion in security holdings brought total liquid assets up to $42,500,292, against $36,450,388 a year ago, the proportion to public liabilities rising to 66.8 per cent., against 65.3 per cent. a year ago, and 58 per cent. two years ago.

RAILROAD EARNINGS

The following are the earnings of Canada's transcontinental railways for the first two weeks in December:—

	1917.	1918.	Inc. or dec.
Canadian Pacific Railway.			
Dec. 7 ..	$3,289,000	$3,480,000	+ $191,000
Dec. 14 ...	2,908,000	3,780,000	+ 872,000
Grand Trunk Railway.			
Dec. 7 ..	$ 861,442	$1,379,502	+ $518,060
Dec. 14 .	861,442	1,379,502	+ 518,060
Canadian Northern Railway.			
Dec. 7	$ 916,000	$1,133,100	+ $217,100
Dec. 14 ...	753,800	1,067,000	+ 313,200

The annual meeting of the Bank of Nova Scotia will be held in Halifax on Wednesday, January 22nd, at 11 a.m.

A branch of the Canadian Bank of Commerce has been opened at Amherstburg, Ont., in charge of Mr. A. J. Burnside.

Growth of Mixed Farming In The West

All Provinces Have Given Up Exclusive Production of Wheat and Older Sections are Now Devoted to Mixed Farming—Process is One Which Accompanies Development of All Communities in West—One Effect Will be Lower Price Level—Reaction on Eastern Canada

DURING the past few years, stimulated by high prices of all branches of agricultural produce, mixed farming has increased in popularity in the Canadian west. This is accounted for to a large degree by the fact that land cannot endure a succession of crops of the same kind beyond a few years. After four or five successful wheat crops some of the best wheat-growing land was found to be of no further use for that purpose, and not in the best condition for the production of other crops. It has become apparent that a process of rotation would be more economical from the start and would not necessitate a period of two or three years during which the soil must be again prepared for the production of cereal crops.

Another difficulty which was continually encountered in the days of wheat growing was the fact that the harvest period was entirely confined to a few weeks and until a few months in the year could be utilized to any extent for farm work. So long as a floating labor supply could be obtained during the harvest period, this was not a conclusive difficulty with the labor shortage of the past two or three years. However, the tendency has been to modify farming conditions to meet the supply of labor. This could best be done by the introduction of a variety of crops and to an even greater extent by the growth of livestock, the care of which requires attention throughout the year.

Valuable statistics have been prepared by the Manitoba department of agriculture, showing the production of dairy products in that province since the year 1894. Manitoba is the oldest of the three provinces of the middle west and was until about 1900 the leading wheat-growing district. The opening up of Saskatchewan, however, was about co-incident with the decline in the wheat-producing power of some of the older Manitoba lands, and Manitoba was the first of the western provinces to turn extensively to mixed farming. This, of course, applies mostly to the older southern sections, but many of the new districts being open to the west of Lake Winnipeg are using rotation of crops from the start.

The following are the figures giving the production of dairy products in Manitoba including quantity and value. From the agricultural point of view the quantity is, of course, the better index, but from the economic point of view, the total value is preferable provided the decline in the value of money is kept continually in mind. No statistics are available previous to 1894 and those for the year 1918 are not yet prepared. It is understood, however, that the latter will show a greater advance than any previous year:—

Product.	Quantity (lbs.).	Price per lb. (cents).	Values.
1894:			
Creamery & dairy butter	2,516,200	15.5	$ 382,347
1895:

Total			$4,360,481
Grand total for 24 years			$32,474,151

SASKATCHEWAN TELEPHONE ISSUES RESUMED

The issue of telephone company debentures in Saskatchewan will shortly be resumed in the usual fashion. These issues have been subject to the restrictions of the Dominion department of finance which were in force until a few weeks ago. The removal, however, did not apply to telephone debentures because they are not strictly municipal issues.

The annual meeting of the Standard Bank of Canada is to be held February 26th, 1918.

At a meeting of the Meaford Board of Trade Mr. T. R. Moore was elected president, and Mr. C V. Cartwright, vice-president, for the coming year. The new council of the board is composed of Messrs. J. R. Peterson, T. A. McCarroll, Geo. Brown, S. A Gray, F. Kent, J. A. Sinclair, O. A. Keffer and W. M Telford. Much enthusiasm is hoped for during 1919, when so much reconstruction work is to be accomplished.

NOVA SCOTIA TRAMWAYS COMPANY

A new contract between the Nova Scotia Tramways and the city of Halifax, for the electric lighting of the latter, is being discussed. A conference was held in Halifax recently, and this subject, as well as the tramway service, was discussed. The contract had been originally for five years, then three years, then six months, and since that time has been continued from year to year. This has been found to be unsatisfactory. The company has, therefore, been asked to submit terms for modern equipment and lighting contracts for five to ten years.

Walter C. Findlay, late Prohibition Commissioner for British Columbia, who was dismissed from office by the provincial government on December 16th, pleaded guilty in the police court to the charge of illegally importing liquor into the province, and was sentenced to pay a fine of $10,000, or six months' imprisonment.

RECENT FIRES

The Monetary Times' Weekly Register of Fire Losses and Insurance

Chapleau, Ont.—December 20—The Roman Catholic church was damaged. Estimated loss, $9,000.

Elkton, Alta.—December 15—The plant of the Scott Fertilizer Company was damaged. Estimated loss, $250,000.

Quebec, Que.—December 20—Warehouse of the Frost and Wood Company on St. Paul Street was damaged. Estimated loss, $2,000.

Thorold, Ont.—December 22—The Hillrust Winery near St. John's West was damaged. Estimated loss, $12,000.

Toronto, Ont.—December 22—Stable and contents of Mr. A. Empringham, 1571 Danforth Avenue, were destroyed. Estimated loss, $1,650.

ADDITIONAL INFORMATION CONCERNING FIRES ALREADY REPORTED

Montreal, Que.—December 8—The premises of Aird and Son (boots and shoes), 482 Ontario Street, were damaged. Insurance as follows: Canadian Underwriters Association Company, $20,000; North America, $20,000; Employers Liability, $20,000; Union of Canton, $20,000; Hartford, $20,000; Northern, $20,000; Ocean, $20,000; Guardian, $20,000; Phœnix of London, $15,000; Alliance, $15,000; Scottish Union, $15,000; Great American, $15,000; North British, $15,000; Queen, $15,000; Royal, $15,000; Globe and Rutgers, $15,000; Fidelity Underwriters, $10,000; Providence-Washington, $10,000; New York Underwriters, $10,000; National of Paris, $10,000; Pacific Coast, $10,000; Niagara, $10,000; Springfield, $10,000; Palatine, $10,000; Acadia, $5,000; Quebec, $5,000; London and Lancashire, $5,000; British Dominions, $5,000; Union of Paris, $5,000; Union Assurance Society, $15,000; total, $400,000. Loss about $45,000.

Shawinigan Falls, Que.—December 7—The plant of the Canadian Electro Products Company was damaged. Thought to be the result of an explosion. The following companies are interested: Norwich Union, $43,200; Alliance, $43,200; Yorkshire, $43,200; London and Lancashire, $32,400; Western, $32,400; General of Perth, $32,400; Globe and Rutgers, $27,000; Rochester Underwriters, $27,000; Niagara, $27,000; Union of Paris, $21,600; British Empire Underwriters, $21,600; Equitable, $21,600; Union of Canton, $16,200; Empire Liability, $16,200; Quebec, $16,200; British-America, $16,200; Phœnix of Paris, $16,200; London Mutual, $10,800; Law, Union and Rock, $10,800; British Crown, $5,400; British General, $10,000; City of London, $7,500; Lancashire and Cheshire, $3,000; North Empire, $10,800; Ohio Valley, $2,000; National of Elizabeth, $5,000; National Benefit, $5,000; Hamilton, $5,300; Lloyds, $10,800; Home, $50,000; Sun, $30,000; Hartford, $30,000; North British and Mercantile, $30,000; Northern, $25,000; Nationale, $25,000; Mount Royal, $25,000; Globe and Rutgers, $23,000; British Traders, $15,000; British Crown, $10,000; St. Lawrence Underwriters, $10,000; British Colonial, $8,726; North America, $7,500; Providence-Washington, $5,000; Fireman's Fund, $5,000; Alliance of Pennsylvania, $2,500; United States Fire, $45,760; North River, $68,300; Ohio Millers, $15,000; Old Colony, $10,000; Equitable Underwriters, $7,500; People's National, $5,000; North Branch, $5,000; Excess, $50,090; British Dominions, $7,500; British Dominions, $17,500; British Colonial, $6,714; total, $1,080,000. Loss about $300,000.

Verner, Ont.—December 12—The Roman Catholic Church was damaged. Insurance as follows: Liverpool-Manitoba, $15,000; National of Paris, $10,000; Liverpool Manitoba, $5,000; total, $30,000. Loss about $10,000.

At a regular meeting of the Winnipeg branch of the Dominion Labor party, it was decided to enter on an aggressive campaign to further the amalgamation of farmers, returned soldiers and labor men of the Dominion into one political body. It was decided to appoint a permanent salaried secretary.

PLANS TO REDUCE MONTREAL DEBT

Interest Charges Absorb Too Much of City's Revenue—Comparison With United States Cities

Figures have been compiled, showing that Montreal practically leads all other cities in the amount that has to be taken from revenue for interest charges.

It is shown that the "percapita" debt is only surpassed by New York.

As will be seen the percentage of revenue paid for interest in Montreal amounts to 41.44, while the percentage in New York is but 23.07. The following figures speak for themselves:—

Place.	Per cent. of revenue paid for interest.	Percapita debt.
Montreal	41.44	$161.78
New York	23.07	172.82
Chicago	1.96	27.49
Philadelphia	9.78	61.44
St. Louis	3.69	29.72
Boston	14.04	113.10
Cleveland	8.99	89.26
Baltimore	19.01	102.86
Pittsburg	8.41	91.93
Detroit	3.09	33.65

Just how the interest charges have grown in Montreal is here seen:—

Year.	Interest and sinking fund.
1907	$1,348,024
1908	1,278,485
1909	1,516,771
1910	2,096,033
1911	2,120,240
1912	2,241,644
1913	2,753,033
1914	3,452,000
1915	4,252,727
1916	4,784,637
1917	5,155,927

The total interest to be paid out in 1918 will be over five and a quarter millions.

This increase in debt has taken place in spite of the fact that the yearly revenue increased so steadily:—

Year.	Reveue.
1910	$ 6,615,701
1911	7,656,433
1912	9,190,656
1913	10,822,642
1914	10,861,577
1915	12,304,971
1916	12,564,786
1917	13,600,657
1918 (new taxes)	17,600,650

The Railway Board, in a judgment handed down on December 9th, declined to reduce the minimum weight applicable to canned goods in carloads moving at commodity rates. The pre-war weight was 30,000 pounds, which was increased by the board to 40,000 pounds, as a result of suggestions made by the Canadian Railway War Board, which advocated an increase up to 60,000 pounds.

The Canadian Pacific Ocean Service liner "Corinthian," 7,332 tons gross register, which steamed from St. John, N.B., on December 15th, at 7 o'clock for Glasgow, with a large cargo for the British government, struck before 3 o'clock the same day on Bolson's Ledge, Brier Island, commonly known as Northwest Ledge, and, according to a message from the captain, will be a total loss.

INVESTMENTS AND THE MARKET

News and Notes of Active Companies—Their Financing, Operations, Developments, Extensions, Dividends and Future Plans

Dominion Glass Company.—The annual meeting of the company took place on December 18th, and while no definite figures are available, it is stated that there is a surplus for the year of $150,000 over and above dividends. There were no changes made in the board.

Nova Scotia Steel and Coal Company.—The company's output for July, August and September was as follows: Coal mined, 127,616 tons; limestone quarried, 18,400 tons; coke, manufactured, 27,912 tons; pig iron, 23,575 tons; steel ingots, 33,299 tons; finished steel and forgings, 24,887 tons.

United Farmers' Co-operative Company, Limited.—The balance sheet of the company was presented to the shareholders by President R. W. E. Burnaby at the convention on December 18th. Total sales of $1,768,373 were reported and profits of $4,102 with $3,657 to the reserve account.

Southern Canada Power Company.—The company reports gross earnings of $475,000 for the year ended September last, against $432,634 in 1916, and a final surplus after charges of $48,157 against $47,347. Surplus would equal about 18.8 per cent. on the company's small issue of preferred stock, on which no dividends have yet been paid.

Granby Consolidated Mining, Smelting and Power Company.—Production of the company in November amounted to 2,147,405 lbs. of copper, compared with 2,549,474 lbs. in October, 3,371,535 lbs. in September, 2,820,207 lbs. in August, and 2,167,077 lbs. in July. In November of last year the output was 2,886,489 lbs.

Of last month's total the Anyox plant produced 1,970,027 lbs., contrasted with 1,932,870 lbs. in October, 2,682,996 lbs. in September, 2,426,313 lbs. in August and 1,494,788 lbs. in July. November of last year the Anyox plant turned out 2,458,841 lbs.

The Grand Forks plant contributed 177,378 lbs. to the total in November, against 616,604 lbs. in October, 688,539 in September, 393,894 lbs. in August, and 672,289 lbs. in July. In November of last year this plant produced 427,648 lbs.

Brazilian Traction, Light and Power Company, Limited.—The company in October showed an increase in its net earnings of 585,000 milreis, which, while not indicating as large a gain as in the four preceding months, is still quite a satisfactory improvement. Operating expenses are upon a most exacting plane, the increase in October being 539,000 milreis over the corresponding month a year ago. Both the gross and the net earnings for the month show a decline. The gross for October amounts to 8,052,000, as compared with 9,081,000 in September and 9,491,000 in August—a figure that constitutes a record in the company's history. The net earnings amounted to 4,301,000.

The figures for October approximated as nearly as possible, but subject to final adjustments in the annual accounts of the subsidiary companies, compare as follows:—

	1918. Milreis.	1917. Milreis.		Inc. or dec. Milreis.
Total gross earnings	8,052,000	8,006,000	+	46,000
Operating expenses	3,751,000	4,290,000	—	539,000
Net earnings	4,301,000	3,716,000	+	585,000
Aggregate gross earnings from Jan. 1..	85,782,000	76,436,000	+	9,346,000
Aggregate net earnings from Jan. 1 ..	44,141,000	39,884,000	+	4,257,000

The Dominion Bank of Canada has opened branches at Teulon, Man., and at St. Catharines, Ont.

NOVEMBER BANK STATEMENT

The outstanding feature in the November bank statement issued on December 26th, is the reduction of $137,185,356 in the notice or savings deposits for the month, and of $69,328,603 for the year. This reduction is, of course, a reflection of the withdrawal of savings for the purpose of investing in the second Victory Loan, and was not, therefore, unexpected. The total amount left on deposit after this large withdrawal is $939,329,271. In spite of this, however, the total exceeds that of November, 1916, by approximately $103,000,000. This is significant, indicating as it does a large increase in savings deposits of the Canadian people.

Demand deposits, on the other hand, standing at $666,366,359, show an increase of $22,145,000 for the month, and of $127,496,997 for the year. This is, of course, an evidence of the financial strength of the commercial houses of Canada. Two years ago these demand deposits only amounted to $459,477,000. Taking the total deposits of the country the figures stand at $1,605,695,630, or a decrease of $115,000,000. They are, however, larger by over $58,000,000 than they were a year ago, and in excess of two years ago by nearly $310,000,000. Deposits outside Canada were smaller by $2,901,000 than they were a month ago, but in excess of a year ago by $45,654,698. The following are the principal figures with changes:—

	Nov., 1918.		Changes during Nov., 1918.
Reserve fund	$ 111,125,000		No change
Note circulation	234,982,978	+	$ 7,385,170
Demand deposits	666,366,359	+	22,145,361
Notice deposits	939,329,271	—	137,185,356
Total deposits in Canada ..	1,605,695,630	—	115,039,995
Deposits outside Canada ...	221,299,711	—	2,901,385
Current coin	83,776,756	+	4,305,902
Dominion notes	182,212,720	+	14,986,902
Deposits, central gold reserve	131,500,000	+	7,600,000
Call loans in Canada	85,675,063	+	11,989,927
Call loans outside Canada .	171,035,732	+	13,994,874
Current loans in Canada ...	1,082,709,655	+	79,116,052
Current loans outside Canada	110,010,815	—	2,858,584
Total liabilities	2,547,798,723	+	154,679,125
Total assets	2,783,641,297	+	144,801,565

The detailed statement will appear in *The Monetary Times* of January 10th, 1919.

OBITUARY

MR. AUSTIN GOURLAY, relieving accountant at the Bank of Montreal, died at Brockville on Dec. 18th, after an illness of one week.

MR. JOHN J. MANNING, resident of Brampton, Ont., has died. For more than thirty years he held the position of customs collector at that place, and only last year resigned his post as town treasurer, which he had occupied for many years.

MR. JAMES NOBLE PAGET, who for thirty years has operated a cheese and butter factory at the village of Canboro', passed away at his home there on December 16th, in his sixty-fourth year, after an illness following a stroke of paralysis.

Mr. Lawrence Boyd, son of the late Sir John A. Boyd, has been sworn in as accountant of the Supreme Court of Ontario at Osgoode Hall. Mr. B. W. Murray, the retiring accountant, has been connected with the accountant's office for more than forty years. He is well known as author of Murray's Interest Table.

Mr. A. D. Braithwaite, of Montreal, has been appointed to represent banking interests on the Canadian Economic Mission to Siberia.

ONE OF CANADA'S NOTABLE YEARS

In this, the last issue for 1918, *The Monetary Times* wishes its readers the compliments of the season. The year 1918 has been a momentous one in practically all lines of business. Our industries were strained to a maximum this year owing to the heavy demands upon them, combined with the shortage in raw materials and labor. The reverse movement has now set in. In finance the successive months have witnessed somewhat easier conditions with a break during September, October and November on account of the second Victory Loan. The enormous total secured for this loan, however, merely indicates the quantity of available funds which did exist in Canada. Banks have been able to report several new high records in deposits and circulation, and at the same time, the demand for loans has been unusual. At the present time funds are particularly scarce, as large advances have been made on account of Victory Loan subscriptions. The prospects are that in the near future the accumulation of funds will be greater than the opportunities for investment.

Fire and life, the principal branches of insurance, have been through a critical period as a result, on the one hand, of a depreciation of investments, and on the other hand, of the heavy losses. There is every prospect now that life claims will not be so frequent and it can reasonably be expected that with the new industrial conditions, fire losses will be less severe.

So long as the end of hostilities remained quite out of sight we were, in spite of huge war orders and assured prosperity, continually haunted by the knowledge that these conditions would ultimately cease and that the longer they continued the greater would be the reaction which would follow. It is fortunate that the new conditions came gradually; the initial steps, which are the most difficult, have already been taken.

Canada can be congratulated on having played such an excellent part, but at the same time there are two or three dangers which threaten to interfere with our future economy. One is the tariff dispute which is again coming rapidly to the fore. With the organization of the agricultural interests throughout Canada, a body will be formed superior in political power to that of any present interest, and if the free trade program were carried to a great distance, it would unquestionably be ruinous to many of our cities.

A second question, and one that is not unconnected with the first, is the labor question. Industrial disputes have been much too frequent during the year, and have resulted in serious interruption in our economic life.

CANADIAN AGRICULTURE AND THE WHEAT PRICE

For some time past the price of wheat has been fixed by the Canadian government with a view to keeping down the cost of living. This period has been coincident with a period of scarcity in food supplies and constant efforts have been made by the Dominion government through the Canada Food Board to stimulate the production of food in Canada. The law that production increases with a rise in prices is generally accepted as applying to all branches of production and it has not been proved to be inapplicable in the case of wheat. Considerable effort was, therefore, necessary to maintain wheat production in Canada, and the fact that this has been successfully done is partly accounted for by the patriotic effort on the part of farmers. There was a continual tendency for agricultural work to be diverted towards producing commodities, the price of which was allowed to rise in the market.

It is now proposed to follow the example set by the United States government and set a price sufficiently high to insure a large production of wheat in 1919. The price fixed by the American government is $2.24½ per bushel, good until June, 1920, that is until the 1919 crop has been entirely harvested. It is generally admitted, even in the United States, that this is considerably above the market even if the crop is only an average one, and that, therefore, the American government stands to lose a large sum of money by this policy. There is no reason whatever why the Canadian government should do the same thing. If wheat production was maintained and increased during the critical year of 1918, it should not be a difficult thing to maintain production in 1919. The general price level for agricultural products is expected to fall shortly and there will not be the same attraction, therefore, towards production of other commodities.

Mr. W. Sanford Evans, writing in the Ottawa Journal and other newspapers, states very clearly some arguments against the Canadian government fixing the price of wheat. He maintains that there is no prospect of a wheat scarcity but that there is rather likely to be a glut upon the market, which would mean that wheat has been produced in excess at the expense of other branches of agricultural production. "An increase in acreage in wheat," he says, "does not necessarily mean an increase in the total acreage under crops of all kinds, for greater production of one crop must nearly always be at the expense of other crops. In a very real sense there can not possibly be general overproduction in the world, but there is often ill-balanced production, that is the relative overproduction of particular commodities, to the serious disturbance of the whole commercial, industrial and financial system. Can there be justification for a policy the effect of which, if it has any effect at all, can be clearly calculated beforehand to be relative overproduction of one agricultural commodity, wheat?"

ESSENTIAL DEVELOPMENT MUST BE ASSURED

Owing to the financial stringency of the past few years, coupled with the rapid growth of some of our cities, many public utility enterprises find themselves far in the rear of civic growth. One of the most useful forms or "reconstruction," therefore, would seem to be that these enterprises be at least allowed to catch up with this growth. Such essential services as the street railway, water works, electric lighting, gas and the telephone, may be delayed for a few years under conditions of necessity, but a public demand for their extension is certain to arise just as soon as the restrictions are removed. Governments have announced their intention of proceeding with public works with a view to absorbing some of the surplus labor which will undoubtedly be available for a short time; cities should, where their finances permit, pursue a similar policy, but they can scarcely be considered to take as broad a view of the public interest as should the Dominion or Provincial Governments. What is more desirable still, however, is that conditions should be made sufficiently attractive for new developments on the part of private enterprise, which can undoubtedly conduct them with greater economy and better judgment than can a public institution.

Public utility enterprises have always attracted capital at a low rate of interest, the reason being that the services are an essential part of modern life and the market is assured because competition does not enter. This assumes that an adequate interest return is received. Where a government or municipality, however, so hampers the operations of a utility enterprise by an undue restriction of rates or other means, it is not likely that new capital will be encouraged to enter. This is what has happened in several cases recently, both in Canada and in the United States. Public bodies have continually refused increases of rates of private companies while prices of the products of industry and of labor were advancing by leaps and bounds. Such a policy has reduced the profits of utility companies, until in some cases they have been entirely wiped out, and generates a hesitation to invest capital in such a fixed form. If our cities desire their growth to be healthy it must be accompanied by the extension of necessary services, and that this may be accomplished, it is essential that an adequate return be paid upon the capital invested, in addition to paying fixed charges and providing for depreciation; the view is taken in many quarters that the common stockholder has no rights whatever in spite of the fact that he has invested real money in an enterprise.

PERSONAL NOTES

Hon. W. R. Motherwell has resigned from the Saskatchewan government.

Sir Edmund Walker, president of the Canadian Bank of Commerce, has been appointed a member of the commission to establish a Canadian Memorial War Museum.

Hon. James McShane, ex-mayor of Montreal, and one of the best known figures in the city, died at his home, 616 University Street, on December 14th, following an illness which extended over several weeks.

Mr. Morden Neilson, president and general manager of Neilsons, Limited, has been elected a director of the Standard Reliance Mortgage Corporation, to succeed the late Dr. E. Jessop, of St. Catharines.

Mr. W. N. Tilley, K.C., of Toronto, has been appointed consulting counsel of the Canadian Pacific Railway Company. This is a new office in connection with the legal department. Mr. Tilley is a partner in the firm of Tilley, Johnston, Thomson and Parmenter, Toronto.

Mr. Clarence H. McArthur has become a partner in the stock and bond house formerly known as Lloyd, Thomas & Company, 33 National Trust Building, Toronto. In future the business will be carried on under the name of Lloyd, McArthur & Company at the same address.

Mr. Newton Wylie, formerly a member of the Globe staff and recently editor of the Dominion Press News and Feature Service in connection with the 1918 Victory loan, has gone to New York as secretary and assistant to the president of the National Thrift Bond Corporation.

Mr. A. H. Sequin, manager of the Cobalt branch of the Imperial Bank of Canada, has returned from Kirkland Lake, where a branch of the Imperial was opened recently in the Kirkland townsite, with Mr. S. B. Moore as manager. Mr. Moore formerly was the accountant at the Cobalt branch.

Hon. J. A. Calder, minister of Immigration and Colonization, has gone to the Maritime Provinces to confer with the provincial governments in regard to immigration and land settlement matters. He will take up with the provincial representatives details of the government's proposals which were not dealt with fully at the provincial conference.

Mr. P. G. Ward, after six years in the Saskatchewan civil service as municipal inspector, has been appointed civil service commissioner in charge of all employees of the government, both inside and outside service. He assumed his new duties on December 13th, Mr. Thomas Mutrie having resigned in bad health, to take up residence in California.

Mr. George G. G. Milne, for the past five years chief accountant in the taxation division at Winnipeg, under Comptroller W. H. Evanson, and for ten years connected with the city's accounting service, has resigned. Mr. Milne has decided to go back into commerce, and has taken over the financial end of the Todd, Hunter and Mitchell Coffee Company.

Mr. G. M. Murray, hitherto general secretary of the Canadian Manufacturers' Association at the head office in Toronto, was asked to take up his residence in Ottawa and look after the business of the association in the capital. Mr. Walsh, transportation expert, was appointed general manager of the C.M.A. with supervision of the staff in all departments, branches and sections.

Mr. H. W. Woods, president of the Canadian Council of Agriculture, who was nominated by the council at its recent meeting to be the government's representative on the Trade Mission in the interests of agriculture, has definitely announced that it will be impossible for him to go overseas, and the executive of the council, which was granted powers for such an emergency, has nominated J. A. Maharg, M.P., of Moose Jaw, as a substitute to Mr. Woods.

MINIMUM WAGE BOARD MEETS AT VICTORIA

First Business Session Was Held on Seventeenth Instant

The Minimum Wage Board, which recently met at Vancouver at its first formal session since its formation under the legislation passed at the last session of the legislature, held its first sitting in Victoria on the 17th instant. Deputy minister of labor, J. D. McNiven, is chairman of the board.

The Vancouver meeting, Mr. McNiven stated, was an important one, because it was the first the board has held to carry out the duties devolving upon it under the provisions of the Minimum Wage for Women Act, and because it initiated its work by something substantial in the shape of the fixing of a minimum wage for women and girls employed in all those premises throughout the province in which goods are sold or offered for sale, and affected every such employee engaged in the sale or distribution of goods.

The minimum wage fixed was $12.75 per week. The award becomes effective in sixty days from the date of its being fixed by the board.

It is the intention of the board, Mr. McNiven stated, to deal separately with the various industries in which women are engaged. In approving of a minimum of $12.75 for the particular class of employees whose case was under consideration at Vancouver, the board had before it information from a great many businesses affected. Sixty-five per cent. of such businesses, or even more, were paying female help a figure substantially below the minimum fixed.

Expected Results

That the fixing of a minimum wage will not result in employers holding their employees to that figure as a maximum is the experience of those states where a minimum wage act is operative, Mr. McNiven stated. It has been found to work out just the opposite. When the woman or girl who is receiving more than the minimum fixed finds that those below that limit are receiving an increase she will naturally ask more in view of her greater experience or ability, and experience shows, wages of the higher priced female employees have improved with the establishment of a minimum wage.

It was the opinion expressed by some of those present at the Vancouver meeting that the boards intention of setting a lower wage for girls under 18 years would induce employers to engage such youthful help to the exclusion of older females, but it was shown by data at hand that of the employees who are now receiving amounts ranging as low as $5 a week, and not as high as the minimum of $12.75 fixed by the board, not 15 per cent. of the employees were under 18 years of age, and it was taken for granted that even with the minimum fixed the percentage of girls under eighteen years of age would not be larger than at present. In any event, the board's powers permit it to deal with just such a condition should action be found necessary.

But while the minimum wage was fixed, nothing was done relative to hours of employment, and at present there is nothing to prohibit an employer, while forced to pay the minimum fixed by the board, working his employees as long hours as he sees fit. Of course, in the case of employment by members of an organized body, that phase of the question is settled by the union regulations.

The board is understood to be of the opinion that there should be a limit fixed of hours per week to be worked by female employees, and it is probable that the board will report to the legislature recommending that some step be taken to fix by legislation a statutory number of hours per day or per week. But on this point Mr. McNiven had nothing of an official nature to give out.

The Commercial Club of Halifax has decided not to accede to the request of the Halifax Board of Trade that the two organizations amalgamate.

EDMONTON GAS ASKS HIGHER RATES

The Northern Alberta Natural Gas Company recently notified the Edmonton utilities commissioners that it would apply to the public utilities commission for rearrangement of prices. Higher rates are, it is claimed, required to meet the increased cost of construction and operations. The company produced figures showing that under the present prices the deficit for the first year would be $169,000, for the second year $185,000 and for the third year $228,000. If the increase to be applied for is granted, they will have a deficit of $30,000 for the first year, a surplus of $30,000 for the second year and a similar profit for the third year. New extensions are being constructed by the company.

There appears to be some doubt as to the ability of the commissioners to raise the rates for this company, as the price was fixed in the franchise, which was voted on and passed by the ratepayers and subsequently ratified by the legislature.

In section 23 of the Public Utilities Act, it is stipulated that the board of commissioners "shall have power, after hearing upon notice by order in writing, to fix just and reasonable individual rates, joint rates, tolls, charges, or schedules thereof, as well as commutation, mileage and other special rates which shall be imposed, observed or followed thereafter by any utility as hereinafter defined, whenever the board shall determine any existing rate, joint rate, toll, charge, or schedule thereof, or commutation, mileage, or other special rate, to be unjust, unreasonable, insufficient, or unjustly discriminatory or preferential."

In section 43 of the gas franchise agreement, it is laid down that "Nothing in this act shall be taken to impair, abridge, or take away or affect in any way the jurisdiction and powers of the board of public utility commissioners under the Public Utilities Act."

WEEKLY BANK CLEARINGS

The following are the bank clearings for the weeks ended December 19th, 1918, and December 22nd, 1917, respectively, with changes:—

	Week ending Dec. 19, '18.	Week ending Dec. 22, '17.		Changes.
Montreal	$138,706,888	$ 69,707,527	+	$ 68,999,361

NATIONAL RAILWAY HEAD GREETS EMPLOYEES

Many Staff Changes Also Announced in Canadian Government Railway System

Mr. D. B. Hanna, president and chairman of the Board of Canadian National Railways, distributed to all parts of the system, the following Christmas message:—

"To all Employees,—As a first official greeting to all employees of the Canadian National Railways this Christmas message is to wish for you and yours the continuation of Peace and Goodwill. With the New Year close at hand which we enter under such changed conditions it is opportune to ask your co-operation in making a success of Government-owned Railways in the wider field which the combined system now serves. Our duties to this end should be regarded as a public trust. Our aim must be efficient transportation service which we know can only be achieved through the loyal support of all employees. At this time we are getting back some of those who have so well represented Canada on Flanders Fields. Those who return to our service we welcome. It should hardly be necessary to say to our employees that while travelling on our lines Returned Soldiers should be treated with all consideration and respect, and that their journey should be made as comfortable as possible for them, also that information as to returning soldiers should be handled with special care and thought of the great importance of such information to those personally concerned."

Changes in Traffic Department

Mr. C. A. Hayes, vice-president in charge of traffic, has completed the organization of the chief offices under his jurisdiction, and circulars are now being prepared to cover the appointments made, which include a freight traffic manager, and a passenger traffic manager with offices at Toronto; three assistant freight traffic managers having offices at Moncton, Montreal, and Winnipeg respectively; a passenger traffic manager with office at Winnipeg; two general passenger agents with offices at Winnipeg and Toronto, and a general freight agent with offices at Winnipeg.

Mr. George Stephen, formerly freight traffic manager, western lines of the Canadian Northern Railway, is to be freight traffic manager of the entire system from Atlantic to Pacific, his office to be at Toronto. Mr. George H. Shaw, formerly general traffic manager of the Canadian Northern Railway System has resigned; Mr. D. A. Storey, formerly freight traffic manager of Canadian Government Railways has also resigned.

Mr. H. H. Melanson, formerly passenger traffic manager of Canadian Government Railways, is to be passenger traffic manager of the Canadian National Railways, with jurisdiction over all lines. His office will be at Toronto.

Mr. A. T. Weldon is appointed assistant freight traffic manager with jurisdiction over lines Matapedia, Quebec, and Edmundston, N.B., and east thereof; office at Moncton, N.B.

Mr. Guy Tombs, formerly assistant freight traffic manager of Canadian Northern lines east of Port Arthur, is appointed assistant freight traffic manager, Canadian National Railways with jurisdiction over lines west of Matapedia and Edmundston, to but not including Port Arthur, and Armstrong, Ont.; office at Montreal.

Mr. W. G. Manders, formerly general freight agent of Canadian Northern lines in Western Canada, is appointed assistant freight traffic manager with jurisdiction over lines Port Arthur and Armstrong in Ontario; Duluth, Minnesota and west thereof; office to be at Winnipeg.

Mr J. M. Horn is appointed general freight agent, and Mr J. M. Macrae, assistant general freight agent over lines Port Arthur, Armstrong, Duluth, Minnesota and west; offices at Winnipeg. Mr. A. Brostedt is appointed assistant general freight agent with jurisdiction over lines in British Columbia; office at Vancouver. Mr. Brostedt will also serve as assistant general passenger agent for the Canadian National Railway's lines in British Columbia.

Mr. R. Creelman, formerly general passenger agent of Canadian Northern western lines, is appointed assistant passenger traffic manager with jurisdiction over lines Port Arthur and Armstrong, in Ontario, and Duluth in Minnesota, and west thereof; office to be at Winnipeg.

Mr. R. L. Fairbairn is to be general passenger agent over lines Quebec and west to Port Arthur, and Armstrong Ontario; office at Toronto.

Mr. Osborne Scott, formerly assistant general passenger agent for Canadian Northern lines in the west, is appointed general passenger agent with jurisdiction over lines Port Arthur and Armstrong, in Ontario, and Duluth, Minnesota, and west thereof; office to be at Winnipeg.

All appointments go into effect immediately.

GUARANTY TRUST MAY COME TO CANADA

A Toronto paper recently reported that the Guaranty Trust Company of New York was about to open a branch in Canada. *The Monetary Times*, some time ago, received advice from this company to the effect that, while this was being considered, no immediate decision had as yet been reached.

MAY FORM CIVIC SERVICE BOARD

In all probability a civic service commission will be organized in the near future at the city hall, Montreal. It is understood that as soon as the members of the Administrative Commission have disposed of the surplus of work they have now before them they will take the matter into consideration, with the object of formulating a definite project. As the idea is generally understood, the duty of such a commission would be to classify the staff at the city hall, fix salaries according to merit ascertained by a definite system.

TAX ARREARS MAY BE SPREAD OVER LONG TERM

The spreading of tax arrears over a term of years, and amendments to the income, business and improvement taxes will likely form a portion of the charter amendments to be applied for by the city of Edmonton, at the next sitting of the Alberta provincial house. Owing to the near approach of the time for presenting these amendments, the mayor has made an appeal for citizens or organizations to come forward with their suggestions early so that they may be taken up.

The finance committee of council will have all changes in any of the financial dealings of the city before them as soon as possible and it will be too late to put suggestions before this committee or the council after something has been decided upon. So far as is now known, the proposals to be taken up are as follows:—

Making some arrangement to spread the burden of taking up arrears of taxes over a term of years. Deciding how much, if any, value in private dwellings, shall be exempt from the tax on improvements. Some have suggested that houses costing $1,500 be exempt, while others favor carrying the exemption amount up to $2,500. Some reduction in the levy based on rental value or at least an equalization of same. Whether income and business taxes will both be levied on people paying land taxes, or whether they shall be alternative. Whether license fees shall be reduced.

Representatives of the organized automobile industries of Canada waited on December 20th on Sir Thomas White, acting prime minister, and Hon. A. K. MacLean, acting minister of trade and commerce, to urge that the excise war tax on automobiles be removed. The tax was imposed in the last budget. It amounts to 10 per cent. on automobiles, applicable to all imported into or manufactured in Canada and unsold on April 30th, 1918.

B. E. WALKER, President JOHN AIRD, General Manager

Report of the Auditors to the Shareholders of The Canadian Bank of Commerce.

In accordance with the provisions of sub-sections 19 and 20 of section 56 of the Bank Act, 1913, we report as follows:—

We have audited the above Balance Sheet and compared it with the books and vouchers at Head Office and with the certified returns from the branches. We have obtained all the information and explanations that we have required, and are of the opinion that the transactions of the Bank which have come under our notice have been within the powers of the Bank.

We have checked the cash and verified the securities representing the investments of the Bank at its chief office and principal branches at a date other than, and in addition to, the verification at 30th November, 1918, and found that they were in agreement with the entries in the books of the Bank relating thereto.

In our opinion the Balance Sheet is properly drawn up so as to exhibit a true and correct view of the state of the affairs of the Bank according to the best of our information and the explanations given to us, and as shown by the books of the Bank.

SOLDIERS' PENSION REPORT TO BE ADOPTED

Government to Put Into Force Recommendations Submitted to Parliament Last Session

The Government has decided to adopt and put into force, with a few alterations, the recommendations submitted to Parliament last session by the special committee dealing with soldiers' pensions. It will be recalled that evidence was taken throughout the session, but the report was presented just before prorogation, when it was too late to take legislative action.

The principal provisions are:

That the Pensions Board be developed as a civil rather than as a military organization; that the Commissioners should devote their whole time to their duties; that the approval of the Commission be evidenced by the personal signature of at least one Commissioner; examining medical boards to be composed of a civilian physician, an overseas member with war experience, and a representative of the C.A.M.C.; the relationship between pension applicants and the board to be that of patient and doctor, and every facility be given to furnish an account of the man's condition from his point of view; medical boards to report to the Commission their estimate of percentage of disability, and where their views differ from those of the medical officer of the Commission by more than ten per cent., reasons to be furnished by the former.

Must be of United Kingdom

No deduction to be made from the pension of any member who has served in a theatre of actual war, other than the United Kingdom, on account of any disability existing before enlistment, providing that it has not been wilfully concealed; pension to be awarded according to rank at disability, and to be discontinued upon re-enlistment in forces; if a soldier, ordered by a medical board, on which he is represented, to go to a hospital or home for treatment, refuse, the pension may be reduced by not more than 50 per cent.

The Commission to have discretion to refuse a pension where a member has been dismissed or dishonorably discharged; pensions above lieutenant totally helpless may be awarded a "total sum" of pension and allowance not in excess of that which a totally disabled lieutenant might be awarded.

SUCCESS FROM WAR SAVINGS EXPECTED

The conference of the members of the National War Savings Committee, which began its sessions on December 10th, came to an end on December 12th. The members, who were representative men drawn from every portion of the Dominion, all went away confident of the successful outcome of the war savings movement in their respective provinces.

The unanimity of opinion that the movement should be made of a permanent character, indicated that its value, both as means of raising money and as a beneficial influence generally on the life of the country, was fully appreciated. The conference learned that the United States is going right ahead with its undertaking, arrangements having been made for a new issue of war savings stamps on January 1st. On their way home several members of the committee stopped at American points in order that they may learn something of the methods followed across the line.

The presence of Pierre Jay, of the U.S. Treasury, was greatly appreciated, and his suggestions, born of the experience of the campaign in the neighboring republic, were of a very valuable nature, inasmuch as the problem in the two countries is of a similar nature.

The conference, it is believed, has been of very great benefit to the war savings effort throughout the Dominion. The reports brought from the chairman and the secretaries of the various provincial committees indicate that the public will heartily support the movement.

NEW PRICE INVESTIGATION METHODS

Regulations governing local Fair Price Committees are changed. Under the order-in-council of October 3rd, the council of any municipality was empowered to appoint a committee of two or more of its officers to be known as the Fair Price Committee. Both the constitution of the Fair Price Committee and the procedure to be adopted have now been placed on a different basis. The method to be adopted in holding an inquiry will be as follows:—

(1) A municipal council will appoint a committee of three resident taxpayers to be known as the Fair Price Inquiry Committee. This committee will make a preliminary inquiry into the cost of any necessary of life specified by the municipal council and the price at which the necessary is held for sale. Evidence may be taken under oath, and the inquiry is to be held in camera.

(2) The Fair Price Inquiry Committee will report to the municipal council whether further inquiry should be held.

(3) Should the Fair Price Inquiry Committee recommend further investigation the municipal council is empowered to appoint a commission of three members. One is to be a judge of the county or district court of the county or district in which the municipality is situated. He will act as chairman. Another member will represent labor or consumers. The third member will represent the trade dealing in the necessary of life under investigation.

The commission will report its finding to the minister of labor and to the municipal council. They will also be published in the press of the district concerned.

COUNCILS IN GREAT BRITAIN AND CANADA

Close co-operation and exchange of information has been arranged between the Canadian and British Councils for scientific and industrial research, Prof. J. C. McLellan, of the University of Toronto, and Prof. Frank D. Adams, of McGill University, who are members of the Canadian Research Council, and are now in Great Britain, are attending meetings of the various British councils, at which industrial problems of interest to Canada are discussed, and are reporting regularly to the council here the varied and important developments of British industrial and scientific work. The latest report received emphasizes the energetic and comprehensive way in which Great Britain is utilizing all her resources for trade and industrial advantages in the new area of international development in the arts of peace.

Trade guilds or associations have been established in nearly all lines of industry, to take mutual advantage of the opportunity for research and organization work fostered by the council and other government agencies. New guilds formed last month include the boot and shoe industry, the machine tool industry, motor and allied trades, the rubber industry, manufacturers of refractories, and the Scottish marine, engineering, shipbuilding and metallurgical industries. New researches under the supervision of the British Research Council have been undertaken into problems connected with the rubber, sugar, cotton, woolen and cocoa industries. A scheme has been initiated for the scientific development of the resources of the colonies and protectorates. A governmental grant of $500,000 has been made to meet the expenses of investigation, expert advice and research work in connection with this scheme, covering a five-year programme.

In Canada negotiations have been on for some months between the Research Council and various trade associations, looking to the formation of guilds for research, which will enable the firms or companies belonging to such guilds to co-operate with the council in undertaking experimental investigations with the object of improving their manufacturing processes. A number of industries, such as the tanners, the canners, the clay products manufacturers, and the pulp and paper men, are ready to combine for this purpose as soon as the proposed Central Research Institute, with its much-needed facilities for laboratory work is ready.

PLAN FOR LAND SETTLEMENT

Must be Prepared to Spend—Steer Immigrants to the Land

The confidential memorandum relating to land settlement, submitted for consideration to the Interprovincial Conference held at Ottawa in November by the Dominion Government, was on December 19th, made available for publication, does not outline a definitely settled policy on the part of the Dominion Government, but covers proposals, the adoption of which, either as a whole or in part, depends in a large measure upon the action of the various provincial legislatures.

After referring to the reservation of Crown lands for soldier settlement, the abandoned farms, the millions of acres of wild land, the title for which has passed into the hands of the Government, and the past lack of co-operation between the Federal and provincial governments, as important factors in the problem, the memorandum says:—

"Any comprehensive policy adopted with a view to securing rapid increase in population and the settlement of land necessarily involves the expenditure of large sums of money and the use of State credit. If Canada is to succeed in competition with other countries in this field of work, the provinces as well as the Dominion must stand prepared to pledge their credit and meet whatever expenditures are required. Any cheese-paring policy will be doomed to failure."

Lines of Policy

The memorandum then outlines the objects of the proposed land settlement policy as follows:

(1) The development of a nation-wide sentiment in favor of increased agricultural settlement and production.

(2) The encouragement of a movement from urban centres to rural districts.

(3) The avoidance of overcrowding in our urban centres with a surplus of labor.

(4) The securing of suitable settlers in large numbers for our vacant lands, including abandoned farms.

(5) The creation of conditions whereby suitable settlers with small means (including tenants), may, in the course of time, become the owners of their farms.

The suggested policy of land settlement was outlined in the memorandum, the main features of which were announced when the Interprovincial Conference was in session. In this connection it was suggested that steps should be taken to ascertain the lands available for settlement, and that the provinces, as far as possible, should have uniform legislation for this purpose.

To prevent owners from fixing an unreasonable or inflated selling price for their lands, each province should provide for a special provincial tax on wild lands, abandoned farms and leased farms. It is also suggested that each province should take powers to expropriate lands required for settlement purposes.

Send Immigrants to Land

The memorandum recommends that the Federal Government should continue to be responsible for the admission of immigrants to Canada. One of the gravest situations confronting Canada is the necessity for making suitable provision for the flood of British immigration that will move our way as soon as shipping is available. Unless steps are taken to make certain that a large proportion of these immigrants go to the land they will crowd our large urban centres and bring about conditions of unemployment and unrest that will be exceedingly detrimental to Canada as a whole.

Each province desiring to secure Federal co-operation must determine for itself a number of things, including the class of settlers to be assisted, the maximum assistance to be given, and the terms upon which such assistance shall be given.

The memorandum assumes that the Federal Government should undertake the securing of settlers from Great Britain and from foreign countries (other than enemy), and that provincial governments should take charge of the prospective settler upon arrival in Canada. It is suggested that there should be created a Federal Land Settlement Board, comprising the minister of immigration and a representative from each of the provinces. The board should be consultative and advisory, and not administrative. It should meet at least once annually for the purpose of reviewing the working out of any policies that may be adopted for land settlement throughout Canada.

The final suggestion made by the memorandum is that there should be established in connection with the Department of Immigration and Colonization a Social Welfare Bureau to assist in the care of immigrants.

BRITISH COLUMBIA'S MINING REVIVAL

Reports from the Kootenay mining district all point to a big revival and labor may be more plentiful. Practically all the interior mining towns were hard hit by the "flu" epidemic, and in several cases work was shut down for several weeks.

The Consolidated Mining and Smelting Company of Trail for a time had difficulty in keeping as many as one of the lead and copper furnaces going. The large zinc plant was also affected, while on the other hand the workmen in the concentrator seemed to be immune from the prevailing malady.

The announcement of the company that the smelting of low grade ores can now be successfully carried on means much to the Trail district, where millions of tons of ore and hundreds of good low-grade properties have remained idle because of the problem not having been solved heretofore. Rossland will also benefit immensely by the discovery. It was asserted low-grade ores can under the new process be smelted at a profit at $1 per ton. This will mean a new life and prosperity to hundreds of companies.

PUT IT OFF NO LONGER—
MAKE YOUR WILL NOW

"I will do it to-morrow" might appropriately be given as the excuse why some of the most important actions of our lives have been put off until too late. Your Will, to be valid, must be made while you are in mental and physical health, so before an evil day may chance to come, Make Your Will. In appointing an Executor, consider the efficiency of this Corporation, with 36 years' experience. The charges are no more, often less, than when the Executor is some private individual

ALBERTA'S RE-ESTABLISHMENT PLANS

Plenty of Room Not Only in Agriculture, But Also in Industry

According to Mr. C. R. Mitchell, provincial treasurer of Alberta, that province will be in a position to take ample care of its soldiers as they return.

"We have been marking time in the west the last three or four years so far as expenditure on public works is concerned," said Mr. Mitchell, when in Toronto recently. "Now that the war is over, it is expected that the government will proceed very actively with the provincial telephone construction work and road work. So far as the latter is concerned, the matter is in a somewhat unsettled condition, as we are waiting for the Dominion government, which has plans for a Dominion-wide road scheme under consideration, to announce some definite policy. It is understood that it will be worked out in some way through the different provinces, there being a feeling that the different provinces should take care of a certain amount of the work. What that work shall consist of remains to be settled."

Hon. Mr. Mitchell said that a very large proportion of the soldiers from Alberta are men from the farms, and it is possible that many of them will return to the land when they reach the West. The province had organized a labor bureau to take care of these men on their return; in fact, the bureau will take care of all classes of labor. At present certain legislation was under consideration, and will be submitted at the approaching session, with a view to having the labor bureau work in conjunction with the Soldiers' Civil Re-establishment Commission in fitting and placing the returned soldiers in civil life.

"At an early date the government will hold a joint conference with labor representatives and employers of all classes of labor and other organizations interested in the future welfare of the returned soldier," added Mr. Mitchell, "for the purpose of thoroughly going into the whole question, and ascertain from the men seeking positions and the men who have work to give them, the best means of taking care of the men who have been at the front. It is a very important matter, and the government is going to insist that the scheme adopted will be effective and produce good results. Representatives of the various soldiers' organizations have also been invited to participate in the conference and offer suggestions.

"As to the reconstruction of the various industries in the west, I do not think things will be very much disturbed. The character of our industries in the west is such that the products they have been turning out in large volume during the war will be in greater demand from now on. While a considerable amount of munitions was produced in Alberta during the past four years, in volume it was relatively not as extensive as in the east. The class of industries that we have in the west will require very little reconstructing; they are of the type that turned out staple lines of manufactured goods and products before the war. It is hoped that during the coming year a fair amount of railroad building will be done. There are a number of branch lines in connection with the Canadian Northern System in Alberta which it is expected will be got under way."

TO BUY SEED OATS IN THE UNITED STATES

An order-in-Council has been passed authorizing the Seed Purchasing Commission to purchase seed oats required for Alberta and southern Saskatchewan in the United States, and providing that the oats purchased be not subject to the payment of customs duties. It is estimated that 3,500,000 bushels of seed oats will be required, owing to the shortage, of which not more than 1,500,000 bushels are available in the three western provinces, 500,000 bushels in Ontario, and 300,000 bushels in Prince Edward Island. If these figures are approximately correct, it will be necessary for the Seed Commission to buy at least 1,000,000 bushels of seed oats outside the Dominion.

ENEMY PROPERTY IN CANADA

A statement has been issued by the Dominion government reviewing its activities in enforcing the various regulations respecting enemy property and enemy business dealings in Canada. It is pointed out that since the consolidated orders respecting trading with the enemy were passed, the department of the Secretary of State has made numerous investigations, inquiring into every case of alien enemy property or dealings which has been brought to its attention. In many instances chartered accountants have been engaged to investigate and submit reports, and among the list of firms whose businesses were thus investigated are the different companies in which Alvo von Alvensleben, of Vancouver was interested.

In addition, the finance department has been engaged in carrying out the provisions of the orders, in collecting moneys, registering enemy properties in Canada and claims of debts due by persons in enemy countries to Canadians, and vice versa. These claims are now being dealt with by the Enemy Debts Committee, and particulars of the claims are being forwarded to Canada's representatives at the Peace Conference.

FARM CONDITIONS IN ONTARIO

The following is a summary of reports made by agricultural representatives to the Ontario Department of Agriculture:—

The Dufferin representative describes the situation not only for his own district but for the province generally when he says: "This country goes into winter quarters in much better shape than usual. Fall work is well completed. There is a tendency with some to sell grain rather than to feed, and some unfinished stuff is going out."

The fear that the price of beef may drop is also causing some to crowd their animals on the market, but the bulk of stockmen are acting more steadily, and are feeding most of their grain and fodder as usual.

Dundas reports that $3.40 per hundredweight is being paid for milk shipped from Morrisburg to Montreal. Dairy cows are selling at auction sales in Brant at from $100 to $150.

Hogs are thriving, owing to the abundance of coarse grains, but little pigs are now selling as low as $12 a pair. Bacon animals bring from $17.25 to $18.50 a hundredweight. During November six clubs in Victoria marketed 823 hogs.

Hay has a wide range of prices, which run from $16 to $25 a ton. This class of fodder is now reported to be very scarce.

Haldimand states that ready sales are being made of red and alsike clover and blue grass seed. Alfalfa seed is going a little slower at prices ranging at from $18 a bushel to $1 a pound.

The Dundas representative reports that there is not so large a supply of ensilage on hand as is usual in that county, as owing to unfavorable weather some of the corn grown for the silo was not harvested

Apples vary greatly in price. Simcoe reports winter apples as selling at from $3.50 to $5.50 a barrel depending on quality. In Prince Edward the figures range from $4.50 to $7.50, while Greenings bring $5.50 and Spies $7 in Grey.

Fall wheat is in excellent condition except on very low land. Even late planted fields have a fair top, and the young plants are said to be well rooted.

The late fall weather was most favorable for plowing, and an unusually large acreage was done. Haldimand reports that many farmers in that county have summer fallows plowed for next year.

The following are subscribers to the 1918 Victory Loan: Mrs. Tancrede Bienvenu, Montreal, $20,000; T. Bienvenu and T. Bastien, for L. H. Catelli Company, Limited, Montreal, $25,000; E. J. Meilicke and Sons, of Saskatoon.

Why You Should Invest Your Funds in Mortgage Corporation 5½ per cent. Debentures

The Standard Reliance Mortgage Corporation is registered under the Loan Companies Act of Ontario, and makes a yearly return of their affairs to the Government, by whom their accounts are published for the information of the public each year.

Mortgage Corporations are one of the classes of financial institutions, selected by the Government of Ontario, in which the uninvested funds of Provincial Insurance Companies may be deposited. The others are the Post Office Savings Bank and the Savings Department of Chartered Banks of Canada.

Stocks and Bonds fluctuate in value with the state of the money market and other causes. Thousands of people have invested their savings in these debentures without the loss of one dollar invested. The debentures are issued in amounts of $100 and upwards. Interest at 5½% is paid in cash on the day it is due.

Write for our booklet about "PROFITS FROM SAVINGS." It explains what these Debentures are and why they are so good a security.

SASKATCHEWAN'S FISCAL YEAR

Practically no Capital Expenditures During Year Ended 30th April, 1918—Heavy Expenditure for Education and Debt Charges

The following is a statement of the revenue and expenditure of the province of Saskatchewan for the fiscal year from 1st May, 1917, to 30th April, 1918:—

Revenue.

Balance brought forward from 1916-17	$ 481,311
Dominion subsidy	2,207,696
Treasury	2,293,531
Repayment of loan to supplementary revenue fund	61,873
Interest on sinking funds and investments	28,962
Premium and discount	7,780
Attorney general	1,077,281
Provincial secretary	1,062,859
Insurance	49,916
Public works	189,593
Public improvements	3,360
Education	51,992
Agriculture	35,325
Rural telephones	1,200
Municipal	6,570
Executive council	2,472
Legislation	774
King's printer	11,500
Public health	11,848
Neglected and dependent children	1,954
King's printer's advance	225,029
Warehouse	175,035
Local government board	204
Public accommodation	3
Public works advance	290,387
	$8,278,465

Expenditure.

Public Debt:—	
Interest	$1,078,847
Sinking funds	75,078
Charges on issue of securities and temporary loans	65,645
Premium, discount and exchange	43,292
Civil government	370,488
Legislation	135,623
Attorney general	878,314
Provincial secretary	42,773
Insurance	15,014
Public works	810,752
Public improvements	391,532
Education	1,045,111
Agriculture	182,879
Public health	251,534
Neglected and dependent children	56,213
Rural telephones	17,096
Miscellaneous	726,607
Loan to supplementary revenue fund	61,873
King's printer's advance	225,020
Warehouse	174,431
Public works advance	311,481
	$6,959,613
Less sinking funds chargeable to investment account	75,078
	$6,884,534

There is, it will be observed, a balance of $1,393,930 to be carried forward to next year's account. This is over three times the balance carried forward from the previous year. The subsidy from the Dominion government still remains, one of the largest sources of revenue being exceeded only by that raised by the provincial treasury department. Expenditure upon public works has been practically eliminated as far as the capital account is concerned.

The statement of assets and liabilities shows a balance of assets over liabilities of $23,798,329. The total debenture debt is about $27,000,000 in addition to which there were outstanding at the 30th April treasury bills to the amount of $290,000. The other items in the liability's statement are $1,200,200 of debentures issued under the Saskatchewan Farm Loans Act for which, of course, corresponding assets are security; miscellaneous obligations totalling about $900,000 and about $200,000 in connection with the administration of the Agricultural Aids Act have an advance from the Union Bank of Canada, etc. The total liabilities are, therefore, slightly less than $30,000,000. The principal items in the assets statement are the debt allowance of the Dominion government, amounting to $8,107,500; school lands trust account, totalling $14,588,204; public buildings and lands, totalling $9,449,005; public improvements, $7,396,471, and the telephone system, which is valued at $7,065,731. Sinking funds bank balance and other accounts make up the total assets of $53,444,165

TRANSPORTATION PAYABLE IN ADVANCE

Notifications were, on Dec. 18th, issued by the C.P.R., G.T.R., C.G.R., C.N.R., and all other Canadian railways, under instructions of the Canadian Railway War Board, that, effective January 1 next, all transportation charges, including demurrage and storage charges, and covering passenger express, freight, baggage, etc., must be paid for cash in advance, just as in the buying of ordinary passenger tickets. One exception is made in the case of shippers of large quantities of goods, that on the execution of a bond, attested to by either a bank or trust company, credit to the extent of 96 hours will be given. This change, it was stated, would end the old practice by which monthly settlements were affected in the case of continual and heavy shippers. It is expected that within the near future the committee, after considering the matter with the trade generally, will have a discussion with the Canadian Railway War Board in regard to whatever modifications of the order may be considered necessary.

SHOE MANUFACTURERS WANT TARIFF KEPT

About 125 delegates representing boot and shoe manufacturers of eastern Canada met in Montreal on December 19th and organized the Shoe Manufacturers' Association of Canada. The headquarters are to be in that city, because it is midway between Quebec and Toronto, which cities are the most important centres of the shoe making industry in Canada.

One of the first things the association did was to petition the Ministers of Finance and Customs that no changes effecting the tariff on boots and shoes be formulated without previous discussion with manufacturers. A petition was also sent to the Minister of Militia requesting that owing to the shortage of operators in the industry, steps be taken to have those overseas who are familiar with the trade, return as soon as possible.

The principal officers elected were:—president, F. S. Scott, M.P., Galt, Ont.; first vice-president, J. Daoust, Montreal; second vice-president, J. D. Palmer, Fredericton, N.B. A representative executive committee was also chosen.

Asking that the Ontario government grant assistance in the building of a good road between Parry Sound and Bala, a large and representative deputation from Parry Sound district waited on the Prime Minister and Hon W. D. McPherson on December 11th. It was pointed out by the various speakers that while there are good railway facilities in that part of the province, there is a lack of suitable highways.

Will be Ready Next Friday—Jan. 3rd, 1919

ORDERS TAKEN NOW

Monetary Times Annual

1919

YEAR after year the MONETARY TIMES ANNUAL finds a most cordial reception at the hands of business and financial interests in Canada. Its intrinsic value as a work of reference is recognized in the offices of financial and commercial houses not only throughout Canada but in all financial centres of the world—in fact, wherever there are those who have investment and commercial interests in Canada.

The 1919 Annual, on which our editorial organization is now at work, will contain statistics covering banking, clearing houses, insurance bonds, dividend records, fire losses, war finances, loans, exports, imports, etc., which it would be almost impossible for anyone to gather together without an expenditure of much time and effort.

Read what a few of Canada's leading men of affairs have to say concerning the *Monetary Times Annual:*

"I also wish to congratulate you on the splendid New Year issue of your paper. To my mind there is really more information between the covers of that issue for the benefit of Canada generally than I have ever seen in any magazine published in Canada or elsewhere, and I am sure you really deserve our congratulations in this respect."—E. F. HUTCHINGS, President, Great West Saddlery Company. Winnipeg.

"To my mind your annual publications are head and shoulders over anything of the same nature that I have ever seen in all my wanderings. Your Annual always finds a permanent place on the shelves of my library; and I notice that it also does so in the libraries of most of the thoughtful community throughout the country. It is a great work."—F. MACLURE SCLANDERS, Commissioner, Border Chamber of Commerce, Windsor, Ont.

"I have received a copy of your Annual, and am very much pleased with it. It is very full and covers an immense deal of ground, and gives information to the seeker of knowledge that is valuable."—SIR GEORGE FOSTER

"You have certainly condensed a wonderful body of information into a form which cannot but prove of enormous educational value."—G. FRANK BEER, Toronto

"I find the number exceedingly interesting, as there are many articles which have a direct or indirect bearing on the work of this Board."—MAXWELL SMITH, Chairman, Land Settlement Board, Victoria, B.C.

"I have to thank you for the copy of the annual review of *The Monetary Times*. It is indeed a most valuable document both in business and finance."—SIR EDMUND WALKER, President, Canadian Bank of Commerce.

"In acknowledging receipt of the annual number of *The Monetary Times*, I would like to take the opportunity of saying that it is welcomed just as one welcomes an old and tried friend. It is never disappointing, but responds to one's inquiries in the most satisfactory manner. It lives because it deserves to live."—S. R. PARSONS, Past President, Canadian Manufacturers Association.

"The general appearance and compilation are excellent and the publication constitutes a valuable record of Canadian financial events during the past year."—SIR FREDERICK WILLIAMS-TAYLOR, General Manager, Bank of Montreal.

"It is a magnificent issue."—MR. T. BRADSHAW, City Treasurer and Finance Commissioner, Toronto.

Monetary Times Annual--1919

MUNICIPAL BOND MARKET

The Monetary Times' Weekly Register of Municipal Activities and Financing

Saindon, Que.—Messrs. Credit Canadien, Inc., of Montreal, have purchased an issue of $41,000 6 per cent. five-year bonds.

McMasterville, Que.—Messrs. Credit Canadien, Inc., of Montreal, have purchased an issue of $30,000 6 per cent. five-year bonds.

Pembroke, N.S.—First and second readings have been given a by-law for $50,000 waterworks system improvement debentures.

Hamilton, Ont.—A by-law for borrowing the sum of $105,000 for the reconstruction of the Central Market Hall has been proposed.

New Toronto, Ont.—Messrs. G. A. Stimson and Company, of Toronto, have purchased $3,500 6½ per cent. debentures, maturing in 15 annual instalments.

Vancouver, B.C.—A by-law to raise by way of debentures the sum of $50,000 for school sites has been proposed. Also a by-law to raise by way of debentures the sum of $414,000 for construction of new school buildings has been proposed.

Verdun, Que.—An issue of bonds, amounting to $100,000, for the Protestant schools, has been purchased by Messrs. A. E. Ames and Company, of Toronto. The bonds are 6 per cent., and are repayable in five years at New York and Montreal.

London, Ont.—A statement respecting by-laws to be submitted to a vote of the electors on January 1st has been issued by City Clerk Baker. The following are some of the projects:—

Victorian Order of Nurses, $600; $1,000 grant to Italian Red Cross, grant of $500 to No. 4 Nursing Division, $50,000 industrial by-law and medical school $100,000 by-law.

Saskatchewan.—The following is a list of authorizations granted by the local government board from December 9th to 17th, 1918:—

School Districts.—Silver Cliff, $1,500 10-years not ex. 8 per cent. annuity; F. J. Decker, Valbrand. Freeland, $2,600 10-years not ex. 8 per cent. annuity; Wm. Binnington, Lipton. Lupescu, $500 5-years not ex. 8 per cent. annuity; I. S. Bricker, Cupar. Lonesome Pine, $1,200 10-years not ex. 8 per cent. annuity; E. D. Shore, Paddling Lake.

Rural Telephone Companies.—Iron Springs, $400 15-years not ex. 8 per cent. annuity; J. P. Baxter, Watson. Blackley, $1,000 1[illegible]-years not ex. 8 per cent. annuity; Douglas R. Pitts, Sutherland. Kenaston, $4,0[illegible]0 15-years not ex. 8 per cent. annuity; J. A. Sandilands, Kenaston. Horse Lake, $1,200 15-years not ex. 8 per cent. annuity; Fred Ironside, Kelliher. Alsask, $3,8[illegible]0 15-years not ex. 8 per cent. annuity; F. J. Clark, Alsask. Plenty, $7,900 15-years 7 per cent. annuity; A. M. Percival, Plenty.

Town of Cabri.—$4,000 10-years not ex. 8 per cent. annuity, fire apparatus and water supply; Thos. Bell, Cabri.

The following debentures reported sold from December 7th to December 9th, 1918:—

School Districts.—*Eclipse, $2,500; Canada Landed and National Investment Company, Winnipeg. Hanley, $3,000; sold locally. *Barvas, $[illegible]50; Regina Public School District, No. 4.

Rural Telephone Companies.—Findlater, $1,900; R. S. Donaldson, Acme, $4,6[illegible]0; M. C. Swallow, Acme, $500; A. B. Fisher. North Ernfold, $2,300, Lewvan, $1,500, Englefeld, $2,550; W. L. McKinnon and Company, Regina. Dewar Lake, $13,500; Kerr, Fleming and Company, Regina. Blackley, $2,400; Saskatoon Mutual Fire Insurance Company. Hope Lodge, $1,8[illegible]0; Ed. Morris, Waldheim. Torendal, $1,[illegible]0, [illegible] Lake, $900; Nay and James, Regina. Plymouth, $500; J. Burnett, Regina. Rural municipality of Progress, $5,760; J. A. Thompson, Winnipeg.

The Montreal city commissioners have decided to pay to the Bank of Montreal $2,500 on the sale of the million dollars worth of bonds.

*Sold by the local government board.

Six months' imprisonment at Fort Saskatchewan jail was the sentence meted out by Mr. Justice Walsh to Alfred Carrothers, convicted by the jury of false pretences. Carrothers had secured $2,[illegible] from the Union Bank at Edmonton on some bogus [illegible] debentures. He was brought back from New York by the Alberta Attorney-General's department.

OPEN TRADING FOR 1917 VICTORY LOAN

The wide distribution of the bonds of the 1917 Victory Loan through the operations of the Victory Loan special committee, formed for that purpose, has been so satisfactory that the market for this loan, viz.: Victory bonds maturing December 1st, 1922; December 1st, 1927; December 1st, 1937, has now been established, and any floating supply that previously existed has been absorbed by the investing public. The special committee, therefore, announce that on and after Monday, December 23rd, there will be open trading in these bonds.

It is the intention of the minister of finance to immediately apply for the listing of the above bonds on the Toronto and Montreal Stock Exchanges.

The bonds of the 1918 Victory Loan, viz., those due November 1st, 1923, and November 1st, 1933, will remain under the direction of the committee until further notice, the intention of the committee being to release this issue when it is felt that the market situation for this issue is similarly established.

CITY OF SASKATOON TENDERS

The following is a complete list of tenders for the $30,000 15-year 6 per cent. debentures:—

The Bond and Debenture Corporation of Canada Winnipeg	98.50	$29,550.00
Wood, Gundy and Company, Toronto	97.18	29,154.00
Æmilius Jarvis and Company, Toronto	96.589	28,976.70
Housser, Wood and Company, Toronto	96.573	28,971.90
Dominion Securities Corporation, Toronto	96.089	28,826.70
W. A. MacKenzie and Company, Toronto	95.53	28,661.00
Canada Bond Corporation, Toronto	95.52	28,656.00
C. H. Burgess and Company, Toronto	95.37	28,611.00
Davies-Bertram Company, Cincinnati*	95.25	28,575.00
Nay and James, Regina	93.83	28,150.00
R. H. Wood Company, Montreal	93.36	28,008.00
Brent, Noxon and Company, Toronto	93.23	27,969.00
Macneill and Young, Toronto	91.00	27,300.00
Graham, Sanson and Company, Toronto	86.37	25,910.35
National Bond Company, Limited, Vancouver	85.00	25,500.00

*Payment to be made in New York.

MOOSE JAW'S ACCOUNTS IN GOOD CONDITION

One of the first financial statements for the current year to come to hand is that of the city of Moose Jaw, Saskatchewan. A statement of this city's accounts for the ten months ended October 31st 1918, has been made up. The revenue for this period was $965,920, as compared with an estimate of $1,0[illegible]6,124. On the other hand, the expenditure was only $704,064, as compared with an estimate of $956,124, so that the city has an excess of $171,856, part of which was brought forward from 1917. The city's bonded indebtedness is now $5,761,569, against which there are sinking funds of $652,837. This sinking fund is invested in rural telephones, debentures, first mortgages, war loans, etc.

The following statement shows the distribution of the tax rate for the year as compared with 1913:—

	1913. Per cent.	1918. Per cent.
Land	84.7	63.2
Improvements	9.4	25.4
Business	5.5	10.3
Income	.4	1.1

The tax rate for the year was 17.75 mills on the dollar. Collections on 1918 account totalled 358,496 the balance ($158,272) being still in arrears. The tax arrears on account of the previous years now amount to $521,385, and have increased each year for several years past. The good showing at present being made is evidently maintained by strict economy in municipal expenditure.

AUSTRALIAN MANUFACTURER HERE

Mr. O. C. Beale, F.R.H.S., a prominent manufacturer of Australia, past president of the Australian Manufacturers' Association, and vice-president of the British Empire Producers' Association, is paying a visit to Canada. When in Toronto recently he was entertained by members of the Toronto branch of the Canadian Manufacturers' Association.

UNITED FARMERS OF ONTARIO

A convention of the United Farmers of Ontario was held in Toronto on Tuesday, Wednesday and Thursday, December 17th, 18th and 19th. Various political questions, including the tariff, were vigorously discussed.

The United Farmers Co-Operative Company, which is the business organization connected with the United Farmers' Association, has done large business this year. The sales for the present year totalled over $1,750,000. The following figures, being the sales of the institution since its organization, illustrate its rapid growth:—

1915	$ 226,000
1916	410,385
1917	918,197
1918	1,765,378

UNITED GRAIN GROWERS HOLD ANNUAL MEETING

The annual meeting of the United Grain Growers was held at Calgary on December 17th, continuing for three days.

The financial statement presented shows that a balance of $41,760.96 has been carried to the balance sheet, subject to Dominion taxes. Expenses of operating elevators during the year were $2,371,779, while $131,892.34 was paid for rent of the Manitoba governmental elevators. Depreciation is charged at $136,020.61. The last three items total $2,585,691.95, and deducting them from grain and merchandise accounts, twine, machinery, etc., which are put at $3,047,395.66, leaves a balance carried down of $461,730.95 profit for the year.

Hon. T. A. Crerar, minister of agriculture, who attended the meeting, stated at the session on December 17th, that personally he was in favor of the Western Provinces handling their own natural resources, but the demands made by the Eastern Provinces had so complicated matters that he could not say what would be the outcome.

In reply to a question whether the government was taking over some of the Indian lands for soldiers' purposes, Mr. Crerar said that while the Indians had certain treaty rights which could not be violated, there were some cases where there were not sufficient Indians to use all the land, and in such cases, if satisfactory arrangements could be made with the Indians, the land would doubtless be taken over.

FRENCH LOAN IN CANADA

M. Henri Pousot, French consul-general for Canada, estimates that Canadian subscriptions to the French loan of Liberation will amount to about $2,000,000. It was explained that the chief reasons for the offering were sentimental, the French government being anxious to secure an expression of Canadian interest in the republic's war financing. The Bank of Montreal, it is announced, applied for one million francs of the loan, considering a subscription an excellent way of promoting closer trade relations between the two countries.

DOES NON-OCCUPATION INCREASE RISK?

In the Supreme Court on December 17th, argument proceeded on the appeal of Ross v. Scottish Union Insurance Company. The appellants owned a block of houses all under one roof, which were separately insured by respondent. Four or five of them were unoccupied, and all were destroyed by fire. The company refused to pay, and on the trial of an action on the several policies the jury found that the non-occupation did not increase the risk, and a verdict was given for the plaintiff for the face value of each policy. The Appellate Division reversed this and gave judgment for the insurance on the occupied buildings only, with a reference to ascertain how many were vacant at the time of the fire. Judgment was reserved.

DRYDOCK AT VANCOUVER TO COST MILLIONS

It is expected that application will shortly be made by a strong company to Hon. F. B. Carvell, minister of public works, under the provisions of the Drydock Subsidy Act for leave to construct a large drydock at Vancouver at a cost of several million dollars. Port conditions at Vancouver have recently been investigated by Mr. A. D. Swan, the harbor expert, who has had placed before him a report of the harbor development committee, recommending the construction of a modern drydock in order to increase the facilities and reduce the cost of handling cargoes. It is said to be likely that the drydock will be built by a combination of Vancouver companies, including the Lyall Shipbuilding Company and the Pacific Construction Company. The policy of the government is to authorize the guarantee of bonds called for by the act, provided it is satisfied as to the bona fides of the scheme and its promoters.

UNION BANK EXPANDS EXECUTIVE

The Union Bank of Canada, with head office at Winnipeg, announces the appointment of three new assistant general managers—namely, F. W. S. Crispo with headquarters at Winnipeg, F. W. Ashe with headquarters in London, England, and George Wilson with headquarters in Toronto. The appointment of these three assistant general managers, who will take up their new work on January 1st, will materially strengthen the executive, and also enable the bank to keep in closer and more direct touch with the large financial and industrial centres.

The annual statement of the bank, which is shortly to make its appearance, will show an increase in assets of $13,000,000 over the figures of 1917, the total assets now being $153,000,000. The Union Bank has made steady and consistent progress during the war period; with its over 300 offices located in the Dominion, it is enabled to keep in close touch with a very large part of the country's commercial business.

Female employees in millinery, dressmaking, tailoring and knitting factories of Winnipeg have been awarded a minimum of $12 a week, for experienced adult employees.

GUELPH WINTER FAIR

The annual winter fair was held in Guelph, Ontario, from December 10th to December 12th. The attendance was rather less than usual owing, no doubt, to the influenza epidemic. The exhibits, however, were quite up to the usual standard.

Speaking at the directors' luncheon on the 11th instant, Mr. H. S. Arkell, Dominion Live Stock Commissioner, said that as Canada has mortgaged its future all the heavy financial obligations which have been assumed, much will depend upon what agriculture does during the next few years to maintain our place as a first-rate commercial and industrial nation.

LITTLE CHANGE EXPECTED IN REGINA ASSESSMENT

There is likely to be very little change in the total net assessment of the city of Regina for the year 1919 as compared with the current year. The principal work of the assessor this year is confined to equalization, and there will be no general change in the property valuation.

During the municipal campaign a statement was made that the total assessment would probably be reduced by a couple of million dollars, but members of the city assessment board say that this is not correct and that the only change in the total would be the result of minor changes on individual properties, and the net result would not be anything like the amount mentioned.

An investigation into the books of the Winnipeg Electric Railway will be held by the Public Utilities Commission for the purpose of determining whether the recent temporary fare increase was justified. The committee will consist of one member appointed by the company and one by the Utility Commission. The third member will be selected jointly.

COMMISSION SETS SALMON PRICES

The Vancouver office of the Canneries Association have received notice from the War Purchasing Commission setting the price of fish.

The total payment made by the British Ministry of Food has not yet been computed, but it is stated to be more than $9,000,000, of which the cannerymen have received more than half as first payment, while the balance will be forthcoming at once.

The settlement of the prices on the 1918 salmon pack and the payment therefor will relieve the financial stress being felt for the past two months by the British Columbia canners on account of the holding up of salmon export with no money forthcoming.

BRITISH COLUMBIA SHIPPING MUCH NEWSPRINT

One hundred and two thousand measurement tons of newsprint paper have been handled by vessels of the fleet of the Pacific Steamship Company from the plant of the Pacific Mills Company, Limited, of Ocean Falls, B.C., since January 1, according to tonnage figures compiled by employees of the traffic department of the company. The shipments have been carried by 25 different vessels, including chartered craft, and nearly all the cargoes have been handled via Seattle. The greater part of the cargoes were billed through to San Francisco and Los Angeles, many of them being transhipped in Seattle for the South.

The total of 102,000 measurement tons of paper, which will practically represent the total tonnage for the year 1918 handled by vessels from the plant of the Pacific Mills Company, Limited, was divided into 105 separate cargoes.

SWIFT CURRENT WANTS EXPERIMENTAL FARM

In view of the number of returned soldiers liable to be settled on land in the southwestern portion of the province and the necessity for the greater portion of these men to have agricultural training, the Swift Current city council lately drafted a petition to the Dominion government asking that an experimental farm be established on the portion of the school land that was withdrawn from sale when the school lands were auctioned at Swift Current this summer.

This land is peculiarly adapted for the purpose of an experimental farm and the establishment of one near Swift Current has been advised by practically the whole of the southwestern portion of the province.

Mr. Argue, the member for Swift Current, will also be asked to take this matter up with the government at the coming session in Ottawa.

FARMERS' BANK PROPERTY

Tenders were received until the 18th inst., for the property of the defunct Farmers' Bank of Canada. This property is as follows:—

1. Contributory and other judgments having a face value of approximately $375,000, exclusive of interest.
2. Liabilities to the bank unsecured by judgment.
3. The liquidator's interest in various stocks, bonds, insurance policies, settlements and other assets of the liquidation.
4. The Lorne Park property.

Four tenders were received. The liquidator, Mr. G. T. Clarkson, stated that none of these tenders were satisfactory, and that his next step would be to try to effect a sale by negotiations.

The Wentworth county council has come in for considerable criticism for recommending a grant of $5,000 to the Salvation Army, in view of the fact that it leaves the incoming council with a heavy overdraft to meet.

Restrictions on the export of silver spruce and Douglas fir have been removed. Owing to their necessity for aeroplane construction, exportation had been forbidden, except for the Imperial Munitions Board. As the Munitions Board has received instructions to cease the production of aeroplane spruce, the restrictions are no longer considered necessary. The spruce is secured from British Columbia.

A controlling interest in the Strand Theatre, Limited, Toronto, has been secured by a local syndicate. It is understood the new arrangement goes into effect at once. Chiefly represented in the new company are J. P. Bickell, president, Regent Theatre; N. L. Nathanson, managing director, Regent Theatre; and H. Brouse, of Ottawa, formerly vice-president of the Strand Theatre, Limited.

COBALT ORE SHIPMENTS

The following is a statement of the shipments of ore, in pounds, from Cobalt Station, for the week ended December 13th, 1918:—

McKinley-Darragh, 84,558; O'Brien Mine, 88,000; Buffalo Mine, 242,000; total, 414,558.

The total shipments since January 1st now amount to 31,727,504 pounds, or 15,863.7 tons.

Mr. Harry Drope and Mr. A. J. Hosie, well-known Regina insurance men, have formed a partnership to be known as Drope and Hosie, and have opened an insurance office in the Darke Block, Regina, Sask.

GET BACK TO PEACE CONDITIONS

Steps were recently taken by the council of the Montreal Board of Trade asking the acting prime minister to take immediate steps toward the abrogation, as far as possible, of all war measures restricting imports and exports, as well as all other restrictions on trade which war conditions had made necessary. This was brought up on a letter from Mr. Henry Miles asking that the council approach the government to this end, and similar representations had been received from the branch associations of the board and a number of individual members. These representations were approved, and the council was unanimous in deciding to ask the government that trade conditions be returned to a peace basis as soon as possible. A letter to this effect will be sent to Sir Thomas White, acting prime minister.

BANK OF COMMERCE EXPANDS

The total are the figures in the Bank of Commerce statement for the year ended November 30th, 1918, compared with the figures for the previous year:—

	1918.	1917.
Balance brought forward	$1,332,074.52	$ 802,319.09
Amount recovered from over-appropriations	1,000,000.00	....
Net profits	2,850,318.16	2,637,555.43
	$5,182,392.68	$3,439,874.52
Appropriated as follows:—		
Dividends	1,500,000.00	1,500,000.00
Bonuses (two)	300,000.00	300,000.00
War tax on bank circulation	150,000.00	150,000.00
Transferred to pension fund	85,000.00	85,000.00
Reserved for war memorial	100,000.00	....
Transferred to rest	1,500,000	....
Subscriptions, patriotic and otherwise	102,550.00	72,800.00
Balance carried forward	1,444,842.68	1,332,074.52
	$5,182,392.68	$3,439,874.52

The net profits were, it will be observed, considerably larger than for the previous year. The amount carried forward from the 1917 accounts was also large and $1,000,000 was recovered from over-appropriation. This made a total available for distribution of $5,182,392. Dividends required $1,500,000 and a similar sum was transferred to the reserve account. After various other items were met the balance carried forward amounted to $1,444,842, an increase of $112,000 over the previous year.

The assets of the Bank of Commerce now total over $440,000,000. Of this total, coin, Dominion notes and deposits in the Central Gold Reserve total almost $62,000,000, or about 14 per cent. Current loans and discounts in Canada amount to almost $2,000,000, or somewhat less than 50 per cent. of the total assets. The holdings of public securities are large and railway and other securities to the amount of over $6,000,000 are held by the bank. The detailed statement will be found elsewhere in this issue of *The Monetary Times.*

CANADA STEAMSHIPS TO ENTER ATLANTIC TRADE

Mr. J. W. Norcross, vice-president and managing director of the Canada Steamship Lines, Limited, reached Montreal on December 23rd, where he has been in conference with the London advisory board regarding the plans of the company during the period of reconstruction.

Mr. Norcross was able to announce that the Canada Steamship lines is expecting to complete arrangements for its own connections on the Atlantic. Regarding the outlook for the large number of boats which the company still had on the high seas, Mr. Norcross stated that a very large number of them had been chartered for a period of six months after the signing of peace, and on this account good earnings from them should continue for at least the greater part of the coming fiscal year. In fact, a good many people in London did not think peace would be signed before the month of June, and six months after this would mean December, which would be the close of the company's fiscal year.

The Bank of Hamilton has opened two branches. One at Carmangay, Alta., in charge of Mr. H. C. Jones, and one at Plum Coulee, Man., in charge of Mr. E. A. Warnock. The bank has also closed the sub-branch recently opened at Bluevale, Ont. It was found that the business there could be conducted equally well from Wingham. The latter branch will extend a partial service to Whitechurch, Ont., on three days of the week.

OTTAWA AND THE DOMINION GOVERNMENT

Present Agreement Expires Soon, and New Arrangement Must be Reached

The agreement which in a large measure governs the relationship between the city of Ottawa and the Dominion government expires on June 30, 1919. Mayor Fisher, of Ottawa, at a recent dinner, under the auspices of the Ottawa Board of Trade, endeavored to secure immediate attention of all parties concerned to the question of improving the relationship.

Under the present agreement, which has been in force for about 20 years, he contended the government was not paying its way in the city. The best way for it to do this, he thought, was by submitting to taxation, the same as other institutions and employers of labor. He presented figures in argument that if it paid in that way, its payment for this year would amount to $886,000, whereas it contributed $100,000 through the Improvement Commission for park purposes, and pays direct to the city $15,000.

The acting premier expressed the opinion that if the matter could be left in the hands of Sir Wilfrid Laurier and himself it would be satisfactorily adjusted, as both were deeply interested in Ottawa. The mayor's statement would be studied before the question was gone into. It had been his idea that the $100,000 expended by the Improvement Commission was a contribution for the beautification of the capital.

Sir Wilfrid Laurier expressed very deep interest in the subject. It was not a political one, and he promised that the Opposition in Parliament would ratify everything that Sir Thomas White might bring down in the House looking to a satisfactory disposition of the matter. Sir Wilfrid thought the present contribution of the government was not enough, but that the $800,000 spoken of by the mayor was a little too high.

That the Dominion government's position toward the city of Ottawa in regard to municipal taxes should be no different from that of any other property holder, is the opinion of Hon. F. B. Carvell, minister of public works. While the British North America Act provides for an exemption, Mr. Carvell believes the provision is wrong and unbusinesslike. The civil servants should also pay income taxes, Mr. Carvell believes.

According to advices received at the head office of the Canadian Northern Railway in Toronto on December 9th, the Canadian Northern ship "Canora" has arrived at Victoria, B.C., completing the long journey from the yards of the builders at Levis by way of the Panama Canal. She will be the object of celebration on the part of the people of Victoria, and will then proceed to Vancouver, going into car ferry service between the British Columbia mainland and Vancouver Island.

HELPING PULP AND PAPER TRADE

The Hon. C. C. Ballantyne, minister of marine and fisheries, has notified the Canadian Pulp and Paper Association of his department's willingness to do everything possible to facilitate the shipping of Canadian pulp and paper products to foreign countries, and has asked for definite information as to the tonnage required, the destination of the proposed shipments, etc.

The action of the minister is the result of a memorial addressed to the government setting forth that the lack of shipping space available to Canadian shippers is proving a serious handicap to the shipment of many orders already secured in the various markets of the world and asking the government to give immediate consideration to providing adequate shipping accommodation.

The council has also asked the government to take into consideration the question of abolishing the present business profits tax, on the ground that its proceeds are no longer needed to carry on the war, while they are needed for the expansion of industry and the increased and constant employment of labor.

VANCOUVER'S TAX ARREARS TOTAL $1,500,000

Civic tax collections covering the rebate period of the current year were approximately 5 per cent. better than last year, according to a statement prepared by Ald. Kirk, Vancouver's civic finance chairman. While this shows an increase over the collections of the previous year, Ald. Kirk maintains it does not wipe out very much of the city's tax arrears nor remove the necessity for considering some action that will provide for realizing on these arrears of taxes and enable the city to meet its financial obligations. Despite the improved collections, the city will still end the year with approximately one and a half millions of tax arrears.

The city's total tax levy for this year was $4,672,775.76, and if all this had been paid in, less the rebate allowed for prompt payment, the city's account against the property owners would be square for the year. The city, however, had only received up to December 1—when the last rebate period closed—a total of $2,825,629.61. This sum, allowing for the total rebates of $274,109.26, makes the total collections for the year up to December 1 of $3,099,738.57. The aggregate arrears on current year's taxes at December 1 was, therefore, $1,573,036.89, but it is expected, judging by the rate of payment for the first 10 days of this month, that about $70,000 will be received in taxes this month, leaving approximately $1,500,000 in arrears at the end of the year.

Tax records of last year show that approximately 61 per cent. of the 1917 taxes were paid by last New Year's, while up to December 1 of this year the amount of taxes paid was approximately 66 per cent. leaving a difference in favor of this year of about 5 per cent.

Testifying before the commission enquiring into the purchase of potatoes for a patriotic gift by the late provincial government, Hon. J. A. Murray, minister of agriculture at the time of the transaction, said he knew it was proposed to cover the potato deficit by making up the amount out of "party funds." He did not think it necessary to make the matter public at the time.

The Dominion Steel and Coal Company, of Sydney, N.S., has made a formal offer to Fuel Controller Magrath to lease or purchase the Florence Mine of the Nova Scotia Steel and Coal Company, New Glasgow, N.S. Under the offer it is understood the value of the property would be fixed by arbitrators, to be appointed by the government. It is also announced that the Dominion Coal Company will develop and operate its extensive submarine areas in the Florence district.

A NARRATIVE

"It seemed but over-night when we reached the great Hinterland back of Lake Superior, with its innumerable rivers clothed to the edge with a tangle of forest, interspersed here and there by rocky ridges—the bright green of the underbrush and the shadowy white of the birch breaking indiscriminately the dark evergreen of the predominating pines.

"Nearing the head of the Lakes the country becomes more broken and Nipigon Forest Reserve with its world-famed trout streams is soon traversed. At Port Arthur we saw the largest grain elevator on the Continent, and were informed that the immense shipbuilding industries here, and its rapidly increasing trade as the distributing point for the great undeveloped territories lying to the north and west, is rapidly developing a great, metropolitan city. Leaving Port Arthur, the route lies through the picturesque Rainy Lakes district and Quebec National Park, reaching Winnipeg by a fertile and gradually rolling prairie.

"West of Winnipeg the prairie continued with its teeming activities, and innumerable clusters of grain elevators standing silent sentinel will long be remembered as we rolled along over the flat country. A choice of routes is available west of Winnipeg, taking one either through Brandon, Regina and Saskatoon, the southern route; through the Central Districts; or by Northern Manitoba and Saskatchewan to Calgary and Edmonton. We chose the second because of its through train service. At Calgary and at Edmonton our short stay was well spent in studying the great commercial and agricultural opportunities of this Last Great West with its infinite possibilities as the outpost of a mighty nation. Here, work, enterprise and prosperity go hand in hand.

"From Edmonton west the prairie is soon replaced by the haze-clothed mountains in the distance, and following the banks of the Athabaska River the Canadian Northern passes through Jasper National Park, a second Yellowstone, to Yellowhead Pass—the Great Divide. Yellowhead, as tradition has it, is named after a mighty Iroquois-Scotch trapper known as Tete Jaune, or Yellowhead, who hid or cached his furs at this spot and stood a tower of strength and a goodly beacon to the luckless wayfarer in the tempestuous days of old.

"The scenery at this point is grand—a rocky gorge covered with dark pines and light green shrub above surmount the seething currents of the Fraser, while towering on either side and lost in the clouds are the snow-capped peaks of the giant Mount Robson, the highest known in Canada. Such is the surrounding chosen by a grateful country in its selection of a fitting tribute to the memory of the famous British nurse martyred by Germans in Belgium, October, 1915—'Mount Edith Cavell.'

"Journeying south from the Yellowhead we followed the Canoe and Albreda rivers, which are in turn succeeded by the North and Main Thompson rivers, reaching at Lytton the lower waters of the main Fraser. From here west we crossed and re-crossed, hugging its mighty and picturesque banks through to Vancouver.

"Nowhere in this mountainous and river-valley route of over 700 miles from the gateway to the Rockies clear through to the Pacific did it grow monotonous or time hang heavily, so insistent were the attractions which flashed past the windows of the comfortable Observation Car."

BUSINESS MEN TO DISCUSS TRADE CONDITIONS

Business men to the number of seven or eight hundred will meet at a dinner at the Fort Garry on December 30, to discuss trade conditions and the future prosperity of the prairie provinces.

An address will be given by J. Bruce Walker, who spent a considerable period in Europe during the war in connection with the undertaking to restore soldiers to civil life.

Other prominent Winnipeg people who have been invited to be present and to speak briefly include Sir James Aikins, Premier Norris, Mayor Davidson, Mayor-elect Gray, W. H. Carter, of the board of trade, Secretary Moore, of the same organization, and some others. The affair will be under the direction of the Canadian Credit Men's Trust Association.

DEBENTURE STOCK ISSUE CEASES

There will be no further issues of Dominion debenture stock under the order-in-council of June 5th, 1918, nor of war-savings certificates under the order-in-council of June 17th, 1917. These were withdrawn by a recent order which explains the action as follows:—

"The Committee of the Privy Council have had before them a report, dated December 4, 1918, from the Minister of Finance, stating that under the provisions of the Order in Council of June 5, 1918, authority was given for the issue of $50,000,000 of Debenture Stock at the rate of five and one-half per cent. per annum, maturing June 1, 1919, 1920, 1921.

"In view of the over-subscription of the recent Victory Loan and the inauguration of the campaign of thrift with the issue and sale of Thrift and War Savings Stamps under the National War Savings Committee, the Minister recommends that the issue and sale of the Debenture Stock under the Order in Council above referred to, be discontinued.

"The Committee concur in the foregoing recommendation, and submit the same for approval.

"The Committee of the Privy Council have had before them a report dated December 2, 1918, from the Minister of Finance, stating that under the provisions of the Order in Council of January 17, 1917 (P.C. 104), authority was given for the issue and sale through the medium of the post offices and chartered banks of War Savings Certificates of small denominations; such certificates were repayable three years from the date of sale at rates which represented the discount at a fair rate of interest for the three years before maturity.

"In view of the over-subscription of the recent Victory Loan and the inauguration of the campaign of thrift with the issue and sale of Thrift and War Savings Stamps under the National War Savings Committee, the Minister recommends that the issue and sale of War Savings Certificates under the Order in Council above referred to be discontinued."

The Imperial Bank of Canada opened a branch at Kirkland Lake, Ontario, on December 19th.

NEW YEAR DIVIDEND AND INTEREST PAYMENTS

Substantial amounts will be paid out on January 1st, to shareholders and bond holders of Canada corporations. An estimate of the total, prepared by *The Monetary Times*, is as follows:—

Interest on bonds	$ 5,900,000
Dividends on Stocks	
Banks	576,250
Trust companies	540,300
Life insurance companies	78,000
Industrial corporations	10,732,500
Total dividends	$11,927,050
Total payments	$17,827,050

ASK AMENDMENTS TO MUNICIPAL ACT

Municipal matters formed the theme of a lengthy conference between the executive of the Union of Saskatchewan Municipalities and the provincial government on December 14th. Among other matters it was decided to have the executive, which numbers some well-known chartered accountants, draft a uniform financial statement for the use of cities, which will be submitted to the officials of the department for approval. Endeavor will be made to have the work completed in time for use in connection with the annual statement of 1918.

Among requests made which the government thought might be met were the following:—

An increase in the hospital grant from $1.50 to $2; permitting the use of sinking fund surpluses for current purposes by towns; permitting the city clerk to appoint election officers, permitting cities to make a contract for the collection of garbage; allowing the council power to declare a half-holiday; amending public revenues act so that the tax will apply to land only.

A request that city, town and village elections be conducted on the system of proportional representation was not met with a definite decision, nor was another request that a specified day in each week during the summer months be set aside as a half-holiday. A resolution that the village act be amended to permit of increasing the mill rate from 12 to 15 mills was promised consideration.

A circular issued by Mr. W. P. Hinton, vice-president and general manager of the Grand Trunk Pacific Railway, has announced that the title of Mr. R. C. W. Lott will hereafter be Industrial and Colonization Agent. This change marks the establishment by the Grand Trunk Pacific of an industrial department, which has been found necessary owing to the rapid development of natural resources and industries in the territory served by the railway. Mr. Lott's headquarters will be at Winnipeg. He has had charge of the tourist and colonization traffic of the Grand Trunk Pacific for some years past.

FIRE INSURANCE AGENTS TO MEET IN REGINA

The executive of the Saskatchewan Fire Insurance Agents' Association was in session on December 18th, making preparations for the annual meeting which is to be held in Regina February 13-14, 1919. As there are over 3,000 agents in the province who hold certificates, the convention in Regina is expected to be a big one as every agent will be invited to attend.

Those present at the executive meeting were: W. L. Wallace, Regina, chairman; Messrs. Irwin and Ogilvie, of Moose Jaw; Messrs. Coulthard, Trotter and Bush, of Saskatoon; A. Webber, of Swift Current; Mr. Percival, Humboldt; and N. Andre and S. Wheeler, of Regina.

The main topics of discussion, besides the preparation for the annual convention in Regina next February, will be fire waste and fire prevention. The association, through its executive, will direct certain literature containing valuable information on fire prevention.

Net expenditure of the Canadian War Trade Board from its inception to November 30, 1918, totals $98,153. It is estimated that another $30,000 will be required to meet outstanding accounts and expenses to the end of the year.

"THE DAWN OF A TO-MORROW"

The war having ended so happily it is believed that a better world will rise out of the ruin—More of beneficence, equality, fraternity and sympathy with "The Other Fellow" will prevail in the great "To-morrow" that is dawning. Life insurance embodies these great conceptions and will be one of the big movements that "Will Come Into Its Own." Now is the time to make Life Insurance your life work. The war has given the institution of Life Insurance a great impulse and it is appreciated to-day as never before. It is a calling for men of the highest abilities and the finest character. Sell Life Insurance, and sell Mutual Life Insurance for the Mutual system is popular because it is based upon strictly democratic principles. If not as an agent then as a member you will be welcomed into our organization.

AN OLD TIMER ON THE WEST

Pioneer Work in the Canadian West is Much Different from that in Ontario

BY W. COUSINS, MEDICINE HAT, ALTA.

The young man who is living in this country, or is coming here to live, will be the best off who will consult some old timer who has not got a grouch or the dyspepsia and ask him what is happening in this country and what will happen. Then he wants to split what the old timer tells him up into small pieces and run it through a sieve. He can let the little pieces go and hang on to those that look the best. If he will just believe what he is told, or a part of what he is told, before he gets to be sixty years of age he will have enough of this world's goods to satisfy anyone. The old timer will probably tell him that if that part of the continent of North American north of the 49th parallel were tumbled over on to the southern part it would cover it up entirely, as well as the Gulf of Mexico and part of South America. While the northern country will not grow the very best brand of bananas, it will grow something that you can always get money for and will not rot before you get a chance to sell it.

As an old timer myself I can say this: that I came from Ontario, and just before I left there the people were very much excited over the fact that they thought Sir John A. Macdonald had gone crazy because he proposed to loan the Canadian Pacific Railway $9,000,000. The old fellows down in that Cent Belt said the Canadian Pacific Railway could never pay it back and all the people of Canada would be in debt for the rest of their lives to make up this huge sum of money. Well, what happened? The Canadian Pacific Railway paid back their money long ago, and to-day in the province of Alberta we have over 25,000 automobiles, which cost an average of $1,000 apiece, and the wild land tax in Saskatchewan and Alberta would more than pay the interest on the money loaned the Canadian Pacific Railway. The war debt, without any trouble to the people of Canada, can be paid off by the great resources of this country if they will keep it for a white man's country and make everyone who lives in it talk "white."

As an example of what there is in the country that is not usually reckoned on, I will tell you what I heard a man say who was helping me sell Victory Bonds at Bow Island, Alberta. He said he had farmed in Ontario, and knew how to farm all right from the standpoint of doing the work, and he got along fairly well at it. He had a bunch of boys, and he sent them to school, and afterwards to the agriculture college. They learned how to farm with their heads as well as with their hands, and they knew why some soil grew better crops than others. When they were finished their education they came out to him at Bow Island, where he thought he had 320 acres of land. He is not sure now how much land he has, because those boys of his found out that the soil from the bottom of a forty-foot well is just as good to grow grain as surface soil. So now, when he exhausts his 320 acres as surface soil, he will just go down another foot, and instead of having 320 acres, he has forty times that much if he can only find some way to turn it up.

This year has been a dry year in southern Alberta, and there are a good many farmers who did not get a crop, but they are not all like that. I was out shooting the other day, and was on a man's place who had thrashed 10,000 bushels of grain, for which he would realize in the neighborhood of $20,000. I counted twenty-six stacks of hay on his place that would contain at least twenty tons in a stack. Besides all this, he has as nice a bunch of cattle and as fine a flock of pigs as you will find on any farm in old Ontario.

When I first came to this country one of the principal industries of the halfbreeds was to gather buffalo bones and ship them somewhere down into the States. They were used for refining sugar at that time. The halfbreeds, in order to find the bones with ease, used to set fire to the prairie so that they could see the buffalo shank in the blackened soil a mile away. The few ranchers in the country, who were at that time stealing grass from the government, used to curse the breeds for burning up the grass. When the buffalo bone industry played out and a few fellows came into the country to farm, they drew down upon themselves the curses of the ranchers, just the same as the halfbreeds. They were destroying some of the ranchers' grass with their ploughs.

The Old and the New Industry.

I once heard an old man down in Ontario say that when he was a boy his parents moved on to a bush farm down there where they had to cut the trees down to find enough soil to grow some wheat. When they had grown it they put it in a sack, gave it to him to put on his back and carry to a miller, who had a mill several miles away. When he arrived there the miller had just come out of the mill and was standing in the door, wiping the sweat off his face, as it was a hot day. The miller said to him, "What can I do for you, my little man?" and he said, "I want you to grind this wheat for me so that I can take home the flour." "Oh," said the miller, "there are a lot of fellows in ahead of you, so I can't grind your wheat for four or five days." He turned and went into the mill. The boy knew it was no use to go home, so he sat down to wait, and in the course of a few hours the miller came out again for a breath of fresh air, and, finding him sitting there, he said, "Hello! You here yet? Didn't I tell you it was no use for you to stay here?" The boy said, "And it is no use going home either without the flour, so I'll just have to wait." Then the miller said, "Well, you are a plucky one, anyway, and worth keeping for a while longer." He went into the mill and brought out a bag with a fine, large quantity of flour in it and gave this to the boy, saying, "I guess this will last you as long as you live. You don't look very strong." I am telling you this to show you what is being done and what can be done. How much easier it is for a man to farm to-day than it was when they settled in Ontario!

One thing that the people in this country want to learn is how to farm right, and there are a lot of them who do not know yet, but they are learning. Another thing they need to understand is the meaning of economy. They want to take better care of the implements they use in farming, and when they have a good crop, instead of going to California for the winter and buying expensive automobiles, they had better buy a Ford and keep enough money to buy seed for the year following, and if there is any surplus after that they can use it up on the picture shows and the purchase of some pigs and cows. When they get this thoroughly into their heads, that old war debt will not mean any more to the Canadian people than the war debt of the United States does to the people down there.

MARITIME COMMERCIAL TRAVELLERS' ASSOCIATION

The Maritime Commercial Travellers' Association held its 37th annual meeting in the Board of Trade Rooms, Halifax, N.S., on December 12th. The following officers were elected: President, Charles W. Smith; vice-president for Nova Scotia, F. A. Graham; vice-president for New Brunswick, R. S. Sime; directors for Nova Scotia, F. C. Carton, W. W. Lane, R. G. Morton, F. W. Budd, A. M Fraser, J. C. Jones; directors for New Brunswick, M. H. Dunlop, J. C. Earle, G. G. Watters, C. E. Patterson, E. J. Fleetwood, T. J. Gunn; past-president, W. H. Smith.

The Cost of Living Branch of the Labor Department, after an investigation into the price being charged by manufacturers of soda biscuits, has come to the conclusion that 15 cents a pound in bulk lots is a reasonable charge for this commodity.

The T. Eaton Company, of Toronto, will, on February 1, commence in Moncton, the construction of a reinforced concrete building, 240 feet wide and 260 feet long. It will be six stories in height. It is expected to be completed by the middle of the summer. The building will be used as a distributing warehouse for the Maritime Provinces, and will employ between five and six hundred persons.

The Monarch Life Assurance Company, Winnipeg, report that their "Flu" claims average age 30, height 5 ft. 8 ins., and weight 161 lbs., 40 per cent. rural and 60 per cent. city. Less than 9 per cent. over-weight cases. Their issued business for the first eleven months of this year exceed $4,500,000, being an increase of 18 per cent. over the corresponding period of 1917. Cash collections exceed any previous record of the company.

That Boy of Yours

What's to become of the lad in case you should die suddenly? Will he, at fourteen or earlier, be forced out into the world to earn a living?

Or will you make sure that he gets a proper start in life? You can do it, whether you live or die, by means of an Imperial Endowment policy.

Write for our free booklet which tells all about it.

THE CONTINENTAL LIFE INSURANCE CO.
TORONTO, ONTARIO

IMPERIAL OIL INDUSTRIAL PLAN

Speaking before a banquet of officers and employees of the Imperial Oil Company in Sarnia, Ontario, on the 19th instant, the Hon. W. J. Hanna, president, announced a new plan of industrial relationships. The company proposes on the first day of January, to give everyone who has served for twelve months, insurance to an amount depending on his years of service and his earnings. The minimum will be $500 and the maximum $2,000. On February 1st, old age pensions are to be established to commence at the age of 65 years. On the first of March it is proposed to establish a sick benefit plan.

Addresses were also delivered by C. O. Stillman, G. W. Mayer, G. H. Smith and others.

The work for the various Liberty Loans of the United States being done by the large corporations is well illustrated in the case of the Aetna Life, which reports that it is now looking after more than 124,000 individual accounts of bonds purchased on the partial-payment plan, this entailing the establishment of a special department with separate offices and a force of 32 clerks, maintained by the company as a special contribution toward winning the war.

CIVIC SOLDIERS' INSURANCE

The city of Hamilton, Ontario, is considering maintaining the insurance upon its soldiers after they return to civic life. It is thought that a considerable proportion of the returned men will not be acceptable as risks by insurance companies, and that, therefore, obligation rests upon the city to maintain the policies. The policies taken out in Hamilton are convertible into cash at the age of 48 years. The premium, therefore, is relatively high, being $41.84 for a man who enlisted at the age of 28 years. Owing to this high premium it was thought that not very many of the soldiers would care to retain the insurance.

In Toronto the policies are 57 years endowment while in Hamilton they are 20 years endowment. The premium in Toronto, therefore, for a man who enlisted at 28 years of age is $17.99. On the other hand it cannot be converted into cash until the age of 85 years.

A campaign to raise $1,000,000 for the work of the Salvation Army, which includes demobilization, reconstruction work and social service, will be undertaken, commencing the week of January 19. Montreal's quota in this drive will be $150,000.

NEW INCORPORATIONS

Large Pulp and Paper Company Incorporated—Also Gold Mining Company

The following is a list of companies incorporated during the week ended December 14th, with the capital and the names of directors:—

A. Smith, S. S. Snider. Kowkash Gold Mines, Limited, $2,000,000; A. W. Roebuch, H T. Young, M. Egan.

Dominion Linens Co., Ltd., of Guelph, Ont., has declared a dividend on its preferred stock to December 31st, 1918, payable January 15th, 1919.

The Excelsior Life Insurance Company closed its books for the current year on the 15th instant with applications for six and three-quarter million dollars of insurance, an increase over 1917 of over half n million dollars.

The town of Macleod, Alta., has arranged that its coupons, due January 1st, 1919, will be payable at par at the Canadian Bank of Commerce in Toronto or New York, instead of at the Union Bank of Canada and the National Park Bank, respectively, in these cities.

The National City Company of New York is opening a branch in Montreal, under the management of Mr. N. L. C. Mather. Mr. Mather was originally with the Dominion Securities Corporation in Toronto. In 1911 he formed a partnership with H W Murray, known as Murray, Mather and Company.

BANK OF TORONTO PROFITS GROW

The net profits for the year ended November 30th, 1918, of the Bank of Toronto, amounted to $844,402, which is over $40,000 more than for the previous year. The usual dividend of 11 per cent. per annum was paid and a substantial amount of $110,884 was written off bank premises. The balance carried forward this year is $625,623. The principal figures in the profit and loss account, as compared with last year, are as follows:—

	1918.	1917.
Balance brought forward	$ 555,306.53	$ 507,989.87
Net profits	844,402.16	802,920.49
	$1,399,708.69	$1,310,910.36
Appropriated as follows:—		
Dividends	550,000.00	550,000.00
War tax on circulation	50,000.00	49,403.83
Transferred to Officers' Pension Fund	36,200.00	25,000.00
Patriotic Fund	....	29,200.00
Toronto General Hospital	2,000.00	2,000.00
Written off bank premises	110,884.75	100,000.00
Carried forward	625,623.94	555,306.53
	$1,399,708.69	$1,310,910.36

The total assets of the bank have crossed the hundred million mark being now $100,207,997. Gold and silver coin, Dominion notes and the deposits in the Central Gold Reserve total $13,922,182. Almost $12,000,000 are invested in Dominion and provincial government securites and over $10,000,000 in Canadian and municipal securities and British, foreign and other colonial public securities.

The total of current loans and discounts was $48,951,428. The bank's deposits are almost $80,000,000 and circulaton totals $7,270,615.

DUNDAS CLOSES YEAR WITH SURPLUS

In closing the town books for the year, Town Clerk Fry issued a statement to the mayor and councillors which said in part:—

"In presenting to you the financial statement of the town, including receipts and expenditures, assets and liabilities, to the 15th inst., as required by statute, it occurred to me that it might be in accordance with the wishes of the mayor and council, if I were to make a few explanatory remarks in connection therewith. You will note that after providing for the fixed expenditures up to the end of the year, there will be a surplus of over $2,000. The matter of uncollectable taxes will likely reduce this by a few hundred dollars, but, in any event, the fact that there will remain a surplus of several hundred dollars must be a source of gratification to you, because you were called upon to pay a county rate of $3,160.99 in excess of the amount estimated when you struck your rate last February."

CALGARY SECURES LOAN OF HALF MILLION

Calgary has secured the sum of $500,000 at 6 per cent. from Molsons Bank for the liquidation of the balance of a loan raised in the United States. The arrears for 1918 are pledged as security for the loan. The finance committee of the city council of Calgary has also been authorized to purchase $100,000 worth of 20-year debentures from the sinking fund to meet half-yearly debentures maturing the current month.

A further conference has been held in Ottawa between representatives of the Dominion and Provincial governments regarding the collection of vital statistics. A model bill has been prepared which is to be submitted to the provincial legislatures.
